PROSPECTUS

SICAV ODDO BHF

Société d'Investissement à Capital Variable Luxembourg

SUSTAINABLE FINANCE DISCLOSURE REGULATION

This Prospectus contains the information required to be disclosed under Regulation (EU) 2019/2088 and related Delegated Acts of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (SFDR).

The SICAV ODDO BHF (the "Company") is registered in the Grand Duchy of Luxembourg as an undertaking for collective investment pursuant to Part I of the Law of 17 December 2010 on undertakings for collective investment (the "2010 Law"), subject to disclosure for financial products referred to in article 8, paragraphs 1, 2 and 2a, and article 9 paragraph 1 to 4a of the Regulation (EU) 2019/2088, and article 5 and article 6 first paragraph of Regulation (EU) 2020/852 (Taxonomy Regulation). Such registration however does not imply a positive assessment by the supervisory authority of the quality of the shares of the Company (the "Shares") offered for sale. Any representation to the contrary is unauthorised and unlawful. The Company is an Undertaking for Collective Investment in Transferable Securities ("UCITS") for the purpose of the Directive 2009/65/EC of the European Parliament and of the Council of 19 July 2009 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities, as amended from time to time ("UCITS Directive").

Subscriptions can be accepted only on the basis of the current prospectus (the "Prospectus"), which is valid only if accompanied by a copy of the relevant PRIIPS-KID (as such term is defined below), the latest Annual Report containing the audited accounts, and of the semi-annual report if such report is published after the latest Annual Report. These reports form an integral part of the Prospectus.

No person is authorised to make any representation other than as contained in the Prospectus or in the documents referred to in the Prospectus. Such documents are available to the public at the registered office of the Company.

Important: If you are in any doubt about the contents of this document, you should consult your stockbroker, bank manager, solicitor, accountant or other financial adviser.

The distribution of the Prospectus and the offering of the Shares may be restricted in certain jurisdictions. The Prospectus does not constitute an offer or solicitation in a jurisdiction where to do so is unlawful or where the person making the offer or solicitation is not qualified to do so or where a person receiving the offer or solicitation may not lawfully do so. It is the responsibility of any person in possession of the Prospectus and of any person wishing to apply for Shares to inform himself or herself of and to observe all applicable laws and regulations of relevant jurisdictions.

Luxembourg - The Company is registered pursuant to Part I of the 2010 Law. However, such registration does not require any Luxembourg authority to approve or disapprove either the adequacy or accuracy of the Prospectus or the assets held in the various Sub-Funds. Any representations to the contrary are unauthorised and unlawful.

European Union ("EU") - The Company is a UCITS for the purposes of the UCITS Directive and the Board of Directors of the Company proposes to market the Shares in accordance with the UCITS Directive in certain Member States of the European Union.

USA - The Shares have not been and will not be registered in the United States under the Securities Act of 1933, as amended (the "1933 Act"), or any U.S. state securities laws, and neither any Sub-Fund nor the Company has been or will be registered in the United States under the Investment Company Act of 1940, as amended (the "1940 Act"), and Shareholders will not be entitled to the benefits of such registration. Accordingly, except as provided below, no Shares may be offered or sold, directly

or indirectly, in the United States, any state thereof or its territories or possessions or to any U.S. Person, as defined in the Glossary. The Board of Directors may authorise the offer and sale of Shares in the United States or to a limited number or category of U.S. Persons provided that, if so authorised, Shares will be offered and sold only to such persons and in such manner as will not require registration of the Company, any Sub-Fund, or the Shares under the securities laws of the United States or any state thereof. The Shares have not been approved or disapproved by the United States Securities and Exchange Commission, any state securities commission or other regulatory authority in the United States, nor has any such authority passed upon or endorsed the merits of this offering or the accuracy or adequacy of this Prospectus as may be amended or supplemented from time to time. Any representation to the contrary is a criminal offence. Certain restrictions also apply to any subsequent transfer of Shares in the United States or to U.S. Persons. Article 10 of the Articles contains provisions enabling the Company to compulsorily redeem Shares held by U.S. Persons. Should a Shareholder become a U.S. Person they may be subject to adverse tax consequences including without limitation U.S. withholding taxes and tax reporting.

Applicants will be required to certify that they are not U.S. Persons precluded from purchasing, acquiring or holding Shares.

The Articles give powers to the Board of Directors to impose such restrictions as they may think necessary for the purpose of ensuring that no Shares in the Company are acquired or held by any person in breach of the law or the requirements of any country or governmental authority or by any person in circumstances which in the opinion of the Board of Directors might result in the Company incurring any liability or taxation or suffering any other disadvantage which the Company may not otherwise have incurred or suffered and, in particular, by any U.S. Person as referred to above. The Company may compulsorily redeem all Shares held by any such person.

The Board of Directors has taken all reasonable care to ensure that at the date of this Prospectus the information contained herein is accurate and complete in all material respects. The Board of Directors accept responsibility accordingly.

A Key Information Document ("PRIIPS-KID") for each available Class of each Sub-Fund shall be made available to investors free of charge prior to their subscription for Shares. Prospective investors must consult the PRIIPS-KID for the relevant Class and Sub-Fund in which they intend to invest.

Any information given by any person not mentioned in the Prospectus should be regarded as unauthorised. The information contained in the Prospectus is considered to be accurate at the date of its publication. To reflect material changes, this document may be updated from time to time and potential subscribers should enquire of the Company as to the issue of any later prospectus.

The value of the Shares may fall as well as rise and a Shareholder on transfer or redemption of Shares may not get back the amount initially invested. Income from the Shares may fluctuate in money terms and changes in rates of exchange may cause the value of Shares to go up or down. The levels and bases of, and reliefs from, taxation may change.

All references in the Prospectus to "GBP", to "USD" or "US Dollars", to "CHF" or to "SEK" are to the legal currency of the United Kingdom, of the United States of America, of Switzerland or of Sweden. All references to "Euro" refer to the currency of the participating countries to the European Monetary Union.

Potential subscribers or purchasers of Shares should inform themselves as to (a) the possible tax consequences, (b) the legal requirements, and (c) any foreign exchange restrictions or exchange control requirements which they might encounter under the laws of the countries of their citizenship, residence or domicile and which might be relevant to the subscription, purchase, holding, conversion or sale of Shares of the Company.

This Prospectus may be translated into other languages. Any such translation shall only contain the same information and have the same meaning as the English language Prospectus. To the extent that there is any inconsistency between the English language Prospectus and the Prospectus in another language, this English Prospectus will prevail, except to the extent (but only to the extent) that the law of any jurisdiction where the Shares are sold requires that in an action based upon a statement in the Prospectus in a language other than English, the version of the Prospectus on which such action is based shall prevail.

PRINCIPAL FEATURES

1. Structure

The Company is an open-ended investment company with variable capital ("*Société d'Investissement à Capital Variable*", "SICAV") incorporated in Luxembourg and qualifies as a UCITS under Part I of the 2010 Law.

ODDO BHF Asset Management SAS has been appointed as the Management Company to the Company.

The Company is an Umbrella Fund and as such provides investors with the choice of investment in a range of separate sub-funds (the "Sub-Funds") each of which relates to a separate portfolio of transferable securities and other assets permitted by law with specific investment objectives.

The Board of Directors (in cooperation with the Management Company) may, at any time, create additional Sub-Funds, whose investment objectives may differ from those of the Sub-Funds then existing. Upon creation of new Sub-Funds, the Prospectus will be updated or supplemented accordingly. The Board of Directors may, at any time, close down any of the Sub-Funds according to the provisions set out in Appendix IV hereto.

Investors have the flexibility to convert efficiently between Sub-Funds.

2. Investment choice

Investors can choose from a range of separate Sub-Funds:

- ❖ ODDO BHF Sustainable Euro Corporate Bond (hereinafter the "Sustainable Euro Corporate Bond")
- ❖ ODDO BHF Euro High Yield Bond (hereinafter the "Euro High Yield Bond")
- ❖ ODDO BHF Euro Credit Short Duration (hereinafter the "Euro Credit Short Duration")
- ❖ ODDO BHF Convertibles Global (hereinafter the "Convertibles Global")
- ❖ ODDO BHF Objectifs Revenus (hereinafter the "Objectifs Revenus")
- ❖ ODDO BHF Credit Opportunities (hereinafter the "Credit Opportunities")
- ❖ ODDO BHF US Equity Trend (hereinafter the "US Equity Trend")
- ❖ ODDO BHF Global Credit Short Duration (hereinafter the "Global Credit Short Duration")
- ❖ ODDO BHF Artificial Intelligence (hereinafter the "Artificial Intelligence")
- ❖ ODDO BHF Green Planet (hereinafter the "Green Planet")
- ❖ ODDO BHF Global High Yield Bond (hereinafter the "Global High Yield Bond")
- ❖ ODDO BHF Global Target 2031 (hereinafter the "Global Target 2031")
- ❖ ODDO BHF Global Target IG 2031 (hereinafter the "Global Target IG 2031")
- ❖ ODDO BHF Global Navigator (hereinafter the "Global Navigator")
- ❖ ODDO BHF Laufzeitfonds 2032 (hereinafter the "Laufzeitfonds 2032")

The Board of Directors shall maintain for each Sub-Fund a separate portfolio of assets. As between Shareholders, each portfolio of assets shall be invested for the exclusive benefit of the relevant Sub-Fund. With regard to third parties, in particular towards the Company's creditors, the assets of each Sub-Fund shall only be responsible for the liabilities incurred by the relevant Sub-Fund.

3. The Shares

The Company offers separate Classes, grouped into several categories of Shares. Classes of Shares with the letter "C" (with the exception of "GC" Classes of Shares, which may be accumulation Shares or distribution Shares) and "X" in their denomination are Classes of Shares that capitalise their income, whereas Classes of Shares with the letter "D" in their denomination are Classes of Shares that pay-out periodic dividends on an annual basis, or more frequently if the Board of Directors decides to do so.

Classes of Shares with the letter "R" in their denomination may be acquired by any type of investors (i.e. retail and Institutional Investors).

As from December 11th, 2017, Classes of Shares with the letter "I" in their denomination may be acquired by (i) eligible counterparties and professional investors within the meaning of Directive 2014/65/EU of the European Parliament and of the

Council of 15 May 2014 on markets in financial instruments, amended by Directive (EU) 2016/1034 of 23 June 2016¹ and (ii) UCIs including *employee investment undertakings* “*Fonds d'épargne salariale*”.

GC Classes of Shares are reserved to (i) insurance companies, approved by the Management Company, to represent unit-linked products subscribed as part of “advisory management” contracts in their range and for (ii) ODDO BHF SCA's clients having signed an advisory agreement with an ODDO BHF SCA financial investment advisory partner. GC Shares may be accumulation Shares or distribution Shares”.

Classes of Shares with the letter “N” in their denomination are available solely at the discretion of the Management Company and will not pay any distribution fees or rebates.

As from December 11th, 2017, Classes of Shares with the letter “N” in their denomination are reserved to (i) investors subscribing via an intermediary providing the service of investment advice on an independent basis pursuant to the European Directive 2014/65/EU (so-called “MIFID II Directive”), (ii) investors subscribing via a financial intermediary on the basis of a fee agreement concluded between the investor and the intermediary and mentioning that the intermediary is exclusively paid by the investor, (iii) companies providing the service of portfolio management pursuant to the MIFID II Directive, and (iv) ODDO BHF SCA when providing the service of investment advice on the basis of a written fee agreement concluded with its client².

Classes of Shares with the letter “P” in their denomination may be offered to Institutional Investors only who have made a prior arrangement with the Management Company. Classes of Shares with the letter “X” in their denomination may be offered to Institutional Investors only subject to the prior conclusion of a special individual agreement between the Shareholder and the Management Company. The Management Company may, at its own discretion, decide whether to approve the issue of “P” or “X” Shares, whether it is prepared to make the necessary arrangement or to conclude a special individual agreement and how any special individual agreement is to be structured. Notwithstanding the above, the Class of Shares with the letter “X” in its denomination offered in the ODDO BHF Sustainable Euro Corporate Bond and in the Euro High Yield Bond Sub-Funds shall be dedicated to S-Bank.

Classes of Shares with the letter “F” in their denomination may be offered to all investors.

The Company will cease to issue an “F” Class of Shares after the cut off time of the day on which the assets under management of such relevant Class of Shares reach EUR 100 million for the first time or, in any case, 24 months after the launch the relevant Class of Shares.

Classes of Shares with the letters “oN”, together or separately, in their denomination may be offered only to clients of the private banking division of ODDO BHF SE or ODDO BHF (Schweiz) AG benefiting from portfolio management or investment advisory services provided by a company of the ODDO BHF Group.

Classes of Shares with the letter “S” in their denomination may be acquired by any type of investors (i.e. retail and Institutional Investors) solely at the discretion of the Management Company.

Shares may be denominated in different currencies. The term “EUR” refers to the single currency of the EU Member States that belong to the Economic and Monetary Union, the Euro. The term “USD” refers to the currency of the United States of America, the U.S. dollar. The term “CHF” refers to the currency of Switzerland, the Swiss franc. The term “GBP” refers to the currency of the United Kingdom, the British pound. The term “SEK” refers to the currency of Sweden, the Swedish crown.

Classes of Shares followed by [H] are hedged against the Reference Currency of the respective Sub-Fund (subject to any specific rules provided for a particular Sub-Fund) or when the hedged Class of Shares is denominated in the same Reference Currency than the Sub-Fund, the Company will hedge this Class of Shares against the currency risk arising from assets that are not denominated in the Reference Currency of the Sub-Fund. The characteristics of the hedged Classes of Shares remain unchanged with the exception that the costs in relation to the hedging shall be borne by such Classes. The Net Asset Value of all the Classes of Shares of a Sub-Fund may be affected by such hedging transaction.

¹ Prior to December 11th, 2017, Classes of Shares with the letter “I” in their denomination may be acquired by Institutional Investors only. Investments made before December 11th, 2017 are not subject to the new eligibility criteria but remain subject to the previous eligibility criteria. Additional and new investments made as from December 11th, 2017 by existing investors not meeting the new eligibility criteria will no longer be accepted.

² Prior to December 11th, 2017, Classes of Shares with the letter “N” in their denomination are reserved to i) Italian Institutional Investors and Swiss investors, (ii) retail investors if they invest via a distributor, financial adviser, platform or other intermediary on the basis of a specific agreement or commission agreement concluded between the investor and the intermediary and (iii) UCIs and mandates managed by the Management Company. Investments made before December 11th, 2017 are not subject to the new eligibility criteria but remain subject to the previous eligibility criteria. Additional and new investments made as from December 11th, 2017 by existing investors not meeting the new eligibility criteria will no longer be accepted.

Furthermore, the Classes of Shares may have a different fee structure (as specified in Section "Charges and Expenses"), but participate in the same portfolio of assets within a given Sub-Fund. Share Classes may also differ with regard to their distribution policy.

Classes of Shares with the letter "w" in their denomination are Classes of Shares without performance fees.

Payments for subscriptions of Classes of Shares with the letter "I" or "P", Classes of Shares "GC" and "X" Shares in each Sub-Fund shall be made in the Reference Currency of the relevant Sub-Fund or in any other currency specified by the investor (in which case any currency conversion cost shall be borne by the investor).

As a general rule, payments for subscriptions of Classes of Shares with the letter "R" or "N" in their denomination in each Sub-Fund may be effected in Euro, GBP, Swiss Franc, US Dollar or SEK (in case subscriptions are made in Euro, GBP, Swiss Franc, US Dollar or SEK, any currency conversion costs with respect to the conversion of the subscription price into the Reference Currency of the relevant Sub-Fund shall be borne by such class of Shares). Furthermore, in relation to these Classes of Shares, any currency conversion costs that arise due to the fact that payment of the Redemption Price is effected in a different currency than the Reference Currency of the relevant Shares, shall be borne by the relevant Shareholder.

The Net Asset Value per Share of each Class in respect of each Sub-Fund shall be calculated in the Reference Currency of the Share Class.

4. Minimum Investment and Holding

The minimum investment per Class of Shares is described below for each Sub-Fund and is subject to the discretion of the Board of Directors to accept lesser amounts. No minimum investment amount will apply to the subscriptions made by the Management Company, companies which belong to the Management Company's group, other UCIs managed by the Management Company and to any investments made in the context of discretionary portfolio management agreements which would have been entered into with the Management Company. Unless otherwise provided for a particular Sub-Fund, there is no minimum holding applicable.

The Board of Directors will have the discretion to reject any application for subscription of Shares in a Sub-Fund where the net assets of such Sub-Fund will have reached an amount to be considered as the maximum capacity in a specific investment strategy.

5. Form of Shares

Shares are issued in registered form or uncertified bearer shares and/or global certificate held in custody by a clearing and settlement system. Registered and bearer shares may be provided, inter alia, through Clearstream Banking (Vestima), Euroclear (Fund Settle) and/or other centralised management systems. Shareholders should note that Euroclear will only accept delivery for whole Shares.

Each Sub-Fund may at its discretion issue registered Shares under the form digital financial instruments (such as digital tokens) directly via distributed ledger technology (the "DLT") such as but not limited to Blockchain (the "Security Tokens"). For the avoidance of doubt, one Security Token will correspond to one Share of the relevant Sub-Fund and will confer the same rights and obligations to their holders as if the Shares were issued or held in the traditional form, including, but not limited to, voting rights, rights to dividends, and rights to participate in the distribution of the Company's assets upon liquidation. Unless the context otherwise requires, any reference to Shares should be understood as referring to registered Shares including Security Tokens and any reference to registered Shares should be understood as encompassing Security Tokens. The Company will employ methods to identify Shareholders for recording in the Register, which may include automated processes through electronic means. For the avoidance of doubt, the issuance process of Shares and Security Tokens is not deemed to be complete until such Shares or Security Tokens have been registered in the Register. From a technical standpoint, Shares remain in registered form but are represented as tokens.

