WHAT IS THIS PRODUCT?

TYPE

ODDO BHF ProActif Europe is a UCITS under Directive 2009/65/EC, taking the form of a *Fonds Commun de Placement*.

TERM

ODDO BHF ProActif Europe was created on 10 September 2004 for a term of 99 years.

The management company may liquidate the product if the assets fall below the regulatory minimum, or at its discretion in accordance with the legal requirements.

OBJECTIVES

The Fund's investment objective is to outperform the benchmark index (50% compounded €STR + 8.5 basis points and 50% EURO STOXX 50 NET RETURN calculated with dividends reinvested (Bloomberg code: SX5T INDEX)) over a minimum investment horizon of three years through a flexible allocation between the equity market and money market instruments.

The Fund is a stock-picking fund and is managed on a discretionary and active basis with reference to its benchmark. The investment process is based on (i) actively managing the asset allocation, divided between equity and money markets, through a tactical and strategic allocation determined according to an economic scenario, market valuations and portfolio risk management, and (ii) selecting small, mid and large-cap stocks directly, taking into account the securities' individual financial valuations compared with the investment universe and/or their sectors. We may also seek to take overweight or underweight positions (relative to the equity component of the benchmark index) in certain sectors or certain factors (e.g. value/growth, cyclical/defensive, mid/large caps, etc.) within our direct equity exposure.

Certain stocks may be included in the portfolio in order to reduce any biases (in relation to the benchmark's equity component) resulting from the prior selection of individual stocks, which are not consistent with the macroeconomic views of the first stage, or which the managers deem too high given the volatility or degree of disparity within equity markets.

Between 0% and 100% of the Fund's assets may be invested in equities traded on regulated markets and issued by companies headquartered within the European Economic Area (EEA) or in a European member of the OECD.

Equities issued by companies headquartered outside the Euro Zone may be held in the equity component up to a maximum of 40% of net assets.

The Fund may invest in equities from any economic sector and with any market capitalisation. Only 10% of the Fund may be exposed to emerging markets.

Between 0% and 100% of the Fund's assets may be invested in money market instruments or securities received under repurchase agreements (maximum period of three months).

Money market instruments will be rated at least BBB- (long-term rating by Standard and Poor's, Moody's, or equivalent, or using the Management Company's internal rating). Securities acquired in reverse repurchase transactions will be issued by governments, public entities or private companies and denominated in euro, and will have a rating of A- to AAA (S&P, Moody's or equivalent, or using the Management Company's internal rating), with a maximum of 5% of assets held in securities rated below A- but no lower than BBB- (S&P, Moody's or equivalent, or using the Management Company's internal rating).

The Management Company does not use the ratings issued by rating agencies automatically or in isolation, as it also applies its own internal analysis. In the event of a downgrade, the Management Company will take the interests of unitholders, market conditions and its own analysis of these money market instruments into account when respecting rating limits.

The Fund may invest up to 45% of its net assets (i) in units or shares of UCITS under European Directive 2009/65/EC, (ii) in EU AIFs and/or in foreign investment funds mentioned in R.214-25 that meet the criteria of Article R.214-13 of the French Monetary and Financial Code. These funds may be managed by the companies belonging to the BHF group and will be compatible with the Fund's investment strategy.

Without seeking overexposure, the Fund may invest in financial futures or options traded on French or foreign regulated markets or over the counter for the purposes of hedging equity risk or exposing the Fund thereto and/or hedging currency risk. This shall be limited to 40% of the net assets.

The Fund's maximum exposure to the instruments (equities, debt securities, funds and derivatives) may not exceed 100% of net assets, it being understood that the maximum exposure is the sum of the net exposures to each of the markets (equity, fixed income, money) to which the Fund is exposed (the sum of long and hedging positions).

Subscription and redemption requests are centralised by the custodian every Paris stock exchange trading day until 11:15 (Paris time, CET/CEST) and executed on the basis of the net asset value of the same day.

CR-EUR units accumulate their income, as decided by the management company on a yearly basis.

