INVESTMENT STRATEGY

Since 2007, ODDO BHF Polaris Dynamic has offered a global and broadly diversified, dynamic multi-asset investment solution. It is characterized by an equity allocation between 70% and 100% and a bond portfolio that invests mainly in investment-grade bonds. The portfolio may invest in securities listed or traded on regulated markets, primarily in Europe, the US or Emerging Markets.

The investment objective is to generate attractive asset growth with reduced fluctuations in value through value-oriented investments, while taking into account environmental, social issues and corporate governance (ESG) criteria.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved.

ASSET ALLOCATION

MONTHLY MANAGEMENT COMMENT

The nomination of Kevin Warsh as President of the US Federal Reserve led to volatility on the financial markets. Market participants initially anticipated a less supportive monetary policy, which also put pressure on gold, as rising interest rates would reduce its attractiveness. However, the most significant market movements resulted from developments in the AI sector: following the announcement of extensive investments, shares in large AI and cloud providers fell as investors demanded greater transparency about the benefits of these programmes. In addition, Anthropic's new AI agent release weighed on the software sector. On the other hand, sectors less affected by AI, such as utilities and commodities, benefited from these developments. European equity indices also outperformed their more technology-heavy US counterparts. Amid ongoing uncertainty about the impact of AI on the technology sector, we reduced our exposure to data provider S&P Global. Although the company is strongly positioned as a provider of market indices, its software business, which accounts for a third of its revenue, could come under particular pressure. We also divested from online travel provider Booking.com, as its share price was weighed down by concerns about AI-based travel assistants. In return, we added US industrial stock Amelek to the portfolio. Among other things, the company is benefiting from rising defence budgets and the global expansion of power transmission grids. With Iberdrola, we also added a utility stock that should benefit from increasing investment in energy infrastructure. Iberdrola is a Spanish energy supplier that provides natural gas in addition to electricity and is one of the largest players in the renewables and energy networks sector across attractive markets. We also further expanded our exposure to oil services provider SLB.

SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity).

The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

ESG integration at ODDO BHF Asset Management | 3 systematic steps

Exclusions

- Norm-based:** exclusion of companies that do not comply with certain international standards.(chemical weapons , anti-personnel mines, violation of the principles of the Global Compact, etc.)
- Sector-based:** total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, weapon, adult entertainment / pornographie and Coal...)

ESG ratings

- Usage of MSCI data based on a « Best-in-Class » approach

Dialogue and engagement

- Regular dialogue with companies on ESG issues
- Individual and joint engagement
- Inclusion of ESG research within ODDO BHF Asset Management's voting policy
- Escalation procedure if engagement is not conclusive