Shares may be held through a securities settlement system or book entry interest records in the name of their owner or holder, with an approved account keeper or settlement institution. Such Shareholder shall have the same rights and obligations as if such Shareholder held the Shares directly. The account keeper or settlement institution shall record the Shares in an account opened, as the case may be, under the name of the applicable participant in the securities settlement system or under the name of the Shareholder. The Company shall (i) permit the account keeper or settlement institution to exercise the rights attaching to the Shares corresponding to the book-entry interests of the relevant Shareholder, including receiving notices of General Meetings, admission to and voting at General Meetings and (ii) consider the account keeper or settlement institution to be the holder of the Shares corresponding to the book-entry interests for purposes of this section, provided, that, in each case, a proper certificate and sufficient evidence have been received by the Company from the account keeper or settlement institution. The Shares held through an account keeper or settlement institution may be transferred from one account to

another in accordance with customary procedures for the transfer of securities in book-entry form. Subject to the terms of the Articles of Incorporation, the Company shall make any dividend payments and any other payments in cash, Shares or other securities only to, or for the benefit of, the account keeper or settlement institution recorded in the Register or in accordance with the instructions of such account keeper or settlement institution. Such payment shall grant full discharge of the Company's obligations in that respect. Fractions of registered Shares may be issued up to three decimal places. Fractional Shares do not have voting rights at the General Meeting, unless combined in sufficient number. However, fractions of distribution Shares are entitled to any dividends that may be paid.

For the purpose of registered shares that are tokenised, the UCI Administrator deploys a smart contract on the DLT that will allow for the creation of tokens representing the new shares issued (minting) and the destruction of tokens for the shares to be redeemed (burning). The UCI Administrator is also in charge of settlement process for those acquisitions and sales of tokenised shares by investors. For the securities leg, this is done via wallets interacting with the smart contract.

The investor must provide his or her existing wallet or request a wallet creation in order to register (or deregister) the ownership rights of an investor in the distributed ledger. A wallet provided by the investor will be subject to an audit by the UCI Administrator before acceptance or rejection. In case of rejection following the audit, the investor may require a wallet creation by the UCI administrator. As the sole operator and administrator of the Security Tokens smart contract, the UCI Administrator retains the ability to mint, burn and recover Security Tokens at any time in respect of all wallets. In case of a wallet provided by the UCI Administrator on behalf of the Company, such wallets are generated and the private keys are held and safeguarded by the UCI Administrator. Where the investor elects to use a wallet provided by the investor itself (non-custodial wallet), the investor manages its own private keys and the Shareholder will bear all the risks related to such non-custodial wallet, including the risk of loss or theft of private keys. In such case, the UCI Administrator does not hold or have access to the relevant private keys, meaning that the UCI Administrator would only be able to retrieve the Security Tokens related to a Sub-Fund, but not the other crypto assets stored in the wallet. This retrieval would be done upon verified identification of the investor by reference to the off-chain register.

For the avoidance of doubt, Security Tokens may only be subscribed, transferred, converted or redeemed on the DLT environment approved by the Company and the UCI Administrator. Security Tokens held in self-hosted wallets are recognised only to the extent such wallets have been approved, whitelisted and technically supported by the UCI Administrator. Transfers attempted outside such approved environment will not be recognised by the Company.

Neither the Company nor the UCI Administrator shall be liable for losses arising solely from malfunction, outage or failure of the external DLT infrastructure.

There will be a continuous monitoring of wallet activities to prevent any unlawful activities. The UCI Administrator reserves the right to block or burn shares in case such unlawful activities are detected.

In order to proceed with the "mint", "burn", the transfer in and out of tokenised shares from a given public address allocated to a given investor and attached to a wallet, the UCI Administrator will "call" the smart contract deployed on the DLT. Wallets are software allowing for those transfers via the combination of cryptographic keys (public and private keys). The UCI Administrator is in charge of safekeeping those cryptographic keys and of the signing process in order to validate the calls for wallets provided for by the UCI Administrator. In such case, private keys are not shared nor involve a co-signing process with external parties.

In addition to the record keeping of the ownership rights of investors in the distributed ledger, the UCI Administrator mirrors such holdings in the centralised ledger maintained also by UCI Administrator by delegation from the Company for the purpose registration of the Shares which are not tokenised.

Transaction processing on the blockchain network(s) utilized by the Company and the UCI Administrator may experience delays that can result for example from a failure among computers ("nodes") to achieve consensus on pending transactions. When such delays occur, it may not be possible to record share transactions on the blockchain in real time. If these disruptions persist, the Company may opt to process Shareholders' transactions manually through traditional registration methods until the blockchain network is functioning normally again.

The Sub-Funds do not invest directly in crypto-assets or virtual currencies. The tokenisation of Shares does not modify, expand or otherwise affect the Sub-Funds' investment strategy or permitted asset classes.

6. Management Company and Investment Managers

ODDO BHF Asset Management SAS, 12 boulevard de la Madeleine, 75440 Paris Cedex 09, France assumes the functions of Management Company. For the description of the functions performed by the Management Company, see section "Management Company".

The following legal entity performs the function of Investment Manager:

- ODDO BHF Asset Management GmbH, Herzogstr. 15, 40217 Düsseldorf, Germany
- Wellington Management International Limited, Cardinal Place, 80 Victoria Street, London SW1E 5JL, United Kingdom

For the description of the different Sub-Funds managed by the Investment Manager, see Section "Investment Managers".

7. Depositary, Paying Agent, UCI Administrator

Caceis Bank, Luxembourg Branch, established at 5 Allée Scheffer, L- 2520 Luxembourg assumes the functions of Depositary, Paying Agent and UCI Administrator.

8. Dealing

Shares of each Class in each Sub-Fund may normally be purchased, redeemed or converted on a daily basis at prices based on the Net Asset Value per Share of such Class in such Sub-Fund on any Valuation Day.

For each of the Sub-Funds, there is a Valuation Day on each Business Day.

9. Settlement

Applications for Shares in all Sub-Funds must be settled in cleared funds within three (3) Business Days of the Valuation Day on which the application was made at the UCI Administrator. In case of Security Tokens subscribed for at the UCI Administrator, payment may be made in EUROD Stablecoin issued by ODDO BHF SCA if made to a dedicated address designated by the UCI Administrator prior to 12 p.m. Luxembourg time on the day the application was made. Security Token will only be issued against EUROD for the next Valuation Day if the respective subscription amount has been received prior to 12 p.m. Luxembourg time on the day the application was made.

If settlement does not occur within the above-mentioned period, the relevant allotment of Shares may be cancelled and the applicant may be required to compensate the Company and, where applicable, the relevant distributor, for any loss incurred in relation to such cancellation. The Company may notably incur a loss as a result of the disposal of any securities purchased further to the receipt of a subscription order, when the securities are sold for a lower price than their acquisition price. Any such loss, as well as, without limitation, costs incurred by the Company or, if applicable, the relevant distributor in taking proceedings against the applicant, will be taken into account when computing the losses covered under this paragraph.

Redemptions in respect of Securities Token may be requested by an investor in EUROD. Such redemptions in EUROD will require a wallet and the redemption proceeds will be transmitted to the investor's wallet within three (3) Business Days after the Valuation Day, for which the redemption request was received by the UCI Administrator prior to 12 p.m. Luxembourg time.

10. Conversion

Subject to the minimum initial investment requirements, Shareholders may convert Shares from one Sub-Fund for Shares of another Sub-Fund within the same Class of Shares without incurring a Sales Charge. See "Conversion of Shares" for further details.

11. Risk Factors

There are certain risks associated with investment in the Sub-Funds. Potential investors should refer to the investment objective of each Sub-Fund and the section headed Risk Factors for further details.

12. Listing

Shares of each Class in each Sub-Fund may be listed on the Luxembourg Stock Exchange.

13. Publication of Net Asset Value

The Net Asset Value per Share will be published daily on am.oddo-bhf.com, www.fundinfo.com and, if required, in such newspapers as may be decided by the Board of Directors from time to time and will be available the Business Day following each Valuation Day, as defined hereinafter, at the registered office of the Company.

14. Financial Reports

Semi-annual unaudited reports and annual audited reports shall be available at the registered office of the Company and at the offices of the distributors.

15. Data Protection

The Investors acknowledge that their personal data may be processed as described in Appendix VII (Privacy Statement – Investors and related parties).

INVESTMENT OBJECTIVES AND POLICIES

A. General

The purpose of the Company is to manage the Company's assets for the benefit of the Shareholders. For this purpose, the Company offers a choice of several Sub-Funds which allow investors to make their own strategic allocation by combining holdings in the various Sub-Funds in proportions of their own choosing.

Each of the Sub-Funds is managed in accordance with the "Investment Restrictions" and "Investment Techniques and Instruments" specified in Appendix I and Appendix II hereinafter. The Company may in particular employ techniques and instruments relating to Transferable Securities and other financial liquid assets for efficient portfolio management and hedging purposes, in compliance with applicable laws and regulations, including CSSF Circular 08/356, CSSF Circular 14/592, and SFTR. When these operations concern the use of derivative instruments, (i) the relevant derivative instruments used by the relevant Sub-Fund shall be described in the investment objective and policy of the relevant Sub-Fund and (ii) these conditions and limits shall conform to the provisions laid down in Appendix I "Investment Restrictions".

For the purpose of efficient portfolio management, the Sub-Funds may in particular also use a certain number of derivative instruments (directly or embedded in a transferable security or money market instrument). In particular, the Sub-Funds may enter into or acquire options, futures contracts, forward currency exchange contracts, swaps, credit default swaps, or structured securities with synthetic underlying.

Credit Default Swaps

A Credit Default Swap is a bilateral financial contract in which one counterparty (the protection buyer) pays a periodic fee in return for a contingent payment by the protection seller following a credit event of one or more reference issuers or one or more reference obligations. A number of reference issuers may form a basket (e.g. iTRAXX). The protection buyer acquires the right to sell a particular bond or other designated reference obligations issued by the reference issuer for its par value or the right to receive the difference between the par value and the market price of the said bond or other designated reference obligations when a credit event occurs. A credit event is commonly defined as bankruptcy, insolvency, receivership, material adverse restructuring of debt, or failure to meet payment obligations when due.

Provided it is in its exclusive interest, the relevant Sub-Funds may hedge an asset by acting as protection buyer under a Credit Default Swap.

Provided it is in its exclusive interest, the relevant Sub-Funds may sell protection under Credit Default Swaps (individually a "Credit Default Swap Sale Transaction", collectively the "Credit Default Swap Sale Transactions") in order to acquire a specific credit exposure.

In addition, the relevant Sub-Funds may, provided it is in their exclusive interest, buy protection under Credit Default Swaps (individually a "Credit Default Swap Purchase Transaction", collectively the "Credit Default Swap Purchase Transactions") without holding the underlying assets.

Such swap transactions must be effected with first class financial institutions specializing in this type of transactions and executed on the basis of standardized documentation such as the International Swaps and Derivatives Association (ISDA) Master Agreement.

However, no total return swaps (TRS) within the meaning of article 3 (18) of the Regulation (EU) No 2015/2365 of 25 November 2015 on transparency of securities financing transactions and of reuse, as amended, are entered into for the Sub-Funds.

B. Pooling and Co-Management

a. Pooling

The Company may invest and manage all or any part of the assets established for two or more Sub-Funds (for the purposes hereof "Participating Sub-Funds") on a pooled basis. Any such asset pool shall be formed by transferring to it cash or other assets (subject to such assets being appropriate in respect of the investment policy of the pool concerned) from each of the Participating Sub-Funds. Thereafter, the Company may from time to time make further transfers to each asset pool. Assets may also be transferred back to a Participating Sub-Fund up to the amount of the participation of the Sub-Fund concerned. The share of a Participating Sub-Fund in an asset pool shall be measured by reference to notional units of equal value in the asset pool. On formation of an asset pool, the Company shall determine the initial value of notional units (which shall be

expressed in such currency as the Company may consider appropriate) and shall allocate to each Participating Sub-Fund notional units having an aggregate value equal to the amount of cash (or the value of other assets) contributed. Thereafter, the value of the units shall be determined by dividing the net assets of the asset pool by the number of notional units existing.

When additional cash or assets are contributed to or withdrawn from an asset pool, the allocation of notional units of the Participating Sub-Fund concerned will be increased or reduced, as the case may be, by a number of notional units determined by dividing the amount of cash or the value of assets contributed or withdrawn by the current value of a unit in such asset pool. Where a contribution is made in cash, it may be treated for the purpose of this calculation as reduced by an amount which the Company considers appropriate to reflect fiscal charges and dealing and purchase costs which may be incurred in investing the cash concerned; in the case of cash withdrawal, a corresponding deduction may be made to reflect costs which may be incurred in realising securities or other assets of the asset pool.

Dividends, interest and other distributions of an income nature earned in respect of the assets in an asset pool will be applied to such asset pool and cause the respective net assets to increase. Upon the dissolution of the Company, the assets in an asset pool will be allocated to the Participating Sub-Funds in proportion to their respective participation in the asset pool.

b. Co-Management

In order to reduce operational and administrative charges while allowing a wider diversification of the investments, the Board of Directors may decide that part or all of the assets of one or more Sub-Funds will be co-managed with assets belonging to the other Sub-Funds within the Company and/or other collective investment schemes. In the following paragraphs, the words "co-managed entities" shall refer to the Company or Sub-Fund and all entities with and between which there would exist any given co-management arrangement and the words "co-managed assets" shall refer to the entire assets of these co-managed entities and co-managed pursuant to the same co-management arrangement.

Under the co-management arrangement, the Management Company or the Investment Manager(s) to the Sub-Funds will be entitled to take, on a consolidated basis for the relevant co-managed entities, investment, disinvestment and readjustment decisions which will influence the composition of the relevant Sub-Fund's assets. Each co-managed entity shall hold a portion of the co-managed assets corresponding to the proportion of its net assets to the total value of the co-managed assets. This proportional holding shall be applicable to each and every line of investment held or acquired under co-management. In case of investment and/or disinvestment decisions these proportions shall not be affected and additional investments shall be allotted to the co-managed entities pursuant to the same proportion and assets sold shall be levied proportionately on the co-managed assets held by each co-managed entity.

In the case of new subscriptions in one of the co-managed entities, the subscription proceeds shall be allotted to the co-managed entities pursuant to the modified proportions resulting from the net asset increase of the co-managed entity which has benefited from the subscriptions and all lines of investment shall be modified by a transfer of assets from one co-managed entity to the other in order to be adjusted to the modified proportions. In a similar manner, in case of redemptions in one of the co-managed entities, the cash required may be levied on the cash held by the co-managed entities pursuant to the modified proportions resulting from the net asset reduction of the co-managed entity which has suffered from the redemptions and, in such case, all lines of investment shall be adjusted to the modified proportions. Shareholders should be aware that, in the absence of any specific action by the Board of Directors or their appointed agents, the co-management arrangement may cause the composition of assets of the relevant Sub-Fund to be influenced by events attributable to other co-managed entities such as subscriptions and redemptions. Thus, all other things being equal, subscriptions received in one entity with which the Company is co-managed will lead to an increase of the Company's reserve cash. Conversely, redemptions made in one entity with which any Sub-Fund is co-managed will lead to a reduction of the Company's reserve of cash. Subscriptions and redemptions may, however, be kept in the specific account opened for each co-managed entity outside the co-management arrangement and through which subscriptions and redemptions must pass. The possibility to allocate substantial subscriptions and redemptions to these specific accounts together with the possibility for the Board of Directors or their appointed agents to decide at any time to terminate their participation in the co-management arrangement permit the Company or the relevant Sub-Fund to avoid the re-adjustments of their Sub-Fund if these re-adjustments are likely to affect the interest of the Company and of its Shareholders.

If a modification of the composition of the relevant Sub-Fund or the Company's assets resulting from redemptions or payments of charges and expenses peculiar to another co-managed entity (i.e., not attributable to the Company) is likely to result in a breach of the investment restrictions applicable to the relevant Sub-Fund or the Company, the relevant assets shall be excluded from the co-management arrangement before the implementation of the modification in order for it not to be affected by the ensuing adjustments.

Co-managed assets of the Sub-Funds shall, as the case may be, only be co-managed with assets intended to be invested pursuant to investment objectives identical to those applicable to the co-managed assets in order to assure that investment decisions are fully compatible with the investment policy of the relevant Sub-Funds. Co-managed assets shall only be co-managed with assets for which the Depositary is also acting as depositary in order to assure that the Depositary is able, with respect to the Company, to fully carry out its functions and responsibilities pursuant to the applicable provisions of the 2010 Law. The Depositary shall at all times keep the Company's assets segregated from the assets of other co-managed entities,

and shall therefore be able at all time to identify the assets of the Company. Since co-managed entities may have investment policies which are not strictly identical to the investment policy of the relevant Sub-Fund, it is possible that as a result the common policy implemented may be more restrictive than that of the Company.

A co-management agreement shall be signed between the Management Company, the Depositary and the relevant Investment Manager in order to define each of the parties' rights and obligations. The Management Company may decide at any time and without notice to terminate the co-management arrangement.

Shareholders may at all times contact the registered office of the Company to be informed of the percentage of assets which are co-managed and of the entities with which there is such a co-management arrangement at the time of their request. Annual and half-yearly reports shall state the co-managed assets' composition and percentages.

