Management fees and other administrative or operating costs	0.674 %

INVESTMENT STRATEGY

Utilizing a proprietary quantitative approach ODDO BHF Algo Trend US invests in US equities. The quantitative model rates equities based on a smart momentum strategy analysing extensive historical data with the aim to detect stable trends in the market. The portfolio construction process involves a strong focus on diversification and risk management by applying various optimization constraints.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved.

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

MONTHLY MANAGEMENT COMMENT

The US equity market experienced a sharp decline in March 2026, driven by geopolitical turmoil stemming from a war with Iran. The S&P 500 fell 5.1% during the month, marking its largest one-month percentage decline since March 2025 and its worst month since September 2022. For the full first quarter, the S&P 500 dropped 4.6%, snapping a three-quarter winning streak.

The conflict sent oil prices soaring above \$90 per barrel for the first time since 2023, with crude gaining more than 30% during the first week of March. The VIX Index climbed near 30, reflecting heightened market anxiety. However, the month ended on a positive note, with the S&P 500 surging 2.9% on March 31st—its best single-day performance since May—following reports that President Trump signaled willingness to end military hostilities with Iran.

The Energy sector surged on the back of soaring oil prices. Consumer Staples posted the weakest performance with a decline of 9.3%, followed by Industrials down 9.2% and Health Care down 8.2%. Technology and communications stocks also faced significant pressure. From a factor perspective, Dividend and Value outperformed the market, while Quality underperformed. Factor return dispersion and volatility continued to be high.

The ODDO BHF Algo Trend US Fund underperformed its benchmark in March. The portfolio's underperformance was primarily driven by unfavorable asset allocation decisions, particularly overweight positions in Capital Goods and Technology Hardware & Equipment sectors during a period of market stress. While individual security selection provided some bright spots with strong performers like Ciena benefiting from AI infrastructure demand and Palantir gaining from defense AI contracts, these gains were insufficient to offset broader sector headwinds and significant detractors in industrial and technology hardware names. The portfolio's positioning reflected exposure to companies undergoing significant operational changes and market transitions, with mixed results during this volatile period.

RISKS:

The fund is exposed to the following risks: risk of capital loss, equity risk, interest rate risk, credit risk, risk associated with discretionary management, currency risk, risk associated with commitments on forward financial instruments, counterparty risk, liquidity risk of underlying assets, emerging markets risk, volatility risk, risk associated with currency conversion, Sustainability risk

SFDR CLASSIFICATION²

The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.

DISCLAIMER

This document has been drawn up by ODDO BHF AM SAS. Potential investors should consult an investment advisor before subscribing to the fund. The investor is informed that the fund presents a risk of capital loss, but also many risks linked to the financial instruments/strategies in the portfolio. In case of subscription, investors must read the Key Information Document (KID) and the fund's prospectus in order to acquaint themselves with the detailed nature of any risks incurred and all costs. The value of the investment may vary both upwards and downwards and may not be returned in full. The investment must be made in accordance with investors' investment objectives, their investment horizon and their capacity to deal with the risk arising from the transaction. ODDO BHF AM SAS cannot be held responsible for any direct or indirect damages resulting from the use of this document or the information contained in it.
