Yield to Maturity (cash excluded)**	4.23
Yield to worst**	3.15
Average maturity (year)	3.58
Modified duration	1.73
OAS Spread (bp)	310

Investment strategy

The Fund's investment strategy is to manage, on an active and discretionary basis, a diversified portfolio composed of traditional bonds (and convertible bonds up to 10% of net assets) with high yields and ratings between BB+ and B- according to Standard & Poor's or equivalent ratings based on the Management Company's own analysis, with maturities of a maximum of six months and one day after 31 December 2023 (final maturity of the product or early redemption options at the issuer's discretion) and issued mainly by corporate issuers with their registered office in Europe.

Annual performance (rolling 12 months)

from		10/31/17	10/31/18
to		10/31/18	10/31/19
Fund		-3.5%	0.5%

Past performance is not an indication of future results. Performance may vary over time.

Calendar performance (from January 01 to December 31)

	2014	2015	2016	2017	2018
Fund				5.6%	-7.4%

Annualized volatility

	1 year	3 years	5 years
Fund	3.99%		

Futures and options are not included in the calculation of the yield. The Yield to Maturity is calculated before currency hedging. The Yield to Worst is calculated after currency hedging.

The Yield to Maturity (YTM) is the estimation at a certain date of the expected rate of return of a bond portfolio if the securities are held to maturity. It does by no means constitute a promised return. It can, therefore, be affected by interest rate risks, default risks, reinvestment risks and the fact that bonds may not be held until maturity.

The Yield to worst (YTW) is the estimation at a certain date of the worst expected rate of return of a bond portfolio of which some of the securities would not be held until maturity but redeemed at the discretion of the issuer (call). It does by no means constitute a promised return. It can, therefore, be affected by interest rate risks, default risks, reinvestment risks and the fact that bonds may not be held until maturity.

*Definitions of the financial indicators used are available for download on the website www.am.oddo-bhf.com under the heading "Regulatory information".

(1) Risk/return scale in a range from 1 (lowest risk) to 7 (highest risk). This indicator is not constant and is updated if the risk/reward profile of the fund changes over time. The lowest category does not mean a risk-free investment. Historical data, such as is used to calculate the risk/return ratio, may not be a reliable indication of the future risk profile of the Fund. There is no guarantee that the management objectives in terms of risk and return will actually be met.

Portfolio manager comment

In mid-October, after months of trade tensions, Donald Trump announced that the US and China had reached a partial trade deal, postponing the planned increase in tariffs on USD 250 billion of Chinese imports. However, this "mini deal" is still only provisional. In Europe, the United Kingdom was granted an additional three-month extension to get the withdrawal agreement through parliament and called general elections for 12 December. Initial GDP growth figures for Q3 indicate stable (albeit moderate) growth in the US, France, Italy and the Euro Zone. Economic data in the Euro Zone continued to worsen, though, with the manufacturing PMI figures in October signalling the sector's second-largest contraction for seven years. In terms of monetary policy, the Fed lowered its rates by 25 bps in October, whereas the ECB maintained the status quo at Mario Draghi's last meeting at the institution's helm.

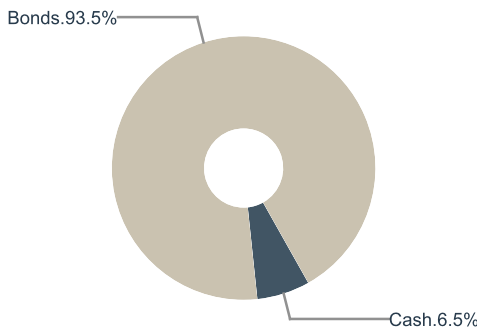

Bolstered by hopes of an end to the trade war and despite a somewhat lacklustre Q3 reporting season, bond yields spiked (+17 bps to 1.8% for the US 10-year yield, +22 bps to -0.35% for the German 10-year yield) as investors turned away from safe haven assets. On the credit market, the iTraxx Xover index widened by 7 bps to 239 bps over the month, whereas the iTraxx Main narrowed by 3 bps to 114 bps.

In a context of rallying equity markets (+0.9% for the STOXX 600), the high yield market bucked the trend by contracting (-0.25%) as a result of substantial underperformance by the services (-1.7%), retail (-1.7%) and consumer goods (-1.0%) sectors. Conversely, health care rallied strongly (+2.3%). Lastly, within the high yield segment, we should note the differing performances of issuers rated BB (+0.15%) and those rated B (-0.72%).

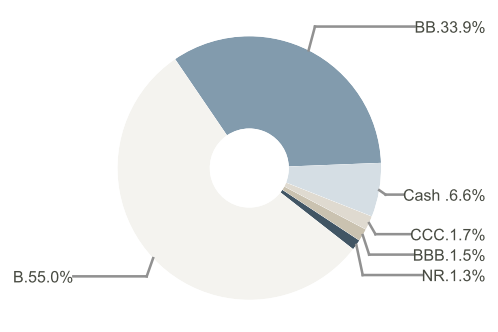

We took advantage of the buoyant primary market in October by taking part in new issues by Crown and Ziggo. We also continued to reduce the portfolio's idiosyncratic risk by reducing our exposure to Codere, Rekeep and Jaguar.

The worldwide slowdown in industrial activity is now affecting the results published by a number of companies and leading to reduced visibility in terms of future performance. In the context of a macroeconomic slowdown and persistently high levels of idiosyncratic risk, we remain cautious and selective in our investments.

Breakdown by asset class

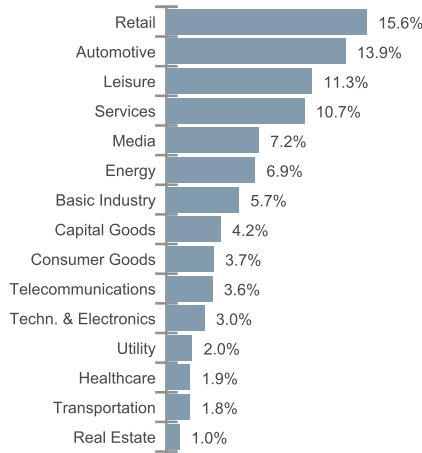

Breakdown by rating

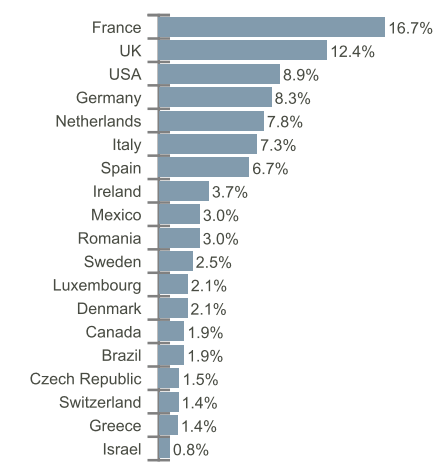

The breakdown takes into consideration the rating of the issuer or the guarantor in the case of unrated issues.

Sector breakdown

Geographic breakdown

Main portfolio issuers

Issuer	Weight	Sector	Country