C. Investment objectives and policies of the Sub-Funds

ODDO BHF SUSTAINABLE EURO CORPORATE BOND

1. ODDO BHF Sustainable Euro Corporate Bond

Investment objective and strategy

The Sub-Fund is actively managed and aims to provide long term capital appreciation by managing a portfolio investing at least 2/3 of its total assets in transferable debt securities of public or private corporations in all sectors (including financial institutions) and integrating ESG (Environmental, Social, and Governance) criteria in parallel.

The investment universe of the Sub-Fund is made up of the companies included in the Markit iBoxx Euro Corporates Total Return index. As part of the investment process, the Investment Manager has full discretion over the composition of the Sub-Fund's portfolio and may deviate from the investment universe.

The Investment Manager takes ESG (Environment, Social and Governance) criteria into account as described on the ESG Strategy of the Sub-Fund in Appendix VIII to this Prospectus.

The Sub-Fund invests at least 2/3 of its total assets in transferable debt securities of public or private corporations in all sectors (including financial institutions) with fixed or variable interest rates. There is no geographic limit. At least 80% of the debt securities are denominated in Euro and up to 20% of the debt securities can be denominated in non-Euro.

The Sub-Fund is actively managed and references a benchmark, the Markit iBoxx Euro Corporates Total Return Index (the "**Benchmark**"). The Benchmark is designed to reflect the performance of Euro denominated investment grade debt issued by public or private corporations. The Benchmark rules aim to offer a broad coverage of the Sustainable Euro Corporate bond universe, whilst upholding minimum standards of investability and liquidity. Investors are advised that the Benchmark does not constitute a limitation on the Sub-Fund's investment universe. It allows the investor to assess the Sub-Fund's risk profile. The Sub-Fund's performance and composition of assets may differ substantially from that of the Benchmark.

The Benchmark is broad market index that does not necessarily consider in their composition or calculation methodology the ESG characteristics promoted by the Sub-Fund. For a description of the method used to calculate the Benchmark, see: "<https://ihsmarkit.com/products/indices.html>"

The currency risk will be covered up to a residual currency risk of 5% of the total assets of the Sub-Fund.

The investment focus lies on debt securities of the aforementioned kind with a rating of at least BBB- or Baa3 by an internationally recognised rating service such as Moody's Investor Services, Inc. ("Moody's"), or Standard & Poor's Corporation ("S&P") (or deemed equivalent by the Management Company or using the Management Company's internal rating). These debt securities plus Cash Equivalents should account for at least 85% of the total assets of the Sub-Fund provided that the Cash Equivalents shall represent up to 20% of the net asset value of the Sub-Fund. The Management Company does not use the ratings issued by ratings agencies automatically or in isolation, as

it also applies its own internal analysis. In the event of a downgrade, the Management Company will take the interests of Shareholders, market conditions and its own analysis of these fixed income products into account when respecting rating limits. Investment in unrated debt securities or rated lower than BBB- is limited to 15% of the total assets of the Sub-Fund. This limit of 15% includes the unrated bonds which can amount to 10% of the total assets of the Sub-Fund. There are no limits with regard to the maximum maturity of the securities.

The remaining part of the total assets may be invested within the limits set forth under "Investment Restrictions" in Appendix I hereinafter in any other fungible securities of world-wide issuers (such as debt securities not denominated in Euro, etc.).

Investments in convertible debt securities, contingent convertible bonds ("CoCos") and debt securities with warrants attached thereto shall not exceed 10% of the Sub-Fund's total assets. The Sub-Fund will not invest in CoCos issued by ODDO BHF Group.

The Sub-Fund may hold Cash Equivalents appropriate to provide for redemptions or to meet other liquidity needs. These assets may consist of commercial paper and other Money Market Instruments with a rating "investment grade" (at least BBB- by Standard & Poor's or deemed equivalent by the Management Company, or using the Management Company's internal rating) and a remaining maturity not in excess of 12 months and of time deposits, and demand deposit accounts; as far as there are exceptional market conditions the Sub-Fund may hold Cash Equivalents temporarily without any limitation if the Management Company or the Investment Manager considers this to be in the best interest of the Shareholders.

The Sub-Fund may use financial derivatives instruments to hedge currency risk or to hedge or gain exposure to interest rate risk or credit risk (for efficient portfolio management), as described in section "Investment Objectives and Policies", Point A. and under "Investment Restrictions" in Appendix I and "Investment Techniques and Instruments" in Appendix II.

The Sub-Fund may in particular have the possibility, at the discretion of the Management Company and the Investment Manager, to enter into Credit Default Swaps Index as buyer or seller.

As detailed in Appendix I point C (12), the Sub-Fund may not invest in aggregate more than 10% of its assets in the units or shares of other UCITS or UCI.

The Reference Currency of the Sustainable Euro Corporate Bond is the Euro.

ODDO BHF SUSTAINABLE EURO CORPORATE BOND

The Sub-Fund may, for cash management purposes or to maximise Sub-Fund's income, use repurchase agreements and/or enter into securities lending transactions, as further described in Appendix II to this Prospectus.

Repurchase agreements or securities lending transactions shall all be conducted under market conditions and each category of transactions (i.e., repurchase agreements or securities lending transactions), may not represent more than 15% of the Sub-Fund's net assets. Cumulatively, repurchase agreements and securities lending transactions shall all be conducted under market conditions, within the limit of 15% of the Sub-Fund's net assets. This limit may be reached in the event of exceptional market conditions, that lead to greater attraction for the securities held in the Sub-Fund and therefore greater activity and opportunities for repurchase agreements and securities lending transactions.

These operations shall be performed on the debt securities and money market instruments referred above.

The target proportion of the Sub-Fund's net assets to be used for repurchase agreements or securities lending transactions will be 10%, for each category of transactions (i.e. repurchase agreements or securities lending transactions). Cumulatively, the target proportion of the Sub-Fund's net assets to be used for repurchase agreements and securities lending transactions will be 10%. This proportion is the proportion expected to be reached in light of the historical market opportunities that have been observed by the Sub-Fund in the past.

Repurchase agreements and securities lending transactions may be carried out with ODDO BHF SCA.

The remuneration received from repurchase agreements and/or securities lending transactions is paid to the Sub-Fund, less operating costs charged by the counterparty. The remuneration of the Sub-Fund amounts to 75% of the gross revenues.

Further information on the remuneration repaid to the Sub-Fund as well as costs and fees related to the services provided by the relevant counterparty is available in the Company's annual and semi-annual reports.

Within the scope of OTC financial derivatives transactions and temporary sales of debt securities, the Sub-Fund may receive financial guarantees (collateral). Transactions potentially requiring the use of financial guarantees shall be carried out with a European Union or United Kingdom credit institution that may belong to the ODDO BHF group. Their operation and characteristics are presented under section C "Collateral Policy" of the Appendix II to this Prospectus.

The Sub-Fund complies with Article 8 of the SFDR as it promotes environmental, social and governance characteristics into its investment strategy on the condition of good corporate governance on the part of the companies in which investments are made. The Sub-Fund is therefore suitable for investors with sustainability preferences.

In accordance with the provisions of Article 8 of the SFDR, the Management Company addresses sustainability risks and principal adverse impacts on sustainability factors through its ESG model, the normative and sector exclusions implemented at the fund level and the analysis of controversies based on the elements provided by our external provider of extra-financial data which is part of the integration of ESG criteria (Environmental and/or Social and/or Governance) into its investment decision making process, as described in the section investment strategy of the Sub-Fund. The Investment Manager also considers sustainability safeguards through the Management Company's Exclusion Policy that excludes specific sectors because of the materiality of their sustainability risks and through the exclusion of companies that do not respect the Principles of the United Nations Global Compact. The Management Company has signed the United Nations Principles for Responsible Investment and also the CDP (previously known as Carbon Disclosure Project). The Management Company takes into account the likely impact of sustainability risks on the return of the product and the risk of principal adverse impacts on sustainability factors (E, S and G) of each investment. Finally, the Management Company exercises the voting rights when equities are held by the Sub-Fund.

Information relating to the Management Company's ESG policy can be found at "am.oddo-bhf.com".

Further information on the ESG Strategy of the Sub-Fund to be disclosed pursuant to article 8(1), (2) and (2a) of the SFDR is set out in Appendix VIII to this Prospectus.

Information in accordance with Article 11 of SFDR can be found in the Company's annual report, on the website 'am.oddo-bhf.com' and is available from the Company on request.

Risks

The major risks associated with investing in the Sub-Fund relate to the following elements:

- risk of capital loss;
- interest rate risk;
- credit risk;
- risk associated with high-yield bonds;
- risk associated with discretionary management;
- emerging markets risk;
- counterparty risk;
- liquidity risk of underlying assets;
- risk associated with commitments on forward financial instruments;
- sustainability risk.

The Sub-Fund will be exposed, to a limited extent, to the following risks:

- risk associated with convertible bonds;
- currency conversion and exchanges risks.

For a comprehensive description of these risks, please refer to the section "Risk Factors". This section also details other risks associated with investing in the Sub-Fund.

ODDO BHF SUSTAINABLE EURO CORPORATE BOND

Typical Investors' Profile

Typical investors have a medium to long term horizon (3 to 5 years) looking for an actively managed portfolio mainly

invested in transferable debt securities of corporations with fixed or variable interest rates denominated in Euro.

Shares available

Shares that can be issued by the Company in the Sub-Fund have the following features (grouped by categories of Shares):

Name	Initial Subscription Price	Minimum Initial Investment	Minimum Subsequent Investment	Sales Charge (in % of the Net Asset Value per Share)	Redemption Fee (in % of the Net Asset Value per Share)
"I" Shares	Euro 1,000	Euro 250,000	1/1000 th of a Share	Up to 2%	None
"R" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"N" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"P" Shares	Euro 1,000	Euro 10,000,000	1/1000 th of a Share	None	None
"GC" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"oN" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"X" Shares*	Euro 1,000	Euro 25,000,000	1/1000 th of a Share	None	None

* "X" Shares are dedicated to S-Bank.

Shares may be offered in currencies other than the Euro, in which case the initial subscription price and the minimum initial investment amount of these Shares (i) will have the same facial value when expressed in GBP, USD or CHF, and (ii) will be ten times the above amounts when expressed in SEK (in order to reflect the foreign exchange rate ("FX rate") between the Euro and the SEK).

Additional and up-to-date information on the Share Classes specifically offered in the Sub-Fund may be obtained free of charge by any person on am.oddobhf.com.

2. ODDO BHF Euro High Yield Bond

Investment Objective and Strategy

The Sub-Fund is actively managed and aims to provide a high level of income and capital growth. The Sub-Fund seeks to achieve its investment objective, in accordance with the policies and guidelines established by the Board of Directors of the Company, by investing in a portfolio of at least 2/3 of listed transferable debt securities of public or private corporations denominated in Euro, without geographic limit, with an emphasis on lower quality debt issues (i.e., less than investment grade debt instruments).

The Sub-Fund invests at least 2/3 of its total assets in Euro denominated high-yield bonds (i.e., less than investment grade debt instruments with initial maturities of one year or more) of international issuers. The high-yield range comprises bonds rated BB+ and below assigned by an internationally recognised rating service such as Moody's or S&P (or deemed equivalent by the Investment Manager, or using the Investment Manager's internal rating), and the Sub-Fund may have a maximum of 10% of its total assets in unrated bonds.

The Sub-Fund is actively managed and references a benchmark, the ICE BofA BB-B Euro High Yield Non-Financial Fixed & Floating Rate Constrained Index (HEAG

Index) (the "Benchmark"). The Benchmark is designed to reflect the performance of EUR denominated high yield debt issued by corporations. The Benchmark rules aim to offer a broad coverage of the high yield bond universe, whilst upholding minimum standards of investability and liquidity. Investors are advised that the Benchmark does not constitute a limitation on the Sub-Fund's investment universe. It allows the investor to assess the Sub-Fund's risk profile. The Sub-Fund's performance and composition of assets may differ substantially from that of the Benchmark.

The Benchmark is a broad market index that does not necessarily consider in its composition or calculation methodology the ESG characteristics promoted by the Sub-Fund. For a description of the method used to calculate the Benchmark, see: "<https://indices.ice.com/>"

The Investment Manager does not use the ratings issued by ratings agencies automatically or in isolation, as it also applies its own internal analysis. In the event of a downgrade, the Investment Manager will take the interests of Shareholders, market conditions and its own analysis of these fixed income products into account when respecting rating limits. Distressed securities are securities of entities that are experiencing default, or are under bankruptcy, rated CCC- and below assigned by an internationally recognised rating service such as Moody's

ODDO BHF EURO HIGH YIELD BOND

or S&P (or deemed equivalent by the Investment Manager, or using the Investment Manager's internal rating). Should the distressed securities represent more than 10% of the Sub-Fund's net assets in the circumstances described in the preceding sentence, the proportion above 10% will be sold as soon as possible, under normal market circumstances, and in the best interest of Shareholders. The Sub-Fund will not actively invest in distressed securities.

ESG (Environment, Social and Governance) criteria are a complement to the credit analysis and are fully integrated into the investment process as described on the ESG Strategy of the Sub-Fund in Appendix IX to this Prospectus.

The remaining part of the total assets, which are not invested in Euro denominated high-yield bonds, may be invested within the limits set forth under "Investment Restrictions" in Appendix I hereinafter in any other fungible securities of world-wide issuers (such as debt securities other than those referred to in the above paragraphs, etc.).

Investments in unrated debt securities, convertible debt securities, contingent convertible bonds ("CoCos") and debt securities with warrants attached thereto shall not exceed 10% of the Sub-Fund's total assets. The Sub-Fund will not invest in CoCos issued by ODDO BHF Group.

The Sub-Fund is not constrained as to the maximum maturity of its portfolio securities. Investors should note that, subject to the above, the Sub-Fund may invest in debt securities rated below investment grade or in unrated securities of comparable quality. These debt securities, sometimes referred to as "junk bonds", are speculative and subject to greater risk of loss of income and principal than higher rated securities.

The Sub-Fund may hold Cash Equivalents appropriate to provide for redemptions or to meet other liquidity needs. These assets may consist of commercial paper and other Money Market Instruments with a remaining maturity not in excess of 12 months and of time deposits, and demand deposit accounts; as far as there are exceptional market conditions the Sub-Fund may hold Cash Equivalents temporarily without any limitation if the Board of Directors considers this to be in the best interest of the Shareholders.

The Sub-Fund may use financial derivatives instruments to hedge currency risk or to hedge or gain exposure to interest rate risk or credit risk (for efficient portfolio management), as described in section "Investment Objectives and Policies", Point A. and under "Investment Restrictions" in Appendix I and "Investment Techniques and Instruments" in Appendix II.

The Sub-Fund may in particular have the possibility, at the discretion of the Investment Manager, to enter into Credit Default Swaps (Index) as buyer and seller.

As detailed in Appendix I point C (12), the Sub-Fund may not invest in aggregate more than 10% of its assets in the units or shares of other UCITS or UCI.

The Reference Currency of the Euro High Yield Bond is the Euro.

The currency risk will be covered up to a residual currency risk of 3% of the total assets of the Sub-Fund.

The Sub-Fund may, for cash management purposes or to maximise Sub-Fund's income, use repurchase agreements and/or enter into securities lending transactions, as further described in Appendix II to this Prospectus.

Repurchase agreements or securities lending transactions shall all be conducted under market conditions and each category of transactions (i.e., repurchase agreements or securities lending transactions), may not represent more than 15% of the Sub-Fund's net assets. Cumulatively, repurchase agreements and securities lending transactions shall all be conducted under market conditions, within the limit of 15% of the Sub-Fund's net assets. This limit may be reached in the event of exceptional market conditions, that lead to greater attraction for the securities held in the Sub-Fund and therefore greater activity and opportunities for repurchase agreements and securities lending transactions.

These operations shall be performed on the debt securities and money market instruments referred above.

The target proportion of Sub-Fund's net assets to be used for repurchase agreements or securities lending transactions will be 10%, for each category of transactions (i.e. repurchase agreements or securities lending transactions). Cumulatively, the target proportion of the Sub-Fund's net assets to be used for repurchase agreements and securities lending transactions will be 10%. This proportion is the proportion expected to be reached in light of the historical market opportunities that have been observed by the Sub-Fund in the past.

Repurchase agreements and securities lending transactions may be carried out with ODDO BHF SCA.

The remuneration received from repurchase agreements and/or securities lending transactions is repaid to the Sub-Fund, less operating costs charged by the counterparty. The remuneration of the Sub-Fund amounts to 75% of the gross revenues.

Further information on the remuneration repaid to the Sub-Fund as well as costs and fees related to the services provided by the relevant counterparty is available in the Company's annual and semi-annual reports.

Within the scope of OTC financial derivatives transactions and temporary sales of debt securities, the Sub-Fund may receive financial guarantees (collateral). Transactions potentially requiring the use of financial guarantees shall be carried out with a European Union or United Kingdom credit institution that may belong to the ODDO BHF Group. Their operation and characteristics are presented under section C "Collateral Policy" of the Appendix II to this Prospectus.

The Sub-Fund complies with Article 8 of the SFDR as it promotes environmental, social and governance characteristics into its investment strategy on the

ODDO BHF EURO HIGH YIELD BOND

condition of good corporate governance on the part of the companies in which investments are made. The Sub-Fund is therefore suitable for investors with sustainability preferences.

In accordance with the provisions of Article 8 of the SFDR, the Investment Manager addresses sustainability risks and principal adverse impacts on sustainability factors through its ESG model, the normative and sector exclusions implemented at the fund level and the analysis of controversies based on the elements provided by our external provider of extra-financial data which is part of the integration of ESG criteria (Environmental and/or Social and/or Governance) into its investment decision making process, as described in the section investment strategy of the Sub-Fund. The Investment Manager also considers sustainability safeguards through the Management Company's Exclusion Policy that excludes specific sectors because of the materiality of their sustainability risks and through the exclusion of companies that do not respect the Principles of the United Nations Global Compact. The Management Company has signed the United Nations Principles for Responsible Investment and also the CDP (previously known as Carbon Disclosure Project). The Management Company takes into account the likely impact of sustainability risks on the return of the product and the risk of principal adverse impacts on sustainability factors (E, S and G) of each investment. Finally, the Management Company exercises the voting rights when equities are held by the Sub-Fund.

