WHAT IS THIS PRODUCT?

TYPE

ODDO BHF Avenir is a UCITS under Directive 2009/65/EC, taking the form of a *Fonds Commun de Placement*.

The management company may liquidate the product if the assets fall below the regulatory minimum, or at its discretion in accordance with the legal requirements.

TERM

This Fund was created on 14 September 1992 for a term of 99 years.

OBJECTIVES

The Fund seeks to outperform its benchmark index (90% MSCI SMID France (NR) + (10% €STR + 8.5 basis points) over an investment horizon of more than five years, while taking ESG criteria into account. The Fund is a stock-picking fund and is managed on an active and discretionary basis with reference to its benchmark. At least 75% of the Fund portfolio is permanently invested in Equities which are eligible for the Equity Savings Plan (*Plan d'Épargne en Actions – PEA*) (with at least 70% in French equities).

The Fund's investment universe is made up of the securities that make up the MSCI SMID France NR as well as other securities of companies whose registered office is located in the European Union or the European Economic Area (EEA) and whose capitalisation is between EUR 500 million and EUR 10 billion (the first time they are added to the portfolio). On an ancillary basis, the Fund may also invest in securities of companies located in the same geographical area with a market capitalisation of less than EUR 500 million (when they are first added to the portfolio). The Fund's composition may deviate significantly from that of the benchmark index.

Initially, the management team takes into account extra-financial criteria in a significant way, thanks to a selectivity approach leading to the elimination of at least 20% of this universe. This selectivity approach can be broken down into three stages: 1. Shareholder filter: Companies that do not have a stable and long-term reference shareholder, holding a legal or de facto power over the management, are systematically excluded from the eligible universe. 2. Exclusions: Strict exclusions are implemented by applying, on the one hand, the Management Company's common exclusion framework and, on the other hand, the Fund-specific exclusions. 3. ESG score: This step involves taking into account the ESG rating of most of the companies making up the investment universe. To that end, the management team uses non-financial data and ratings from our internal rating system or from our external non-financial data provider, MSCI ESG Ratings.

Our approach to adopting ESG criteria combines a “best-in-universe” and a “best-effort” approach, thereby promoting the development and improvement of best practices. Close attention is paid to the analysis of human capital (human resources management and employee health and safety, etc.) and corporate governance (preservation of minority shareholder's interests, remuneration policy, etc.).

The Management Company pledges that at least 90% of the issuers in the portfolio (taking the weighting of each share into account) shall have an ESG rating. Additional information on ESG analysis can be found in the “Investment Strategy” section of the prospectus and in the SFDR Annex.

The management team focuses on companies that enjoy a real competitive edge, operating on markets that are already well developed and where they hold strong positions, usually on an international scale, and still offer genuine potential for growth. The companies selected generate above-average profitability, which should enable them to finance their own long-term growth. These characteristics are identified during the analysis conducted by the fund managers, who choose them on a discretionary basis.

The Fund may invest up to 25% of assets in fixed, variable or revisable rate securities (linked to bond market or money market rates) in order to optimise cash management. These debt securities shall be denominated in euro and issued by governments and public corporations rated between AAA and AA (Standard & Poor's or equivalent, or using the Management Company's internal rating). The Management Company does not use the ratings issued by ratings agencies automatically or in isolation, as it also applies its own internal analysis. In the event of a downgrade, the Management Company will take the interests of unitholders, market conditions and its own analysis of these fixed income products into account when respecting rating limits.

The Fund may invest up to 10% of its net assets (i) in units or shares of UCITS under European Directive 2009/65/EC, (ii) in EU AIFs and/or in foreign investment funds mentioned in R.214-25 that meet the criteria of article R.214-13 of the French Monetary and Financial Code. These funds may be managed by ODDO BHF group entities and will be compatible with the Fund's investment strategy.

The use of derivatives is not permitted.

With a view to achieving its investment objective, the Fund may invest up to 10% of its net assets in securities with embedded derivatives (warrants, subscription certificates, convertible bonds) in order to hedge or gain exposure to equity risk.

The portfolio's maximum exposure to the various asset classes (equities, debt securities and funds) is limited to 100% of net assets.

