Management fees and other administrative or operating costs	1.12 %

Risk measurement	3 Years	5 Years
Sharpe ratio	-0.02	-0.57

INVESTMENT STRATEGY

The investment objective is to outperform the ESTER index +2% (capitalised), net of fees, on an annual basis. The Sub-fund does not have a benchmark. Given the Fund's discretionary management style, its management is not linked to any index.The fund may be invested up to 100% in debt securities. These securities will be issued by issuers whose registered office is located in an OECD country up to a minimum of 70%. The Sub-Fund may only invest in instruments issued by entities rated at least B.

Benchmark : Nil

The performance shown is that of the "ODDO BHF Sustainable Credit Opportunities". "ODDO BHF Sustainable Credit Opportunities" was launched on 12/13/2013 under the name "Oddo Strategic Corporate Bond", this name and strategy have been changed on 12/30/2016 to become "Oddo Credit Opportunities". The later has been absorbed on 10/09/2018 by the Luxembourg fund "ODDO BHF Credit Opportunities", but it still pursues exactly the same investment strategy and the same investment objective as the "Oddo Credit Opportunities".

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It rangesfrom 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indicationof the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved..

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity).
The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

ESG integration at ODDO BHF Asset Management | 3 systematic steps

Exclusions

- Norm-based: exclusion of companies that do not comply with certain international standards.(chemical weapons , anti-personnel mines, violation of the principles of the Global Compact, etc.)
- Sector-based: total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, weapon, adult entertainment / pornography and coal...)

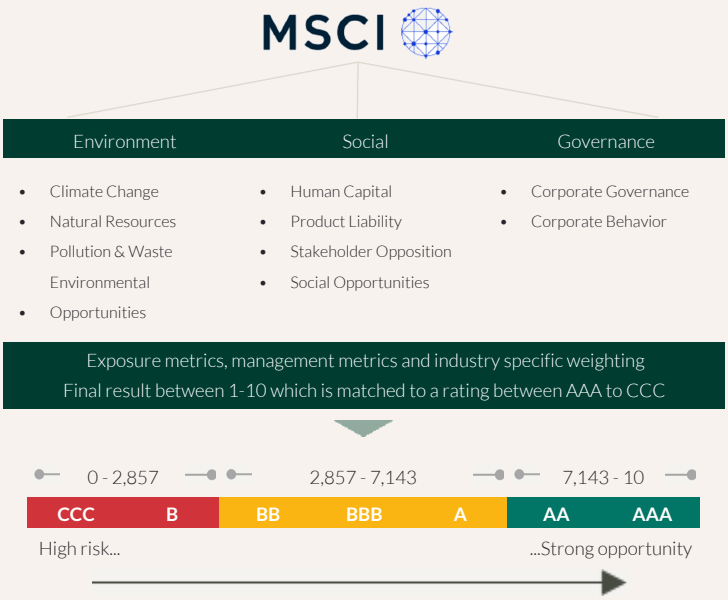

ESG ratings

- Usage of MSCI data based on a "Best-in-Class" approach
- All titles considered for investments have at least a BB rating

Dialogue and engagement

- Regular dialogue with companies on ESG issues
- Individual and joint engagement
- Inclusion of ESG research within ODDO BHF Asset Management's voting policy
- Escalation procedure if engagement is not conclusive

ESG rating methodology

Sources: ODDO BHF AM SAS, MSCI.

Carbon metrics methodology: We updated our methodology of carbon intensity calculation.
Starting January 31st, 2023, when reported carbon values are unavailable or inconsistent, estimated carbon values are used.
The estimations are based on average carbon value (scope 1+2 emissions) of sectoral peers as a function of revenues

MONTHLY MANAGEMENT COMMENT

In September the global selloff in fixed income accelerated further driven by stronger economic data and hawkish central banks which led to a repricing in real rates. Spreads widened alongside the rising rates volatility with government bonds of fiscally weaker countries, such as France and Italy underperforming strongly. France is currently in the spotlight because of ongoing budget negotiations against a backdrop of a very high fiscal deficit and a political stalemate that make any cost cuts hard to pass. In addition, the upcoming election in 2027 is weighing on sentiment with the prospect of candidates from the extreme right and left being in the final round. Notably, macroeconomic data remained strong in the US and improved in the Eurozone at the same time. The jobs report showed a strong rebound in the US labor market in August, consumer spending rebounded strongly from a weak July leaving consumption tracking close to 3% on an annualized basis in Q3, and PMIs remained in strongly expansionary territory across all metrics indicating an economy growing above potential. Meanwhile in the Eurozone the main highlight were leading indicators which defied expectations of a slowdown in the face of the ongoing conflict showing a broad-based acceleration in both manufacturing and services sectors. Inflationary pressures remained high, particularly because of high refining margins resulting in record high prices for distillates such as Diesel. As a result, central banks signaled a hawkish bias, generally upgrading their forecasts for both inflation and growth and signaling further hikes which in turn exacerbated the selloff in rates. On the positive side, the increase in inflation so far is largely limited to energy and related categories with little evidence of second round effects. Credit markets saw a healthy amount of new issuance in September which was well absorbed by markets with limited new issue concessions. In this environment Corporate Investment Grade spreads finished the month 12bp wider while High Yield spreads underperformed, widening by 39bps. 10yr Bund yields finished the month significantly higher at 3.59% while US 10yr Treasury yields underperformed, increasing to 5.29%.
Against this backdrop, we have reduced credit risk, with a particular focus on high-yield corporates, subordinated bonds, French financial institutions and French corporates. In addition, we have purchased some iTraxx Xover credit default swap protection to further reduce credit risk. At the same time, we have maintained a long-duration position, as we believe valuations at the front end of the curve are particularly attractive.

RISKS:

The fund is exposed to the following risks :risk of capital loss, interest rate risk, credit risk, risk associated with discretionary management, risk associated with commitments on forward financial instruments, counterparty risk, risks associated with portfolio concentration, liquidity risk of underlying assets, risk associated with high yield bonds, emerging markets risk, risks associated with securities financing transactions and collateral management, risks linked to the use of overexposure, modelling risk, Sustainability risk and on an ancillary basis currency risk, risk associated with currency conversion

SFDR CLASSIFICATION[2]

The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.
