Benchmark	14.3% 14.0% 15.4%

INVESTMENT STRATEGY

The management strategy implemented is a discretionary investment strategy based on a stock-picking approach and a rigorous methodology for selecting European growth stocks. It favors companies whose earnings growth exceeds the average market growth, and ensures that these high-growth stocks are not purchased at excessive prices ("Growth at Reasonable Price").

*The glossary of indicators used is available for download on www.am.oddo-bhf.com in the Information section. | Sources : ODDO BHF AM SAS, Bloomberg, Morningstar® Sustainability provides company-level analysis used in the calculation of Morningstar's Sustainability Score.

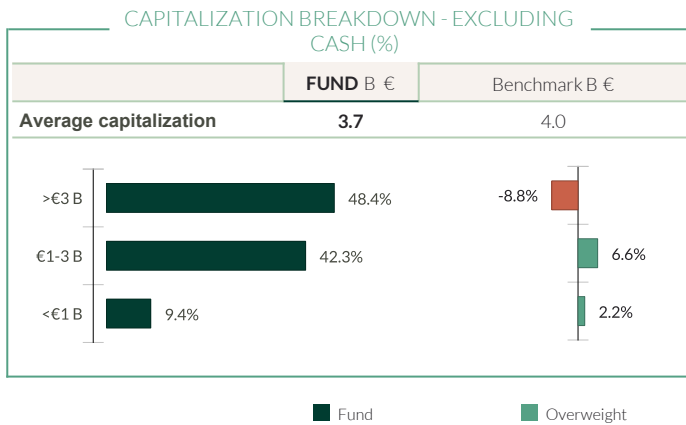

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved.

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity).

The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

ESG integration at ODDO BHF Asset Management | 3 systematic steps

Exclusions

- Norm-based:** exclusion of companies that do not comply with certain international standards.(chemical weapons , anti-personnel mines, violation of the principles of the Global Compact, etc.)
- Sector-based:** total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, weapon, adult entertainment / pornographie and Coal...)

ESG ratings

- Usage of MSCI data based on a “Best-in-Class” approach
- All titles considered for investments have at least a BB rating

Dialogue and engagement

- Regular dialogue with companies on ESG issues
- Individual and joint engagement
- Inclusion of ESG research within ODDO BHF Asset Management’s voting policy
- Escalation procedure if engagement is not conclusive

Carbon metrics methodology: We updated our methodology of carbon intensity calculation. Starting January 31st, 2023, when reported carbon values are unavailable or inconsistent, estimated carbon values are used. The estimations are based on average carbon value (scope 1+2 emissions) of sectoral peers as a function of revenues

MONTHLY MANAGEMENT COMMENT

Of the securities that account for more than 1% of the portfolio, the best performances came from SUSS MicroTec (technology, Germany), Nordic Semiconductor (technology, Norway) and Cenergy (industrials, Belgium). Conversely, the worst performers were Addnode (technology, Sweden), Fincantieri (industrials, Italy) and Borregaard (materials, Norway).

Our focus this month is on the Spanish group Atalaya Mining, a copper producer based in Spain, which is notable for its operation of the Riotinto complex, one of the largest open-pit copper production sites in Europe. The group has gradually transformed this asset into a platform for growth, combining operational optimisation, cost discipline and the development of a portfolio of add-on projects (Masa Valverde, Proyecto Touro). Against a backdrop of growing structural demand for critical metals linked to electrification and low-carbon technologies, Atalaya is benefiting from its strategic positioning within the European commodities market.

2025 marked a major turning point with significantly improved results. Production reached 51 kt of copper, at the top end of the forecast range, thanks to a record level of ore processing and improved operating efficiency. Revenue soared to EUR 4.839bn, while EBITDA almost tripled to EUR 180m, boosted by higher copper prices and a significant fall in unit costs (cash cost to USD 2.40/lb). This performance resulted in free cash flow of EUR 107m and a net cash position of EUR 122m, providing increased capacity to finance projects and return money to shareholders.

The Group went into 2026 with good visibility, targeting production of between 50 kt and 54 kt, and with an investment programme focused on expanding the Riotinto district and developing satellite projects. A stronger balance sheet (high net cash and recent fundraising) puts Atalaya in a position to accelerate its growth strategy, particularly in a copper market driven by energy and technology infrastructure needs. Nevertheless, the profile remains exposed to the traditional hazards of the mining sector (commodity price volatility, operational and regulatory risks), even if the quality of the assets and the discipline of the capital base provide medium-term support.

RISKS:

The fund is exposed to the following risks: risk of capital loss, equity risk, interest rate risk, credit risk, risk associated with discretionary management, risk associated with commitments on forward financial instruments, counterparty risk, liquidity risk of underlying assets, risk associated with holding small and medium capitalisations, risks associated with securities financing transactions and collateral management, Sustainability risk and on an ancillary basis currency risk, emerging markets risk

SFDR CLASSIFICATION²

The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.

DISCLAIMER

This document has been drawn up by ODDO BHF AM SAS. Potential investors should consult an investment advisor before subscribing to the fund. The investor is informed that the fund presents a risk of capital loss, but also many risks linked to the financial instruments/strategies in the portfolio. In case of subscription, investors must read the Key Information Document (KID) and the fund's prospectus in order to acquaint themselves with the detailed nature of any risks incurred and all costs. The value of the investment may vary both upwards and downwards and may not be returned in full. The investment must be made in accordance with investors' investment objectives, their investment horizon and their capacity to deal with the risk arising from the transaction. ODDO BHF AM SAS cannot be held responsible for any direct or indirect damages resulting from the use of this document or the information contained in it. This information is provided for indicative purposes and may be modified at any moment without prior notice.
