WHY INVEST IN *flexible fixed income* ACCORDING TO OUR ANALYSIS?

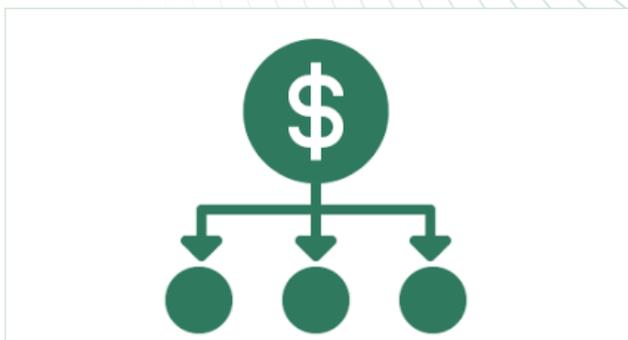

- **Fixed income comprises a variety of sub-segments** (e. g. Government bonds, Investment Grade Corporate Bonds, High Yield Bonds) which potentially have different performance and risk drivers.
- **Traditional fixed income** approaches are often **benchmark-oriented**. This can be a constraint to a particular area of the fixed income universe such as a region, sector or credit quality.
- **Flexible fixed income** strategies may mitigate this constraint by allowing the portfolio manager to **allocate across the whole fixed income spectrum**.

FLEXIBLE FIXED INCOME ENABLES INVESTORS TO ...

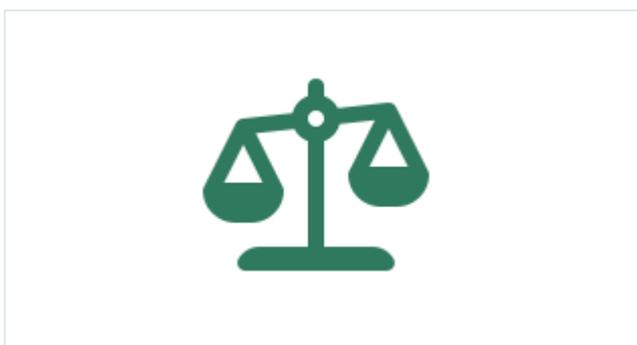

1 Invest in the most promising opportunities independently from the state of the business / credit cycle

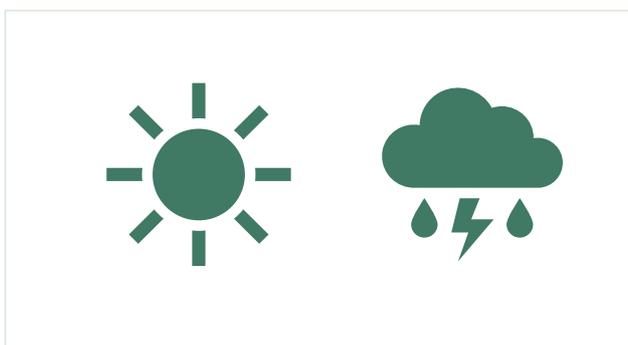

2 Reduce portfolio risk by providing efficient diversification via a broader¹ set of regions, segments, sectors and issuers

3 Better exploit¹ dislocations in different market segments because it is not constrained by a benchmark.

4 Adapt portfolio risk to the prevailing interest rate / credit environment to be able to profit in every market condition