Information relating to the Management Company's ESG Policy can be found at "am.oddo-bhf.com".

Further information on the ESG Strategy of the Sub-Fund to be disclosed pursuant to article 8(1), (2) and (2a) of the SFDR is set out in Appendix IX to this Prospectus. Information in accordance with Article 11 of SFDR can be found in the Company's annual report, on the website 'am.oddo-bhf.com' and is available from the Company on request.

Shares available

Shares that can be issued by the Company in the Sub-Fund have the following features (grouped by categories of Shares):

Name	Initial Subscription Price	Minimum Initial Investment	Minimum Subsequent Investment	Sales Charge (in % of the Net Asset Value per Share)	Redemption Fee (in % of the Net Asset Value per Share)
"I" Shares	Euro 1,000	Euro 250,000	1/1000 th of a Share	Up to 2%	None
"R" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"N" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"P" Shares	Euro 1,000	Euro 10,000,000	1/1000 th of a Share	None	None
"GC" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"X" Shares*	Euro 1,000	Euro 25,000,000	1/1000 th of a Share	None	None

* "X" Shares are dedicated to S-Bank.

Risks

The major risks associated with investing in the Sub-Fund relate to the following elements:

- risk of capital loss;
- interest rate risk;
- credit risk;
- risk associated with high-yield bonds;
- risk associated with discretionary management;
- emerging markets risk;
- counterparty risk;
- liquidity risk of underlying assets;
- risk associated with commitments on forward financial instruments;
- sustainability risk.

The Sub-Fund will be exposed, to a limited extent, to the following risks:

- risk associated with convertible bonds;
- currency conversion and exchanges risks.

For a comprehensive description of these risks, including special risk considerations applicable to high-yield bonds, please refer to the section "Risk Factors". This section also details other risks associated with investing in the Sub-Fund.

Typical Investors' Profile

Typical investors have a long-term horizon (5 years) by investing in a portfolio of mainly listed transferable debt securities of issuers from members countries of the European Monetary Union, with an emphasis on lower quality debt issues. The investor should also have experience with more volatile products and accept that these debt securities are speculative and subject to greater risk of loss of income and principal than higher rated securities.

ODDO BHF EURO HIGH YIELD BOND - Continued

Shares may be offered in currencies other than the Euro, in which case the initial subscription price and the minimum initial investment amount of these Shares (i) will have the same facial value when expressed in GBP, USD or CHF, and (ii) will be ten times the above amounts when expressed in SEK (in order to reflect the FX rate between the Euro and the SEK).

Additional and up-to-date information on the Share Classes specifically offered in the Sub-Fund may be obtained free of charge by any person on am.oddo-bhf.com.

ODDO BHF EURO CREDIT SHORT DURATION

3. ODDO BHF Euro Credit Short Duration

Investment Objective and Strategy

The Sub-Fund is actively managed and aims to provide a high level of income and capital growth. The Sub-Fund does not reference a benchmark.

The Sub-Fund seeks to achieve its investment objective, in accordance with the policies and guidelines established by the Board of Directors, by investing in a portfolio of at least 2/3 listed transferable debt securities of public or private corporations in all sectors, without geographic limit, with fixed or variable interest rates. At least 2/3 of these debt securities are denominated in Euro.

The investment focus lies on debt securities with a rating of at least B3 or B- assigned by an internationally recognised rating service such as Moody's or S&P (or deemed equivalent by the Investment Manager or using the Investment Manager's international rating). The Investment Manager does not use the ratings issued by ratings agencies automatically or in isolation, as it also applies its own internal analysis. In the event of a downgrade, the Investment Manager will take the interests of Shareholders, market conditions and its own analysis of these fixed income products into account when respecting rating limits. A minimum of 20 % of the assets will be invested in high-yield bonds with a maximum rating of BB+ or Ba1 and maximum 10% of unrated bonds. In case a security is downgraded below B3 or B-, it will be sold within six months under normal market circumstances, and in the best interest of Shareholders.

The Sub-Fund is not constrained as to the maximum maturity of its portfolio securities. Nevertheless, it will invest, at least 2/3, in debt securities with a remaining maturity of no more than 4 years.

ESG (Environment, Social and Governance) criteria are a complement to the credit analysis and are fully integrated into the investment process as described on the ESG Strategy of the Sub-Fund in Appendix X to this Prospectus. The remaining part of the total assets which are not invested in debt securities, may be invested within the limits set forth under "Investment Restrictions" in Appendix I hereinafter in any other fungible securities of world-wide issuers (such as debt securities other than those referred to in the above paragraphs, etc.).

Investments in unrated bonds convertible debt securities, and debt securities with warrants attached thereto shall not exceed 10% of the Sub-Fund's total assets.

Investors should note that the Sub-fund may invest in debt securities rated below investment grade or in unrated securities of comparable quality. These debt securities, sometimes referred to as "junk bonds", are speculative and subject to greater risk of loss of income and principal than higher rated securities.

The Sub-Fund may hold Cash Equivalents appropriate to provide for redemptions or to meet other liquidity needs. These assets may consist of commercial paper and other Money Market Instruments with a remaining maturity not in excess of 12 months and of time deposits, and demand deposit accounts; as far as there are exceptional market

conditions the Sub-Fund may hold Cash Equivalents temporarily without any limitation if the Investment Manager considers this to be in the best interest of the Shareholders.

The Sub-Fund may use financial derivatives instruments to hedge currency risk or to hedge or gain exposure to interest rate risk or credit risk (for efficient portfolio management), as described in section "Investment Objectives and Policies", Point A. and under "Investment Restrictions" in Appendix I and "Investment Techniques and Instruments" in Appendix II.

The Sub-Fund may in particular have the possibility, at the discretion of the Investment Manager, to enter into Credit Default Swaps (Index) as buyer and seller.

As detailed in Appendix I Point C (12), the Sub-Fund may not invest more than 10 % of its assets in units or shares of other UCITS or UCI.

The Reference Currency of the Euro Credit Short Duration is Euro.

The currency risk will be covered up to a residual currency risk of 3% of the total assets of the Sub-Fund.

The Sub-Fund may, for cash management purposes or to maximise Sub-Fund's income, use repurchase agreements and/or enter into securities lending transactions, as further described in Appendix II to this Prospectus.

Repurchase agreements or securities lending transactions shall all be conducted under market conditions and each category of transactions (i.e., repurchase agreements or securities lending transactions), may not represent more than 15% of the Sub-Fund's net assets. Cumulatively, repurchase agreements and securities lending transactions shall all be conducted under market conditions, within the limit of 15% of the Sub-Fund's net assets. This limit may be reached in the event of exceptional market conditions, that lead to greater attraction for the securities held in the Sub-Fund and therefore greater activity and opportunities for repurchase agreements and securities lending transactions.

These operations shall be performed on the debt securities and money market instruments referred above

The target proportion of the Sub-Fund's net assets to be used for repurchase agreements or securities lending transactions will be 10%, for each category of transactions (i.e. repurchase agreements or securities lending transactions)

Cumulatively, the target proportion of the Sub-Fund's net assets to be used for repurchase agreements and securities lending transactions will be 10%. This proportion is the proportion expected to be reached in light of the historical market opportunities that have been observed by the Sub-Fund in the past.

Repurchase agreements and securities lending transactions may be carried out with ODDO BHF SCA.

The remuneration received from repurchase agreements and/or securities lending transactions is repaid to the Sub-

ODDO BHF EURO CREDIT SHORT DURATION

Fund, less operating costs charged by the counterparty. The remuneration of the Sub-Fund amounts to 75% of the gross revenues.

Further information on the remuneration repaid to the Sub-Fund as well as costs and fees related to the services provided by the relevant counterparty is available in the Company's annual and semi-annual reports.

Within the scope of OTC financial derivatives transactions and temporary sales of debt securities, the Sub-Fund may receive financial guarantees (collateral). Transactions potentially requiring the use of financial guarantees shall be carried out with a European Union or United Kingdom credit institution that may belong to the ODDO BHF Group. Their operation and characteristics are presented under section C "Collateral Policy" of the Appendix II to this Prospectus.

The Sub-Fund complies with Article 8 of the SFDR as it promotes environmental, social and governance characteristics into its investment strategy on the condition of good corporate governance on the part of the companies in which investments are made. The Sub-Fund is therefore suitable for investors with sustainability preferences.

In accordance with the provisions of Article 8 of the SFDR, the Investment Manager addresses sustainability risks and principal adverse impacts on sustainability factors through its ESG model, the normative and sector exclusions implemented at the fund level and the analysis of controversies based on the elements provided by our external provider of extra-financial data which is part of the integration of ESG criteria (Environmental and/or Social and/or Governance) into its investment decision making process, as described in the section investment strategy of the Sub-Fund. The Investment Manager also considers sustainability safeguards through the Management Company's Exclusion Policy that excludes specific sectors because of the materiality of their sustainability risks and through the exclusion of companies that do not respect the Principles of the United Nations Global Compact. The Management Company has signed the United Nations Principles for Responsible Investment and also the CDP (previously known as Carbon Disclosure Project). The Management Company takes into account the likely impact of sustainability risks on the return of the product and the risk of principal adverse impacts on sustainability factors (E, S and G) of each investment.

Shares available

Shares that can be issued by the Company in the Sub-Fund have the following features (grouped by categories of Shares):

Name	Initial Subscription Price	Minimum Initial Investment	Minimum Subsequent Investment	Sales Charge (in % of the Net Asset Value per Share)	Redemption Fee (in % of the Net Asset Value per Share)
"I" Shares	Euro 1,000	Euro 250,000	1/1000 th of a Share	Up to 2%	None
"R" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"N" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None

Finally, the Management Company exercises the voting rights when equities are held by the Sub-Fund.

Information relating to the Management Company's ESG Policy can be found at "am.oddo-bhf.com".

Further information on the ESG Strategy of the Sub-Fund to be disclosed pursuant to article 8(1), (2) and (2a) of the SFDR is set out in Appendix X to this Prospectus.

Information in accordance with Article 11 of SFDR can be found in the Company's annual report, on the website 'am.oddo-bhf.com' and is available from the Company on request.

Risks

The major risks associated with investing in the Sub-Fund relate to the following elements:

- risk of capital loss;
- interest rate risk;
- credit risk;
- risk associated with high-yield bonds;
- risk associated with discretionary management;
- emerging markets risk;
- volatility risk;
- counterparty risk;
- liquidity risk of underlying assets;
- risk associated with commitments on forward financial instruments;
- sustainability risk.

The Sub-Fund will be exposed, to a limited extent, to the following risks:

- risk associated with convertible bonds;
- currency conversion and exchanges risks.

For a comprehensive description of these risks, including special risk considerations applicable to high-yield bonds, please refer to the section "Risk Factors". This section also details other risks associated with investing in the Sub-Fund.

Typical Investors' Profile

Typical investors have a medium to long term horizon (3 to 5 years) looking for an actively managed portfolio mainly invested in transferable debt securities of corporations with fixed or variable interest rates denominated in Euro.

ODDO BHF EURO CREDIT SHORT DURATION

"P" Shares	Euro 1,000	Euro 10,000,000	1/1000 th of a Share	None	None
"GC" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None

Shares may be offered in currencies other than the Euro, in which case the initial subscription price and the minimum initial investment amount of these Shares (i) will have the same facial value when expressed in GBP, USD or CHF, and (ii) will be ten times the above amounts when expressed in SEK (in order to reflect the FX rate between the Euro and the SEK).

Additional and up-to-date information on the Share Classes specifically offered in the Sub-Fund may be obtained free of charge by any person on am.oddo-bhf.com.

ODDO BHF CONVERTIBLES GLOBAL

4. ODDO BHF Convertibles Global

Investment Objective and Strategy

The Sub-Fund is actively managed and aims to outperform the benchmark index the Thomson Reuters Global Focus Hedged Convertible Bond Index (EUR), calculated with net coupons reinvested, over a minimum investment horizon of three years.

The benchmark index is the Thomson Reuters Global Focus Hedged Convertible Bond Index (EUR) (the "**Benchmark**"). The Benchmark is calculated by MACE Convertible, a company in the Thomson Reuters group. It includes global convertible bonds that meet the minimum liquidity and risk profile balancing (equities/bonds) criteria. The Sub-Fund aims to outperform its Benchmark rather than replicate it precisely and may deviate from it considerably in both positive and negative terms. As part of the investment process, the Investment Manager has full discretion over the composition of the Sub-Fund's portfolio.

The Sub-Fund is managed on an active, discretionary basis and using a fundamental approach that comprises several stages:

1. Fundamental Company Research: the Convertible Securities portfolio management team leverages and integrates the company and sector views from various research teams within the Investment Manager's team.
2. Top-down macro and sector themes: in addition to bottom-up fundamental research and security selection processes, the Investment Manager also develops a view on high-level top-down themes that will guide the portfolio construction process.
3. Portfolio construction and risk control:
 - exposure to different regions, sectors and investment themes,
 - average sensitivity to equity risk, credit risk, interest rate risk and volatility.

To outperform the Benchmark, the Investment Manager will primarily aim to select securities with the greatest potential and to weight them in accordance with overall sensitivity targets.

The Sub-Fund is managed on an active, discretionary basis. The Sub-Fund may invest:

- between 66% and 100% of the net assets in convertible bonds of all types;
- up to 34% of the net assets in other debt securities. Combined convertible bonds will be created by combining a listed call option with a traditional bond or cash.

These securities may:

- be denominated in any currency;
- be high yield securities (i.e. those with a rating of lower than BBB- from S&P, Moody's (2nd highest rating dominates) or a rating deemed to be equivalent by the Investment Manager or through an internal rating system at the Investment Manager, up to a limit of 50% of the Sub-Fund's net assets. The Investment Manager

does not use the ratings issued by ratings agencies automatically or in isolation, as it also applies its own internal analysis. In the event of a ratings downgrade, ratings limits will be assessed in conjunction with the interests of Shareholders, market conditions and the Investment Manager's own analysis of the ratings of these fixed income products.

- Be unrated securities, up to a limit of 75% of the Sub-Fund's net assets.

The Sub-Fund may invest up to 5% of its net assets in shares resulting from the conversion of bonds. These shares will be held for a transitional period until such time as the Investment Manager deems the sale prices to be favourable.

The Sub-Fund is not subject to any restrictions regarding the business sector or geographical location of the issuers. Notwithstanding the foregoing, the Sub-Fund will not invest in companies in the sector of unconventional weapons (chemical weapons, anti-personnel mines and cluster bombs, blinding laser weapons, incendiary weapons and non-detectable fragments weapons, nuclear weapons manufactured by a company incorporated in a country that does not form part of the Nuclear Non-Proliferation Treaty (NPT)).

Exposure to the various asset classes, including derivatives through combined convertible bonds and options on equity indices, may not exceed 130 % of the Sub-Fund's net assets.

The average effective duration shall be between 0 and 5.

The Sub-Fund will be fully hedged against currency risk. Residual risk resulting from delays in adjusting systematic hedging shall account for less than 5% of the net assets.

The Sub-Fund may use options traded on French or foreign regulated markets in order to expose the Sub-Fund through combined convertible bonds and options on equity indices

The Sub-Fund may use futures or options traded on French or foreign regulated markets in order to hedge against the interest rate or equity risk.

Any associated currency risk will be hedged. Futures traded on French or foreign regulated markets and FX forwards may be used to hedge the Sub-Fund's currency risk.

The Sub-Fund may use financial derivatives instruments to hedge currency risk or to hedge or gain exposure to interest rate risk or credit risk (for efficient portfolio management), as described in section "Investment Objectives and Policies", Point A. and under "Investment Restrictions" in Appendix I and "Investment Techniques and Instruments" in Appendix II.

The Sub-Fund may also use index credit default swaps (CDS) up to a limit of 10% to hedge against credit risk.

As detailed in Appendix I point C (12), a maximum of 10% of the Sub-Fund's net assets may be invested in shares or units of UCITS, UCITS-ETF or UCI that meet the four

ODDO BHF CONVERTIBLES GLOBAL

criteria of article 41(1)(e) of the 2010 Law on Undertakings for Collective Investment. These investment funds or UCITS may be managed by the Management Company or the Investment Manager. Investment in these funds shall be consistent with the Sub-Fund's investment strategy.

The Reference Currency of the Sub-Fund is Euro.

The Sub-Fund may, for cash management purposes or to maximise Sub-Fund's income, use repurchase agreements and/or securities lending transactions, as further described in Appendix II to this Prospectus.

Repurchase agreements or securities lending transactions shall all be conducted under market conditions and each category of transactions (i.e. repurchase agreements or securities lending transactions), may not represent more than 15% of the Sub-Fund's net assets. Cumulatively, repurchase agreements and securities lending transactions shall all be conducted under market conditions, within the limit of 15% of the Sub-Fund's net assets. This limit may be reached in the event of exceptional market conditions, that lead to greater attraction for the securities held in the Sub-Fund and therefore greater activity and opportunities for repurchase agreements and securities lending transactions.

These operations shall be performed on the debt securities and money market instruments referred above.

The target proportion of the Sub-Fund's net assets to be used for repurchase agreements or securities lending transactions will be 10%, for each category of transactions (i.e. repurchase agreements or securities lending transactions). Cumulatively, the target proportion of the Sub-Fund's net assets to be used for repurchase agreements and securities lending transactions will be 10%. This proportion is the proportion expected to be reached in light of the historical market opportunities that have been observed by the Sub-Fund in the past.

