	Annualized volatility		
	1 year	3 years	5 years
FUND	13.8%	11.6%	12.5%
Benchmark	13.7%	11.4%	12.3%

INVESTMENT STRATEGY

Invested primarily in European equities likely to offer a high yield, the ODDO BHF European High Dividend fund seeks to optimise its annual performance (risk/return ratio) over a minimum investment horizon of five years. Fund managers favour a fundamental analysis of companies. The Fund's focus on companies offering high yields leads to a dominance of "value stocks" in the portfolio.

*The glossary of indicators used is available for download on www.am.oddo-bhf.com in the Information section. | Sources : ODDO BHF AM SAS, Bloomberg, Morningstar® Sustainability provides company-level analysis used in the calculation of Morningstar's Sustainability Score.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved.

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity).

The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

ESG integration at ODDO BHF Asset Management | 3 systematic steps

Exclusions

- Norm-based:** exclusion of companies that do not comply with certain international standards.(chemical weapons , anti-personnel mines, violation of the principles of the Global Compact, etc.)
- Sector-based:** total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, weapon, adult entertainment / pornographie and Coal...)

ESG ratings

- Usage of MSCI data based on a “Best-in-Class” approach
- All titles considered for investments have at least a BB rating

Dialogue and engagement

- Regular dialogue with companies on ESG issues
- Individual and joint engagement
- Inclusion of ESG research within ODDO BHF Asset Management’s voting policy
- Escalation procedure if engagement is not conclusive

ESG rating methodology

The diagram shows the MSCI ESG rating methodology. It is divided into three pillars: Environment, Social, and Governance. Each pillar has a list of indicators: Environment (Climate Change, Natural Resources, Pollution & Waste, Environmental Opportunities), Social (Human Capital, Product Liability, Stakeholder Opposition, Social Opportunities), and Governance (Corporate Governance, Corporate Behavior). These indicators feed into a box for 'Exposure metrics, management metrics and industry specific weighting' which leads to a 'Final result between 1-10 which is matched to a rating between AAA to CCC'. Below this is a scale from 0 to 10 with corresponding ratings: CCC (0-2,857), B (2,857-7,143), BB (7,143-10), BBB, A, AA, and AAA. The scale is labeled 'High risk...' on the left and '...Strong opportunity' on the right.

Sources: ODDO BHF AM SAS, MSCI.

Carbon metrics methodology: We updated our methodology of carbon intensity calculation.

Starting January 31st, 2023, when reported carbon values are unavailable or inconsistent, estimated carbon values are used.

The estimations are based on average carbon value (scope 1+2 emissions) of sectoral peers as a function of revenues

MONTHLY MANAGEMENT COMMENT

European equity markets fell sharply in March (STOXX 600: -8%) due to the Iran war, which followed the attack launched by Donald Trump on 28 February. The conflict led to a blockade of the Strait of Hormuz, through which nearly 20% of the world's oil passes, and caused oil prices to surge beyond USD 100 a barrel.

This raises inflation risks and, consequently, fears about growth. It makes central banks and investors feel more uncertain, and increases risk aversion. Central bankers are therefore being monitored closely; at this stage it remains difficult to confidently predict the future path of interest rates. The Federal Reserve and ECB both opted to maintain the status quo. This means the ECB's deposit rate remains at 2%, but its forecasts now reflect the inflationary risk linked to the conflict in the Middle East.

Just one of the STOXX 600's 20 sectors ended the period in the black: Oil & Gas (+14.5%). The next most resilient sectors were Chemicals (-2.7%) and Utilities (-3.3%). Conversely, the sharpest falls came from Real Estate (-14.5%), Consumer Goods & Services (-14.1%) and Food Distribution & Personal Care (-14.1%).

During the month, we opened a position in Air Liquide (industrials, France), a global leader in the production and distribution of industrial gases. The company has a resilient business model, leveraging margins through long-term contracts and solid growth, while benefiting from favourable structural trends (health care, semiconductors, aerospace). We also opened a position in Shell (Oil & Gas, UK), one of the world's largest integrated petroleum companies. By sales volumes, it has the largest LNG portfolio of any of the majors. As well as being one of the main beneficiaries of rising fuel prices amid the tensions in the Persian Gulf, the Group seems to offer attractive shareholder returns, the total of which is expected to be around 8.35% over 2026 (dividends and share buybacks).

Another buy during the month was Danone (consumer goods, France), one of the world's leading food companies, with a balanced portfolio of dairy and plant-based products, specialist nutrition and water. Growth prospects look sustainable, driven in particular by high-protein yoghurts and medical nutrition in Asia. Together with an attractive dividend of around 3.3% for 2026 (Visible Alpha), well covered by solid cash flow generation (5.9% for 2026 according to Visible Alpha), the upturn in margins linked to efficiency gains and the product mix adds to the share's appeal.

We also introduced ENGIE (utilities, France), a big hitter in gas and electricity, whose regulated profile has been strengthened by the recent acquisition of UK Power Networks. Additionally, a position was taken in ASML (technology, Netherlands), a key player in the semiconductor sector with a virtual monopoly on the lithography machines needed to manufacture chips. Finally, we invested in Siemens Energy (industrials, Germany), a world leader in gas turbines and a major player in wind power and electrical equipment, with an order book offering visibility into the early 2030s and solid cash flow generation.

Meanwhile, we sold our position in Autoliv (consumer goods, Sweden), largely due to the disappointing outlook for 2026.

We strengthened our positions in Schneider Electric (industrials, France) and took profits on DHL (industrials, Germany), TotalEnergies and Saipem (Italy), as well as on the banking sector through Intesa, ABN AMRO and ING.

The top contributors to performance were Diageo (consumer goods, UK), Galp (Oil & Gas, Portugal) and Roche (health care, Switzerland). In contrast, Shell, Schneider Electric and TotalEnergies had a negative impact.

RISKS:

The fund is exposed to the following risks :risk of capital loss, equity risk, interest rate risk, credit risk, risk associated with discretionary management, currency risk, counterparty risk, risk associated with holding small and medium capitalisations, risks associated with securities financing transactions and collateral management, risks linked to the use of overexposure, Sustainability risk and on an ancillary basis risk associated with convertible bonds

SFDR CLASSIFICATION²

The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.

DISCLAIMER

This document has been drawn up by ODDO BHF AM SAS. Potential investors should consult an investment advisor before subscribing to the fund. The investor is informed that the fund presents a risk of capital loss, but also many risks linked to the financial instruments/strategies in the portfolio. In case of subscription, investors must read the Key Information Document (KID) and the fund's prospectus in order to acquaint themselves with the detailed nature of any risks incurred and all costs. The value of the investment may vary both upwards and downwards and may not be returned in full. The investment must be made in accordance with investors' investment objectives, their investment horizon and their capacity to deal with the risk arising from the transaction. ODDO BHF AM SAS cannot be held responsible for any direct or indirect damages resulting from the use of this document or the information contained in it.
