Information on investments and management

Classification:

“International Equities” fund.

Distributable income allocation:

Net income allocation: Accumulation

Allocation of net realised capital gains or losses: Accumulation

Fund of funds:

Up to 10% of net assets.

Investment objective:

The Fund’s investment objective is to outperform the MSCI Emerging Markets index (net dividends reinvested) over the recommended investment horizon of five years, after deduction of management fees, through a selection of equities that feature heavily in this index.

Benchmark index:

The benchmark is the MSCI Emerging Markets (net dividends reinvested). MSCI Limited is the administrator of this benchmark. The Fund’s benchmark is the MSCI Emerging Markets index in USD converted into EUR, which tracks the performance of emerging market mid and large cap stocks.

It is calculated each day by MSCI on the basis of closing prices, dividends reinvested.

Further information about the benchmark is available on the MSCI’s website (www.msci.com). The benchmark administrator (MSCI) is entered on the register for administrators and benchmarks maintained by the ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the benchmarks used, describing the actions to be taken in the event that a benchmark materially changes or ceases to be provided.

Investors are advised that the benchmark index does not constitute a limitation on the Fund’s investment universe. It allows the investor to assess the Fund’s risk profile. The Fund’s performance and composition may differ substantially from those of its benchmark index.

Investment strategy:

The Fund will invest at least 70% of its net assets in equities included in the MSCI Emerging Markets index.

Shares are selected for this Fund using a proprietary quantitative tool (Algo 5). Algo 5 assesses the shares of issuers located in major emerging markets (Brazil, China, India, South Korea, etc.) on the basis of five factor-based strategies:

- 1. Valuation:** selection of fundamentally undervalued shares, owing in particular to a high level of dividend yield or a poor P/E ratio.
- 2. Momentum:** selection of shares whose medium-term performance exceeds the market average. In particular, the rate of price changes over the previous 12 months (momentum) and a trend strength indicator are analysed.
- 3. Risk:** selection of stocks with low risk indicators, such as a beta coefficient of less than 1 and volatility below the market

average.

4. **Growth:** selection of securities with high growth, particularly based on an analysis of growth in earnings and dividends.

5. **Revisions:** selection of securities viewed favourably by analysts, by taking into account analysts' revisions to their opinions in particular.

Within each strategy, shares with the best scores are selected in order to create a diversified equity portfolio. Allocation by strategy may be adjusted based on market conditions. The investment manager does not make any discretionary investment decisions.

The Fund is not hedged against currency risk and up to 100% of its net assets will be exposed to this risk. The Fund's exposure to all markets and all asset classes may not exceed 200% of the Fund's net assets.

• Principal category of assets used (excluding embedded derivatives):

o Equities:

At least 70% of the Fund portfolio is permanently invested in equities that feature in the MSCI Emerging Markets index.

o UCI shares or units:

Up to 10% of the Fund may be invested in shares or units of:

- French or foreign UCITS that cannot invest more than 10% of their assets in units or shares of other UCITS, AIFs or investment funds,
- French AIFs or AIFs established in other Member States of the EU,
- investment funds incorporated under foreign laws.

The units or shares of these AIFs and investment funds must meet the four criteria under article R 214-13 of the French Monetary and Financial Code, namely: (i) that they are subject to regulations equivalent to those applicable to UCITS and that there is cooperation between the AMF and the regulatory body of the AIF; (ii) that the level of protection granted to unitholders is equivalent to that of UCITS; (iii) that they issue semi-annual and annual reports explaining their activities; and (iv) that they must not themselves invest over 10% of their assets in units or shares of other UCITS, AIFs or foreign investment funds.

These funds may be managed by ODDO BHF Asset Management SAS and/or ODDO BHF Asset Management GmbH. The investment strategies of these funds will be compatible with the Fund's investment strategy.

1) Derivatives:

The Fund may invest in all financial futures or options traded on regulated or organised markets or over-the-counter in France and other countries, subject to the limit of 200% of the net assets. The Fund may use futures or options to hedge or increase the portfolio's exposure to equities, business sectors or market indices, in order to achieve the specified investment objective. It may also use forward currency contracts or currency swaps (used to hedge the currency risk linked to holding assets denominated in foreign currency).

The Fund will not use total return swaps.

2) Securities with embedded derivatives:

The investment manager excludes securities with embedded derivatives from the Fund's portfolio.

3) Deposits:

The Fund may use deposits to generate a return on cash holdings, up to the limit of 20% of its net assets.

Used as part of day-to-day management of the Fund's cash assets, these will contribute to achieving the investment objective based on their level of return.

4) Cash borrowings:

The Fund may borrow the equivalent of up to 10% of its net assets in cash in order to cover a temporary delay between incoming and outgoing funds relating to purchases and sales of securities issued on the market, or to cover large redemptions;

5) Temporary purchases and sales of securities:

To manage cash and maximise income, the Fund may carry out reverse repurchase agreements.

Any temporary purchases of securities shall all be conducted under market conditions and within the following limit:

up to 100% of the Fund's net assets in the case of reverse repurchase agreements.

These operations shall be performed on the debt securities and money market instruments referred to in the "Assets (excluding embedded derivatives)" section.

The targeted proportion of AUM to be used for such operations will be 5%.

Within the scope of these transactions, the Fund may receive financial guarantees (collateral). Their operation and characteristics are presented under "Collateral management".

Temporary purchases of securities may be carried out with ODDO BHF SCA or with EU banks that have a minimum credit rating of A-.

Additional information can be found under the heading "Fees and expenses".

For further information, please refer to the Fund's annual report.

6) Collateral management:

Within the scope of OTC financial derivatives transactions and temporary purchases of securities, the Fund may receive financial assets as guarantees.

The purpose of receiving financial guarantees is to reduce the Fund's exposure to counterparty default risk. They will consist solely of cash.

As an exception to the above, and only in the case of reverse repurchase operations, the Fund will receive traditional fixed income securities rated at least A- and/or securities issued by governments with a rating of at least AA- as collateral. In any case, the issue of the security received as collateral must be larger than EUR 100 million and the Fund's participation will be limited to 10%.

Transactions potentially requiring the use of financial guarantees shall be carried out with a European Union credit institution that may belong to the ODDO BHF group.

