(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It rangesfrom 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Glossary - Definition of impact measurement indicators

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity). The choice of indicators is therefore crucial for the relevance of impact measurement.

We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

Carbon intensity

Source MSCI. We use scopes 1 (direct emissions) and 2 (indirect emissions related to electricity, heat or steam consumption) to calculate the carbon intensity, expressed in tonnes of CO_2 equivalent per million € of revenues.Cash and derivatives are not covered.
Carbon metrics methodology: We updated our methodology of carbon intensity calculation.
Starting January 31st, 2023, when reported carbon values are unavailable or inconsistent, estimated carbon values are used.
The estimations are based on average carbon value (scope 1+2 emissions) of sectoral peers as a function of revenues

Fossil fuel exposure

Source MSCI. Percentage of revenue exposed to fossil fuels, based on MSCI' coverage rate for the portfolio and for the comparison index.

Carbon solutions exposure “green part”

Source MSCI. Percentage of revenue exposed to carbon solutions (renewable energies, sustainable mobility, etc.), based on MSCI' coverage rate for the portfolio and for the comparison index.

Implementation of Human rights policy

Percentage of companies in the portfolio that have implemented one or more initiatives to protect human rights compared to the benchmark.
