INVESTMENT STRATEGY

Utilizing a proprietary quantitative approach ODDO BHF US Large Cap invests in US equities. The quantitative model rates equities based on a smart momentum strategy analysing extensive historical data with the aim to detect stable trends in the market. The portfolio construction process involves a strong focus on diversification and risk management by applying various optimization constraints.

*The glossary of indicators used is available for download on www.am.oddo-bhf.com in the Information section. | Sources : ODDO BHF AM SAS, Bloomberg, Morningstar® Sustainalytics provides company-level analysis used in the calculation of Morningstar's Sustainability Score.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved..

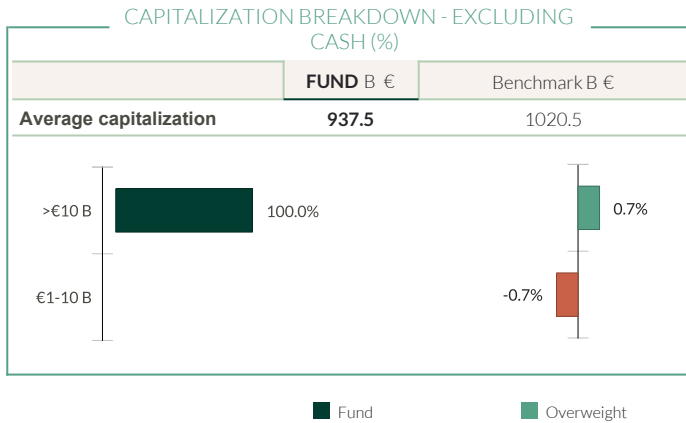

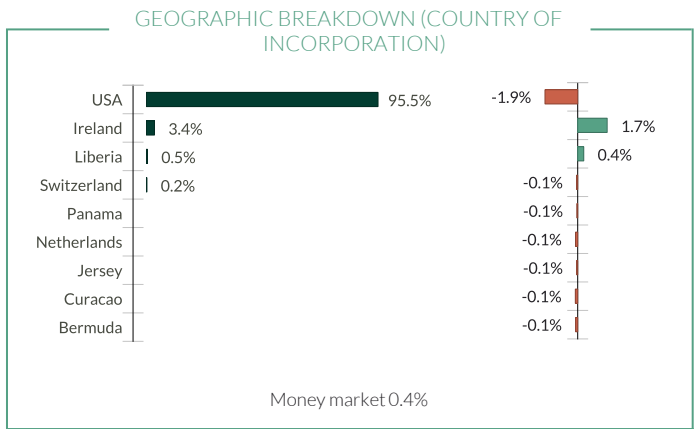

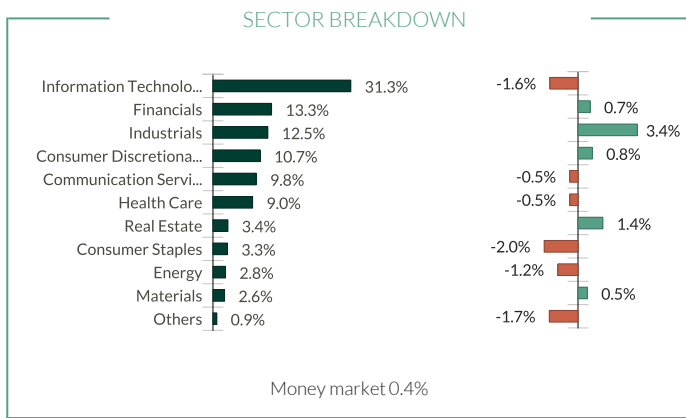

(**) The ongoing charges are based on the charges for the previous period. Estimates are drawn up for all funds that have not yet closed their first accounting period

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity). The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

ESG integration at ODDO BHF Asset Management | 3 systematic steps

Exclusions

- Norm-based:** exclusion of companies that do not comply with certain international standards.(chemical weapons , anti-personnel mines, violation of the principles of the Global Compact, etc.)
- Sector-based:** total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, weapon, adult entertainment / pornographie and Coal...)

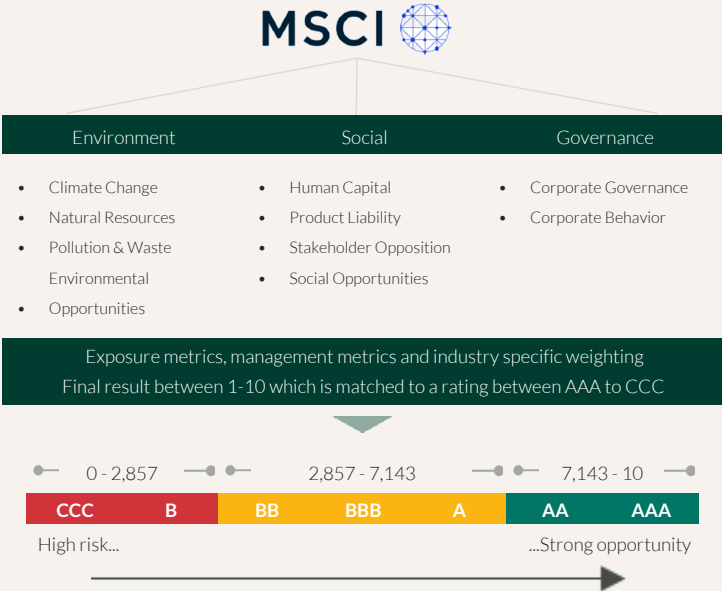

ESG ratings

- Usage of MSCI data based on a “Best-in-Class” approach
- All titles considered for investments have at least a BB rating