Repurchase agreements and securities lending transactions may be carried out with ODDO BHF SCA.

The remuneration received from repurchase agreements and/or securities lending transactions is repaid to the Sub-Fund, less operating costs charged by the counterparty. The remuneration of the Sub-Fund amounts to 75% of the gross revenues.

Further information on the remuneration repaid to the Sub-Fund as well as costs and fees related to the services provided by the relevant counterparty is available in the Company's annual and semi-annual reports.

The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

In accordance with the provisions of Article 6 of the SFDR, the Investment Manager does not consider sustainability risks or "principal adverse impacts" on sustainability factors in the investment decision making process, as they are not part of the strategy for the Sub-Fund. However, the Investment Manager considers minimum sustainability safeguards across its funds through Management Company's Exclusion Policy that excludes specific sectors

because of the materiality of their sustainability risks and through the exclusion of companies that do not respect the Principles of the United Nations Global Compact. The Management Company has signed the United Nations Principles for Responsible Investment (PRI) and also the CDP (previously known as Carbon Disclosure Project).

Information relating to the Management Company's ESG Policy can be found at "am.oddo-bhf.com".

Within the scope of OTC financial derivatives transactions and temporary sales of debt securities, the Sub-Fund may receive financial guarantees (collateral). Transactions potentially requiring the use of financial guarantees shall be carried out with a European Union, Switzerland or United Kingdom credit institution that may belong to the ODDO BHF Group. Their operation and characteristics are presented under section C "Collateral Policy" of the Appendix II to this Prospectus.

Risks

The major risks associated with investing in the Sub-Fund relate to the following elements:

- risk of capital loss;
- interest rate risk;
- credit risk;
- risk associated with convertible bonds;
- risk associated with high yield bonds;
- equity risk;
- risk associated with holding small and medium capitalisations;
- risk associated with discretionary management;
- emerging markets risk;
- volatility risk;
- counterparty risk;
- liquidity risk of underlying assets;
- risk associated with commitments on forward financial instruments
- risk linked to use of overexposure (max 130%);
- sustainability risk.

And on an ancillary basis:

- currency, conversion and exchange rates risks.

For a comprehensive description of these risks, please refer to the section "Risk Factors". This section also details other risks associated with investing in the Sub-Fund.

Typical investors' profile

Typical investors have an investment horizon of three (3) years. The Sub-Fund is intended for investors seeking exposure to global markets, in particular via convertible bonds, and who are able to cope with any losses linked to this exposure.

ODDO BHF CONVERTIBLES GLOBAL

The amount that is appropriate to invest in this Sub-Fund will depend on the personal situation of each investor. To determine this amount, investors should take into account their personal assets, their current needs and their needs in more than three years' time, and also their willingness to

accept risks or their preference for a more prudent investment. It is therefore highly recommended that investors sufficiently diversify their investments so as not to be exposed solely to the risks of this Sub-Fund.

Shares available

Shares that can be issued by the Company in the Sub-Fund have the following features (grouped by categories of Shares):

Name	Initial Subscription Price	Minimum Initial Investment	Minimum Subsequent Investment	Sales Charge (in % of the Net Asset Value per Share)	Redemption Fee (in % of the Net Asset Value per Share)
"I" Shares	Euro 1,000	Euro 250,000	1/1000 th of a Share	Up to 2%	None
"R" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"N" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"GC" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None

Shares may be offered in currencies other than the Euro, in which case the initial subscription price and the minimum initial investment amount of these Shares (i) will have the same facial value when expressed in GBP, USD or CHF, and (ii) will be ten times the above amounts when expressed in SEK (in order to reflect the FX rate between the Euro and the SEK).

Additional and up-to-date information on the Share Classes specifically offered in the Sub-Fund may be obtained free of charge by any person on am.oddo-bhf.com.

ODDO BHF OBJECTIFS REVENUS

5. ODDO BHF Objectifs Revenus

Investment Objective and Strategy

The Sub-Fund is actively managed and aims to achieve medium and long-term asset growth and, with the exception of accumulation shares, to pay a dividend at regular intervals between four and eight times a year.

The Sub-Fund's profitability objective is to generate an annual return higher than €STR + 15 bp, less management fee, assuming that the dividends paid by the Sub-Fund are reinvested by Shareholders. This target return is an objective and does not constitute a guarantee of future performance.

The benchmark index is €STR (the "Benchmark"). The euro short-term rate (€STR) reflects the wholesale euro unsecured overnight borrowing costs of banks located in the euro area. The €STR is published on each TARGET2 business day based on transactions conducted and settled on the previous TARGET2 business day (the reporting date "T") with a maturity date of T+1 which are deemed to have been executed at arm's length and thus reflect market rates in an unbiased way. The Sub-Fund aims to outperform its Benchmark rather than replicate it precisely and may deviate from it considerably in both positive and negative terms. As part of the investment process, the Management Company has full discretion over the composition of the Sub-Fund's portfolio.

The Sub-Fund will invest up to 70% of its net assets in shares or units of French or European money market UCITS or other UCIs that meet the four criteria of article 41(1)(e) of the 2010 Law. The Sub-Fund may also invest in fixed or floating rate debt/money market instruments, such as bonds issued by governments or public and private companies rated between A and AAA (S&P or an equivalent rating agency). Within a limit of 5% of its net assets, the Sub-Fund may hold securities with a minimum rating of BBB.

The Sub-Fund invests at least 30% of its net assets in shares or units of French or European UCITS or other UCIs meeting the four criteria referred to in Article 41(1)(e) of the 2010 Law, investing in bonds with a maximum exposure of 10% to High Yield rated instruments.

The Sub-Fund may invest a majority of its assets in UCITS or investment funds managed by the Management Company. Investment in these UCITS or funds shall be consistent with the Sub-Fund's investment strategy.

The Sub-Fund will not invest in companies in the sector of unconventional weapons (chemical weapons, anti-personnel mines and cluster bombs, blinding laser weapons, incendiary weapons and non-detectable fragments weapons, nuclear weapons manufactured by a company incorporated in a country that does not form part of the Nuclear Non-Proliferation Treaty (NPT)).

The maximum management fee that can be charged both to the Sub-Fund itself and to other UCITS/UCIs in which it intends to invest is 1%.

The Sub-Fund will not invest in asset backed securities. The Management Company does not use the ratings issued by ratings agencies automatically or in isolation, as it also applies its own internal analysis. In the event of a

downgrade, the Management Company will take the interests of the Shareholders, market conditions and its own analysis of these fixed income products into account when respecting rating limits.

The Sub-Fund may also invest in deposits with institutions that have their registered office in an EU Member State.

Within the limits provided for in the Prospectus, the Sub-Fund has the option of holding cash and similar instruments on an ancillary basis.

In spite of all the measures that the Management Company takes to achieve its investment objectives, these are subject to risk factors beyond its control, in particular including changes made to tax or commercial regulations. No guarantee of any kind can be given to investors in this regard.

The Reference Currency of the Sub-Fund is Euro.

The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

In accordance with the provisions of Article 6 of the SFDR, the Management Company currently does not consider sustainability risks or "principal adverse impacts" on sustainability factors in the investment decision making process, as they are not part of the strategy for the Sub-Fund. However, the Management Company considers minimum sustainability safeguards across its funds through its own Exclusion Policy that excludes specific sectors because of the materiality of their sustainability risks and through the exclusion of companies that do not respect the Principles of the United Nations Global Compact. The Management Company has signed the United Nations Principles for Responsible Investment (PRI) and also the CDP (previously known as Carbon Disclosure Project). Finally, the Management Company exercises the voting rights when equities are held by the Sub-Fund. Information relating to the Management Company's ESG policy can be found at "am.oddo-bhf.com".

Risks

The major risks associated with investing in the Sub-Fund relate to the following elements:

- credit risk;
- interest rate risk;
- risk that the Sub-Fund may not achieve its investment objective in full: Investors are advised that the Sub-Fund's performance may not meet its objectives and that they may lose some or all of their initial investment;
- sustainability risk.

Exposure to currency risk is prohibited.

ODDO BHF OBJECTIFS REVENUS

For a comprehensive description of these risks, please refer to the section “Risk Factors”. This section also details other risks associated with investing in the Sub-Fund.

Typical investors' profile

The Sub-Fund is reserved for institutional investors, in particular insurance companies offering life insurance policies that are seeking exposure to European money markets while having the option, with the exception of accumulation shares, of receiving several distributions per year.

Shares available

Shares that can be issued by the Company in the Sub-Fund have the following features (grouped by categories of Shares):

Name	Initial Subscription Price	Minimum Initial Investment	Minimum Subsequent Investment	Sales Charge (in % of the Net Asset Value per Share)	Redemption Fee (in % of the Net Asset Value per Share)
“I” Shares	Euro 1,000	Euro 250,000	1/1000 th of a Share	Up to 2%	None
“GC” Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None

Shares may be offered in currencies other than the Euro, in which case the initial subscription price and the minimum initial investment amount of these Shares (i) will have the same facial value when expressed in GBP, USD or CHF, and (ii) will be ten times the above amounts when expressed in SEK (in order to reflect the FX rate between the Euro and the SEK).

Additional and up-to-date information on the Share Classes specifically offered in the Sub-Fund may be obtained free of charge by any person on am.oddo-bhf.com.

Dividend Policy

Unless the Board of Directors expressly decides otherwise, CI-EUR Shares in this Sub-Fund do not normally pay a dividend to Shareholders of this Class of Shares. The income of Classes of Shares labelled C will be accumulated and will increase the net asset value of each share in these Classes of Shares by the same amount.

The goal of DI-EUR Shares in this Sub-Fund is to distribute dividends to shareholders of this Class of Shares at regular intervals. Dividends may account for a substantial proportion (up to 80%) of the Net Asset Value of Classes of Shares labelled D and will be paid at regular intervals, up to eight times a year. Such dividends will be paid in cash. However, under no circumstances will a dividend of any kind be paid if to do so would reduce the net asset value of the Company to less than EUR 1,250,000 (one million two hundred and fifty thousand Euro).

Due to the dividend policy of the DI-EUR Class of Shares, the Board of Directors may decide to consolidate distribution shares if the Net Asset Value per Shares falls below 100 (one hundred) Euro.

ODDO BHF CREDIT OPPORTUNITIES

6. ODDO BHF Credit Opportunities

Investment Objective and Strategy

The Sub-Fund is actively managed and aims to achieve a performance, net of fees, higher than €STR plus 2% (capitalized), on an annual basis by managing a portfolio investing at least 70% of its total assets in securities issued by issuers headquartered in an OECD member state and integrating ESG (Environmental, Social, and Governance) criteria in parallel.

The investment universe of the Sub-Fund is made up of the companies included in the following credit market indices: the ICE BofAML Euro Corporate Senior Index, the ICE BofAML BB-B Euro High Yield Non-Financial Constrained Index, the ICE BofAML Euro Subordinated Financial Index, the ICE BofA Euro Non-Financial Subordinated Index, the ICE BofAML Euro Large Cap ex Corporates Index, and the ICE BofA Non-Financial US Emerging Markets Liquid Corporate Plus Index and the ICE BofA Contingent Capital Index. As part of the investment process, the Investment Manager has full discretion over the composition of the Sub-Fund's portfolio and may deviate from the investment universe.

The Investment Manager takes ESG (Environment, Social and Governance) criteria into account, as described on the ESG Strategy of the Sub-Fund, in Appendix XI to this Prospectus. The Investment Manager's management team will follow an investment process comprising two stages:

- 1. First stage:** Analysis of the overall risk profile and determination of the allocation per segment based on fundamental and quantitative analysis.

The main bond segments are:

- securities rated "high yield", i.e. rated between BB+ and B- (S&P, Moody's or deemed equivalent by the Investment Manager or through an internal rating system at the Investment Manager). The Sub-Fund will not invest in distressed securities (securities rated CCC- and below assigned by an internationally recognised rating service such as Moody's or S&P (or deemed equivalent by the Investment Manager, or using the Investment Manager's internal rating);
- securities rated "investment grade" i.e. equal to or higher than BBB- (S&P, Moody's or deemed equivalent by the Management Company or through an internal rating system at the Management Company);
- securities issued by entities whose activities are primarily conducted in a country that is not a member of the OECD and is likely to result in economic exposure to emerging markets;
- covered bonds, SSA bonds (Sovereigns, Supranationals and Agencies Bonds) and government bonds;
- convertible bonds and "Contingent Convertible Bonds" with a maximum of 10% of the Sub-Fund's assets;
- subordinated bonds from financial issuers (this bucket might include a maximum of 10% of the Sub-Fund's net assets in "Contingent Convertible Bonds");
- subordinated bonds from non-financial issuers (corporate hybrids).

- 2. Second stage:** Fixed income securities selection through a bottom-up analysis of credit issuers.

Up to 100% of the Sub-Fund's net assets shall be invested in debt securities:

- bonds of all kinds; and
- money market instruments.

All these securities will be denominated in the currency of an OECD member state with a minimum of 80% of the securities in the portfolio denominated in EUR and/or USD.

A minimum of 70% of these securities will be issued by issuers headquartered in an OECD member state. However, up to 100% of the Sub-Fund's net assets may be invested in entities whose activities are primarily conducted in a country that is not a member of the OECD, resulting in economic exposure to emerging markets.

The Sub-Fund may invest in instruments issued by entities rated at least B-: "investment grade" (rated at least BBB-) and "high yield" (rated between BB+ and B-) (S&P, Moody's or deemed equivalent by the Investment Manager or through an internal rating system at the Investment Manager). The Investment Manager does not use the ratings issued by ratings agencies automatically or in isolation, as it also applies its own internal analysis. In the event of a downgrade, the Investment Manager will take the interests of Shareholders, market conditions and its own analysis of these fixed income products into account when respecting rating limits.

The portfolio's modified duration will range from -2 to +8. Modified duration measures the impact of a change in interest rate on the price of a bond to which it relates. Example: for a bond with modified duration of 3, if the benchmark interest rate falls by 1%, the bond price will rise by 3% (1% x 3) and vice versa. The longer the maturity of the bond, the higher the modified duration.

As detailed in Appendix I point C (12), a maximum of 10% of the Sub-Fund's net assets may be invested in shares or units of UCITS, UCITS-ETF or UCI that meet the four criteria of article 41(1)(e) of the 2010 Law. These investment funds or UCITS may be managed by the Management Company or the Investment Manager. Investment in these funds shall be consistent with the Sub-Fund's investment strategy.

The Sub-Fund may use financial derivatives instruments to hedge or gain exposure to interest rate risk or credit risk (for efficient portfolio management), as described in section "Investment Objectives and Policies", Point A. and under "Investment Restrictions" in Appendix I and "Investment Techniques and Instruments" in Appendix II. The Sub-Fund may in particular have the possibility, at the discretion of the Management Company and the Investment Manager, to enter into Credit Default Swaps Index as buyer or seller.

The Sub-Fund may also use forward exchange transactions for hedging purposes; however, ancillary risk will be limited to a maximum of 5% of the Sub-Fund's net assets.

The Sub-Fund's overall net exposure will be limited to 200% of its net assets, via direct investments in securities, derivatives and, to a lesser extent, investment funds.

Investments in convertible bonds and contingent convertible bonds ("CoCos") shall not exceed 10% of the

ODDO BHF CREDIT OPPORTUNITIES

Sub-Fund's net assets. The Sub-Fund will not invest in CoCos issued by ODDO BHF Group.

The Sub-Fund will not invest in "securitisation" instruments such as asset-backed securities and mortgage-backed securities.

The Reference Currency of the Sub-Fund is the Euro.

The Sub-Fund may, for cash management purposes or to maximise Sub-Fund's income, use repurchase agreements and/or securities lending transactions, as further described in Appendix II to this Prospectus.

Repurchase agreements or securities lending transactions shall all be conducted under market conditions and each category of transactions (i.e. repurchase agreements or securities lending transactions), may not represent more than 15% of the Sub-Fund's net assets. Cumulatively, repurchase agreements and securities lending transactions shall all be conducted under market conditions, within the limit of 15% of the Sub-Fund's net assets. This limit may be reached in the event of exceptional market conditions, that lead to greater attraction for the securities held in the Sub-Fund and therefore greater activity and opportunities for repurchase agreements and securities lending transactions.

These operations shall be performed on the debt securities and money market instruments referred above.

The target proportion of the Sub-Fund's net assets to be used for repurchase agreements or securities lending transactions will be 10%, for each category of transactions (i.e. repurchase agreements or securities lending transactions). Cumulatively, the target proportion of the Sub-Fund's net assets to be used for repurchase agreements and securities lending transactions will be 10%. This proportion is the proportion expected to be reached in light of the historical market opportunities that have been observed by the Sub-Fund in the past.

Repurchase agreements and securities lending transactions may be carried out with ODDO BHF SCA.

The remuneration received from repurchase agreements and/or securities lending transactions is repaid to the Sub-Fund, less operating costs charged by the counterparty. The remuneration of the Sub-Fund amounts to 75% of the gross revenues.

Further information on the remuneration repaid to the Sub-Fund as well as costs and fees related to the services provided by the relevant counterparty is available in the Company's annual and semi-annual reports.

The Sub-Fund is actively managed and references a benchmark, €STR plus 2% (capitalized) (the "**Benchmark**"), for performance fee calculation purposes, if any. The euro short-term rate (€STR) reflects the wholesale euro unsecured overnight borrowing costs of banks located in the euro area. The €STR is published on each TARGET2 business day based on transactions conducted and settled on the previous TARGET2 business day (the reporting date "T") with a maturity date of T+1 which are deemed to have been executed at arm's length and thus reflect market rates in an unbiased way.