Any financial guarantees (collateral) received shall also, in accordance with regulations, comply with the following:

- criteria for liquidity, valuation (at least daily, and assets that are not highly volatile, except for obtaining adequate discounts), issuer creditworthiness, correlation (independence vis-à-vis the counterparty) and diversification with maximum exposure to a given issuer of 20% of the net assets;
- it shall be held by the Custodian of the Fund or any third party, in a segregated account, subject to prudential supervision and which has no connection with the provider of the financial guarantees;
- financial guarantees received must be available for full execution by the Fund at any time without consulting the counterparty or the counterparty's consent;
- financial guarantees received as cash shall only be placed as deposits with eligible institutions or invested in top-tier government bonds or used in reverse repurchase transactions (provided that such transactions are concluded with credit institutions subject to prudential supervision and on the condition that the Fund is in a position to recall the total cash amount at any time, accounting for accrued interest) or invested in short-term money market UCIs;
- the financial guarantees shall not be reused.

Risk profile:

Your money will mainly be invested in financial instruments selected by the Management Company. These instruments are subject to the market's movements and fluctuations.

The risks identified by the Management Company and presented below are not exhaustive. Investors are responsible for forming their own opinion independently from that of the Management Company, assessing the risk of any investments they make, with the assistance of a financial investment adviser where applicable, and for ensuring that the investment envisaged is suited to their financial situation and ability to assume financial risks.

Please refer to the Key Investor Information Document for information on the risk category to which this Fund belongs.

In particular, the Fund will be exposed to the following risks:

- **Risk of capital loss:** The Fund is not guaranteed or protected; investors may not get back their initial investment in full.
- **Equity risk:** The Fund invests in one or more equity markets that may experience significant fluctuations. The Fund's net asset value could fall during periods in which the equity market is falling.
- **Emerging markets risk:** This risk is linked to the operating and monitoring conditions on emerging markets in which the Fund invests, which may deviate from the standards that exist on the large international markets and may be affected by various disruptions (such as changes in taxation or political stability, or a temporary lack of liquidity on these securities). These disruptions may trigger settlement/delivery problems likely to have an impact on the prices at which the fund may be obliged to liquidate its positions, which may then result in a sharp fall in the Fund's net asset value. The Fund may be fully exposed to emerging markets risk.
- **Risk associated with holding small and medium capitalisations:** The Fund may be exposed to small and medium capitalisations. Price fluctuations, both upward and downward, are more acute and more abrupt than for large capitalisations, and may therefore result in sharp variations in the net asset value. Furthermore, the low volumes traded on these markets may result in liquidity risk. This type of investment may affect the Fund's valuation and the prices at which the Fund may be obliged to liquidate its positions, particularly in the case of large redemptions, and may even make it impossible for the Fund to sell its holdings, as a result of which the Fund's net asset value may fall.
- **Currency risk:** This risk is linked to portfolios invested fully or partially in securities denominated in currencies other than the Fund's reference currency and corresponds to the variation in the exchange rate between these currencies and the Fund's reference currency. As such, the value a security may be affected by a change in the value of its reference currency against the euro, even though its value in its base currency may not change, thereby causing the net asset value of the Fund to fall.
- **Risk associated with commitments on forward financial instruments:** The Fund may use derivatives alongside securities in the portfolio, with an overall commitment of up to 100% of the net assets. The Fund's net asset value could fall if markets move unfavourably.
- **Counterparty risk:** This is the risk of a counterparty's collapse, causing it to default on payment. The Fund may be exposed

to the counterparty risk caused by the use of forward financial instruments contracted over-the-counter with credit institutions or contracts for the temporary purchase or sale of securities. The Fund is therefore exposed to the risk that one of these credit institutions may not be able to honour its commitments in connection with such instruments. Certain contracts exposing the Fund to counterparty risk may be concluded with a company belonging to the ODDO BHF group.

- **Liquidity risk of underlying assets:** Weak liquidity on a market makes it sensitive to significant movements in purchases/sales. This increases the volatility of the fund, the assets of which are listed or traded on this market, and may impact the valuation of these assets and, where applicable, the prices at which the Fund may be obliged to liquidate its positions. The lack of liquidity is particularly associated with certain geographic (emerging countries) and sector (small and mid caps) characteristics and with certain classes of securities in which the Fund may invest. In such cases, the net asset value of the Fund may therefore fall sharply.

A significant proportion of assets are invested in financial instruments that are sufficiently liquid but nevertheless liable, under certain circumstances, to have relatively weak liquidity, to the extent that this impacts on the liquidity of the Fund as a whole.

- **Risks associated with securities financing transactions and collateral management:** investors may be exposed to legal risk (arising from the legal documentation, the application of agreements and the limits imposed by them) and to the risk associated with the reuse of securities received as collateral, given that the net asset value of the FCP may vary depending on fluctuations in the value of the securities acquired through investment in cash received as collateral. In exceptional market conditions, investors may also be exposed to liquidity risk, making it difficult, for example, to trade certain securities.

- **Risks linked to the use of overexposure:** Taking into account the use of derivatives in particular, the Fund's maximum exposure to individual asset classes may not exceed 200% of the Fund's net assets. The risk therefore relates to a fall in the net asset value of the Fund if market developments are adverse. In the event of unfavourable changes in the strategies used, the net asset value may fall more significantly than the markets to which the Fund is exposed. This leverage has the effect of amplifying expected gains, but also heightens the risk of losses.

Investors are advised that the Fund's performance may fall short of its objectives.

Guarantee or protection: None (neither the capital nor the performance are guaranteed).

Subscribers and investor profile:

The units have not been, and shall not be, registered under the 1933 US Securities Act (hereinafter "the Act of 1933"), or under any law applicable in a US State, and the units may not be directly or indirectly assigned, offered or sold in the United States of America (including its territories and possessions) for the benefit of any US persons (hereinafter "US Persons"), as defined by US "Regulation S" under the Act of 1933 adopted by the Securities and Exchange Commission or SEC, except if (i) the units are registered or (ii) an exemption is applicable (with the prior consent of the Fund Management Company's CEO). The Fund is not, and shall not, be registered under the US Investment Company Act of 1940. Any resale or assigning of units in the United States of America or to a "US Person" may constitute a violation of US law and require the prior written consent of the Fund Management Company's CEO. Persons wishing to purchase or subscribe units shall be required to certify in writing that they are not "US Persons".

All unitholders must immediately inform the Fund if they become a "US Person". Any unitholder that becomes a US Person shall no longer be authorised to purchase new units and may be requested to dispose of their units at any time for the benefit of persons who do not have "US Person" status.

