Nom du produit : ODDO BHF Sustainable Euro Corporate Bond

Identifiant de l'entité juridique (LEI-Code) : 47U0WTOORVIPRTCR8T92

SUMMARY

The fund promotes environmental and/or social characteristics. This is reflected in the construction and weighting of the portfolio based on the ESG rating process, the consideration of external research and data. Details of the investment strategy are set out in the fund's sales prospectus and in particular in the appendix 'Environmental and/or social characteristics', which discloses the pre-contractual information for a financial product as referred to in Article 8 (1), (2) and (2a) of Regulation (EU) 2019/2088 and Article 6 (1) of Regulation (EU) 2020/852. Material adverse impacts on sustainability factors are considered in investment decisions, in particular by adhering to the company's exclusion policy. The fund promotes climate change mitigation and adaptation. Adherence to the ESG-related investment guidelines is controlled by the independent risk controlling unit. The methodology for analysing and assessing environmental or social characteristics of the fund is based on the company's ESG model. Depending on the asset class and strategy, this ESG model is based entirely or only partially on MSCI methodology or data. The company does not use any estimates of taxonomy data. All direct investments purchased for the fund are subject to the fund's minimum exclusions, which ensure a minimum level of environmental or social protection.

NO SUSTAINABLE INVESTMENT OBJECTIVE

This financial product promotes environmental or social characteristics.

The following approach is defined to comply with Article 2 (17) of the SFDR.

Sectors excluded from investment: The Sub-Fund applies the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com. This exclusion policy notably covers coal, tobacco and non-conventional weapons. In addition, the Sub-Fund excludes production of adult entertainment, conventional weapons and nuclear sectors from all investments and it applies the Paris Aligned Benchmark exclusions.

Controversies: The most controversial companies according to our MSCI ESG data provider, and after confirmation by the ESG team for a second check, will not be considered sustainable.

Consideration of major negative impacts: In order not to significantly undermine sustainability objectives, the Investment Manager defines control rules (pre-trade) for selected significantly harmful activities: exposure to controversial weapons (0% tolerance) and serious violations of the UN Global Compact principles and the Organization for Economic Co-operation and Development (OECD) guidelines for multinational enterprises (0% tolerance).

Dialogue, engagement and voting: our dialogue, engagement and voting policies support the objective of avoiding significant harm by identifying the most important risks and have our voice heard to generate change and improvement.

Regulation (EU) 2020/852 defines certain areas of concern that may have a negative impact ("PAI").

The Investment Manager applies pre-trade rules on two PAIs:

- exposure to controversial weapons (PAI 14 and 0% tolerance),

- Serious violations of the UN Global Compact principles and the Organization for Economic Co-operation and Development (OECD) guidelines for multinational enterprises (PAI 10 and 0% tolerance).

In addition, ESG analysis includes, when the data is available, the monitoring of greenhouse gas emissions (PAI 1), exposure to fossil fuels (PAI 4), share of non-renewable energy consumption and production (PAI 5), energy consumption intensity by high climate impact sectors (PAI 6), activities with a negative impact on biodiversity-sensitive areas (PAI 7), the lack of processes and compliance mechanisms to monitor adherence to the UN Global Compact and OECD Guidelines for Multinational Enterprises (PAI 11), the unadjusted gender pay gap (PAI 12), and board parity (PAI 13). The Investment Manager also includes two other PAIs: the deforestation policy (PAI 15) and the lack of a human rights policy (PAI 9).

Further information on the Investment Manager's consideration of PAI is available on am.oddo-bhf.com.

The Company ensures that the Fund's sustainable investments are in line with the exclusion list drawn up according to the criteria of the United Nations Global Compact (UNGC), as further described in the Company's exclusion policy. Proven violations of the OECD Guidelines for Multinational Enterprises and/or the UN Guiding Principles on Business and Human Rights also result in exclusion.

ENVIRONMENTAL OR SOCIAL CHARACTERISTICS OF THE FINANCIAL PRODUCT

The fund promotes climate protection and adaptation to climate change through sustainable investments under the EU taxonomy and sustainable investments under Art. 2 No. 17 SFDR.

INVESTMENT STRATEGY

The Sub-Fund is actively managed and aims to provide long term capital appreciation by managing a portfolio investing at least 2/3 of its total assets in transferable debt securities of public or private corporations in all sectors (including financial institutions) and integrating ESG (Environmental, Social, and Governance) criteria in parallel.

The investment universe of the Sub-Fund is made up of the companies included in the Markit iBoxx Euro Corporate Total Return index. As part of the investment process, the Investment Manager has full discretion over the composition of the Sub-Fund's portfolio and may deviate from the investment universe.

First, the Investment Manager takes ESG (Environment, Social and Governance) criteria into account in two stages:

First stage: sector exclusion

The Sub-Fund applies the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com. This exclusion policy notably covers coal, tobacco, and non-conventional weapons. In addition,

the Sub-Fund excludes the production of adult entertainment, conventional weapons and nuclear sectors from all investments, and it applies the Paris Aligned Benchmark exclusions.