The Benchmark is broad market index that does not necessarily consider in their composition or calculation methodology the ESG characteristics promoted by the Sub-Fund. For a description of the method used to calculate the Benchmark, see: <https://www.emmi-benchmarks.eu/emmi/>.

Within the scope of OTC financial derivatives transactions and temporary sales of debt securities, the Sub-Fund may receive financial guarantees (collateral). Transactions potentially requiring the use of financial guarantees shall be carried out with a European Union or United Kingdom credit institution that may belong to the ODDO BHF Group. Their operation and characteristics are presented under section C "Collateral Policy" of the Appendix II to this Prospectus.

The Sub-Fund complies with Article 8 of the SFDR as it promotes environmental, social and governance characteristics into its investment strategy on the condition of good corporate governance on the part of the companies in which investments are made. The Sub-Fund is therefore suitable for investors with sustainability preferences.

In accordance with the provisions of Article 8 of the SFDR, the Management Company addresses sustainability risks and principal adverse impacts on sustainability factors through its ESG model, the normative and sector exclusions implemented at the fund level and the analysis of controversies based on the elements provided by our external provider of extra-financial data which is part of the integration of ESG criteria (Environmental and/or Social and/or Governance) into its investment decision making process, as described in the section investment strategy of the Sub-Fund. The Investment Manager also considers sustainability safeguards through the Management Company's Exclusion Policy that excludes specific sectors because of the materiality of their sustainability risks and through the exclusion of companies that do not respect the Principles of the United Nations Global Compact. The Management Company has signed the United Nations Principles for Responsible Investment and also the CDP (previously known as Carbon Disclosure Project). The Management Company takes into account the likely impact of sustainability risks on the return of the product and the risk of principal adverse impacts on sustainability factors (E, S and G) of each investment. Finally, the Management Company exercises the voting rights when equities are held by the Sub-Fund.

Information relating to the Management Company's ESG Policy can be found at "am.oddo-bhf.com".

Further information on the ESG Strategy of the Sub-Fund to be disclosed pursuant to article 8(1), (2) and (2a) of the SFDR is set out in Appendix XI to this Prospectus. Information in accordance with Article 11 of SFDR can be found in the Company's annual report, on the website 'am.oddo-bhf.com' and is available from the Company on request.

Risks

ODDO BHF CREDIT OPPORTUNITIES

The major risks associated with investing in the Sub-Fund relate to the following elements:

- Risk of capital loss;
- Credit risk
- Interest rate risk;
- Risk associated with discretionary management;
- Modelling risk;
- Liquidity risk of underlying assets;
- Counterparty risk;
- Emerging markets risk;
- Risks associated with securities financing transactions and collateral management;
- Risk associated with high yield bonds;
- Risks associated with portfolio concentration;
- Risk associated with commitments on forward financial instruments;
- sustainability risk.
- Risk of over exposure

The Sub-Fund will be exposed, to a limited extent, to the following risks:

- Currency conversion and exchanges risk.

For a comprehensive description of these risks, please refer to the section "Risk Factors". This section also details other risks associated with investing in the Sub-Fund.

Typical Investors' Profile

The Sub-Fund is mainly intended for investors seeking exposure to bond markets over a period of three years, who are willing to accept the risks arising from such exposure.

The amount that is appropriate to invest in this Sub-Fund depends on your personal wealth. To determine this amount, investors should consider their personal wealth/assets, their current financial needs and those in three years as well as their willingness to accept risks or their preference for a more prudent investment. It is also highly recommended that investors sufficiently diversify their investments so as not to be exposed solely to the risks of this Sub-Fund.

Shares available

Shares that can be issued by the Company in the Sub-Fund have the following features (grouped by categories of Shares):

Name	Initial Subscription Price	Minimum Initial Investment	Minimum Subsequent Investment	Sales Charge (in % of the Net Asset Value per Share)	Redemption Fee (in % of the Net Asset Value per Share)
"I" Shares	Euro 1,000	Euro 250,000	1/1000th of a Share	Up to 2%	None
"R" Shares	Euro 100	Euro 100	1/1000th of a Share	Up to 5%	None
"N" Shares	Euro 100	Euro 100	1/1000th of a Share	Up to 5%	None
"P" Shares	Euro 1,000	Euro 10,000,000	1/1000th of a Share	None	None
"GC" Shares	Euro 100	Euro 100	1/1000th of a Share	Up to 5%	None
"X" Shares*	Euro 1,000	Euro 250,000	1/1000th of a Share	Up to 2%	None

Shares may be offered in currencies other than the Euro, in which case the initial subscription price and the minimum initial investment amount of these Shares (i) will have the same facial value when expressed in GBP, USD or CHF, and (ii) will be ten times the above amounts when expressed in SEK (in order to reflect the FX rate between the Euro and the SEK).

Additional and up-to-date information on the Share Classes specifically offered in the Sub-Fund may be obtained free of charge by any person on am.oddo-bhf.com.

ODDO BHF US EQUITY TREND

7. ODDO BHF US Equity Trend

Investment Objective and Strategy

The Sub-Fund is actively managed and aims to generate a sustainable return out of income from growth in investments in securities while keeping financial risk low.

The Sub-Fund is actively managed and references a benchmark, the S&P 500 NR (Net Return) in EUR, dividend reinvested (the “**Benchmark**”), by seeking to outperform it and for performance fee calculation purposes, if any. This Benchmark is a market-capitalization-weighted index of the 500 largest U.S. publicly traded companies. The Sub-Fund aims to outperform its Benchmark rather than replicate it precisely and may deviate from it considerably in both positive and negative terms. As part of the investment process, the Investment Manager has full discretion over the composition of the Sub-Fund’s portfolio.

The Sub-Fund shall invest at least 70% of its net assets in equities that are contained in the S&P 500 NR.

The selection of equity securities for the Sub-Fund is performed using a trend tracker model referencing the benchmark index. The model computes trends and buy/sell signals from a large set of historical data. There is no manual intervention in the model’s investment decisions.

Notwithstanding the above, orders for purchases or sales of securities are performed manually by the Investment Manager.

Fluctuations and declines in equity market prices do not trigger reallocations within the Sub-Fund until the moment is reached when the tracked positive trend in the equities concerned ceases to exist or other equities are identified as more attractive. An additional component of the strategy is that the Sub-Fund is always almost fully invested in equity securities, save as provided otherwise herein.

The Sub-Fund will always invest a minimum of 51% of its net assets in equity participations as defined in the German Investment Taxation Act.

The Sub-Fund may invest up to 30% of its net assets in equities of issuers whose registered office is not located in the U.S.A, with the possibility of investing 10% of its net assets in issuers whose registered office is not located in a country of OECD.

Subject to market conditions, the Sub-Fund may invest up to 30% of its net assets in debt instruments denominated in euro with a rating “investment grade” (at least BBB- by Standard & Poor’s or deemed equivalent by the Investment Manager or using the Investment Manager’s internal rating) issued by corporate or sovereign issuers.

Regarding the ratings referred to above and below in respect of this Sub-Fund, the Investment Manager does not use the ratings issued by ratings agencies automatically or in isolation, as it also applies its own internal analysis. In the event of a downgrade, the Investment Manager will take the interests of Shareholders, market conditions and its own

analysis of these fixed income products into account when respecting rating limits.

The Sub-Fund may hold Cash Equivalents appropriate to provide for redemptions or to meet other liquidity needs. These assets may consist of commercial paper and other Money Market Instruments with a rating “investment grade” (at least BBB- by Standard & Poor’s or deemed equivalent by the Investment Manager or using the Investment Manager’s internal rating) and a remaining maturity not in excess of 12 months and of time deposits, and demand deposit accounts. As part of the investment strategy, the Sub-Fund is allowed to enter into derivatives for investment and hedging purposes. This includes derivatives for efficient portfolio management, as described in section “Investment Objectives and Policies”, Point A. and under “Investment Restrictions” in Appendix I and “Investment Techniques and Instruments” in Appendix II, and to generate additional income, and hence also for speculative purposes. The Sub-Fund may in particular have the possibility, at the discretion of the Investment Manager, to enter into futures contracts, options, swaps, and OTC derivatives.

As detailed in Appendix I Point C (12), the Sub-Fund may invest up to 10 % of its net assets in units or shares of UCITS or UCI that meet the four criteria of article 41(1)(e) of the 2010 Law, including AIFs from France or other Member States and foreign investment funds. These funds may be managed by ODDO BHF Asset Management SAS and ODDO BHF Asset Management GmbH.

The portfolio’s total exposure to equities and other markets, including derivatives, is limited to 100% of net assets. The Sub-Fund is exposed to currency risk.

Within the scope of OTC financial derivatives transactions and temporary sales of debt securities, the Sub-Fund may receive financial guarantees (collateral). Transactions potentially requiring the use of financial guarantees shall be carried out with a European Union or United Kingdom credit institution that may belong to the ODDO BHF Group. Their operation and characteristics are presented under section C “Collateral Policy” of the Appendix II to this Prospectus.

ODDO BHF US EQUITY TREND

The Sub-Fund may act as a master fund for other UCITS or sub-fund of other UCITS within the meaning of and the limits set forth in article 77 of the 2010 Law and section F. of Appendix I "Investments Restrictions" of this Prospectus; In particular the Sub-Fund may not (i) be itself a feeder fund nor (ii) acquire shares or units of feeder funds.

The Reference Currency of the ODDO BHF US Equity Trend Sub-Fund is Euro.

The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

The Sub-Fund complies with Article 8 of the SFDR as it promotes environmental, social and governance characteristics into its investment strategy on the condition of good corporate governance on the part of the companies in which investments are made. The Sub-Fund is therefore suitable for investors with sustainability preferences.

In accordance with the provisions of Article 8 of the SFDR, the Investment Manager addresses sustainability risks and principal adverse impacts on sustainability factors through its ESG model, the normative and sector exclusions implemented at the fund level and the analysis of controversies based on the elements provided by our external provider of extra-financial data which is part of the integration of ESG criteria (Environmental and/or Social and/or Governance) into its investment decision making process, as described in the section investment strategy of the Sub-Fund. The Investment Manager also considers sustainability safeguards through the Management Company's Exclusion Policy that excludes specific sectors because of the materiality of their sustainability risks and through the exclusion of companies that do not respect the Principles of the United Nations Global Compact. The Management Company has signed the United Nations Principles for Responsible Investment and also the CDP (previously known as Carbon Disclosure Project).

The Management Company takes into account the likely impact of sustainability risks on the return of the product

Shares available

Shares that can be issued by the Company in the Sub-Fund have the following features (grouped by categories of Shares):

Name	Initial Subscription Price	Minimum Initial Investment	Minimum Subsequent Investment	Sales Charge (in % of the Net Asset Value per Share)	Redemption Fee (in % of the Net Asset Value per Share)
"I" Shares	Euro 1,000	Euro 250,000	1/1000 th of a Share	Up to 2%	None
"R" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"N" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"P" Shares	Euro 1,000	Euro 10,000,000	1/1000 th of a Share	Up to 2%	None

and the risk of principal adverse impacts on sustainability factors (E, S and G) of each investment. Finally, the Management Company exercises the voting rights when equities are held by the Sub-Fund.

Information relating to the Management Company's ESG Policy can be found at "am.oddo-bhf.com".

Further information on the ESG Strategy of the Sub-Fund to be disclosed pursuant to article 8(1), (2) and (2a) of the SFDR is set out in Appendix XVIII to this Prospectus.

Information in accordance with Article 11 of SFDR can be found in the Company's annual report, on the website 'am.oddo-bhf.com' and is available from the Company on request.

Risks

The major risks associated with investing in the Sub-Fund relate to the following elements:

- risk of capital loss;
- equity risk;
- quantitative model risk;
- interest rate risk;
- credit risk;
- risk associated with discretionary management;
- volatility risk;
- counterparty risk;
- liquidity risk of underlying assets;
- risk associated with commitments on forward financial instruments;
- currency conversion and exchange rates risks;
- emerging markets risk;
- sustainability risk.

For a comprehensive description of these risks, please refer to the section "Risk Factors". This section also details other risks associated with investing in the Sub-Fund.

Typical investors' profile

Typical investors have a medium term horizon (at least 5 years) looking for an actively managed portfolio which generates a sustainable return out of income from growth in investments in securities while keeping financial risk low.

ODDO BHF US EQUITY TREND

ODDO BHF GLOBAL CREDIT SHORT DURATION

8. ODDO BHF Global Credit Short Duration

Investment Objective and Strategy

The investment objective of the Sub-Fund is to provide a high level of income and capital growth.

The Sub-Fund is actively managed and references a benchmark, €STR plus 1.5% (capitalized) (the "Benchmark"), by seeking to outperform it and for performance fee calculation purposes, if any. The euro short-term rate (€STR) reflects the wholesale euro unsecured overnight borrowing costs of banks located in the euro area. The €STR is published on each TARGET2 business day based on transactions conducted and settled on the previous TARGET2 business day (the reporting date "T") with a maturity date of T+1 which are deemed to have been executed at arm's length and thus reflect market rates in an unbiased way. The Sub-Fund aims to outperform its Benchmark rather than replicate it precisely and may deviate from it considerably in both positive and negative terms. As part of the investment process, the Investment Manager has full discretion over the composition of the Sub-Fund's portfolio.

The Sub-Fund aims to achieve its objective by investing at least 50% of its net assets in global debt securities ("investment grade" and High Yield).

The investment focus lies on debt securities with a rating of at least B3 or B- assigned by an internationally recognised rating service such as Moody's or S&P (or deemed equivalent by the Investment Manager or using the Investment Manager's internal rating). The Investment Manager does not use the ratings issued by ratings agencies automatically or in isolation, as it also applies its own internal analysis. In the event of a downgrade, the Investment Manager will take the interests of Shareholders, market conditions and its own analysis of these fixed income products into account when respecting rating limits. In case a security is downgraded below B3 or B- (in a worst-case scenario a security could be even downgraded to the point that such security can be considered as distressed), it will be sold within six months under normal market circumstances, and in the best interest of Shareholders. Distressed securities are securities of entities that are experiencing default or are under bankruptcy rated CCC- and below assigned by an internationally recognised rating service such as Moody's or S&P (or deemed equivalent by the Investment Manager, or using the Investment Manager's internal rating). In the circumstances described in the preceding sentence, should the distressed securities represent more than 10% of the Sub-Fund's net assets; the proportion above 10% will be sold as soon as possible, under normal market circumstances, and in the best interest of Shareholders. The Sub-Fund will not actively invest in distressed securities. The average minimum rating of the portfolio will be B2/B.

The Sub-Fund includes issuers from emerging markets countries who are not members of the OECD. In terms of issue currencies the Sub-Fund will only invest in securities denominated in currencies of OECD countries in particular the following currencies: USD, EUR, GBP, JPY, CHF, NOK, SEK, DKK.

Currency related risk will be hedged back into Euro with a maximum residual exposure of 5% remaining.

At least 75% of the debt securities will have a remaining maturity of no more than 5 years.

The remaining part of the total assets may be invested within the limits set forth under "Investment Restrictions" in Appendix I hereinafter in any other fungible securities of world-wide issuers (such as debt securities other than those referred to in the above paragraphs, etc.).

Investors should note that the Sub-Fund may invest in debt securities rated below investment grade or in unrated securities of comparable quality. These debt securities, sometimes referred to as "High yield bonds", are speculative and subject to greater risk of loss of income and principal than higher rated securities.

The Sub-Fund may hold Cash Equivalents appropriate to provide for redemptions or to meet other liquidity needs. These assets may consist of commercial paper and other Money Market Instruments with a rating minimum BBB- (as Moody's or S&P or deemed equivalent by the Investment Manager, or using the Investment Manager's internal rating with a remaining maturity not in excess of 12 months and of time deposits, and demand deposit accounts; as far as there are exceptional market conditions the Sub-Fund may hold Cash Equivalents temporarily without any limitation if the Management Company or the Investment Manager considers this to be in the best interest of the Shareholders). The Investment Manager does not use the ratings issued by ratings agencies automatically or in isolation, as it also applies its own internal analysis. In the event of a downgrade, the Investment Manager will take the interests of Shareholders, market conditions and its own analysis of these fixed income products into account when respecting rating limits.

The Sub-Fund may use financial derivatives instruments to hedge currency risk or to hedge or gain exposure to interest rate risk or credit risk (for efficient portfolio management) as described in section "Investment Objectives and Policies", Point A. and under "Investment Restrictions" in Appendix I and "Investment Techniques and Instruments" in Appendix II.

The Sub-Fund may in particular have the possibility, at the discretion of the Management Company and the Investment Manager, to enter into Credit Default Swaps (Index) as buyer or seller.

ODDO BHF GLOBAL CREDIT SHORT DURATION

As detailed in Appendix I Point C (12), the Sub-Fund may invest up to 10 % of its net assets in units or shares of UCITS or UCI that meet the four criteria of article 41(1)(e) of the 2010 Law , including AIFs from France or other Member States and foreign investment funds. These funds may be managed by ODDO BHF Asset Management SAS and ODDO BHF Asset Management GmbH.

The Reference Currency of the Global Credit Short Duration is Euro.

Maximum exposure to the markets (interest rate / credit) through direct instruments and derivatives is 120 %.

The Sub-Fund may, for cash management purposes or to maximise Sub-Fund's income, use repurchase agreements and/or enter into securities lending transactions, as further described in Appendix II to this Prospectus.

Repurchase agreements or securities lending transactions shall all be conducted under market conditions and each category of transactions (i.e. repurchase agreements or securities lending transactions), may not represent more than 15% of the Sub-Fund's net assets. Cumulatively, repurchase agreements and securities lending transactions shall all be conducted under market conditions, within the limit of 15% of the Sub-Fund's net assets. This limit may be reached in the event of exceptional market conditions, that lead to greater attraction for the securities held in the Sub-Fund and therefore greater activity and opportunities for repurchase agreements and securities lending transactions.