The term "US Person" has the same meaning in the Prospectus as the definition given in SEC Regulation S (Part 230 - 17 CFR 230.903). This definition of a "US Person" is available at <http://www.sec.gov/about/laws/secrulesregs.htm>

In accordance with the provisions of the Foreign Account Tax Compliance Act ("FATCA"), applicable as of 1 July 2014, if the Fund directly or indirectly invests in US assets, the income from these investments may be subject to 30% withholding tax. To avoid the payment of this 30% withholding tax, France and the United States have concluded an intergovernmental agreement whereby non-US financial institutions ("foreign financial institutions") undertake to set up a procedure to identify direct or indirect investors with US taxpayer status and transmit certain information about these investors to the French tax authorities, which will communicate it to the US tax authorities ("Internal Revenue Service").

In its capacity as a foreign financial institution, the Fund undertakes to comply with FATCA and to take any measures required by the aforementioned intergovernmental agreement.

Except for these restrictions, the Fund is open to all investors, while bearing the following in mind.

- **CR-EUR units:** CR-EUR units are intended for all investors, including institutional investors (mutual benefit societies, pension funds, insurance companies), cash account managers of large caps, and particularly natural persons.

- **GC units:** GC units are reserved for (i) insurance companies approved by ODDO BHF Asset Management SAS, to represent unit-linked products subscribed as part of "advisory management" contracts in their range and for (ii) ODDO BHF SCA clients also having signed an advisory agreement with an ODDO BHF SCA financial investment advisory partner.

- **CN-EUR units:** CN units are available solely at the discretion of the Management Company and will not pay any distribution fees or rebates. Units reserved for (i) investors subscribing via an intermediary providing the service of investment advice on an independent basis pursuant to MiFID II, (ii) investors subscribing via a financial intermediary on the basis of a fee agreement concluded between the investor and the intermediary and mentioning that the intermediary is exclusively paid by the investor, (iii) companies providing the service of portfolio management pursuant to MiFID II, (iv) UCIs managed by ODDO BHF Group entities, and (v) ODDO BHF SCA when providing the service of investment advice on the basis of a written fee agreement

concluded with its client.

- **CI-EUR units:** Units only accessible to eligible counterparties and professional investors as per Directive 2014/65/EU (or “MiFID II”).

• **Typical investor profile:** The typical investor profile is characterised by low risk aversion.

The amount that is appropriate to invest in this Fund depends on your personal wealth. To determine this amount, investors should consider their personal assets, their current financial needs and those in five years as well as their willingness to accept risks or their preference for a more prudent investment. It is also highly recommended that investors sufficiently diversify their investments so as not to be exposed solely to the risks of this Fund.

• **Recommended investment horizon:** 5 years.

Tax regime:

As of 1 July 2014, the Fund shall be governed by the provisions of Appendix II, point II.B. of the Agreement (IGA) signed on 14 November 2013 between the government of the French Republic and the government of the United States of America so as to improve compliance with tax obligations at an international level and implement the act governing compliance with these obligations for foreign accounts (FATCA).

This prospectus does not purport to set out the tax implications for investors of subscribing, redeeming, holding or selling the Fund’s units. These implications will vary, depending on the laws and practices that apply in the country of residence, domicile or incorporation of the unitholders and on their personal situations.

Abroad, in the countries where the Fund invests, capital gains on the sale of securities and income from foreign sources received by the Fund may be subject to tax, generally in the form of withholding tax. The amount of withholding tax due may be reduced or waived when the governments in question have signed tax treaties.

Depending on your tax status, your country of residence or the jurisdiction from which you invest in the Fund, any capital gains and income resulting from the holding of units of the Fund may be subject to taxation. We advise you to consult a tax advisor in relation to the potential consequences of purchasing, holding, selling or redeeming units of the Fund according to the laws of your country of tax residence, ordinary residence or domicile.

The Management Company shall accept no responsibility whatsoever for the tax consequences that may arise for investors following a decision to purchase, hold, sell or redeem units of the Fund.

Redemption of unit followed by a subscription: as the Fund is made up of several unit classes, a conversion from one class of units by means of a redemption followed by a subscription of another class of units constitutes, for tax purposes, a sale in return for payment of a consideration likely to generate a taxable gain.

For further details, the full prospectus is available on request from the management company.

• *The Fund’s full prospectus and latest annual and semi-annual reports shall be sent to unitholders within one week upon written request to ODDO BHF ASSET MANAGEMENT SAS – 12, boulevard de la Madeleine – 75009 Paris. Tel.: 01 44 51 84 14. Email: information_oam@oddomeriten.eu*

• *Date of approval by the AMF: 29 October 1993*

• *Fund inception date: 19 November 1993*

activity report

Macroeconomic climate and equity market performances in 2018–19

While global growth remained at satisfactory levels throughout the first half of 2018, H2 brought substantial downgrading, with growth stalling in the US and on markets for risky assets late in the year. This trend was most prominent in Europe but also in evidence in emerging markets, including China. Conversely, the United States benefited greatly from measures taken by the Trump administration and grew by approximately 3% in 2018 despite a turbulent end to the year. Coupled with the ongoing drop in unemployment (3.7% and falling) and early signs of wage growth, it is easy to see why the Fed raised rates four times in 2018. However, the Fed's most important move was to begin reducing the size of its balance sheet (by around USD 50 billion per month). This resulted in lower market liquidity, which goes some way to explaining the periods of volatility seen in late 2018. Economic growth struggled to get back on an even keel in early 2019, resulting in an abrupt reversal of central banks' strategies. After central banks argued in Q1 that they needed to be patient before pursuing any further tightening, Q2 provided them with an opportunity to reiterate their ability to act in response to economic developments. The bond markets interpreted this positioning as indicating that central banks were preparing for an upcoming cycle of rate cuts at the Fed.

The second cause for concern was the resurgence of political risk, which has become entrenched in 2019, having been somewhat overlooked previously. If we consider the international picture, President Trump's protectionist rhetoric has already resulted in around USD 500 billion in Chinese imports being taxed at between 10% and 25%, despite hopes of an agreement in late March boosting the markets in early 2019. Brexit uncertainty and the row over the Italian budget loom large in Europe. Although a deal was ultimately struck between the UK and the European Commission, it was voted down in the UK parliament three times and eventually cost Theresa May her position. And while the UK was initially set to leave the European Union on 29 March 2019 with or without a deal, it is anyone's guess at this point what the outcome of Brexit will be given the powers of procrastination on display on both sides of the Channel. Emerging markets were not immune to political uncertainty, experiencing doubts over central bank independence (Turkey) and the election of candidates widely seen as populist (Brazil). The G20 in Osaka secured a brief ceasefire rather than an actual fresh start to discussions between US and Chinese negotiators.