INTENDED RETAIL INVESTOR

The Fund is intended for investors seeking to increase the value of their capital through a vehicle investing flexibly in equities and fixed income products and aiming to outperform the benchmark index over a period of at least three years. US Persons may not invest in this product.

The Fund's custodian is ODDO BHF SCA

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

RISK INDICATOR

The risk indicator assumes you keep the product until the end of the recommended holding period, i.e. three years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you. Currency risk: you will be paid in a different currency; your actual gain will therefore depend on the exchange rate between the two currencies. This risk is not taken into account in the above indicator:

Other materially relevant risks not taken into account in the indicator:

Other risks not taken into account in the risk indicator may be materially relevant. They include:

counterparty risk

liquidity risk

As this product does not offer protection from market hazards, you could lose some or all of your investment.

PERFORMANCE SCENARIOS

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years with a one-year horizon and over the recommended investment period.

Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period: 3 years

Investment: €10,000

Scenarios		If you exit after 1 year	If you exit after 3 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	€6,120	€6,700
	Average return each year	-38.8%	-12.5%
Unfavourable	What you might get back after costs	€8,720	€8,670
	Average return each year	-12.8%	-4.7%
Medium	What you might get back after costs	€9,650	€9,580
	Average return each year	-3.5%	-1.4%
Favourable	What you might get back after costs	€10,490	€10,880
	Average return each year	4.9%	2.9%

The unfavourable scenario occurred for an investment between: 03/2017 and 03/2020.

The medium scenario occurred for an investment between: 06/2020 and 06/2023.

The favourable scenario occurred for an investment between: 06/2022 and 06/2025.

WHAT HAPPENS IF ODDO BHF ASSET MANAGEMENT SAS IS UNABLE TO PAY OUT?

The product is a co-ownership of financial instruments and deposits separate from the portfolio's Management Company. In the event of the company's insolvency, the product's assets, which are held by the custodian, would be unaffected. In the event of the custodian's insolvency, the risk of financial loss on the product would be mitigated by the legal segregation of the custodian's assets from the product's assets.

WHAT ARE THE COSTS?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts taken from your investment to cover the different types of cost. These amounts depend on how much you invest, how long you hold the product, and the return on the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year, you would get back the amount that you invested (0% annual return). For the other holding periods, we have assumed the product performs as shown in the moderate scenario.
- €10,000 is invested

Investment: €10,000

Scenarios	If you exit after 1 year	If you exit after 3 years
Total costs	€576	€936
Annual cost impact*	5.8%	3.2%

*This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the end of the recommended holding period your average return per year is projected to be 1.7% before costs and -1.4% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

COMPOSITION OF COSTS

The table below indicates the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period, and the meaning of the different cost categories.

One-off costs upon entry or exit		If you exit after: 1 year
Entry costs	Entry costs represent the maximum amount that may be paid at the time of subscription. 4.00% is the most you will pay; it may be that you pay less. The person selling you the product will inform you of the actual costs.	Up to €400
Exit costs	We do not charge any exit costs for this product. However, the person selling you the product may do so.	Up to €0
Ongoing costs [taken each year]		
Management fees and other administrative or operating costs	These represent the unavoidable costs of running the product and any payments, including remuneration, to parties connected to the product and providing services. 1.61% of the value of your investment per year. This is an estimate based on actual costs over the last year.	€155
Transaction costs	0.12% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	€12
Incidental costs taken under specific conditions		
Performance-related fees	Impact of performance-related fees. 20% (inclusive of tax) of the Fund's outperformance relative to the benchmark, once any past underperformance over the last five financial years has been fully offset and provided that the Fund's absolute return is positive.	€10

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Minimum recommended holding period: over 3 years

This recommended holding period is a minimum that takes into account the features of the selected product. It may be longer, depending on your financial position and investment choices.

You can redeem some or all of your investment at any time. Exiting before the end of the recommended holding period may affect the performance that can be expected from your investment. You can find details of any charges and penalties applied when divesting under: "What are the costs?"

Subscription and redemption requests are centralised by the custodian every Paris stock exchange trading day until 11:15 (Paris time, CET/CEST) and executed on the basis of the net asset value of the same day.