These operations shall be performed on the debt securities and Money Market Instruments referred above.

The target proportion of the Sub-Fund's net assets to be used for repurchase agreements or securities lending transactions will be 10%, for each category of transactions (i.e. repurchase agreements or securities lending transactions). Cumulatively, the target proportion of the Sub-Fund's net assets to be used for repurchase agreements and securities lending transactions will be 10%. This proportion is the proportion expected to be reached in light of the historical market opportunities that have been observed by the Sub-Fund in the past.

Repurchase agreements and securities lending transactions may be carried out with ODDO BHF SCA.

The remuneration received from repurchase agreements and/or securities lending transactions is repaid to the Sub-Fund, less operating costs charged by the counterparty. The remuneration of the Sub-Fund amounts to 75% of the gross revenues.

Further information on the remuneration repaid to the Sub-Fund as well as costs and fees related to the services provided by the relevant counterparty is available in the Company's annual and semi-annual reports.

Within the scope of OTC financial derivatives transactions and temporary sales of debt securities, the Sub-Fund may receive financial guarantees (collateral). Transactions potentially requiring the use of financial guarantees shall be carried out with a European Union or United Kingdom credit institution that may belong to the ODDO BHF

Group. Their operation and characteristics are presented under section C "Collateral Policy" of the Appendix II to this Prospectus.

The Sub-Fund complies with Article 8 of the SFDR as it promotes environmental, social and governance characteristics into its investment strategy on the condition of good corporate governance on the part of the companies in which investments are made. The Sub-Fund is therefore suitable for investors with sustainability preferences.

In accordance with the provisions of Article 8 of the SFDR, the Investment Manager addresses sustainability risks and principal adverse impacts on sustainability factors, the normative and sector exclusions implemented at the fund level and the analysis of controversies based on the elements provided by our external provider of extra-financial data which is part of the integration of ESG criteria (Environmental and/or Social and/or Governance) into its investment decision making process, as described in the section investment strategy of the Sub-Fund. The Investment Manager also considers sustainability safeguards through the Management Company's Exclusion Policy that excludes specific sectors because of the materiality of their sustainability risks and through the exclusion of companies that do not respect the Principles of the United Nations Global Compact. The Management Company has signed the United Nations Principles for Responsible Investment and also the CDP (previously known as Carbon Disclosure Project). The Management Company takes into account the likely impact of sustainability risks on the return of the product and the risk of principal adverse impacts on sustainability factors (E, S and G) of each investment. Finally, the Management Company exercises the voting rights when equities are held by the Sub-Fund.

Information relating to the Management Company's ESG Policy can be found at "am.oddo-bhf.com".

Further information on the ESG Strategy of the Sub-Fund to be disclosed pursuant to article 8(1), (2) and (2a) of the SFDR is set out in Appendix XII to this Prospectus.

Information in accordance with Article 11 of SFDR can be found in the Company's annual report, on the website 'am.oddo-bhf.com' and is available from the Company on request.

Risks

The major risks associated with investing in the Sub-Fund relate to the following elements:

- risk of capital loss;
- interest rate risk;
- credit risk;
- risk associated with high-yield bonds;
- risk associated with discretionary management;
- emerging markets risk;
- volatility risk;
- counterparty risk;
- liquidity risk of underlying assets;

ODDO BHF GLOBAL CREDIT SHORT DURATION

- risk associated with commitments on forward financial instruments;
- risk linked to the use of overexposure (max. 120%);
- sustainability risk.

The currency risk will be covered up to a residual currency risk of 5% of the total assets of the Sub-Fund.

For a comprehensive description of these risks, including special risk considerations applicable to high-yield bonds,

please refer to the section "Risk Factors". This section also details other risks associated with investing in the Sub-Fund.

Typical Investors' Profile

Typical investors have a medium to long term horizon (3 to 5 years) looking for an actively managed portfolio mainly invested in transferable debt securities of corporations with fixed or variable interest rates denominated in OECD countries.

Shares available

Shares that can be issued by the Company in the Sub-Fund have the following features (grouped by categories of Shares):

Name	Initial Subscription Price	Minimum Initial Investment	Minimum Subsequent Investment	Sales Charge (in % of the Net Asset Value per Share)	Redemption Fee (in % of the Net Asset Value per Share)
"I" Shares	Euro 1,000	Euro 250,000	1/1000 th of a Share	Up to 2%	None
"R" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"N" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"P" Shares	Euro 1,000	Euro 10,000,000	1/1000 th of a Share	None	None
"F" Shares	Euro 1,000	Euro 250,000	1/1000 th of a Share	None	None

Shares may be offered in currencies other than the Euro, in which case the initial subscription price and the minimum initial investment amount of these Shares (i) will have the same facial value when expressed in GBP, USD or CHF, and (ii) will be ten times the above amounts when expressed in SEK (in order to reflect the FX rate between the Euro and the SEK).

Additional and up-to-date information on the Share Classes specifically offered in the Sub-Fund may be obtained free of charge by any person on am.oddobhf.com.

ODDO BHF ARTIFICIAL INTELLIGENCE

9. ODDO BHF Artificial Intelligence

Investment Objective and Strategy

The Sub-Fund seeks capital growth by investing in global listed equities with exposure to the global mega trend “artificial intelligence” via a selection of related sub-themes. The Sub-Fund has sustainable investment as its objective, within the meaning of Article 9 paragraph 3 of the SFDR. The Sub-Fund’s sustainable investment objective is to contribute to carbon-reduction and to seize opportunities arising from the transition to a low-carbon economy to achieve the long-term objectives of the Paris Agreement dated 12th December 2015³ to limit global warming.

The construction of a relevant investment universe within the global equities is supported by big data analysis tools, identifying:

i) the most important and trendy sub themes. The choice of the most relevant sub-themes is done and reviewed on a regular basis in accordance with the Management Company’s discretionary understanding and interpretation of the mega trend.

ii) the companies related to those sub themes. Each company which is part of the investment universe is getting a “big data score”.

The construction of the global equity portfolio will be done in several steps:

I) First, the MSCI World NR benchmark index (the “**Benchmark**”), which also constitutes the initial investment universe, is filtered using environmental, social and governance (“**ESG**”) selection criteria, as specified in Appendix XIII to this Prospectus.

II) Second, securities are selected according to their “big data” score. The big data analysis is conducted with the support of an external partner, expert in data science, and is carried out in two stages:

(1) Identifying the most important and popular sub-themes associated to the “artificial intelligence” mega trend, by using big data analysis tools. The choice of the most relevant sub-themes is done and reviewed on a regular basis in accordance with the Management Company’s discretionary understanding and interpretation of the mega trend; and

(2) Identifying the companies related to those sub-themes with big data analysis tools. Each company which is part of the filtered investment universe is getting a “big data score”.

The fees paid to the data science expert will be charged to the Sub-Fund via soft commission arrangements.

III) Third, the Management Company runs a quantitative screening. Therefore, financial figures are taken into account in order to avoid investments into stocks with undesirable characteristics.

IV) Fourth, the portfolio is subject to a final quality assurance check conducted by the Management Company:

This fundamental analysis may lead to the exclusion of certain stocks, mainly where the “artificial intelligence” mega trend does not represent a sufficiently important proportion in the economic value creation of the company and occasionally based on technical or fundamental reasons.

V) Finally, in constructing the final portfolio, the quantitative screening described above will lead to a ranking of the companies. The weight of each security in the final portfolio depends on its ranking. Nevertheless, the management team may, based on fundamental analysis, ESG/carbon objectives and overall portfolio risk management, adjust the final weighting on a discretionary basis. The management team may also, on a discretionary basis, select a very limited number of companies that have been identified by the big data algorithms but not selected by the quantitative model.

At least 90% of the issuers in the portfolio have an ESG rating after taking into account the weighting of each security.

Investors are advised that the Benchmark (as defined above) does not constitute a limitation on the Sub-Fund’s investment universe. It allows the investor to assess the Sub-Fund’s risk profile. The Sub-Fund’s performance and composition of assets may differ substantially from that of the Benchmark (as defined below).

The Sub-Fund is actively managed and references a benchmark, the MSCI World NR, by seeking to outperform it and for performance fee calculation purposes, if any. The Benchmark is denominated in USD, except for Class of Shares that are denominated in another currency and that are not hedged against the currency risk. In that case, the Benchmark will be denominated in the Class of Shares’ currency.

The Benchmark is a broad market index that does not necessarily take into account, in its composition or calculation methodology the sustainable objective of the Sub-Fund. For a description of the method used to calculate the Benchmark, see: <https://www.msci.com/>. This Benchmark is a representative index of the world’s major capitalizations within developed countries. The Benchmark is a market capitalization weighted index designed to provide a broad measure of equity-market performance throughout the world. The Sub-Fund aims to outperform its Benchmark rather than replicate it precisely and may deviate from it considerably in both positive and negative terms. As part of the investment process, the Management Company has full discretion over the composition of the Sub-Fund’s portfolio. The Benchmark that is intended to be outperformed and that will be taken into account for the calculation of the performance fee will be considered in the same currency as the Share concerned, except in the case of hedged Shares for which the Benchmark will always be expressed in USD, the currency of the Sub-Fund.

The Sub-Fund invests at least 80% of its net assets in global listed equities.

ODDO BHF ARTIFICIAL INTELLIGENCE

The Sub-Fund will always invest a minimum of 51% of its net assets in equity participations as defined in the German Investment Taxation Act.

The Sub-Fund may invest up to 50% of its net assets in equities whose registered office is located in non-OECD countries, and up to 50% of its net assets in equities issued in currencies of non-OECD countries (not exclusively, in China (notably through HK connect), South Korea and Latin America). The Sub-Fund may have a geographic bias to some emerging countries such as China (not exclusively) via Stock Connect and Bond Connect.

ODDO BHF ARTIFICIAL INTELLIGENCE

The remaining part of the total assets may be invested within the limits set forth under "Investment Restrictions" in Appendix I hereinafter in any other fungible securities of worldwide issuers (such as debt securities, etc.).

The Sub-Fund may, up to 10% of its total assets, hold Cash Equivalents appropriate to provide for redemptions or to meet other liquidity needs. These assets may consist of commercial paper and other Money Market Instruments denominated in USD with a rating "investment grade" (at least BBB- by Standard & Poor's or deemed equivalent by the Management Company or using the Management Company's internal rating) and a remaining maturity not in excess of 12 months and of time deposits, and demand deposit accounts. The Management Company does not use the ratings issued by ratings agencies automatically or in isolation, as it also applies its own internal analysis. In the event of a downgrade, the Management Company will take the interests of Shareholders, market conditions and its own analysis of these fixed income products into account when respecting rating limits.

As part of the investment strategy, the Sub-Fund is allowed to enter into derivatives for investment and hedging purposes, as described in section "Investment Objectives and Policies", Point A. and under "Investment Restrictions" in Appendix I and "Investment Techniques and Instruments" in Appendix II.

The Sub-Fund may in particular have the possibility, at the discretion of the Management Company to enter into futures contracts and options.

As detailed in Appendix I Point C (12), the Sub-Fund may invest up to 10 % of its net assets in units or shares of UCITS or UCI that meet the four criteria of article 41(1)(e) of the 2010 Law, provided that such UCITS and UCI are subject to article 9 of the SFDR, including AIFs from France or other Member States and foreign investment funds. These funds may be managed by ODDO BHF Asset Management SAS and ODDO BHF Asset Management GmbH.

The portfolio's total exposure to equities and interest rate, including derivatives, is limited to 100% of net assets.

The Sub-Fund may, for cash management purposes or to maximise Sub-Fund's income, use securities lending transactions, as further described in Appendix II to this Prospectus.

Securities lending transactions shall all be conducted under market conditions and within the following limit of 15% of the Sub-Fund's net assets. This limit may be reached in the event of exceptional market conditions, that lead to greater attraction for the securities held in the Sub-Fund and therefore greater activity and opportunities for securities lending transactions.

These operations shall be performed on the equities referred above.

The target proportion of the Sub-Fund's net assets to be used for securities lending will be 10%. This proportion is the proportion expected to be reached in light of the historical market opportunities that have been observed by the Sub-Fund in the past.

Securities lending transactions may be carried out with ODDO BHF SCA.

The remuneration received from securities lending transactions is repaid to the Sub-Fund, less operating costs charged by the counterparty. The remuneration of the Sub-Fund amounts to 75% of the gross revenues.

Further information on the remuneration repaid to the Sub-Fund as well as costs and fees related to the services provided by the relevant counterparty is available in the Company's annual and semi-annual reports.

Within the scope of OTC financial derivatives transactions and temporary sales of debt securities, the Sub-Fund may receive financial guarantees (collateral). Transactions potentially requiring the use of financial guarantees shall be carried out with a European Union or United Kingdom credit institution that may belong to the ODDO BHF Group. Their operation and characteristics are presented under section C "Collateral Policy" of the Appendix II to this Prospectus.

The Reference Currency of the Sub-Fund is the USD.

The currency risk can be up to 100%.

The Sub-Fund complies with Article 9 of the SFDR, as it has sustainable investment as its objective and aims to contribute to carbon-reduction and to seize opportunities arising from the transition to a low-carbon economy to achieve the long-term global warming objectives of the Paris Agreement.

In accordance with the provisions of Article 9 of the SFDR, the Management Company (i) addresses sustainability risks and principal adverse impacts on sustainability factors through ratings provided by the Management Company's external ESG data provider on which the integration of ESG criteria (Environmental and/or Social and/or Governance) into its investment decision making process is based, integrates the normative and sector exclusions implemented at the fund level, and (ii) promotes a business model that significantly contributes to the challenges of the ecological transition. The Management Company also considers sustainability safeguards through its own Exclusion Policy that excludes specific sectors because of the materiality of their sustainability risks and through the exclusion of companies that do not respect the Principles of the United Nations Global Compact. The Management Company has signed the United Nations Principles for Responsible Investment and also the CDP (previously known as Carbon Disclosure Project).

The Management Company takes into account the likely impact of sustainability risks on the return of the product and the risk of principal adverse impacts on sustainability factors (E, S and G) of each investment. Finally, the Management Company exercises the voting rights when equities are held by the Sub-Fund

Information relating to the Management Company's ESG policy can be found at "am.oddo-bhf.com".

Further information on the ESG-Strategy of the Sub-Fund and to be disclosed pursuant to article 9(1) to (4a) of the SFDR is set out in Appendix XIII to this Prospectus. Information in accordance with Article 11 of SFDR can be found in the Company's annual report, on the website 'am.oddo-bhf.com' and is available from the Company on request.

ODDO BHF ARTIFICIAL INTELLIGENCE

Risks

The major risks associated with investing in the Sub-Fund relate to the following elements:

- risk of capital loss;
- equity risk;
- risk associated with holding small and medium companies;
- interest rate risk;
- credit risk;
- risk associated with discretionary management;
- volatility risk;
- counterparty risk;
- liquidity risk of underlying assets;
- modelling risk;
- risk associated with commitments on forward financial instruments;
- currency risk;
- emerging markets risk;
- investment in China;
- Stock Connect;
- Bond Connect;
- sustainability risk.

For a comprehensive description of these risks, please refer to the section "Risk Factors". This section also details other risks associated with investing in the Sub-Fund.

Typical Investors' Profile

Typical investors have a long term horizon (5 years) looking for an actively managed portfolio mainly invested in transferable global equities related to "artificial intelligence" thematic.

Shares available

Shares that can be issued by the Company in the Sub-Fund have the following features (grouped by categories of Shares):

Name	Initial Subscription Price	Minimum Initial Investment	Minimum Subsequent Investment	Sales Charge (in % of the Net Asset Value per Share)	Redemption Fee (in % of the Net Asset Value per Share)
"I" Shares	Euro 1,000	Euro 250,000	1/1000 th of a Share	Up to 2%	None
"R" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"N" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"P" Shares	Euro 1,000	Euro 15,000,000	1/1000 th of a Share	None	None
"X" Shares	Euro 1000	Euro 30,000,000	1/1000 th of a Share	None	None

Shares may be offered in currencies other than the Euro, in which case the initial subscription price and the minimum initial investment amount of these Shares (i) will have the same facial value when expressed in EUR, GBP, USD or CHF, and (ii) will be ten times the above amounts when expressed in SEK (in order to reflect the FX rate between the Euro and the SEK).

Additional and up-to-date information on the Share Classes specifically offered in the Sub-Fund may be obtained free of charge by any person on am.oddobhf.com.

ODDO BHF GREEN PLANET

10. ODDO BHF Green Planet

Investment Objective and Strategy

The Sub-Fund aims to invest in global listed equities of companies benefiting mostly from the structural trend in favor of the ecological transition, « green planet » mega trend, i.e. whose business model significantly and positively contributes to the challenges of climate change around 4 different non-exclusive sub-themes, such as: clean energy, energy efficiency, natural resources preservation and sustainable mobility. The investment in the “green planet” megatrend is considered an environmental sustainable objective. An extra-financial analysis is conducted in parallel to favor companies whose ESG characteristics (Environment, Social, Governance) best contribute to limiting operational execution risks and encouraging sustainable practices.

The construction of the global equity portfolio will be done in four steps:

I) the initial investment universe is based on the MSCI ACWI NR index and global companies with a market capitalization greater than 500 million USD, on which an ESG (Environment, Social and Governance) screening is applied as further described in Annex XIV to this document.

II) After this first filter, the companies are selected according to their big data score. The big data analysis is conducted with the support of an external partner, expert in data science, and is carried out in two stages:

- (1) Identifying the most important and trendy sub-themes associated to the « green planet » mega trend (i.e. linked to the challenges of the ecological transition), by using big data analysis tools. The choice of the most relevant sub-themes is done and reviewed on a regular basis in accordance with the Management Company's discretionary understanding and interpretation of the mega trend, with the implication of the ESG research team; and
- (2) Identifying the companies related to those sub-themes with big data analysis tools. Each company which is part of the investment universe is getting a “big data score”.