In the Euro Zone in particular, corporate earnings forecasts have been regularly downgraded over the past year and are now around 5-7% lower than where they were a year ago. However, this negative momentum has not affected all sectors of the economy: banking, telecom and chemical stocks are prime examples of this. The situation is radically different in the United States, where companies have benefited from buoyant economic growth and budgetary measures resulting in profit rises of over 20%. The final point to note is that the poor performance of the equity markets means that valuation levels are a lot more attractive today than they were a year ago.

Performance

Year on year, the Fund's net performance was -5.28% in . For comparison, its benchmark index (the MSCI AC EX JAPAN) fell by 4.14% between 29 June 2018 and 20 January 2019 and its new benchmark index (the MSCI EMERGING MARKETS NR) rose by 4.67% between 21 January 2019 and 28 June 2019. The Investec Global Strategy Fd Asian Equity fund was the main drag on performance (-13.7% in over the period) and the State Inv ICVC Stew Asia Pacific Leaders Fund was the primary contributor (+0.64% in over the period).

Transactions

Profound changes were made to the management strategy over the course of the year under review. The fund is now managed through our proprietary quantitative selection model, Algo 5. The Algo 5 model seeks to create a portfolio of securities that manages risk and delivers consistent outperformance based on a robust quantitative structure whereby irrational and excessively intuitive factors are eliminated. The model selects stocks on the basis of five factor-based strategies: valuation, growth, momentum, revision and risk.

This new strategy was implemented for the first time at the end of January 2019. Significant changes were made to the portfolio as a result, with Tencent, Alibaba, Samsung and TSMC representing the largest positions. The fact that the model is reset to zero every three months meant that significant changes were made to the portfolio. If we compare the country weightings in the portfolio with those of the MSCI Emerging Markets index, we have greater exposure to China and Taiwan and less exposure to South Africa. We are favouring the finance sector over energy.

Outlook

The balance of risks has deteriorated somewhat over recent months, in particular as a result of uncertainty in relation to global growth, poorly managed political risk in countries such as the United States and a slight uptick in the volatility of risky assets.

Nonetheless, this marked slowdown in growth is not proof of a recession; risk premiums remain at high levels (especially in the equity market) as the price rally in H1 2019 was partially offset by the drop in sovereign bond yields and the marginal rise in corporate earnings. This means that investors (in particular those in Europe) are relatively well rewarded at present for taking risk in the context of an environment of persistently low interest rates. In other words, we believe that caution is the order of the day as 2019 draws to a close, but we would not go so far as to assert that the asset revaluations that occurred in H1 are, in and of themselves, enough of a reason to significantly cut the investment rate.

Regulatory information

- The Fund does not hold any financial instruments issued by companies linked to the Oddo BHF group.
- UCITS held by the Fund and managed by the management company at the Fund's reporting date: see annual financial statements in the appendices.
- Overall risk calculation method for the Fund: the method chosen by Oddo BHF Asset Management to measure the overall risk to the Fund is the commitment approach.
- Environmental, social and governance criteria:

The Fund does not take the three criteria relating to compliance with environmental, social and governance (ESG) objectives into account simultaneously. Full information about ESG criteria can be accessed on the Oddo BHF Asset Management website at the following address: www.am.oddo-bhf.com.

- Within the framework of its risk management policy, the portfolio management company establishes, implements and maintains a risk management policy and procedures that are effective, appropriate and documented, thereby allowing risks associated with its activities, processes and systems to be identified.

For further information, please consult the KIID of this UCI, and particularly the "Risk and reward profile" section, or its full prospectus, which are available on request from the management company or on the website www.am.oddo-bhf.com.

Code of ethics

- Management of intermediaries

The Management Company has implemented a policy for the selection and evaluation of intermediaries and counterparties. The evaluation criteria used are intermediary fees, quality of execution in view of market conditions, quality of investment advice, quality of research and analysis documents and quality of back-office execution. This policy may be consulted on the management company's website at www.am.oddo-bhf.com.

- Brokerage fees

FCP unitholders can consult the document entitled "Report on brokerage fees" on the management company's website at www.am.oddo-bhf.com.

- Voting rights

No voting rights are attributed to unitholders, decisions concerning the Fund being taken by the Management Company. The voting rights attached to the securities held by the Fund are exercised by the Management Company, which has the sole power to take decisions, pursuant to regulations in force. The Management Company's voting policy may be consulted at its registered office or online at www.am.oddo-bhf.com, in accordance with article 314-100 of the AMF General Regulation.

- Information on the remuneration policy

Regulatory information on remuneration is appended to this report.

Information on the efficient investment techniques and derivatives used in the fund

The ODDO BHF Algo Emerging Markets fund did not use efficient investment techniques or derivatives during the financial year.

Changes during the financial year

Significant changes have been made to the Fund's management and strategy.

These changes were listed in the letter to unitholders dated 9 January 2019, which is appended to this annual report.

SFTR reporting

Securities financing transactions in accordance with the SFTR: the fund did not engage in securities financing transactions during the financial year ended 28 June 2019.

Changes made to the Fund

A – Risk profile

Change to risk/return profile: YES

Risk/return profile increase: YES

Fee increase: NO

Changing the Fund's investment strategy and the exposure limits for particular asset classes will result in an increase in the Fund's risk/return profile.

Hence:

- The Fund will now invest directly in emerging market equities (at least 70%) and will no longer only be exposed to primarily Asian emerging markets through funds; and
- The Fund's overall market exposure has increased from 110% to 200% of your Fund's net assets. Regarding fees:
 1. Indirect fees associated with investments in funds of funds no longer apply; and
 2. The index used to calculate performance fees has changed. Previously, this was the MSCI Asia ex Japan. Following the change, the index used to calculate performance fees will be the MSCI Emerging Markets. In this regard, the Management Company has extended the performance fee calculation period to 30 June 2020, i.e. the following financial year-end, so that the new index is in force for at least 12 months. As such, no performance fees will be paid on 30 June 2019.

B – Change to the name, investment objective, benchmark index, investment strategy and composition of assets used by the Fund:

1 – Investment objective

The investment objective will be modified as part of this change.

Prior to the change, the Fund's investment objective was to outperform the MSCI AC Asia ex Japan index (net dividends reinvested) over the recommended investment horizon of five years through a selection of the best mutual funds invested in the markets of South-East Asia (excluding Japan).