Second stage: ESG ratings and carbon intensity

This involves taking into account the ESG rating of the securities comprising the investment universe. To this end, the management team relies on ESG ratings provided by the external data provider MSCI ESG Research. In the event that an issuer has not been rated by MSCI ESG Research, the Management Company has two options:

Firstly, it may use the ESG rating assigned to the securities of the issuer concerned by the Management company. Secondly, if the management company has not assigned an ESG rating to the securities of the issuer concerned, it may generate a substitute ESG rating, which is defined, among other things, by an average based on MSCI's ESG ratings according to the sector of activity, the size of the company and the country of domicile. The use of this substitute rating ends when MSCI ESG Research generates its own ESG rating for the issuer concerned or when an ESG rating is assigned by the management company.

In addition, the management company may review an ESG rating provided by MSCI. This review is carried out by the ESG team and may result in the replacement of the MSCI ESG rating with a new internal ESG rating.

The management team takes into account the weighting of the securities held in the portfolio when calculating the average ESG score of the Sub-Fund.

The Management Company pledges that at least 90% of the issuers in the portfolio shall have an ESG rating (taking the weighting of each share into account).

Besides the integration of ESG ratings, the Sub-Fund commits to having a better carbon intensity (weighted average of Scope 1 and 2 CO₂ emissions divided by the revenue of each company in which the Sub-fund invests) than that of its Benchmark.

PROPORTION OF INVESTMENTS

The Sub-Fund is actively managed and aims to provide long term capital appreciation by managing a portfolio investing at least 2/3 of its total assets in transferable debt securities of public or private corporations in all sectors (including financial institutions) and integrating an ESG (Environmental, Social and Governance) criteria analysis in parallel.

At least 80% of net assets must be aligned with environmental and/or social characteristics.

The Sub-Fund may hold up to 20% of its net assets in the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The Sub-Fund has a minimum of 50% of sustainable investments. However, the Sub-Fund may hold investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Sub-Fund has a minimum of 0,5% of the net assets - weighted by the proportion of revenue aligned with the taxonomy for each issuer- invested in activities aligned with the taxonomy.

A minimum of 49,5% of the Sub-Fund's net assets are invested in other environmental investments and the Sub-Fund may hold social investments without minimum.

At least 90% of issuers in the portfolio have an ESG rating after taking into account the weighting of each security. Target funds with an ESG rating on fund level are also taken into account.

MONITORING OF ENVIRONMENTAL OR SOCIAL CHARACTERISTICS

The company's risk management team is responsible for the internal control of the fund's investment guidelines. These include the fund's environmental and/or social characteristics. The fund managers regularly monitor the fund's environmental or social characteristics.

METHODOLOGIES

The methodology for analysing and evaluating the environmental or social characteristics of the fund is based on the company's ESG model. Depending on the asset class and strategy, this ESG model is based entirely or only partially on MSCI methodology or data. Further information is available on: <https://am.oddo-bhf.com/>

DATA SOURCES AND PROCESSING

The company uses various data sources in its ESG model to analyse and evaluate environmental or social characteristics. This data comes from external sources such as MSCI, CDP, Carbon 4 Finance (biodiversity data) and Bloomberg, and is supplemented by internal analyses. Taxonomy data is obtained from Refinitiv. The company does not use estimates from taxonomy data.

The data is subject to an internal quality check. The company ensures data quality and consistency by holding regular meetings with its data providers to correct any errors, recommend possible improvements and provide feedback from investor or company meetings. Data processing is carried out by importing data into the company's IT systems.

LIMITATIONS TO METHODOLOGIES AND DATA

All rights to the data and reports provided by data suppliers are held by these data suppliers and/or their content providers. None of these data suppliers or their affiliated companies or their content providers accept any liability for errors, omissions or interruptions in such data/reports in terms of completeness, accuracy or timeliness. Copying or redistribution of such data/reports is not permitted without the express written consent of these data suppliers. The manager is in regular contact with its data suppliers to ensure the quality and reliability of the data used. The Company does not use any estimates of taxonomy data. After internal review, a range of external data sources are thus available to the fund manager, which the Company generally considers to be reliable.

DUE DILIGENCE

The due diligence processes are subject to a fundamental analysis by the fund manager. In addition, internal ESG ratings are used. The ESG investment limits are monitored by the independent control department, Investment Controlling.

All direct investments acquired for the fund are subject to the minimum exclusions applicable to the fund, which ensure a minimum level of environmental or social protection. However, there is no look-through for individual financial instruments (no look-through for investments of a target fund or certificates).

ENGAGEMENT POLICIES

The Company's engagement policy is available on: am.oddo-bhf.com

DESIGNATED REFERENCE BENCHMARK

The benchmark of the Sub-Fund is not intended to be aligned with the environmental and/or social characteristics promoted by the Sub-Fund.

Dated as of 15/05/2026 (updated following a change in the ESG investment strategy)
