<b>Subscription fees</b>	2% (maximum)
<b>Redemption fees</b>	Nil
<b>Management fees and other administrative or operating costs</b>	0.897%

## INVESTMENT STRATEGY

ODDO BHF Green Planet is a global equity fund that uses artificial intelligence to invest in listed equities with exposure to the theme of ecological transition, through a selection of associated sub-themes such as clean energy, energy efficiency, sustainable mobility and the preservation of natural resources. A big-data algorithm is first used to construct an universe of eligible investments composed of companies whose business model contributes significantly to the sub-themes identified above. A quantitative model is then applied to this limited investment universe to identify between 30 and 60 companies with the most attractive financial and risk characteristics. The management team may adjust the weightings at its own discretion and the portfolio is monitored on an ongoing basis. The fund seeks to be permanently invested in equities with the aim of generating long-term capital growth while integrating a non-financial analysis.

\*The glossary of indicators used is available for download on [www.am.oddo-bhf.com](http://www.am.oddo-bhf.com) in the Information section. | Sources: ODDO BHF AM SAS, Bloomberg, Morningstar® Sustainability provides company-level analysis used in the calculation of Morningstar's Sustainability Score.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved.

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

## MONTHLY MANAGEMENT COMMENT

In May 2026, the portfolio's underperformance was primarily driven by sector allocation decisions, notably the significant overweight in Industrials, which lagged, and the underweight in the strong-performing Information Technology sector. While individual stock selection within technology—particularly names such as Nextracker, Datadog, and AMD—generated strong positive contributions supported by robust earnings and AI-related growth drivers, these gains were insufficient to offset the broader allocation headwinds. The overweight in Materials provided modest positive selection effects, but overall portfolio positioning and sector rotation dynamics weighed on performance during a period marked by strong leadership from the technology sector.