The Fund's investment objective is now to outperform the MSCI Emerging Markets index (net dividends reinvested) over the recommended investment horizon of five years, after deduction of management fees, through a selection of equities from the major emerging markets that feature heavily in this index.

3 – Change in benchmark index

Prior to the change, the Fund's benchmark was the MSCI AC Asia ex Japan index (net dividends reinvested), which tracks the performance of mid and large caps in developed and emerging countries in Asia (excluding Japan).

Following the change, the MSCI Emerging Markets index (net dividends reinvested) will be the Fund's benchmark index. It tracks the performance of mid and large caps in major emerging countries.

4 – Investment strategy and composition of assets

As part of the change, the Fund's investment strategy and composition of assets have been revised.

Prior to the change, the investment manager selected funds that invested directly in shares of companies listed in South-East Asia (ex Japan) based on a series of quantitative and qualitative criteria.

The investment manager will now select shares included in the MSCI Emerging Markets index using a proprietary quantitative tool (Algo 5). Algo 5 assesses the shares of issuers located in major emerging markets (Brazil, China, India, South Korea, etc.) on the basis of five factor-based strategies.

Prior to the change, between 60% and 100% of the Fund's net assets were permanently invested in units or shares of funds that were themselves invested in equities issued in strong-growth countries, including primarily emerging Asian countries (Hong Kong, Indonesia, Malaysia, India, Taiwan, South Korea, China, etc.) and, on an ancillary basis, Latin American countries (Brazil, Chile, Argentina, Mexico, etc.) and other countries in the Asia-Pacific region (discretionary selection process). This exposure was achieved exclusively through funds; the Fund held no direct investments in shares.

At least 70% of the Fund may now be permanently invested in equities included in the MSCI Emerging Markets index.

In addition, prior to the change, the Fund was able to invest up to 20% of its assets in money market funds, whereas after the change, investments in funds, all asset classes combined, will be limited to 10% of the net assets.

Furthermore, the Fund’s overall exposure to the various asset classes was limited to 110% of the Fund’s net assets prior to the change.

After the change, the Fund’s overall exposure may be up to 200% of its net assets.

C – Change in custodian

The Management Company has also decided to change the custodian: the Fund’s custodian was ODDO BHF SCA and this will be Société Générale after the change.

The following changes have not been submitted for AMF approval and have not, therefore, been approved by the latter.

D – Change in administrative and accounting agent:

The Management Company has also decided to change the administrative and accounting agent: these tasks were performed by European Fund Administration France SAS (EFA France). Following the change, they will be conducted by Société Générale Securities Services Net Asset Value.

E – Fund name change

The Management Company has decided to change the name of the Fund to ODDO BHF Algo Emerging Markets in order to reflect the new strategy.

F – Creation of a unit class

The Management Company has decided to create a new “CI-EUR” unit class, denominated in euro. The minimum initial investment amount is EUR 250,000. CI-EUR units are reserved for eligible counterparties and professional investors as per Directive 2014/65/EU (“MiFID II”).

Their ISIN is FR0013353026.

G – Change in name of A units

In an effort by the Management Company to achieve consistency within the fund range, the decision has been made to change the name of A units (ISIN: FR0007475843).

Following the change, they will be called “CR-EUR” units. The other features of the units remain unchanged.

Important information for investors

We would like to remind you of the importance of reading the Key Investor Information Documents (KIIDs) and the Fund's prospectus.

The Key Investor Information Document, dated 21 January 2019, of the ODDO BHF Algo Emerging Markets Fund (formerly Sélection Multi Gérants Asie Emergente) will be available in French and English on the am.oddo-bhf.com website and upon request from the Management Company. The prospectus of the same date will be available in French and English on the am.oddo-bhf.com website and upon request from the Management Company.

Please do not hesitate to contact us if you require any additional information.

Regarding the risk profile change, several options are available to you:

- If you are happy with the change: no action is necessary on your part;
- If you are not happy with the change: you may exit the Fund free of charge, as no redemption charges are applied by the Fund;
- If you are undecided about the operation: we would encourage you to contact your usual financial adviser.

Yours faithfully,

Report on remuneration in application of the UCITS V Directive

1) Quantitative information

	Fixed remuneration	Variable remuneration (*)	Number of beneficiaries (**)
Total amount of remuneration paid from January to December 2018	8,988,654	16,005,480	162

(*) Variable remuneration awarded for the year

(**) Beneficiaries shall be understood as all OBAM employees having received remuneration in 2018 (Permanent contract/Temporary contract/Apprenticeship/Internship/Foreign offices)

	Senior managers	Number of beneficiaries	Members of staff with the ability to affect the risk profile of the Fund	Number of beneficiaries
Aggregate amount of remuneration paid for the 2018 financial year (fixed and variable*)	1,268,967	11	17,159,577	33

(*) Variable remuneration in respect of 2018

2) Qualitative information

2.1 Financial and non-financial criteria of remuneration policies and practices

2.1.1. Fixed remuneration

Fixed remuneration is determined on a discretionary basis in line with the market. This allows us to meet our targets for the recruitment of qualified and operational staff.

2.1.2. Variable remuneration

Variable remuneration paid within the Management Company is determined on a largely discretionary basis. As such, once fairly accurate estimates of the results for the year are available (mid-November), a budget for variable remuneration is determined and the various managers – in association with the group HRD – are invited to propose an individual budget breakdown.

This process takes place after the appraisal meetings, in which managers can discuss the quality of each employee’s professional performance with them for the year under way (in relation to previously established targets) and set targets for the next year. This appraisal has a highly objective component that addresses whether responsibilities have been met (quantitative targets, sales figures or how the management places in a specific ranking, performance fees generated by the fund managed), as well as a qualitative component (the employee’s attitude during the year).

It should be noted that, as part of their variable remuneration, some managers may receive a portion of the performance fees received by OBAM SAS. However, the amount to be allocated to each manager is determined in line with the abovementioned process and there are no individualised contractual packages that regulate the distribution and payment of these performance fees.

2.2 Information to manage the AIF’s risk profile and measures adopted to avoid and manage conflicts of interest

The management company has decided not to make a provision for remuneration that is directly linked to the fund’s performance. The Remuneration Policy consequently promotes the healthy and effective management of risk and does not encourage risk-taking that would run counter to the risk profiles, the regulations and governing documents of the AIFs.