Dialogue and engagement

- Regular dialogue with companies on ESG issues
- Individual and joint engagement
- Inclusion of ESG research within ODDO BHF Asset Management’s voting policy
- Escalation procedure if engagement is not conclusive

ESG rating methodology

The diagram shows the MSCI ESG rating methodology. It is based on three pillars: Environment, Social, and Governance. Each pillar has specific indicators: Environment (Climate Change, Natural Resources, Pollution & Waste, Environmental Opportunities), Social (Human Capital, Product Liability, Stakeholder Opposition, Social Opportunities), and Governance (Corporate Governance, Corporate Behavior). These indicators are combined using exposure metrics, management metrics, and industry specific weighting to produce a final result between 1-10, which is then mapped to a rating from CCC to AAA. A scale at the bottom shows the mapping: 0-2,857 (CCC), 2,857-7,143 (B, BB, BBB, A), and 7,143-10 (AA, AAA). The scale is labeled 'High risk...' on the left and '...Strong opportunity' on the right.

Sources: ODDO BHF AM SAS, MSCI.

Carbon metrics methodology: We updated our methodology of carbon intensity calculation. Starting January 31st, 2023, when reported carbon values are unavailable or inconsistent, estimated carbon values are used. The estimations are based on average carbon value (scope 1+2 emissions) of sectoral peers as a function of revenues

MONTHLY MANAGEMENT COMMENT

The US equity market experienced a sharp decline in March 2026, driven by geopolitical turmoil stemming from a war with Iran. The S&P 500 fell 5.1% during the month, marking its largest one-month percentage decline since March 2025 and its worst month since September 2022. For the full first quarter, the S&P 500 dropped 4.6%, snapping a three-quarter winning streak.

The conflict sent oil prices soaring above \$90 per barrel for the first time since 2023, with crude gaining more than 30% during the first week of March. The VIX Index climbed near 30, reflecting heightened market anxiety. However, the month ended on a positive note, with the S&P 500 surging 2.9% on March 31st—its best single-day performance since May—following reports that President Trump signaled willingness to end military hostilities with Iran.

The Energy sector surged on the back of soaring oil prices. Consumer Staples posted the weakest performance with a decline of 9.3%, followed by Industrials down 9.2% and Health Care down 8.2%. Technology and communications stocks also faced significant pressure. From a factor perspective, Dividend and Value outperformed the market, while Quality underperformed. Factor return dispersion and volatility continued to be high.

The ODDO BHF US Large Cap Fund underperformed its benchmark in March. The portfolio's underperformance was primarily driven by unfavorable asset allocation decisions, particularly overweight positions in Capital Goods and Technology Hardware & Equipment sectors during a period of market stress. While individual security selection provided some bright spots with strong performers like Ciena benefiting from AI infrastructure demand and Palantir gaining from defense AI contracts, these gains were insufficient to offset broader sector headwinds and significant detractors in industrial and technology hardware names. The portfolio's positioning reflected exposure to companies undergoing significant operational changes and market transitions, with mixed results during this volatile period.

RISKS:

The fund is exposed to the following risks: risk of capital loss, equity risk, interest rate risk, credit risk, risk associated with discretionary management, currency risk, risk associated with commitments on forward financial instruments, counterparty risk, risks associated with the concentration of the portfolio in a sector/geographical region, Sustainability risk

SFDR CLASSIFICATION²

The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.

DISCLAIMER

This document has been drawn up by ODDO BHF AM SAS. Potential investors should consult an investment advisor before subscribing to the fund. The investor is informed that the fund presents a risk of capital loss, but also many risks linked to the financial instruments/strategies in the portfolio. In case of subscription, investors must read the Key Information Document (KID) and the fund's prospectus in order to acquaint themselves with the detailed nature of any risks incurred and all costs. The value of the investment may vary both upwards and downwards and may not be returned in full. The investment must be made in accordance with investors' investment objectives, their investment horizon and their capacity to deal with the risk arising from the transaction. ODDO BHF AM SAS cannot be held responsible for any direct or indirect damages resulting from the use of this document or the information contained in it. This information is provided for indicative purposes and may be modified at any moment without prior notice. Any opinions presented in this document result from our market forecasts on the publication date. They are subject to change according to market conditions and ODDO BHF AM SAS shall not in any case be held contractually liable for them. The net asset values presented in this document are provided for indicative purposes only. Only the net asset value marked on the transaction statement and the securities account statement is authoritative. Subscriptions and redemptions of mutual funds are processed at an unknown asset value.
