

Sustainability-related disclosures

Product name: ODDO BHF German Equities

Legal Entity Identifier (LEI): 529900ZQYZQ8H2PF7W26

SUMMARY

El Fondo promueve características ambientales y/o sociales. Esto se refleja en la construcción y ponderación de la cartera basada en el proceso de calificación ESG y en la consideración de análisis y datos externos. Los detalles de la estrategia de inversión se proporcionan en el Folleto del Fondo y, en particular, en el Anexo «Características medioambientales y/o sociales» sobre divulgación precontractual de los productos financieros a que se refiere el artículo 8, apartados 1, 2 y 2 bis, del Reglamento (UE) 2019/2088 y el artículo 6, párrafo primero, del Reglamento (UE) 2020/852. Los principales impactos adversos sobre los factores de sostenibilidad se tienen en cuenta en las decisiones de inversión, en particular mediante el cumplimiento de la política de exclusión de la Sociedad Gestora. El Fondo contribuye a la mitigación del cambio climático y a la adaptación al mismo. El cumplimiento de las directrices de inversión ESG es supervisado por el departamento de control de riesgos independiente. La metodología de investigación y evaluación de las características medioambientales y sociales del Fondo se basa en el modelo ESG de la Sociedad Gestora. Dependiendo de la categoría de activos y la estrategia, este modelo ESG se basa, total o parcialmente, en la metodología y los datos de MSCI. La Sociedad Gestora no utiliza estimaciones para los datos de la Taxonomía. Todas las inversiones directas adquiridas para el Fondo están sujetas a las exclusiones mínimas del Fondo, que garantizan un nivel mínimo de protección ambiental o social.

NO SUSTAINABLE INVESTMENT OBJECTIVE

This financial product promotes E/S characteristics, but does not have a sustainable investment objective.

The following approach is defined to be consistent with Article 2(17) of Regulation (EU) 2019/2088 on sustainability-related disclosure requirements in the financial services sector (“SFDR”).

1. Sectors excluded from the investment: The Company’s exclusion policy is applied to exclude sectors that have a significant adverse impact on the sustainability objectives. The Fund applies general exclusions which are described in the Company’s exclusion policy which is available at am.oddo-bhf.com. This exclusion policy specifically applies to coal, tobacco, non-conventional weapons and non-conventional oil and gas. Issuers in the gambling and adult entertainment industries are also excluded.

2. Consideration of the principal adverse impacts: In order not to materially compromise its sustainability objectives, the Company sets control rules (prior to trading) on selected activities that do significant harm: Exposure to controversial weapons (PAI 14 and 0% tolerance) and violations of the principles of the UN Global Compact and the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10 and 0% tolerance).

3. Controversies: Companies classified by MSCI ESG Research as particularly controversial – where applicable, following confirmation by the ESG team based on a second review – are considered unsustainable.

4. Dialogue, engagement and alignment: Our policy of dialogue, engagement and alignment supports the goal of avoiding significant harm by identifying key risks and making our voices heard to effect change and improvement.

Regulation (EU) 2020/852 defines certain areas that may have a principal adverse impact (“PAI”).

The fund manager applies pre-trade rules to the following PAIs:

- Exposure to controversial weapons (PAI 14 and 0% tolerance),
- Violations of UN Global Compact principles and of the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10 and 0% tolerance).

MSCI ESG ratings also take into consideration environmental, social and governance issues if the use of additional PAI data for companies and governments can support the ESG rating. Where data is available for companies, ESG analysis includes: monitoring of greenhouse gas emissions (PAI 1), carbon footprint (PAI 2), GHG intensity of investee companies (PAI 3), activities negatively affecting biodiversity sensitive areas (PAI 7), the hazardous waste and radioactive waste ratio (PAI 9), violations of UN Global Compact principles and Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10), the lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (PAI 11), the unadjusted gender pay gap (PAI 12), and board gender diversity (PAI 13). For sovereign issuers, analysis may also include GHG emission intensity (PAI 15). However, the Company does not set specific objectives or control rules for these other PAIs, with the exception of those mentioned in the first paragraph.

For more information about MSCI ESG Ratings visit <https://www.msci.com/data-and-analytics/sustainability-solutions/esg-ratings>

The Company ensures that the Fund’s sustainable investments comply with the exclusion list informed by the United Nations Global Compact (UNGC) criteria, as described in the Company’s exclusion policy. Proven breaches of the OECD Guidelines for Multinational Enterprises and/or the United Nations Guiding Principles on Business and Human Rights also result in exclusion.

