## INVESTMENT STRATEGY

Since 2007, ODDO BHF Polaris Dynamic has offered a global and broadly diversified, dynamic multi-asset investment solution. It is characterized by an equity allocation between 70% and 100% and a bond portfolio that invests mainly in investment-grade bonds. The portfolio may invest in securities listed or traded on regulated markets, primarily in Europe, the US or Emerging Markets.

The investment objective is to generate attractive asset growth with reduced fluctuations in value through value-oriented investments, while taking into account environmental, social issues and corporate governance (ESG) criteria.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved.

## ASSET ALLOCATION

### MONTHLY MANAGEMENT COMMENT

International capital markets have recently been heavily influenced by the war in Iran. The announcement of a ceasefire and the start of negotiations between the US and Iran initially led to a noticeable easing of tensions. This triggered a recovery rally on the financial markets, which was more subdued in Europe than in the US. Once again, technology stocks were in the spotlight. Solid quarterly results also provided a boost. Uncertainty was caused by the ongoing blockade of the Strait of Hormuz and the repeatedly stalling peace negotiations. After initially falling, the oil price rose sharply again towards the end of the month. Cadence Design Systems, a company specialising in software solutions for the semiconductor industry and benefiting from the AI-driven semiconductor boom, was added to the portfolio. In contrast, we took profits on the sharply rising semiconductor stock Broadcom through partial sales. We increased our holding in the Spanish utility company Iberdrola. The company is very well positioned and should benefit from growing demand for electricity. We took advantage of falling share prices in the luxury goods sector to establish an initial position in Hermès. Thanks to its focus on exclusivity, Hermès is one of the most resilient luxury goods manufacturers.

## SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity).

The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

### ESG integration at ODDO BHF Asset Management | 3 systematic steps

**Exclusions**

- Norm-based:** exclusion of companies that do not comply with certain international standards.(chemical weapons , anti-personnel mines, violation of the principles of the Global Compact, etc.)
- Sector-based:** total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, weapon, adult entertainment / pornographie and Coal...)

**ESG ratings**

- Usage of MSCI data based on a « Best-in-Class » approach

**Dialogue and engagement**

- Regular dialogue with companies on ESG issues
- Individual and joint engagement
- Inclusion of ESG research within ODDO BHF Asset Management's voting policy
- Escalation procedure if engagement is not conclusive
