(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved.

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity).

The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

ESG integration at ODDO BHF Asset Management | 3 systematic steps

Exclusions

- Norm-based:** exclusion of companies that do not comply with certain international standards.(chemical weapons , anti-personnel mines, violation of the principles of the Global Compact, etc.)
- Sector-based:** total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, weapon, adult entertainment / pornographie and Coal...)

ESG ratings

- Usage of MSCI data based on a “Best-in-Class” approach
- All titles considered for investments have at least a BB rating

Dialogue and engagement

- Regular dialogue with companies on ESG issues
- Individual and joint engagement
- Inclusion of ESG research within ODDO BHF Asset Management’s voting policy
- Escalation procedure if engagement is not conclusive

Carbon metrics methodology: We updated our methodology of carbon intensity calculation. Starting January 31st, 2023, when reported carbon values are unavailable or inconsistent, estimated carbon values are used. The estimations are based on average carbon value (scope 1+2 emissions) of sectoral peers as a function of revenues

If ODDO BHF Asset Management GmbH receives any rebates on the management fee of target funds or other assets, ODDO BHF Asset Management GmbH undertakes to fully remit such payment to the investor or the fund. If ODDO BHF Asset Management GmbH performs services for an investment product of a third party, ODDO BHF Asset Management GmbH will be compensated by the relevant company. Typical services are investment management or sales activities for funds established by a different investment management company. Normally, such compensation is calculated as a percentage of the management fee (up to 100%) of the respective fund, calculated on the basis of such fund's assets managed or distributed by ODDO BHF Asset Management GmbH. This may result in the risk that the investment advice given may not be consistent with the investor's interest. The amount of the management fee is published in the prospectus of the respective fund. Further details are available upon request.

It is further intended solely for persons based in countries in which the respective funds are registered for distribution or in which such registration is not required. The shares of the fund have not been registered under the United States Securities Act of 1933, as amended (the "1933 Act"); they may therefore not be publicly offered or sold in the United States of America or to US citizens or any US residents.