2.3 Decision-making procedure for determining the remuneration policy

The Management Body of the remuneration policy is responsible for drawing up, approving and monitoring the remuneration policy. It must ensure that the remuneration policy encourages employees to take risks in line with the risks taken by the funds managed by the Management Company, the investors having placed their assets in these funds and the Management Company itself.

OBAM SAS has decided that the Management Body, within the meaning of the variable remuneration policy, will be composed of members of the Company’s Management (currently composed of a Chair and a Deputy Managing Director). As such, the Management Body is responsible for ensuring the approval of and compliance with the variable remuneration policy of OBAM SAS. It is also responsible for ensuring the latter is implemented.

For the purposes of conducting any required auditing activities and making any adjustments, the Management Body shall meet at least once a year in order to review the remuneration policy of OBAM SAS and consider any changes that could be justified by regulatory developments or by an internal change at OBAM SAS.

As part of its analysis of the variable remuneration policy, the Management Body will be assisted by the Group’s Human Resources department, which supports it in the implementation of the variable remuneration policy, as well as by the various Control and Audit teams of the Company and the Group.

The Management Body will be briefed by employees designated as being “risk takers” within the meaning of the regulations and practices of the Company and, more broadly, of the Group. The ODDO BHF Group has decided to have only one Remuneration Committee, the supervisory responsibilities of which extend to both entities regulated by the CRD IV Directive and those falling under the AIFMD and UCITS V. Members of the Remuneration Committee are representatives of the Monitoring Body of ODDO BHF SCA, the parent company of OBAM SAS, and are therefore independent of the Management Company.

2.4 Changes to the remuneration policy made during the last financial year

No changes to the remuneration policy were apparent in the annual review of the remuneration policy provided for under points I.3 and I.4 of article 314-85-2 of the AMF General Regulation.

statutory auditor's report

*ODDO BHF ALGO EMERGING MARKETS FCP
Statutory auditor's report on the annual financial statements
Financial year ended 28 June 2019*

Statutory auditor's report on the annual financial statements Financial year ended 28 June 2019

Dear unitholders of the FCP,

Opinion

Following our appointment by the management company, we have audited the annual financial statements of the ODDO BHF ALGO EMERGING MARKETS FCP for the financial year ended 28 June 2019, which are appended to this report.

In our opinion, the annual financial statements, in accordance with French accounting rules and principles, give a true and fair view of the financial position and assets and liabilities of the FCP and of the results of its operations at the end of the financial year.

Basis for the opinion

Audit framework

We have conducted our audit in accordance with professional standards applicable in France. We consider that the evidence gathered is pertinent and sufficient to serve as a basis for our opinion.

Our responsibilities in light of these standards are described in this report in the section entitled "Responsibilities of the statutory auditor in relation to auditing the annual financial statements".

Independence

We carried out our audit in accordance with the independence rules applicable to us, for the period from 30 June 2018 to the date on which our report was issued. In particular, we refrained from providing the services prohibited by the code of ethics of the statutory audit industry.

Justification of evaluations

In accordance with the provisions of articles L.823-9 and R.823-7 of the French Commercial Code regarding the justification of our evaluations, we hereby inform you that our most important evaluations, in our professional opinion, were focused on the appropriateness of the accounting principles applied, on whether material estimates used were reasonable, and on whether all accounts were presented as per the accounting standards applicable to undertakings for collective investment with variable capital, particularly as regards financial instruments held in the portfolio.

The evaluations were made in the context of the audit of the annual financial statements, taken as a whole, and the formation of the opinion expressed herein. We have not expressed an opinion regarding individual items in the annual financial statements.

Verification of the management company's management report

We have also carried out the specific verifications required by law in accordance with the professional auditing standards applicable in France.

We have no comment as to the fair presentation and conformity with the annual financial statements of the information given in the management company's management report.

Responsibilities of the management company in relation to the annual financial statements

The management company is responsible for drawing up annual financial statements giving a fair view in accordance with French accounting rules and standards, as well as implementing the internal control system it deems necessary for the drafting of annual financial statements free of material misstatements, whether as a result of fraud or error.

When drawing up the annual financial statements, it is incumbent upon the management company to evaluate the ability of the FCP to continue its operations, to present in these financial statements, where applicable, the necessary information regarding continuity of operations and to apply the going concern accounting principle, unless there is a plan to wind up the FCP or end its activities.

The annual financial statements were prepared by the management company.

Responsibilities of the statutory auditor in relation to auditing the annual financial statements

It is our responsibility to draft a report on the annual financial statements. Our objective is to obtain reasonable assurance that the annual financial statements, viewed in their entirety, are free of material misstatement. Reasonable assurance constitutes a high level of assurance, although not a guarantee, that an audit carried out in accordance with the standards of professional conduct allows for the systematic detection of material misstatements. Such misstatements may result from fraud or error and are considered to be material when it is reasonable to expect that they may, taken individually or collectively, influence economic decisions that readers of the financial statements may make based on them.

As stipulated in article L.823-10-1 of the French Commercial Code, our certification of the financial statements does not constitute a guarantee of the viability or quality of the management of your FCP.

As part of an audit carried out in accordance with the standards of professional conduct applicable in France, the statutory audit shall exercise its professional judgement throughout this audit. Furthermore:

- it identifies and evaluates the risk that the annual financial statements may include material misstatement, whether resulting from fraud or error, defines and implements auditing procedures in response to these risks, and gathers the items it deems sufficient and appropriate as a basis for its opinion. The risk of material misstatement not being detected is considerably higher when it is the result of fraud rather than error, since fraud may involve collusion, falsification, voluntary omissions, false declarations or the circumvention of the internal control system;
- it assesses the internal control system that is relevant for the audit in order to define audit procedures that are appropriate in the circumstances, and not for the purpose of expressing an opinion on the internal control system;
- it evaluates the appropriateness of the accounting methods used and the reasonableness of the accounting estimates made by the management company, as well as the related information in the annual financial statements;

- it evaluates the appropriateness of the management company's application of the going concern accounting principle and, based on the information gathered, the existence or absence of significant uncertainty linked to events or circumstances likely to cast doubt on the FCP's ability to continue its operations. This evaluation is based on the information gathered prior to the date of its report; however, it should be noted that subsequent circumstances or events may cast doubt on the continuity of its operations. If it concludes that significant uncertainty exists, it draws the attention of readers of its report to the information provided in the annual financial statements giving rise to this uncertainty or, if this information has not been provided or is not relevant, it certifies the annual financial statements with reservations or refuses to certify them;
- it assesses the presentation of all of the annual financial statements and evaluates whether or not the annual financial statements depict the underlying operations and events fairly.

