Pilotage Sélection Défensive

(hereinafter the "Fund")

This Fund is managed by ODDO BHF Asset Management SAS

ISIN CODE: FR0011250315 - EUR - Accumulation

OBJECTIVES AND INVESTMENT POLICY

The Fund's investment objective is to outperform its benchmark, 45% EONIA + 40% JP Morgan Global Euro Hedged dividends reinvested + 15% MSCI World dividends reinvested, by investing in bond and equity markets, mainly through investment funds on global markets, over a minimum investment horizon of two years.

The Fund is managed on an active, discretionary basis. There are two stages to the investment process: a global macroeconomic analysis and fund selection according to qualitative and quantitative criteria.

The Fund shall be exposed to the global markets. No geographic or sector allocation will be made at this stage. Exposure to emerging markets will be limited to 25% of the Fund's net assets.

The Fund may have exposure of:

- between 0% and 30% of its net assets in equity markets of all capitalisation, through investment funds.

- between 0% and 100% of the net assets in fixed income products.

Up to 20% of the Fund's net assets may be invested in bonds, transferable debt securities or money market instruments with an official rating of at least BBB- (S&P or equivalent, or using the Management Company's internal rating) issued by governments or companies in OECD member states. The Management Company does not use the ratings issued by ratings agencies automatically or in isolation, as it also applies its own internal analysis. In the event of a downgrade, the Management Company will take the interests of unitholders, market conditions and its own analysis of these products into account when respecting rating limits.

The underlying assets of fixed income investment funds may be investment grade government or corporate securities or high yield securities or unrated securities issued by issuers in any geographical region. Funds invested in high yield securities shall be limited to 20% of

the Fund's net assets. Up to 100% of the Fund's net assets may be exposed to currency risk. Up to 10% of the Fund's net assets may also be exposed to commodities through funds that invest in companies belonging to this sector.

These investment funds will be French or foreign UCITS under Directive 2009/65/EC that may not invest more than 10% of their assets in units or shares of other UCITS, AIFs or investment funds or, within the limit of 30% of the Fund's assets, investment funds, French AIFs or AIFs from other EU member states, or investment funds established under foreign law. The units or shares of these AIFs and investment funds must meet the four criteria of article R.214-13 of the French Monetary and Financial Code. The Fund may invest up to 25% in investment funds managed by the Management Company ODDO BHF Asset Management SAS or ODDO BHF Asset Management GmbH.

The Fund may invest in forward financial instruments to gain exposure to or hedge against equity/interest rate/currency/credit risk. These transactions may lead to the Fund having total overexposure of up to 200% of the net assets. However, the level of equity exposure shall not exceed 30% of the Fund's net assets.

Subscription and redemption requests are centralised by the depositary every Paris stock exchange trading day until 17:45 (Paris time, CET/CEST) and executed on the basis of the net asset value of the following trading day.

The units accumulate their income.

Recommended investment horizon: 2 years

This Fund may not be appropriate for investors who plan to withdraw their money within this period.

RISK AND REWARD PROFILE

Historical data, such as is used to calculate the synthetic indicator, may not be a reliable indication of the future risk profile of the Fund. The risk profile is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment. The capital initially invested is not guaranteed.

Why is the Fund placed in category 3?

The Fund presents a modest level of risk due to the prudent allocation of its investments:

- 1) majority allocation, through UCITS or directly, to government or corporate bonds in any geographic area.
- 2) minority allocation, through UCITS, to equity markets of all capitalisations, without any geographic allocation, increasing the level of risk to the Fund.

Material risks to the Fund that are not taken into account in the indicator:

Credit risk: this is the risk of a downgrading of an issuer's credit rating or the risk of an issuer's insolvency.

Liquidity risk: the Fund invests in markets which may be affected by declines in liquidity. Low volumes of market transactions may have an impact on prices at which the manager opens or closes positions.

Counterparty risk: risk of a counterparty's default, causing it to default on payment. The Fund may be exposed to this risk resulting from the use of forward financial instruments or temporary purchases and sales of securities contracts negotiated over-the-counter with a credit institution if the latter is unable to honour its commitments.

Impact of financial techniques: taking into account the use of derivatives in particular, the Fund's maximum exposure to individual asset classes may exceed its net assets. In the event of unfavourable changes in the strategies used, the net asset value may fall more significantly than the markets to which the Fund is exposed.

If one of these risks were to materialise, the Fund's net asset value may fall.
