INVESTMENT STRATEGY

ODDO BHF Avenir Europe is a European small and mid cap equity fund, invested in companies having their registered office in the European Union or in a European OECD member state. It aims to be permanently invested in equities, targeting long-term capital growth. It primarily selects some of the best performing cyclical and non-cyclical companies in Europe, which often have an international presence, where the price is considered attractive taking long-term prospects into account.

*The glossary of indicators used is available for download on www.am.oddo-bhf.com in the Information section. | Sources : ODDO BHF AM SAS, Bloomberg, Morningstar® Sustainalytics provides company-level analysis used in the calculation of Morningstar's Sustainability Score.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It rangesfrom 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indicationof the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved..

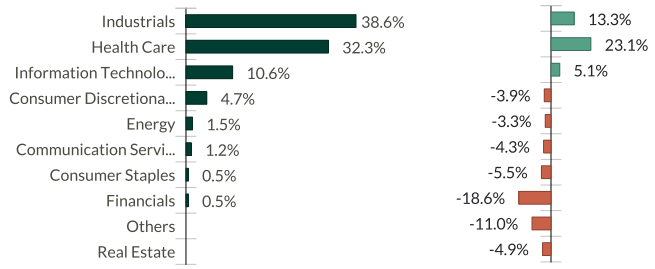

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity).
The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

ESG integration at ODDO BHF Asset Management | 3 systematic steps

Exclusions

- Norm-based: exclusion of companies that do not comply with certain international standards.(chemical weapons , anti-personnel mines, violation of the principles of the Global Compact, etc.)
- Sector-based: total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, weapon, adult entertainment / pornography and coal...)

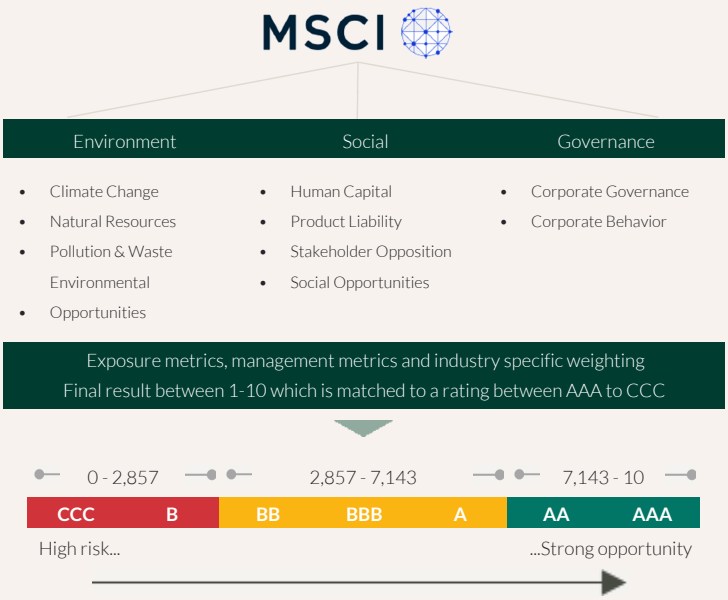

ESG ratings

- Usage of MSCI data based on a "Best-in-Class" approach
- All titles considered for investments have at least a BB rating

Dialogue and engagement

- Regular dialogue with companies on ESG issues
- Individual and joint engagement
- Inclusion of ESG research within ODDO BHF Asset Management's voting policy
- Escalation procedure if engagement is not conclusive

ESG rating methodology

Sources: ODDO BHF AM SAS, MSCI Solutions (Deutschland) GmbH.

Carbon metrics methodology: We updated our methodology of carbon intensity calculation.
Starting January 31st, 2023, when reported carbon values are unavailable or inconsistent, estimated carbon values are used.
The estimations are based on average carbon value (scope 1+2 emissions) of sectoral peers as a function of revenues

MONTHLY MANAGEMENT COMMENT

October was marked by a pause in central bank action, tensions over French debt and a further rise in oil prices. Euro Zone inflation in September, published in early October, reached 3.8% – its highest level in three years – driven by energy prices; against this backdrop, the ECB decided to keep the deposit rate at 2.5%, noting that tighter financial conditions could hold back growth and inflation. In the bond market, France was at the centre of tensions. Amid the government's difficulties in getting the 2027 budget passed and the protests, the yield on the 10-year OAT reached 5.13% and the spread against the Bund exceeded 160 bps – levels not seen since the sovereign debt crisis. On 23 October, however, Moody's confirmed the Aa3 rating with a negative outlook, providing some relief. In the United States, the 10-year yield, having reached 5.3% in early October, fell back to 4.9% by the end of the month. In our view, this fall can also be attributed to a flight to safe-haven assets in response to the results of major technology companies, which were poorly received by the market. On the energy front, Brent crude rose for a fourth consecutive month, reaching around USD 116 a barrel, its highest level since 2022. Prices were buoyed by signs of a possible resumption of US strikes against Iran following the mid-term elections. In the equity markets, the dominant theme was the rising cost of the race for artificial intelligence, highlighted by the quarterly results of the major technology groups, which were lacklustre over the course of the month. On the IPO front, Anthropic published its prospectus ahead of a listing on the Nasdaq, expected in the week of 16 November, with a valuation of between USD 1–2 trillion.

In the United States, the indices posted mixed results. The technology sector made the difference by dragging down the indices in which it had the greatest weighting: Nasdaq -6.6%, S&P 500 -0.9% and Dow Jones +1.8%. The latter bucked the trend, buoyed by shares in the consumer and health care sectors. In Europe, the MSCI Europe Index ended the month up 2.2%, driven mainly by the energy and health care sectors. By contrast, financial stocks fell, having been caught out by the rise in interest rates. Performance was even stronger for European mid-caps, with the MSCI Europe SMID index rising by 3.1%, following a less buoyant September.

AVENIR Europe (+3%) slightly outperformed its benchmark index thanks to the defensive nature of health care stocks. Amongst the stocks that had the greatest impact during the month were, in particular, the positive contribution from (i) ICON, which exceeded expectations in the third quarter and raised its revenue forecast for 2026, as well as that of (ii) Genmab, following positive results from Phase 3 clinical trials of several cancer treatments. Conversely, (iii) Safran was penalised during the month by the failure to raise its forecasts and fears of a slowdown in air traffic due to persistently rising fuel costs.

In an uncertain and ever-changing world, we remain true to our investment philosophy. We invest in companies that are able to adapt to the new rules of international trade and to the ongoing technological and geopolitical changes. We make sure that their competitive advantage remains sustainable, so as to ensure their ability to grow across the world and to outpace global GDP growth.

RISKS:

The fund is exposed to the following risks :risk of capital loss, equity risk, interest rate risk, credit risk, risk associated with discretionary management, currency risk, risk associated with commitments on forward financial instruments, counterparty risk, risk associated with holding small and medium capitalisations, risks associated with securities financing transactions and collateral management, Sustainability risk and on an ancillary basis risk associated with convertible bonds

SFDR CLASSIFICATION[2]

The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.