Done in Paris,

annual financial statements

1 accounting rules & methods

The annual financial statements are presented in accordance with the provisions of ANC Regulation 2014-01, as amended.

Asset valuation rules

The calculation of the net asset value per unit is subject to the following valuation rules:

- Financial instruments and transferable securities traded on regulated markets are valued at their market price using the following principles:
- The valuation is based on the last official market price.

The market price used depends on the market on which the instrument is listed:

European markets: Last market price on the net asset value calculation day
Asian markets: Last market price on the net asset value calculation day
North and South American markets: Last market price on the net asset value calculation day

The prices used are those known the following day at 9:00 (Paris time) and collected from financial information providers: Fininfo or Bloomberg. In the event that no price is available for a security, the last known price is used.

However, the following instruments are valued using the following specific valuation methods:

- financial instruments that are not traded on a regulated market are valued under the Management Company's responsibility at their foreseeable sale prices. In particular, transferable debt securities and similar securities that are not traded in large volumes are valued by means of an actuarial method; the reference rate used is that applied to issues of equivalent securities plus or minus, where applicable, a differential reflecting the issuer's specific characteristics. Nevertheless, transferable debt securities with low sensitivity and a residual maturity of less than or equal to three months may be valued using the straight-line method.
- financial contracts (futures, options or swap transactions concluded on over-the-counter markets) are valued at their market value or at a value estimated according to the terms and conditions determined by the Management Company. The method for valuing off-balance sheet commitments consists in valuing futures contracts at their market price and in converting options into the equivalent value of the underlying.
- Financial guarantees: in order to limit counterparty risk as much as possible while also factoring in operational constraints, the management company applies a daily margin call system, per fund and per counterparty, with an activation threshold set at a maximum of EUR 100,000 based on an evaluation of the mark-to-market price.

The prices used for the valuation of futures or options are consistent with those of the underlying securities. They may vary depending on where they are listed:

European markets: Settlement price on the NAV calculation day, if different from the last price.
Asian markets: Last market price on the NAV calculation day, if different from the last price.
North and South American markets: Last market price on the NAV calculation day, if different from the last price.

In the event that no price is available for a future or option contract, the last known price is used.

Securities subject to a temporary acquisition or sale agreement are valued in accordance with the regulations in force. Securities received under repurchase agreements are recorded on their acquisition date under the heading "Receivables on securities received under a repurchase agreement (pension)" at the value fixed in the contract by the counterparty of the liquidity account concerned. For as long as they are held they are recognised at that value plus the accrued interest from the securities in custody.

Securities transferred under repurchase agreements are withdrawn from their account on the date of the transaction and the corresponding receivable is booked under the heading "Securities transferred under a repurchase agreement (pension)"; they are valued at their

market value. The debt represented by securities transferred under repurchase agreements is recorded under the heading “Payables on securities transferred under a repurchase agreement (*pension*)” by the counterparty of the liquidity account concerned. It is maintained at the value determined in the contract plus any accrued interest on the debt.

- Other instruments: fund units or shares are valued at their last known net asset value.
- Financial instruments whose prices have not been determined on the valuation day or whose prices have been adjusted are valued under the management company’s responsibility at their foreseeable sale prices. These valuations and their justification are communicated to the statutory auditor at the time of the audit.

Accounting methods

Income accounting:

The interest on bonds and debt securities is calculated on the basis of interest received.

Transaction cost accounting:

Transactions are recorded excluding fees.

Valuation methods for off-balance sheet commitments

Off-balance sheet transactions are valued in terms of the value committed.

For futures, the value committed is equal to the price (in the currency of the Fund) multiplied by the number of contracts, multiplied by the nominal.

For options, the value committed is equal to the price of the underlying security (in the currency of the Fund), multiplied by the number of contracts, multiplied by the delta, multiplied by the nominal of the underlying.

For swaps, the value committed is equal to the amount of the nominal of the contract (in the currency of the Fund).

Management and administration fees

Fees charged to the Fund	Basis	Rate
Financial and administrative management fees not payable to the Management Company (statutory auditor, custodian, distributors, lawyers)	Net assets	CR-EUR units: Maximum 1.75% inclusive of tax
		GC units: Maximum 0.90% inclusive of tax
		CN-EUR units: Maximum 1.10% inclusive of tax
		CI-EUR units: Maximum 0.9% inclusive of tax
Transaction fees charged by third parties: - Management Company: 100 %	Payable on each transaction	Equities: depending on the markets, with a maximum of 0.50% inclusive of tax and a minimum of EUR 7.50 exclusive of tax for French equities and EUR 50 exclusive of tax for foreign equities
Performance fee (*)	Net assets	20% of the Fund's outperformance relative to the benchmark index (MSCI Emerging Markets – EUR, Net Return), provided that the Fund's performance is positive.

(*) A description of the method used to calculate the performance fee may be obtained from

the Management Company.

Performance fee: A performance fee based on a comparison between the performance of the unit class and that of the benchmark index over the Fund's reference period.

- The performance fee calculation method seeks to determine the "value created by the manager" in absolute terms: this means comparing sums received (i.e. subscriptions) with sums returned (i.e. redemptions) + assets under management (i.e. the total net asset value).
- Sums received are represented by the "indexed NAV" (or fictitious fund), which is the point of comparison. The indexed NAV is calculated in the same manner as a meter: each time the net asset value is calculated, subscriptions from T-1 are indexed using the performance of the comparison index from T-1 to T. This gives us a theoretical NAV, on the basis of which each subscription is immediately invested in the comparison index. The performance fee provision amount is not linked to the amount of subscriptions: for example, if the book NAV rises by EUR 1 million (following a subscription), the indexed NAV will rise by the same amount, meaning the performance fee provision amount is unaltered.

In the event of redemption, the outperformance linked with redemptions shall be subject to a specific provision, separate from the provision for outperformance on assets under management. The outperformance linked to redemptions is defined as a proportion (i.e. the number of units redeemed divided by the total number of units) of the outperformance on assets under management. This is calculated in the same manner as a meter and allows for the "crystallisation" of the provision for the outperformance corresponding to the redeemed shares. The indexed NAV is also adjusted by the redemption ratio. Hence, in the case of redemptions, the provision corresponding to the outperformance of the total NAV is transferred to the provision corresponding to the outperformance of the redeemed shares. However, the total provision is not linked to the amount of redemptions. The outperformance provision linked to redemptions is definitively allocated to the management company and deducted at the end of the financial year.

