ODDO BHF Investissement

(hereinafter the "Fund")

This Fund is managed by ODDO BHF Asset Management SAS

ISIN: CR-EUR units - FR0000446692 - EUR - Accumulation

OBJECTIVES AND INVESTMENT POLICY

This Fund is classified as follows: International equities

The Fund's investment objective is to benefit from rises in Euro Zone and international equity markets and to outperform its benchmark, the MSCI All Countries World Index (Net return, EUR), dividends reinvested, converted into euro, over a minimum investment horizon of five years.

The manager determines the Fund's overall allocation between the various markets, then the allocation within the interest rate/equity/diversified sub-categories. The manager then invests on the basis of results, mostly from the range of funds managed by the Management Company. The Fund may invest in external UCIs if the desired allocation cannot be achieved through UCIs managed by ODD BHF Asset Management SAS or ODDO BHF Asset Management GmbH.

The Fund may have exposure of: between 75% and 100% of its net assets in equity funds regardless of market capitalisation, without any sector or geographic allocation (emerging market exposure will be limited to 25% of the net assets), up to 25% of its net assets in funds invested in Euro Zone and/or international debt securities, money market instruments and bonds. The Fund's exposure to funds invested in convertible bonds will be limited to 10% of its net assets. The funds' underlyings will be investment grade, high yield or unrated government or corporate issues of all maturities. In the event of a downgrade, the Management Company will take the interests of unitholders, market conditions and its own analysis of these fixed income products into account when respecting rating limits.

The Fund may invest up to 100% of its net assets (i) in units or shares of UCITS under European Directive 2009/65/EC, and (ii) up to 30% of its assets in EU AIFs and/or in foreign investment funds mentioned in R.214-25 that meet the criteria of article R.214-13 of the French Monetary and Financial Code. These funds may be managed by ODDO BHF Asset Management SAS and ODDO BHF Asset Management GmbH, and will be compatible with the Fund's investment strategy.

The Fund may primarily invest in UCITS managed by ODDO BHF Asset Management SAS or ODDO BHF Asset Management GmbH.

The Fund may invest up to 10% of assets in fixed, floating or revisable rate securities (linked to bond market or money market rates) in order to optimise cash management. These transferable debt securities shall be denominated in euro and issued by governments and public corporations or credit institutions in the Euro Zone rated higher than AA (Standard and Poor's, Moody's, Fitch or deemed equivalent by the Management Company) at the time of purchase. In the event of a downgrade, the Management Company will take the interests of unitholders, market conditions and its own analysis of these fixed income products into account when respecting rating limits.

The Fund may invest in financial futures traded on French or foreign regulated markets or over the counter to hedge the portfolio against and/or expose the portfolio to equity, interest rate and currency risks, and to hedge the portfolio against credit risk.

The use of forward financial instruments may lead to the Fund having overall exposure less than or equal to 110% of its net assets.

The Fund may also invest in financial instruments with embedded derivatives. This is done in order to hedge and/or increase the portfolio's interest rate and/or equity risk exposure and to hedge the portfolio's exposure to credit risks.

Subscription and redemption requests are centralised by the depositary every Paris stock exchange trading day until 17:45 (Paris time, CET/CEST) and executed on the basis of the net asset value of the following trading day. CR-EUR units accumulate their income.

Recommended investment horizon: 5 years

This Fund may not be appropriate for investors who plan to withdraw their money within this period.

RISK AND REWARD PROFILE

Historical data, such as is used to calculate the synthetic indicator, may not be a reliable indication of the future risk profile of the Fund. The risk profile is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment. The capital initially invested is not guaranteed.

Why is the Fund placed in category 5?

The Fund presents a high level of risk as at least 75% of its net assets are exposed to equities of all sizes, without any sector or geographic allocation. The Fund may therefore be exposed to small and mid caps, as well as to equities of emerging countries.