ENVIRONMENTAL OR SOCIAL CHARACTERISTICS OF THE FINANCIAL PRODUCT

The Fund promotes climate change mitigation and adaptation through sustainable investment in accordance with the EU Taxonomy and sustainable investment pursuant to Article 2(17) of the SFDR.

In its ESG strategy, the Fund refers to the objectives described above, but does not try to select its investments solely on the basis of one or more of these objectives. The ESG strategy’s sustainability indicators take account of the contributions to these objectives.

The Fund intends to consider two aspects of a company’s contribution: 1. Its positive environmental and/or social contribution resulting from revenue generated from company products and/or services; and 2. Its contribution to environmental and/or social objectives resulting from the company’s operating activities in the broader sense if these activities are consistent with environmental and/or social objectives.

To qualify as a sustainable investment, a company must meet one of the following criteria at a minimum:

a) criteria “based on the company’s operations”:

- Implied Temperature Rise (ITR):

Business activities that are consistent with the Paris Agreement’s goal of limiting global warming to within 2°C are classified as contributing to an environmental objective and therefore qualify as sustainable investments. MSCI ITR data is used to assess temperature alignment.

- SBTi-recognised emission target:

One way of measuring the environmental objective is greenhouse gas emissions. Our approach to identifying sustainable investments includes companies whose greenhouse gas emission reduction targets are recognised by the Science-Based Targets Initiative (SBTi).

b) Criteria “based on company turnover from operational activities”:

- Sustainable impact revenue:

Commercial activities are analysed to determine how they contribute to the achievement of certain environmental or social objectives. In this context, the MSCI indicator “Sustainable Impact Revenue” is used. The indicator goes from 0 to 100%, representing the percentage of the company’s total revenue.

- EU Taxonomy-aligned revenue:

The EU Taxonomy is for identifying economic activities that pursue environmental or social objectives. For the time being, however, only two of the six environmental objectives set out are fully covered. The reported revenue from taxonomy-aligned activities for the company in question is used to determine Taxonomy-alignment.

- EU Taxonomy-aligned investment spending:

The reported taxonomy-aligned investment spending for the company in question is used to determine Taxonomy-alignment.

- Percentage of “green” company patents:

This indicator helps to identify companies that generate revenues from patents related to technologies and procedures to reduce emissions, which contribute to an environmental objective.

INVESTMENT STRATEGY

The objective of the Fund is to participate in the performance of German equities. The Fund invests primarily in German equities. To a limited extent, the fund manager may also invest in shares from other Euro Zone countries. The Fund offers a mix of large and mid-cap companies. The Company pursues a sustainable investment strategy in its management of the Fund. The Fund incorporates financial criteria and environmental, social and good governance (ESG) characteristics. As part of the ESG strategy, the sustainability activities of issuers are analysed and sustainability opportunities and risks integrated into investment decisions; the principal adverse impacts of investment decisions on sustainability factors are also taken into account. The Fund’s investment universe consists of the MSCI Germany NR EUR, the EuroStoxx and the EuroStoxx TMI Small.

ESG criteria are considered using an approach that can be broken down into two stages:

1. stage: Exclusions

The Fund applies general exclusions which are described in the Company's exclusion policy which is available at am.oddo-bhf.com. This exclusion policy specifically applies to coal, tobacco, non-conventional weapons and non-conventional oil and gas. Issuers in the gambling and adult entertainment industries are also excluded.

2. stage: ESG rating

The ESG rating of securities to be allocated to the Fund is considered. The basis is the ESG ratings of data provider MSCI ESG Research. MSCI uses a methodology whereby issuers are assigned an industry-specific rating of between 0 (worst in the industry) and 10 (best in the industry); this rating is based on their ability to manage the risks and opportunities relevant to their operating activities in the area of sustainable development. In particular, MSCI analyses the following environmental and social characteristics already mentioned above: (1) climate change adaptation (carbon emissions, vulnerability to climate change, opportunities in the area of clean technologies and renewable energies); (2) natural capital (biodiversity and land use, raw material supply and water stress); and (3) human rights and human capital (health and safety, human capital development, personnel management, community relations, data protection/security, and product safety/quality). In addition to the ratings for issuers described above, MSCI also assigns ESG ratings for funds.

