A GLOBAL FUND INVESTED IN EQUITIES THAT BENEFIT FROM ARTIFICIAL INTELLIGENCE, ACROSS A VARIETY OF SECTORS

- One of the **pioneer funds** in the Artificial Intelligence (AI) thematic landscape: launch in 2018
- A truly **diversified fund**: invested, far beyond Tech, in a broad range of sectors that will leverage AI to develop new products and services, according to us
- A robust SFDR<sup>(1)</sup> article 9 strategy, based on **decarbonization**
- “Using AI to invest in AI”: ODDO BHF Artificial Intelligence aims to leverage the analytical power of AI
- The Fund may **invest up to 50%** of its net assets in equities whose registered office is located in non-OECD countries

**Main Risks:** ODDO BHF Artificial Intelligence is principally exposed to the following risks: **risk of capital loss, equity risk, mid-cap holding risk, volatility risk, liquidity risk of underlying assets, modelling risk and currency risk.** For more details about risks, please refer to page 5 of this document.

<sup>1</sup> The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider. | <sup>2</sup> The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. It scales in a range from 1 (lowest risk) to 7 (highest risk). The lowest category does not mean a risk-free investment. This indicator is not constant and is updated if the risk profile of the fund changes over time. Historical data, such as is used to calculate the risk indicator, may not be a reliable indication of the future risk profile of the Fund. There is no guarantee that the management objectives in terms of risk will actually be met. The risk indicator assumes you keep the product until the end of the recommended holding period. The actual risk can vary significantly if you cash in at an early stage and you may get back less. | <sup>3</sup> CR-EUR share class | <sup>4</sup> Morningstar quartile of CR-EUR share class in category "Sector Equity Technology"

# AI IS A REVOLUTION *reshaping every industry*

## A POWERFUL TREND

- AI, the ability of a program or machine to think & learn like a human, now allows for **large productivity increases**, regardless of companies' size, sector and geography, according to our analysis
- **Adoption speed** is thus set to significantly accelerate, from Tech companies firstly to then entertainment, media and pharma, in our opinion

**+35.4%\*\***

is the expected **annual growth rate 2019-2026** of AI, while the global technology industry is expected to grow by only 10%\*\*\*.

"In my lifetime, I've seen two demonstrations of technology that struck me as revolutionary.

The first time was in 1980, when I was introduced to a graphical user interface - the forerunner of every modern operating system, including Windows.

The second big surprise came just last year [...] meeting with the team from OpenAI."

*Bill Gates - March 21<sup>st</sup>, 2023*

## ARTIFICIAL INTELLIGENCE, GETTING CLOSER TO ITS "IPHONE MOMENT"

### ChatGPT bringing AI to the next level
