¹ Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found on page 6 of the document. | ² The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. It scales in a range from 1 (lowest risk) to 7 (highest risk). The lowest category does not mean a risk-free investment. This indicator is not constant and is updated if the risk profile of the fund changes over time. Historical data, such as is used to calculate the risk indicator, may not be a reliable indication of the future risk profile of the Fund. There is no guarantee that the management objectives in terms of risk will actually be met. The risk indicator assumes you keep the product until the end of the recommended holding period. The actual risk can vary ! significantly if you cash in at an early stage and you may get back less.
