SFDR Classification²

The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.

Fund profile

INVESTMENT STRATEGY

The Sub-fund seeks high returns and capital growth. The Sub-fund invests in a portfolio, of which at least two-thirds are euro-denominated listed bonds issued by public or private companies, with no regional restriction, concentrating on lower quality issues (rated lower than investment grade).

Sustainalytics provides company-level analysis used in the calculation of Morningstar's Sustainability Score.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved.

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

Sustainable approach

THREE FUNDAMENTAL PILLARS

1 | Exclusions

- Norm-based: exclusion of companies that do not comply with certain international standards.
- Sector-based: total or partial exclusion of sectors or activities based on ethical considerations.

2 | ESG ratings

- Internal model based on a « Best-in-Universe » approach: a bottom-up, stock-picking approach that favors top-rated companies in the entire investment universe.

3 | Dialogue and engagement

- Systematic dialogue with low-ESG rated issuer (1/5)
- Divestment if no positive result within 18 to 24 months

Glossary - Definition of impact measurement indicators

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity). The choice of indicators is therefore crucial for the relevance of impact measurement.

We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

Carbon intensity

Source MSCI. We use scopes 1 (direct emissions) and 2 (indirect emissions related to electricity, heat or steam consumption) to calculate the carbon intensity, expressed in tonnes of CO2 equivalent per million € of revenues. Cash and derivatives are not covered.

Carbon metrics methodology: We updated our methodology of carbon intensity calculation.

Starting January 31st, 2023, when reported carbon values are unavailable or inconsistent, estimated carbon values are used.

The estimations are based on average carbon value (scope 1+2 emissions) of sectoral peers as a function of revenues

Fossil fuel exposure

Source MSCI. Percentage of revenue exposed to fossil fuels, based on MSCI' coverage rate for the portfolio and for the comparison index.

Carbon solutions exposure “green part”

Source MSCI. Percentage of revenue exposed to carbon solutions (renewable energies, sustainable mobility, etc.), based on MSCI' coverage rate for the portfolio and for the comparison index.

Implementation of Human rights policy

Percentage of companies in the portfolio that have implemented one or more initiatives to protect human rights compared to the benchmark.
