Risk measurement	3 Years 5 Years
Sharpe ratio	0.37 -0.29
Information ratio	-0.06 -0.69
Tracking Error (%)	1.47 1.57

INVESTMENT STRATEGY

The Fund's investment objective is to outperform its benchmark index, the €STR, by 0.585% over an 18-month period while limiting volatility. It selects debt securities primarily from issuers with maturities of less than 3 years, mainly rated investment grade, with the possibility of diversifying up to 10% of the assets into high yield securities in order to capture the extra yield related with investment in speculative high yield securities.

*The glossary of indicators used is available for download on www.am.oddo-bhf.com in the Information section. | Sources : ODDO BHF AM SAS, Bloomberg, Morningstar® Sustainability provides company-level analysis used in the calculation of Morningstar's Sustainability Score.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved.

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity). The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

ESG integration at ODDO BHF Asset Management | 3 systematic steps

Exclusions

- Norm-based:** exclusion of companies that do not comply with certain international standards. (chemical weapons, anti-personnel mines, violation of the principles of the Global Compact, etc.)
- Sector-based:** total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, weapon, adult entertainment / pornographic and Coal...)

ESG ratings

- Usage of MSCI data based on a "Best-in-Class" approach
- All titles considered for investments have at least a BB rating

Dialogue and engagement

- Regular dialogue with companies on ESG issues
- Individual and joint engagement
- Inclusion of ESG research within ODDO BHF Asset Management's voting policy
- Escalation procedure if engagement is not conclusive

ESG rating methodology

The diagram shows the MSCI ESG rating methodology. It is based on three pillars: Environment, Social, and Governance. Each pillar has specific indicators: Environment (Climate Change, Natural Resources, Pollution & Waste, Environmental Opportunities), Social (Human Capital, Product Liability, Stakeholder Opposition, Social Opportunities), and Governance (Corporate Governance, Corporate Behavior). These are combined using exposure metrics, management metrics, and industry-specific weighting to produce a final score between 1-10, which is then mapped to a rating from CCC to AAA. A risk scale at the bottom indicates that CCC is 'High risk...' and AAA is '...Strong opportunity'.

Sources: ODDO BHF AM SAS, MSCI.

Carbon metrics methodology: We updated our methodology of carbon intensity calculation. Starting January 31st, 2023, when reported carbon values are unavailable or inconsistent, estimated carbon values are used. The estimations are based on average carbon value (scope 1+2 emissions) of sectoral peers as a function of revenues

MONTHLY MANAGEMENT COMMENT

April sharpened the contrast between resilient equity markets and a persistent deterioration in the oil/interest rate relationship. Whereas risky assets followed an upward trajectory, largely ignoring the conflict, commodity and bond markets continued to incorporate a growing risk premium, fuelled by the duration and complexity of the energy supply shock. The macroeconomic environment is still relatively buoyant in the United States. While Q1 growth came in slightly below forecast, it remains solidly underpinned by exceptionally firm non-residential investment, driven by spending on software, technology equipment and AI-related infrastructure. This momentum was clearly reflected in the reporting season, which was surprisingly good, especially for the technology sector: at this stage, earnings growth justifies the amount of capex committed and reinforces the narrative of ever-robust demand for computing capacity. Against this backdrop, the Fed maintained a cautious approach at Jerome Powell's last meeting as Chairman, retaining an accommodative bias despite PCE inflation rising back above 3.5% due to energy. However, the reality for the FOMC remains one of a prolonged status quo, with the markets no longer anticipating any near-term rate cuts. The situation looks more uncomfortable in Europe. Recent PMIs have rekindled stagflation fears, while pressure on energy supply chains is intensifying as the conflict drags on. The ECB left rates unchanged but significantly hardened its tone, and a rate rise as early as June is likely if knock-on effects materialise. Short-term interest rate expectations thus remain largely determined by the duration of the energy shock. In the background, ongoing talks between Washington and Tehran are keeping the possibility of de-escalation open. Even a partial resolution would allow a gradual normalisation of energy flows and create the conditions for a regression of short rates, helping to reduce the current decorrelation between equity, commodity and bond markets. Against this backdrop, at the end of the month, the 1-month, 3-month and 6-month Euribor rates were +1.98%, +2.199% and +2.524% respectively. The €STR averaged +1.933% over the month. Overall, German yields experienced some volatility in April and ultimately only increased very slightly. At month-end, the 2-year Bund was +2.64% (vs. +2.61% at end-March), the 5-year Bund was +2.75% (vs. +2.73% the previous month), the 10-year Bund was +3.04% (vs. +3.00% the previous month) and the 30-year was +3.54% (vs. 3.46% the previous month). On the credit market, spreads made up for the widening seen in March. 1-3 year, 3-5 year and 5-7 year credit spreads stood at 58 bps (+16 bps over the month), 81 bps (-17 bps) and 95 bps (-16 bps), respectively, at the end of the month. Gross monthly performance is estimated at +56 bps. The investment grade component added +61 bps while the high yield component had no impact (no positions). Our interest rate hedges made a negative contribution of -5 bps. In terms of interest-rate positioning, we started the month with a modified duration of 2.68. We gradually increased this to 3, before reducing it, to reach 2.55 at the end of the month. At the end of the month, all of our hedging was taken out via options on the 5-year German Bund, which will enable us to harness all their convexity. In terms of credit, we favour investment grade corporate debt. We also sold some of our exposure to secure debt to shore up our corporate debt allocation.

RISKS:

The fund is exposed to the following risks :risk of capital loss, interest rate risk, credit risk, risk associated with discretionary management, risk associated with commitments on forward financial instruments, counterparty risk, liquidity risk of underlying assets, risks linked to the use of overexposure, Sustainability risk and on an ancillary basis currency risk, risk associated with high yield bonds, emerging markets risk, risks associated with securities financing transactions and collateral management

SFDR CLASSIFICATION²

The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.

DISCLAIMER

This document has been drawn up by ODDO BHF AM SAS. Potential investors should consult an investment advisor before subscribing to the fund. The investor is informed that the fund presents a risk of capital loss, but also many risks linked to the financial instruments/strategies in the portfolio. In case of subscription, investors must read the Key Information Document (KID) and the fund's prospectus in order to acquaint themselves with the detailed nature of any risks incurred and all costs. The value of the investment may vary both upwards and downwards and may not be returned in full. The investment must be made in accordance with investors' investment objectives, their investment horizon and their capacity to deal with the risk arising from the transaction. ODDO BHF AM SAS cannot be held responsible for any direct or indirect damages resulting from the use of this document or the information contained in it. This information is provided for indicative purposes and may be modified at any moment without prior notice. Any opinions presented in this document result from our market forecasts on the publication date. They are subject to change according to market conditions and ODDO BHF AM SAS shall not in any case be held contractually liable for them. The net asset values presented in this document are provided for indicative purposes only. Only the net asset value marked on the transaction statement and the securities account statement is authoritative. Subscriptions and redemptions of mutual funds are processed at an unknown asset value.

A summary of investor rights is available free of charge in electronic form in English language on the website at : https://am.oddo-bhf.com/FRANCE/en/non_professional_investor/infos_reglementaire. The fund may have been authorized for distribution in different EU member states. Investors are advised to the fact that the management company may decide to withdraw with the arrangements it has made for the distribution of the units of the fund in accordance with Article 93a of Directive 2009/65/EC and Article 32a of Directive 2011/61/EU.

The Key Information Document (DEU, ESP, FR, GB, ITL) and the prospectus (FR, GB) are available free of charge from ODDO BHF AM SAS or at am.oddo-bhf.com or at authorized distributors.
