Performance fees	Maximum 20% of the Sub-Fund's outperformance of the benchmark index (see prospectus for details)
Subscription fees	5 % (maximum)
Redemption fees	Nil
Management fees and other administrative or operating costs	1.087 %

INVESTMENT STRATEGY

ODDO BHF Green Planet is a global equity fund that uses artificial intelligence to invest in listed equities with exposure to the theme of ecological transition, through a selection of associated sub-themes such as clean energy, energy efficiency, sustainable mobility and the preservation of natural resources. A big-data algorithm is first used to construct an universe of eligible investments composed of companies whose business model contributes significantly to the sub-themes identified above. A quantitative model is then applied to this limited investment universe to identify between 30 and 60 companies with the most attractive financial and risk characteristics. The management team may adjust the weightings at its own discretion and the portfolio is monitored on an ongoing basis. The fund seeks to be permanently invested in equities with the aim of generating long-term capital growth while integrating a non-financial analysis.

*The glossary of indicators used is available for download on www.am.oddo-bhf.com in the Information section. | Sources : ODDO BHF AM SAS, Bloomberg, Morningstar® Sustainalytics provides company-level analysis used in the calculation of Morningstar's Sustainability Score.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved.

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

MONTHLY MANAGEMENT COMMENT

In July 2026, the portfolio's underperformance was primarily driven by sector allocation. Notably, the significant overweight in Industrials, which lagged the broader market, and to a lesser extent by stock-specific weakness within that sector. The underweight in Information Technology provided a modest allocation benefit given the sector's weak absolute performance, but this was insufficient to offset losses elsewhere. While individual stock selection in technology and clean energy – particularly Microsoft, BYD and Hitachi – generated strong positive contributions supported by robust earnings and favourable outlook revisions, these gains were more than offset by sharp declines in several industrial and clean-tech holdings. The period was characterised by wide return dispersion, with sector rotation dynamics and idiosyncratic stock outcomes amplifying the portfolio's active positioning.

Main contributors:

- Microsoft (+24.6%), a U.S.-based technology company, delivered a strong performance following a landmark quarterly earnings release, with continued strength in cloud computing and AI-related demand driving a significant re-rating of the shares.

- BYD (+30.0%), a Chinese electric vehicle manufacturer, delivered a strong performance underpinned by robust sales momentum and continued international expansion.

Main detractors:

- Generac Holdings (-32.7%), a U.S.-based power generation company, declined sharply over the month as the stock unwound a significant premium built up through the first half of the year on data center growth expectations, preceding a strong earnings beat that failed to fully recover losses.

- Tesla (-26.0%), a U.S.-based electric vehicle manufacturer, weighed on performance following quarterly results that disappointed on profitability and cash generation, with surging AI and robotics investment raising concerns over the near-term financial outlook.

PORTFOLIO'S SUSTAINABLE IMPACT ANALYSIS VS. BENCHMARK

Revenues generated by a \$1mm investment in the portfolio compared to the same investment in the benchmark:

Clean Energy

Energy efficiency

Sustainable mobility

Preservation of natural resources

The figures above reflect the estimated annual revenue generated by companies from products and services providing sustainable impact solutions in relation with the 4 subthemes. A portfolio or index's estimated annual revenue derived from sustainable impact products and services is the sum of each company's sustainable impact solutions revenue represented by the investor's ownership stake.

UN SUSTAINABLE DEVELOPMENT GOAL EXPOSURE

The figures above reflect the estimated aggregated exposure to a selection of UN Sustainable Development Goal (SDG) of the portfolio compared to the benchmark. The estimated SDG exposure come from the MSCI SDG Net Alignment methodology developed by MSCI ESG Research. One company may contribute to one or several SDGs

Glossary

Carbon Footprint	Portfolio carbon emissions per million dollars invested
Carbon intensity	Portfolio carbon emissions per million dollars of turnover
Weighted Average Carbon Intensity	Carbon emissions per million dollars of turnover weighted by the weight of each portfolio company Carbon metrics methodology: We updated our methodology of carbon intensity calculation. Starting January 31st, 2023, when reported carbon values are unavailable or inconsistent, estimated carbon values are used. The estimations are based on average carbon value (scope 1+2 emissions) of sectoral peers as a function of revenues
Fossil fuel reserves	% of portfolio exposed to companies that own fossil fuel reserves
Green share	% of portfolio exposed to companies that offer clean technologies solutions
SFDR Classification	The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.
