Our investment approach

- Bottom-up driven bond selection based on fundamental credit analysis conducted by an experienced team
- ESG integration as a central component of our investment process
- A best-in-universe approach completed by a Dialogue & Engagement process
- Early identification of improving or deteriorating credits
- Team based approach
- Active management of interest rate risks

Our investment universe

- Focus on Euro-denominated bonds with investment grade rating
- Several exclusion filters are deployed in the ESG integration process:
 - 1) Norm-based exclusion filter – UN Global Compact
 - 2) Sectoral exclusion filter – Exclusion of industries such as
 - Tobacco, gambling, oil sand & shale gas, weapons, GMO & pesticides, coal mining and production of coal-based energy, and nuclear sectors
 - Elimination of the lowest ESG ratings with a focus on human capital and corporate governance according to our proprietary analysis
- As a consequence, these exclusions result in a meaningful reduction of the investable universe

Why invest in corporate bonds?

- Potentially attractive risk adjusted returns make corporate bonds a core investment
- Significant yield pick up versus high grade government bonds
- Investment grade corporate bonds are a relative defensive asset due to low volatility and low default risk - compared to Non-Investment Grade bonds, so-called speculative High Yield bond – as observed in the past.

Historical Volatility² (10Y p.a.)

- IG Corporate Bonds historically with moderate volatility compared to other fixed income segments & equity

Yield levels: government vs. corporate bonds

- Bund yields at historical lows
- Corporate Bond yields significantly higher compared to Bund yields
