WHAT IS THIS PRODUCT?

TYPE

Pilotage Sélection Défensive is a UCITS under Directive 2009/65/EC, taking the form of a *Fonds Commun de Placement*.

TERM

The Fund was created on 1 June 2012 for a term of 99 years.

The management company may liquidate the product if the assets fall below the regulatory minimum, or at its discretion in accordance with the legal requirements.

OBJECTIVES

The Fund’s investment objective is to outperform its benchmark, 75% JP Morgan Global Euro Hedged dividends reinvested + 25% MSCI World dividends reinvested, by investing in bond and equity markets, mainly through investment funds on global markets, over a minimum investment horizon of two years.

The Fund is managed on a discretionary basis. There are two stages to the investment process: a global macroeconomic analysis and fund selection according to qualitative and quantitative criteria. The Fund is managed actively with reference to its benchmark. The Fund’s composition may deviate significantly from that of the benchmark index.

The Fund shall be exposed to the global markets. No geographic or sector allocation will be made at this stage. Exposure to emerging markets will be limited to 25% of the Fund’s net assets.

The Fund may have exposure of:

- between 0% and 40% of its net assets in equity markets of all capitalisations, exclusively through investment funds;
- between 0% and 100% of the net assets in fixed income products.

Up to 20% of the Fund’s net assets may be invested in bonds, transferable debt securities or money market instruments with an official rating of at least BBB- (S&P or equivalent, or using the Management Company’s internal rating) issued by governments or companies specifically in OECD member states. The Management Company does not use the ratings issued by rating agencies automatically or in isolation, as it also applies its own internal analysis. In the event of a downgrade, the Management Company will take the interests of unitholders, market conditions and its own analysis of these products into account when respecting rating limits.

The Fund may be fully invested in other funds. The underlying assets of fixed income investment funds may be investment grade government or corporate securities or high yield securities or unrated securities issued by issuers in any region. Funds invested in high yield securities shall be limited to 20% of the Fund’s net assets. Up to 100% of the Fund’s net assets may be exposed to currency risk. Up to 10% of the Fund’s net assets may also be exposed to commodities through funds that invest in companies belonging to this sector.

These investment funds will be French or foreign UCITS under Directive 2009/65/EC that may not invest more than 10% of their assets in units or shares of other UCITS, AIFs or investment funds or, within the limit of 30% of the Fund’s assets, investment funds, French AIFs or AIFs from other EU member states, or investment funds established under foreign law. The units or shares of these AIFs and investment funds must meet the four criteria of article R.214-13 of the French Monetary and Financial Code. The Fund may invest up to 35% in investment funds managed by ODDO BHF Group.

The Fund may invest in forward financial instruments to gain exposure to or hedge against equity/interest rate/currency/credit risk. However, the level of equity exposure shall not exceed 40% of the Fund’s net assets.

The Fund’s maximum exposure to the instruments (debt securities, funds and derivatives) may not exceed 200% of net assets, it being understood that the maximum exposure is the sum of the net exposures to each of the markets (equity, fixed income, money, credit) to which the Fund is exposed (the sum of long and hedging positions).

The Fund accumulates its income, as decided by the Management Company on a yearly basis.

INTENDED RETAIL INVESTOR

This Fund is suitable for investors seeking exposure through a tactical allocation mainly to fixed income markets, and to equity markets subject to a maximum of 40%, over a recommended investment horizon of two years and who are willing to accept the risks arising from such exposure. WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

RISK INDICATOR

The risk indicator assumes you keep the product until the end of the recommended holding period, i.e. two years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you. Currency risk: you will be paid in a different currency; your actual gain will therefore depend on the exchange rate between the two currencies. This risk is not taken into account in the above indicator:

Other materially relevant risks not taken into account in the indicator:

Other risks not taken into account in the risk indicator may be materially relevant. They include:

risk linked to the use of overexposure: the Fund may use derivatives to generate overexposure. The risk therefore relates to a fall in the net asset value of the Fund if market developments are adverse.

liquidity risk

counterparty risk

As this product does not offer protection from market hazards, you could lose some or all of your investment.

WHAT HAPPENS IF ODDO BHF ASSET MANAGEMENT SAS IS UNABLE TO PAY OUT?

The product is a co-ownership of financial instruments and deposits separate from the portfolio's Management Company. In the event of the company's insolvency, the product's assets, which are held by the custodian, would be unaffected. In the event of the custodian's insolvency, the risk of financial loss on the product would be mitigated by the legal segregation of the custodian's assets from the product's assets.