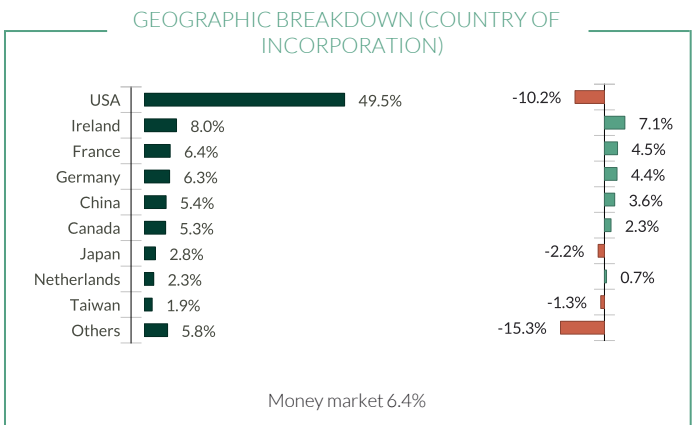

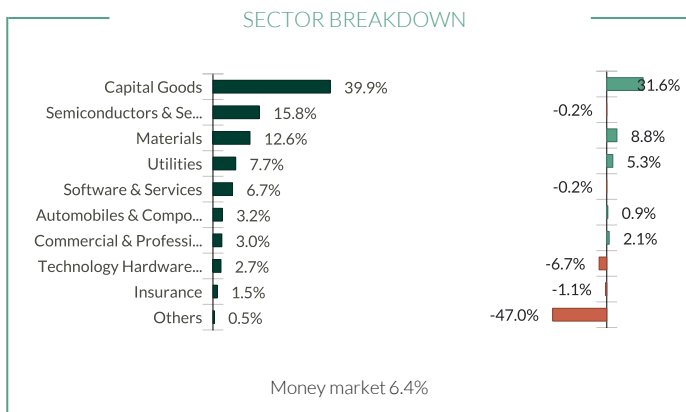

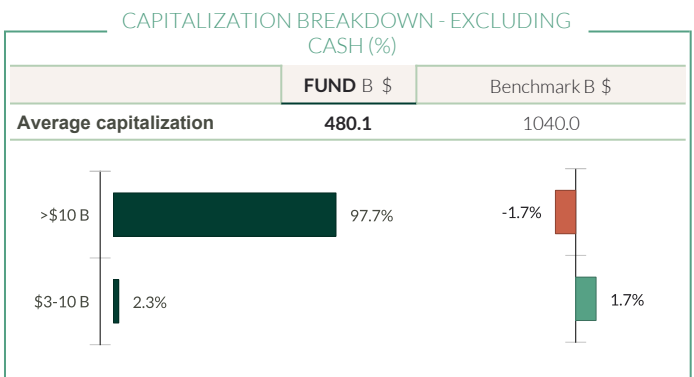

### Key contributors:

- Nextpower (+31.3%), a U.S.-based company, delivered exceptional performance driven by strong fourth-quarter earnings and revenue that exceeded expectations. The company also announced a major \$365 million acquisition of battery firm Prevalon Energy, marking its expansion into energy storage and AI data center power supply.
- Datadog (+87.1%), a U.S.-based software company, rallied sharply following outstanding Q1 2026 results after a difficult start to the year.

### Key detractors:

- JinkoSolar (-11.9%), a Chinese solar company, faced headwinds despite broader industry recovery trends. Although the company benefited from Beijing's push for self-sufficiency in critical technologies—with Q1 revenue more than doubling and net income surging—the stock declined over the period.
- Trimble (-16.2%), a U.S.-based technology company, despite beating Q1 2026 earnings expectations and raising FY2026 guidance, underperformed due to negative market sentiment, as its outlook was perceived as conservative.

Risk measurement	3 Years	5 Years
Sharpe ratio	0.54	0.32

■ Fund      ■ Overweight      ■ Underweight against benchmark

The ESG approach consists in selecting companies with the best environmental, social and governance policies by favouring the best-rated issuers within an investment universe in terms of non-financial criteria (Best in Universe) and/or issuers showing an improvement in their ESG practices over time (Best Effort).

Past performance is not an indication of future results. Performance may vary over time.

## PORTFOLIO'S SUSTAINABLE IMPACT ANALYSIS VS. BENCHMARK

Revenues generated by a \$1mm investment in the portfolio compared to the same investment in the benchmark:

The figures above reflect the estimated annual revenue generated by companies from products and services providing sustainable impact solutions in relation with the 4 subthemes. A portfolio or index's estimated annual revenue derived from sustainable impact products and services is the sum of each company's sustainable impact solutions revenue represented by the investor's ownership stake.

## SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity).

The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

### ESG integration at ODDO BHF Asset Management | 3 systematic steps

**Exclusions**

- Norm-based:** exclusion of companies that do not comply with certain international standards.(chemical weapons , anti-personnel mines, violation of the principles of the Global Compact, etc.)
- Sector-based:** total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, weapon, adult entertainment / pornographie and Coal...)

**ESG ratings**

- Usage of MSCI data based on a "Best-in-Class" approach
- All titles considered for investments have at least a BB rating

**Dialogue and engagement**

- Regular dialogue with issuer in the investment universe
- Individual or collaborative commitment

### ESG rating methodology

Glossary	
<b>Carbon Footprint</b>	Portfolio carbon emissions per million dollars invested
<b>Carbon intensity</b>	Portfolio carbon emissions per million dollars of turnover
<b>Weighted Average Carbon Intensity</b>	Carbon emissions per million dollars of turnover weighted by the weight of each portfolio company Carbon metrics methodology: We updated our methodology of carbon intensity calculation. Starting January 31st, 2023, when reported carbon values are unavailable or inconsistent, estimated carbon values are used. The estimations are based on average carbon value (scope 1+2 emissions) of sectoral peers as a function of revenues
<b>Fossil fuel reserves</b>	% of portfolio exposed to companies that own fossil fuel reserves
<b>Green share</b>	% of portfolio exposed to companies that offer clean technologies solutions
<b>SFDR Classification</b>	The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.
