

- **Market risks:** How financial products perform in terms of price or market value depends in particular on the performance of the capital markets, which is influenced in turn both by the general global economic climate and by the overall local economic and political conditions. On a stock exchange in particular, general price performance can also be influenced by irrational factors such as sentiment, opinions and rumours.
- **Currency risks:** The fund also invests outside the eurozone. The value of the currencies in which these investments are made may fall against the euro.
- **Concentration risk:** The fund acquires securities relating to specific regions or themes. Their performance may suffer, e.g. as a result of political or economic events.

A detailed description of all risks can be found in the fund's Prospectus under "Risk Information". This product does not include any protection from future market performance so you could lose some or all of your investment.

## PERFORMANCE SCENARIOS

The amount you ultimately receive with this product will depend on future market performance. Future market performance is uncertain and cannot be predicted with any certainty. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 5 years

Example investment: EUR 10,000

Scenarios		If you exit after 1 year	If you exit after 5 years
<b>Minimum</b>	<b>There is no minimum guaranteed return. You could lose some or all of your investment.</b>		
<b>Stress</b>	<b>What you might get back after costs</b>	EUR 3,000	EUR 3,700
	Average return each year	-70.0%	-18.0%
<b>Unfavourable</b>	<b>What you might get back after costs</b>	EUR 7,850	EUR 9,310
	Average return each year	-21.5%	-1.4%
<b>Moderate</b>	<b>What you might get back after costs</b>	EUR 10,130	EUR 13,690
	Average return each year	1.3%	6.5%
<b>Favourable</b>	<b>What you might get back after costs</b>	EUR 13,320	EUR 15,580
	Average return each year	33.2%	9.3%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor, or the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market conditions.

The unfavourable scenario occurred for an investment between March 2015 and March 2020. The moderate scenario occurred for an investment between March 2017 and March 2022. The favourable scenario occurred for an investment between October 2016 and October 2021.

## WHAT HAPPENS IF COMPANY IS UNABLE TO PAY OUT?

The default of the Company will have no direct impact on your payment, as in the event of insolvency, legal provisions stipulate that the fund will not form part of the insolvency estate but will remain independent.

## WHAT ARE THE COSTS?

The person selling you or advising you on this product may charge you additional costs. If so, this person will inform you of these costs and show you the impact that these costs will have on your investment.

### COST OVER TIME

The tables illustrate the amounts that will be deducted from your investment to cover various types of costs. These amounts depend on how much you invest, how long you hold the product for, and how well the product performs. The amounts presented here illustrate the example of a specific investment amount and differing potential investment periods. We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10,000 invested.

Scenarios		If you exit after 1 year	If you exit after 5 years
Total costs		EUR 724	EUR 2,188
Annual cost impact*		7.4%	3.6%

\*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the end of the recommended holding period your average return per year is projected to be 10.1% before costs and 6.5% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
