*The glossary of indicators used is available for download on www.am.oddo-bhf.com in the Information section. | Sources : ODDO BHF AM SAS, Bloomberg, Morningstar® Sustainalytics provides company-level analysis used in the calculation of Morningstar's Sustainability Score.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved..

(**) The ongoing charges are based on the charges for the previous period. Estimates are drawn up for all funds that have not yet closed their first accounting period

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

SUSTAINABLE REPORT - METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity). The choice of indicators is therefore crucial for the relevance of impact measurement.

We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

For more information on the ODDO BHF Asset Management ESG methodology, please refer to the [Sustainable investing & ESG document](http://www.am.oddo-bhf.com) available on www.am.oddo-bhf.com

Carbon metrics methodology: We updated our methodology of carbon intensity calculation. Starting January 31st, 2023, when reported carbon values are unavailable or inconsistent, estimated carbon values are used. The estimations are based on average carbon value (scope 1+2 emissions) of sectoral peers as a function of revenues

*ESG rank at the end of the period: In accordance with the update to our ESG integration policy, the internal ESG rating scale now ranks the investment universe from 1 (High Risk) to 5

** : rebased on the rated part of the fund

ODDO BHF Global Target 2031

31 MARCH 2026

CI-EUR - Eur | *Fixed Income - Total Return - Target Maturity*

MONTHLY MANAGEMENT COMMENT

In March 2026, the European High Yield market (HEAE) recorded a decline of 2.53%, as spreads widened by 75 bps to finish the month at 349 bps. On a year-to-date basis, the asset class posted a performance of -1.65%.

In March, sentiment deteriorated sharply after the US Israeli strikes on Iran which escalated into a broader conflict, leading to a higher market volatility. Oil prices surged above \$100 per barrel and raised concerns over global growth and inflation. At this stage, macroeconomic data have shown limited impact from the geopolitical events. In the US, the Composite PMI remained in expansionary territory at 51.4, albeit down from 51.9 in the prior month, while in Europe it fell to 50.5 from 51.9. Inflation data released during the month came in line with expectations in the US, with Core CPI at 2.5%, while European inflation was slightly below forecasts at 2.3%. US rates rebounded strongly over the month, with the 10-year Treasury yield ending March at 4.32%, up 38 bps. European rates also moved higher, with the German 10-year Bund closing March at 3.00%, up 36 bps.

Companies' results showed unchanged trends with continued weaknesses, especially in the automotive and the chemical sector. The outlook given by issuers from all sectors stayed muted. There were some new issues this month. The gross issuance volume in 2026 is higher, so far, with €26bn YTD vs. €23bn last year YTD. The new issues have been well absorbed by the market but were drastically reduced post-war after a strong start.

The fund maintained its overall risk position during the month and continually invested inflows. It increased exposure to issuers showing a solid credit trend.

In 2026, the volatility of credit markets is expected to be influenced by the geopolitical risks (particularly the Middle East conflicts), inflation, economic growth, company results and the sovereign risks. In this market environment credit selection is essential.

RISKS:

The fund is exposed to the following risks :risk of capital loss, interest rate risk, credit risk, risk associated with discretionary management, risk associated with commitments on forward financial instruments, counterparty risk, risks associated with portfolio concentration, liquidity risk of underlying assets, risk associated with high yield bonds, emerging markets risk, risks associated with securities financing transactions and collateral management, Sustainability risk and on an ancillary basis currency risk, risk associated with currency conversion

SFDR CLASSIFICATION²

The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.

DISCLAIMER

This document has been drawn up by ODDO BHF AM SAS. Potential investors should consult an investment advisor before subscribing to the fund. The investor is informed that the fund presents a risk of capital loss, but also many risks linked to the financial instruments/strategies in the portfolio. In case of subscription, investors must read the Key Information Document (KID) and the fund's prospectus in order to acquaint themselves with the detailed nature of any risks incurred and all costs. The value of the investment may vary both upwards and downwards and may not be returned in full. The investment must be made in accordance with investors' investment objectives, their investment horizon and their capacity to deal with the risk arising from the transaction. ODDO BHF AM SAS cannot be held responsible for any direct or indirect damages resulting from the use of this document or the information contained in it.