In the event that an issuer does not have an MSCI ESG rating, there are two possibilities:

- Either the ESG rating assigned by the Company to the relevant security of the issuer is used, or
- if the Company has not assigned an ESG rating to that issuer's securities, the Company can substitute an ESG rating, determined among other things by an average based on the ESG ratings of MSCI according to sector of activity, size of the issuer, and the issuer's place of business. This substitute rating is no longer used if MSCI ESG Research generates its own ESG rating for the issuer concerned or if an ESG rating is assigned by the Company.

In addition, the Company can review an ESG rating provided by MSCI. This review is carried out by the ESG team and can result in replacement of the MSCI ESG rating with a new internal ESG rating.

The ESG ratings influence the portfolio structure of the Fund, which aims to achieve a better weighted average ESG rating than its investment universe. In the event of a deterioration in the ESG ratings of the securities in which the Fund invests or a change in the ESG rating methodology that affects the average ESG rating of the Fund, the average ESG rating of the Fund is restored to a level above that of the investment universe, taking the interests of unitholders and market conditions into account.

At least 90% of the assets (excluding bank deposits) in the portfolio have an ESG rating, taking into account the weighting of the individual assets.

All direct investments acquired for the Fund are subject to the minimum exclusions applicable to the Fund, which guarantee a minimum level of environmental or social safeguards. However, there is no look-through for individual financial instruments (no look-through at the assets of a target fund or certificates).

BREAKDOWN OF INVESTMENTS

At least 80% of the Fund's net asset value is aligned with environmental and/or social characteristics.

The Fund may also hold up to 20% of its net asset value in “Other”, as defined below, which includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

At least 20% of the Fund’s net asset value is invested in sustainable investments. The Fund may also hold assets aligned with the environmental or social characteristics that do not qualify as sustainable investments.

At least 0.5% of the Fund’s net asset value is invested in Taxonomy-aligned investments. There is no minimum commitment for other environmental or social investments.

- At least 90% of the assets (excluding bank deposits) in the portfolio have an ESG rating, taking into account the weighting of the individual assets.

MONITORING OF ENVIRONMENTAL OR SOCIAL CHARACTERISTICS

The Company’s risk management team is responsible for the internal control of the Fund’s investment guidelines. These include the environmental and/or social characteristics of the Fund. The fund managers regularly monitor the environmental or social characteristics of the Fund.

METHODS

The methodology for the analysis and evaluation of environmental or social characteristics of the Fund is based on the Company’s ESG model. More information is available at: am.oddo-bhf.com

DATA SOURCES AND PROCESSING

The Company uses various data sources in its ESG model in order to carry out and substantiate the analysis and evaluation of environmental or social characteristics. These data come from external data sources, such as MSCI, CDP, Carbon 4 Finance (biodiversity data) and Bloomberg, and are supplemented with internal analyses. MSCI provides the Taxonomy data. The company does not use any Taxonomy data estimates.

The data undergo an internal quality check. The Company ensures the quality and consistency of data by having regular meetings with the providers of the data to correct any errors, recommend possible improvements and to give feedback from investor or company engagement. Data processing involves importing data into the Company’s IT systems.

RESTRICTIONS ON METHODS AND DATA

All rights to the data and reports provided by data suppliers rest with these data suppliers and/or their content providers. None of these data suppliers or their affiliated companies or their content providers assume liability for errors, omissions or interruptions in such data/reports in terms of completeness, accuracy or currency. The reproduction or distribution of such data/reports is not permitted without the express written permission of these data suppliers. The manager maintains regular contact with the data suppliers in order to ensure the quality and reliability of the data used. The company does not use any Taxonomy data estimates. After an internal check, an array of external data sources which the Company deems reliable is thus available to the fund manager.

DUE DILIGENCE

Due diligence processes undergo fundamental analysis by the fund manager. In addition, internal ESG ratings are used. The ESG investment limits are monitored by the independent Investment Controlling unit.

All direct investments acquired for the Fund are subject to the minimum exclusions applicable to the Fund, which guarantee a minimum level of environmental or social safeguards. However, there is no look-through for individual financial instruments (no look-through at the assets of a target fund or certificates).

ENGAGEMENT POLICIES

The Company's engagement policies are available at: am.oddo-bhf.com

DESIGNATED REFERENCE BENCHMARK

The fund has not been designated a specific index to use as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics it promotes.

As at 16 April 2026 (updated following a change in the ESG investment strategy)