Subscription and redemption requests are centralised by the custodian every Paris stock exchange trading day until 11:15 (Paris time, CET/CEST) and executed on the basis of the net asset value of the same day.

The Management Company may make use of a gate provision to cap redemptions. For more details on this provision, please refer to the “Gate provision for capping redemptions” section of the prospectus, available at <http://am.oddo-bhf.com>.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

RISK INDICATOR

The risk indicator assumes you keep the product until the end of the recommended holding period, i.e. five years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. Currency risk: you will be paid in a different currency; your actual gain will therefore depend on the exchange rate between the two currencies. This risk is not taken into account in the above indicator:

Other materially relevant risks not taken into account in the indicator:

Other risks not taken into account in the risk indicator may be materially relevant. They include:

liquidity risk

counterparty risk

As this product does not offer protection from market hazards, you could lose some or all of your investment.

PERFORMANCE SCENARIOS

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years with a one-year horizon and over the recommended investment period.

Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period: 5 years

Investment: €10,000

Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	€4,170	€3,470
	Average return each year	-58.3%	-19.1%
Unfavourable	What you might get back after costs	€7,410	€8,840
	Average return each year	-25.9%	-2.4%
Medium	What you might get back after costs	€10,110	€12,270
	Average return each year	1.1%	4.2%
Favourable	What you might get back after costs	€13,810	€16,080
	Average return each year	38.1%	10.0%

The unfavourable scenario occurred for an investment between: 12/2021 and 07/2025.

The medium scenario occurred for an investment between: 04/2020 and 04/2025.

The favourable scenario occurred for an investment between: 10/2016 and 10/2021.

WHAT HAPPENS IF ODDO BHF ASSET MANAGEMENT SAS IS UNABLE TO PAY OUT?

The product is a co-ownership of financial instruments and deposits separate from the portfolio's Management Company. In the event of the company's insolvency, the product's assets, which are held by the custodian, would be unaffected. In the event of the custodian's insolvency, the risk of financial loss on the product would be mitigated by the legal segregation of the custodian's assets from the product's assets.

WHAT ARE THE COSTS?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts taken from your investment to cover the different types of cost. These amounts depend on how much you invest, how long you hold the product, and the return on the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year, you would get back the amount that you invested (0% annual return). For the other holding periods, we have assumed the product performs as shown in the moderate scenario.

- €10,000 is invested

Investment: €10,000

Scenarios	If you exit after 1 year	If you exit after 5 years
Total costs	€549	€1,381
Annual cost impact*	5.5%	2.5%

*This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the end of the recommended holding period your average return per year is projected to be 6.7% before costs and 4.2% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

COMPOSITION OF COSTS

The table below indicates the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period, and the meaning of the different cost categories.

One-off costs upon entry or exit		If you exit after: 1 year
Entry costs	We do not charge any entry costs for this product.	Up to €400
Exit costs	We do not charge any exit costs for this product, but the person who sells you the product might.	Up to €0
Ongoing costs [taken each year]		
Management fees and other administrative or operating costs	These represent the unavoidable costs of running the product and any payments, including remuneration, to parties connected to the product and providing services. 0.85% of the value of your investment per year. This is an estimate based on actual costs over the last year.	€82
Transaction costs	0.29% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	€28
Incidental costs taken under specific conditions		
Performance-related fees	Impact of performance-related fees. Up to 20% of the Fund's outperformance relative to the benchmark (90% MSCI SMID France (NR)) + (10% €STR (compounded) + 8.5 basis points), once past underperformance over the previous five years has been offset and provided that the Fund's absolute return is positive.	€39

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Minimum recommended holding period: over 5 years

This recommended holding period is a minimum that takes into account the features of the selected product. It may be longer, depending on your financial position and investment choices.

You can redeem some or all of your investment at any time. Exiting before the end of the recommended holding period may affect the performance that can be expected from your investment. You can find details of any charges and penalties applied when divesting under: "What are the costs?"

Subscription and redemption requests are centralised by the custodian every Paris stock exchange trading day until 11:15 (Paris time, CET/CEST) and executed on the basis of the net asset value of the same day.
