INVESTMENT STRATEGY

Since 2005, ODDO BHF Polaris Moderate has offered a global and broadly diversified, moderate multi-asset investment solution. It is characterized by an equity allocation between 0% and 40% and a bond segment that invests mainly in investment grade bonds. The portfolio invests in securities listed or traded on regulated markets, mainly in Europe, the US or Emerging Markets. It can also invest up to 10% in gold by certificates or similar.

The investment objective is to avoid major setbacks due to price fluctuations and to generate an additional return to a bond investment, while taking into account environmental, social issues and corporate governance (ESG) criteria.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved.

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

ASSET ALLOCATION

MONTHLY MANAGEMENT COMMENT

Against a backdrop of rising prices and increasing shortages of oil products such as diesel, yields on safe-haven government bonds remain high, reflecting ongoing inflation concerns. As expected, the US Federal Reserve has raised key interest rates. In the US, both 10-year and 30-year government bonds are now yielding more than 5 per cent. The equity markets remained largely unfazed by the scepticism of the bond markets and were supported by robust corporate results and positive economic data. Against the backdrop of rising interest rates, we further reduced the fund's equity allocation. Positions in BYD, LVMH, Saint-Gobain and Rheinmetall were fully sold. We also sold our stake in Micron Technology. By purchasing shares in Banco Santander and UBS, we further expanded the banking sector within the portfolio. In addition, we acquired a pharmaceutical company, UCB, which offers attractive growth prospects thanks to several newly launched medicines. In the fixed-income portfolio, which has a duration of around 4.3 years, we took advantage of the buoyant primary market to acquire attractive investment-grade and high-yield bonds. At the same time, considering increased market volatility, we reduced our exposure to high-yield bonds and our holding of French bank bonds right at the start of the month. Later in the month, following the significant rise in yields, we purchased, amongst other things, a subordinated bond from Stellantis and reduced our underweight position in government bonds. Towards the end of the month, we partially hedged the credit risk in the face of increased interest rate volatility.

SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity). The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

ESG integration at ODDO BHF Asset Management | 3 systematic steps

Exclusions

- **Norm-based:** exclusion of companies that do not comply with certain international standards.(chemical weapons , anti-personnel mines, violation of the principles of the Global Compact, etc.)
- **Sector-based:** total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, weapon, adult entertainment / pornography and coal...)

ESG ratings

- Usage of MSCI data based on a « Best-in-Class » approach

Dialogue and engagement

- Regular dialogue with companies on ESG issues
- Individual and joint engagement
- Inclusion of ESG research within ODDO BHF Asset Management's voting policy
- Escalation procedure if engagement is not conclusive

If ODDO BHF Asset Management GmbH receives any rebates on the management fee of target funds or other assets, ODDO BHF Asset Management GmbH undertakes to fully remit such payment to the investor or the fund. If ODDO BHF Asset Management GmbH performs services for an investment product of a third party, ODDO BHF Asset Management GmbH will be compensated by the relevant company. Typical services are investment management or sales activities for funds established by a different investment management company. Normally, such compensation is calculated as a percentage of the management fee (up to 100%) of the respective fund, calculated on the basis of such fund's assets managed or distributed by ODDO BHF Asset Management GmbH. This may result in the risk that the investment advice given may not be consistent with the investor's interest. The amount of the management fee is published in the prospectus of the respective fund. Further details are available upon request.