The Fund's performance is determined on the basis of its book value after taking into account fixed management fees and before deduction of the performance fee.

Once the Fund records a positive performance that exceeds that of its benchmark index in a given reference period, a provision of a maximum of 20% of this outperformance is established upon each NAV calculation.

In the event the Fund underperforms its benchmark index between two net asset values, any previously accumulated provision shall be reduced accordingly. The amounts deducted from the provision cannot exceed the amount previously accumulated.

This variable fee will only be definitively transferred to the Management Company at the end of the reference period and only if, over the reference period, the Fund's performance is positive and exceeds that of its benchmark index. It is deducted from the last NAV calculation of the financial year and paid annually to the Management Company, provided that on that date the reference period is at least equal to one year.

Where applicable, the performance fee shall be paid on the closing date of the Fund's financial year and for the first time on 30 June 2012. As the Fund's benchmark changed on 21 January 2019, the Management Company has decided to extend the performance fee calculation period to 30 June 2020, on an exceptional basis, so that the new benchmark can be in place for at least 12 months. As such, no performance fees will be paid on 30 June 2019.

Net assets at the end of the financial year	54,584,720.99	65,133,824.95

3 additional information

3.1 Financial instruments: breakdown by legal or economic nature of the instrument

3.1.1. Breakdown of “Income from bonds and similar securities” by instrument type

	Traded on a regulated or similar market	Not traded on a regulated or similar market
Indexed bonds	-	-
Convertible bonds	-	-
Fixed rate bonds	-	-
Floating-rate bonds	-	-
Zero-coupon bonds	-	-
Participation certificates	-	-
Other instruments	-	-

3.1.2. Breakdown of “Debt securities” heading by legal or economic nature of the instrument

	Traded on a regulated or similar market	Not traded on a regulated or similar market
Treasury bills	-	-
Short-term debt securities (NEU CP) issued by non-financial issuers	-	-
Short-term debt securities (NEU CP) issued by banks	-	-
Medium-term debt securities (NEU MTN)	-	-
Other instruments	-	-

3.1.3. Breakdown of “sales of financial instruments” by instrument type

	Sales of securities received under a repurchase agreement	Sales of securities borrowed	Sales of securities acquired under repurchase options	Short sales
Equities	-	-	-	-
Bonds	-	-	-	-
Debt securities	-	-	-	-
Other instruments	-	-	-	-

3.1.4. Breakdown of off-balance sheet items by type of market (fixed income, equities, etc.)

	Fixed income	Equities	Forex	Other
Hedging transactions				
Commitments on regulated or similar markets	-	-	-	-
OTC commitments	-	-	-	-
Other commitments	-	-	-	-
Other transactions				
Commitments on regulated or similar markets	-	2,775,026.34	-	-
OTC commitments	-	-	-	-
Other commitments	-	-	-	-

3.2. Breakdown by type of interest rates for assets, liabilities and off-balance sheet items

	Fixed rate	Variable rate	Adjustable rate	Other
Assets				
Deposits	-	-	-	-
Bonds and similar securities	-	-	-	-
Debt securities	-	-	-	-
Temporary transactions on financial securities	-	-	-	-
Financial accounts	-	-	-	2,392,418.25
Liabilities				
Temporary transactions on financial securities	-	-	-	-
Financial accounts	-	-	-	-
Off-balance sheet				
Hedging transactions	-	-	-	-
Other transactions	-	-	-	-

3.3. Breakdown by residual maturity of assets, liabilities and off-balance sheet items

	0–3 months	3 months – 1 year	1–3 years	3–5 years	> 5 years
Assets					
Deposits	-	-	-	-	-
Bonds and similar securities	-	-	-	-	-
Debt securities	-	-	-	-	-
Temporary transactions on financial securities	-	-	-	-	-
Financial accounts	2,392,418.25	-	-	-	-
Liabilities					
Temporary transactions on financial securities	-	-	-	-	-
Financial accounts	-	-	-	-	-
Off-balance sheet					
Hedging transactions	-	-	-	-	-
Other transactions	-	-	-	-	-

3.4. Breakdown by listing or valuation currency of assets, liabilities and off-balance sheet items

This breakdown is provided for the major listing or valuation currencies, with the exception of the accounting currency.

By main currency	HKD	TWD	KRW	Other currencies
Assets				
Deposits	-	-	-	-
Equities and similar securities	15,143,904.07	6,983,511.74	5,615,167.11	19,090,656.55
Bonds and similar securities	-	-	-	-
Debt securities	-	-	-	-
UCIs	-	-	-	-
Temporary transactions on financial securities	-	-	-	-
Receivables	300,179.79	37,522.69	-	261,758.82
Financial accounts	-	-	-	710,408.71
Other assets	-	-	-	-
Liabilities				
Sales of financial instruments	-	-	-	-
Temporary transactions on financial securities	-	-	-	-
Payables	-	-	-	-
Financial accounts	-	-	-	-
Off-balance sheet				
Hedging transactions	-	-	-	-
Other transactions	-	-	-	2,775,026.34

3.5. Receivables and payables: breakdown by type

Details of items under the "other receivables" and "other payables" headings, including in particular a breakdown of currency forwards by type (purchase/sale).

Receivables	607,232.54
Currency forwards:	
Currency forward purchases	-
Total trading amount of currency forward sales	-
Other receivables:	
Coupons receivable	462,475.00
Guarantee deposits (paid)	136,986.30
Management fees paid to third parties	7,771.24
-	-
-	-
Other transactions	-
Payables	69,935.47
Currency forwards:	
Currency forward sales	-
Total trading amount of currency forward purchases	-
Other payables:	
Reserve for charges	62,562.52
REDEMPTIONS payable	7,372.95
-	-
-	-
-	-
Other transactions	-

3.6 Equity capital

Unit class issued/redeemed during the year:	Number of units	Subscriptions		Redemptions

Tax credit per unit transferred to unit holders (natural persons)⁽¹⁾	-	-	-	-	-
Accumulation per unit	5.98	22.93	8.63	-1.16	22.77

* The per-unit accumulation and distribution amounts and tax credits are expressed in the accounting currency of the Fund. The accumulation per unit corresponds to the sum of the income and capital gains and losses on the number of units outstanding. This calculation method has been applied since 1 January 2013.

⁽¹⁾ Pursuant to the tax instruction of 4 March 1993 of the Direction Générale des Impôts (the French department of revenue), the tax credit per unit is determined on the ex-dividend date by dividing the total amount of tax credits among the units outstanding on this date.