The fees paid to the data science expert will be charged to the Sub-Fund via soft commission arrangements.

III) Then, the Management Company runs a quantitative screening taking into account different criteria such as growth, valuation, quality, momentum or volatility. Thus, financial figures are taken into account in order to avoid investments into stocks with unwanted characteristics. The screened companies are subject to a quality assurance check conducted by the Management Company, which can occasionally exclude some stocks based on technical or fundamental reasons, or ESG-related issues.

IV) Finally, in constructing the final portfolio, the quantitative screening mentioned above will lead to a ranking of the companies. The weight of each security in the final portfolio depends on its ranking. Nevertheless, the management team may, based on fundamental analysis, ESG/carbon objectives and overall portfolio risk management, adjust the final weighting on a discretionary basis. The management team

may also, on a discretionary basis, select a very limited number of companies that have been identified by the big data algorithms but not selected by the quantitative model. Controversies on names held in the portfolio are closely followed by the ESG team.

At least 90% of the issuers in the portfolio have an ESG rating after taking into account the weighting of each security with the support of an external ESG research provider. Target funds with an ESG rating on fund level are also taken into account.

Investors are advised that the Benchmark (as defined below) does not constitute a limitation on the Sub-Fund's investment universe. It allows the investor to assess the Sub-Fund's risk profile. The Sub-Fund's performance and composition of assets may differ substantially from that of the Benchmark (as defined below).

The Sub-Fund is actively managed and references a benchmark, the MSCI ACWI NR Index (the “Benchmark”), by seeking to outperform it and for performance fee calculation purposes, if any. The Benchmark is denominated in USD, except for Class of Shares that are denominated in another currency and that are not hedged against the currency risk. In that case, the Benchmark will be denominated in the Class of Shares' currency.

This Benchmark captures companies of all capitalizations across 23 developed markets and 26 emerging markets countries. The Sub-Fund aims to outperform its Benchmark rather than replicate it precisely and may deviate from it considerably in both positive and negative terms. As part of the investment process, the Management Company has full discretion over the composition of the Sub-Fund's portfolio.

The Benchmark that is intended to be outperformed and that will be taken into account for the calculation of the performance fee will be considered in the same currency as the Share concerned, except in the case of hedged Shares for which the Benchmark will always be expressed in USD, the currency of the Sub-Fund.

The Sub-Fund invests at least 90% of its net assets in global listed equities.

The Sub-Fund will always invest a minimum of 51% of its net assets in equity participations as defined in the German Investment Taxation Act.

The Sub-Fund may invest up to 50% of its net assets in equities of issuers whose registered office is located in non-OECD countries, and up to 50% of its net assets in equities issued in currencies of non-OECD countries (not exclusively in China, India, Brazil, Taiwan and South Korea). The Sub-Fund may have a geographic bias to some emerging countries such as China (not exclusively) via Stock Connect and Bond Connect.

The remaining part of the total assets may be invested within the limits set forth under "Investment Restrictions" in Appendix I hereinafter in any other fungible securities of worldwide issuers (such as debt securities, etc.).

The Sub-Fund will not invest in distressed/defaulted securities (securities rated CCC- and below assigned by an

ODDO BHF GREEN PLANET

internationally recognised rating service such as Moody's or S&P (or deemed equivalent by the Management Company or using the Management Company's internal rating). In the event that a security's rating is downgraded to the point that such security can be considered as distressed/defaulted, it will be sold as soon as possible, under normal market circumstances, and in the best interest of Shareholders. The Sub-Fund may, up to 10% of its total assets, hold Cash Equivalents appropriate to provide for redemptions or to meet other liquidity needs. These assets may consist of commercial paper and other Money Market Instruments denominated in USD with a rating "investment grade" (at least BBB- by Standard & Poor's or deemed equivalent by the Management Company or using the Management Company's internal rating) and a remaining maturity not in excess of 12 months and of time deposits, and demand deposit accounts. The Management Company does not use the ratings issued by ratings agencies automatically or in isolation, as it also applies its own internal analysis. In the event of a downgrade, the Management Company will take the interests of Shareholders, market conditions and its own analysis of these fixed income products into account when respecting rating limits.

As part of the investment strategy, the Sub-Fund is allowed to enter into derivatives for investment and hedging purposes, as described in section "Investment Objectives and Policies", Point A. and under "Investment Restrictions" in Appendix I and "Investment Techniques and Instruments" in Appendix II.

The Sub-Fund may in particular have the possibility, at the discretion of the Management Company, to enter into futures contracts and options.

As detailed in Appendix I Point C (12), the Sub-Fund may invest up to 10% of its net assets in units or shares of UCITS or UCI that meet the four criteria of article 41(1)(e) of the 2010 Law provided that such UCITS and UCI are subject to article 9 of the SFDR, including AIFs from France or other Member States and foreign investment funds. These funds may be managed by ODDO BHF Asset Management SAS and ODDO BHF Asset Management GmbH.

The portfolio's total exposure to equities and interest rate risk, including derivatives, is limited to 100% of net assets.

The Sub-Fund may, for cash management purposes or to maximise Sub-Fund's income, use securities lending transactions, as further described in Appendix II to this Prospectus.

Securities lending transactions shall all be conducted under market conditions and within the following maximum limit of 15% of the Sub-Fund's net assets. This limit may be reached in the event of exceptional market conditions, that lead to greater attraction for the securities held in the Sub-Fund and therefore greater activity and opportunities for securities lending transactions.

These operations shall be performed on the equities referred above.

The target proportion of the Sub-Fund's net assets to be used for securities lending will be 10%. This proportion is the proportion expected to be reached in light of the historical market opportunities that have been observed by the Sub-Fund in the past.

Securities lending transactions may be carried out with ODDO BHF SCA.

The remuneration received from securities lending transactions is repaid to the Sub-Fund, less operating costs charged by the counterparty. The remuneration of the Sub-Fund amounts to 75% of the gross revenues.

Further information on the remuneration repaid to the Sub-Fund as well as costs and fees related to the services provided by the relevant counterparty is available in the Company's annual and semi-annual reports.

Within the scope of OTC financial derivatives transactions and temporary sales of debt securities, the Sub-Fund may receive financial guarantees (collateral). Transactions potentially requiring the use of financial guarantees shall be carried out with a European Union or United Kingdom credit institution that may belong to the ODDO BHF Group. Their operation and characteristics are presented under section C "Collateral Policy" of the Appendix II to this Prospectus.

The Reference Currency of the Sub-Fund is the USD.

The currency risk can be up to 100%.

The Sub-Fund complies with Article 9 of the SFDR, as it aims to support sustainable investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly compromise an environmental or social objective and the investee companies follow good corporate governance practices. The Fund is therefore suitable for investors with sustainability preferences.

In accordance with the provisions of Article 9 of the SFDR, the Management Company intends (i) to address sustainability risks and principal adverse impacts on sustainability factors through ratings provided by the Management Company's external ESG data provider on which the integration of ESG criteria (Environmental and/or Social and/or Governance) into its investment decision making process is based, to integrate the normative and sector exclusions implemented at the fund level and (ii) to promote a business model that significantly contributes to the challenges of the ecological transition. The Management Company also considers sustainability safeguards through its own Exclusion Policy that excludes specific sectors because of the materiality of their sustainability risks and through the exclusion of companies that do not respect the Principles of the United Nations Global Compact. The Management Company has signed the United Nations Principles for Responsible Investment and also the CDP (previously known as Carbon Disclosure Project). The Management Company takes into account the likely impact of sustainability risks on the return of the product and the risk of principal adverse impacts on sustainability factors (E, S and G) of each investment. Finally, the Management Company exercises the voting rights when equities are held by the Sub-Fund.

Information relating to the Management Company's ESG policy can be found at "am.oddo-bhf.com".

Further information on the ESG Strategy of the Sub-Fund and to be disclosed pursuant to article 9(1) to (4a) of the SFDR is set out in Appendix XIV to this Prospectus.

Information relating to the Management Company's ESG policy can be found at "am.oddo-bhf.com".

ODDO BHF GREEN PLANET

Information in accordance with Article 11 of SFDR can be found in the Company's annual report, on the website 'am.oddo-bhf.com' and is available from the Company on request.

Risks

The major risks associated with investing in the Sub-Fund relate to the following elements:

- risk of capital loss;
- equity risk;
- risk associated with holding medium capitalisations;
- interest rate risk;
- credit risk;
- risk associated with discretionary management;
- volatility risk;
- counterparty risk;
- liquidity risk of underlying assets;
- modelling risk;

- risk associated with commitments on forward financial instruments;
-
- currency risk;
- emerging market risk;
- investment in China;
- Stock Connect;
- Bond Connect;
- sustainability risk.

For a comprehensive description of these risks, please refer to the section "Risk Factors". This section also details other risks associated with investing in the Sub-Fund.

Typical Investors' Profile

Typical investors have a long term horizon (5 years) looking for an actively managed portfolio mainly invested in transferable global equities related to "Green Planet" thematic.

Shares available

Shares that can be issued by the Company in the Sub-Fund have the following features (grouped by categories of Shares):

Name	Initial Subscription Price	Minimum Initial Investment	Minimum Subsequent Investment	Sales Charge (in % of the Net Asset Value per Share)	Redemption Fee (in % of the Net Asset Value per Share)
"I" Shares	Euro 1,000	Euro 250,000	1/1000 th of a Share	Up to 2%	None
"R" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"N" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"P" Shares	Euro 1,000	Euro 15,000,000	1/1000 th of a Share	None	None

Shares may be offered in currencies other than the Euro, in which case the initial subscription price and the minimum initial investment amount of these Shares (i) will have the same facial value when expressed in EUR, GBP, USD or CHF, and (ii) will be ten times the above amounts when expressed in SEK (in order to reflect the FX rate between the Euro and the SEK).

ODDO BHF GLOBAL HIGH YIELD BOND

11. ODDO BHF Global High Yield Bond

Investment Objective and Strategy

The Sub-Fund is actively managed and aims to provide a high level of income and capital growth. The Sub-Fund seeks to achieve its investment objective, in accordance with the policies and guidelines established by the Board of Directors of the Company, by investing in a portfolio of at least 2/3 of listed transferable debt securities of public or private corporations without geographic limit, with an emphasis on lower quality debt issues (i.e., less than investment grade debt instruments with initial maturities of one year or more).

The Sub-Fund invests at least 2/3 of its total assets in high-yield bonds (i.e., less than investment grade debt instruments with initial maturities of one year or more) of international issuers. The high-yield range comprises bonds rated BB+ and below assigned by an internationally recognised rating service such as Moody's or S&P (or deemed equivalent by the Investment Manager, or using the Investment Manager's internal rating), and the Sub-Fund may have a maximum of 10% of its total assets in unrated bonds. At purchase the second-best rating must be CCC or better.

The Investment Manager does not use the ratings issued by ratings agencies automatically or in isolation, as it also applies its own internal analysis. In the event of a downgrade, the Investment Manager will take the interests of Shareholders, market conditions and its own analysis of these fixed income products into account when respecting rating limits. Distressed securities are securities of entities that are experiencing default, or are under bankruptcy, rated CCC- and below assigned by an internationally recognised rating service such as Moody's or S&P (or deemed equivalent by the Investment Manager or using the Investment Manager's internal rating). Should the distressed securities represent more than 10% of the Sub-Fund's net assets in the circumstances described in the preceding sentence, the proportion above 10% will be sold as soon as possible, under normal market circumstances, and in the best interest of Shareholders. The Sub-Fund will not actively invest in distressed securities.

The Sub-Fund is not constrained as to the maximum maturity of its portfolio securities. These debt securities, sometimes referred to as "junk bonds", are speculative and subject to greater risk of loss of income and principal than higher rated securities.

Up to 100% of the Sub-Fund's net assets may be invested in entities whose activities are primarily conducted in a country that is not a member of the OECD, resulting in economic exposure to emerging markets.

The Sub-Fund may invest up to 30% of the net assets in perpetual bonds.

The Sub-Fund is actively managed and references a benchmark, the ICE BofA BB-B Global High Yield Non-Financial Constrained Total Return Index Hedged EUR the "Benchmark" by seeking to outperform it and for performance fee calculation purposes, if any. The Sub-Fund is not totally restricted to the benchmark-universe

and can also invest in names not included in the benchmark.

For a description of the method used to calculate the Benchmark, see: <https://www.ice.com/fixed-income-data-services/index-solutions/fixed-income-indices>.

The Benchmark is denominated in EUR, except for Class of Shares that are denominated in another currency and that are not hedged against the currency risk. In that case, the Benchmark will be denominated in the Class of Shares' currency.

ESG (Environment, Social and Governance) criteria are a complement to the credit analysis and are fully integrated into the investment process as described on the ESG Strategy of the Sub-Fund in Appendix XV to this Prospectus.

Investments in unrated debt securities, convertible debt securities, contingent convertible bonds ("CoCos") and debt securities with warrants attached thereto shall not exceed 10% of the Sub-Fund's total assets. The Sub-Fund will not invest in CoCos issued by ODDO BHF Group.

The Sub-Fund may hold Cash Equivalents appropriate to provide for redemptions or to meet other liquidity needs. These assets may consist of commercial paper and other Money Market Instruments with a remaining maturity not in excess of 12 months and of time deposits, and demand deposit accounts as far as there are exceptional market conditions the Sub-Fund may hold Cash Equivalents temporarily without any limitation if the Board of Directors considers this to be in the best interest of the Shareholders.

The Sub-Fund may use financial derivatives instruments to hedge currency risk or to hedge or gain exposure to interest rate risk or credit risk (for efficient portfolio management), as described in section "Investment Objectives and Policies", Point A. and under "Investment Restrictions" in Appendix I and "Investment Techniques and Instruments" in Appendix II.

The Sub-Fund may in particular have the possibility, at the discretion of the Investment Manager, to enter into Credit Default Swaps (Index) as buyer and seller.

As detailed in Appendix I point C (12), the Sub-Fund may not invest in aggregate more than 10% of its assets in the units or shares of other UCITS or UCI.

The Reference Currency of the Sub-Fund is the Euro. The securities will mostly be issued in EUR, GBP, CAD, USD and/or CHF, and the currency risk will be hedged in Euro, with a maximum residual currency risk of 5%.

The Sub-Fund may, for cash management purposes or to maximise Sub-Fund's income, use repurchase agreements and/or enter into securities lending transactions, as further described in Appendix II to this Prospectus.

ODDO BHF GLOBAL HIGH YIELD BOND

Repurchase agreements or securities lending transactions shall all be conducted under market conditions and each category of transactions (i.e., repurchase agreements or securities lending transactions), may not represent more than 15% of the Sub-Fund's net assets. Cumulatively, repurchase agreements and securities lending transactions shall all be conducted under market conditions, within the limit of 15% of the Sub-Fund's net assets. This limit may be reached in the event of exceptional market conditions, that lead to greater attraction for the securities held in the Sub-Fund and therefore greater activity and opportunities for repurchase agreements and securities lending transactions.

These operations shall be performed on the debt securities and money market instruments referred above.

The target proportion of Sub-Fund's net assets to be used for repurchase agreements or securities lending transactions will be 10%, for each category of transactions (i.e. repurchase agreements or securities lending transactions). Cumulatively, the target proportion of the Sub-Fund's net assets to be used for repurchase agreements and securities lending transactions will be 10%. This proportion is the proportion expected to be reached in light of the historical market opportunities that have been observed by the Sub-Fund in the past.

Repurchase agreements or securities lending transactions
Repurchase agreements and securities lending transactions may be carried out with ODDO BHF SCA.

The remuneration received from repurchase agreements and/or securities lending transactions is repaid to the Sub-Fund, less operating costs charged by the counterparty. The remuneration of the Sub-Fund amounts to 75% of the gross revenues.

Further information on the remuneration repaid to the Sub-Fund as well as costs and fees related to the services provided by the relevant counterparty is available in the Company's annual and semi-annual reports.

Within the scope of OTC financial derivatives transactions and temporary sales of debt securities, the Sub-Fund may receive financial guarantees (collateral). Transactions potentially requiring the use of financial guarantees shall be carried out with a European Union or United Kingdom credit institution that may belong to the ODDO BHF Group. Their operation and characteristics are presented under section C "Collateral Policy" of the Appendix II to this Prospectus.

The Sub-Fund complies with Article 8 of the SFDR as it promotes environmental, social and governance characteristics into its investment strategy on the condition of good corporate governance on the part of the companies in which investments are made. The Sub-Fund is therefore suitable for investors with sustainability preferences. In accordance with the provisions of Article 8 of the SFDR, the Investment Manager addresses sustainability risks and principal adverse impacts on sustainability factors through its ESG model, the normative and sector exclusions implemented at the fund level and the analysis of controversies based on the elements

provided by our external provider of extra-financial data which is part of the integration of ESG criteria (Environmental and/or Social and/or Governance) into its investment decision making process, as described in the section investment strategy of the Sub-Fund. The Investment Manager also considers sustainability safeguards through the Management Company's Exclusion Policy that excludes specific sectors because of the materiality of their sustainability risks and through the exclusion of companies that do not respect the Principles of the United Nations Global Compact. The Management Company has signed the United Nations Principles for Responsible Investment and also the CDP (previously known as Carbon Disclosure Project). The Management Company takes into account the likely impact of sustainability risks on the return of the product and the risk of principal adverse impacts on sustainability factors (E, S and G) of each investment. Finally, the Management Company exercises the voting rights when equities are held by the Sub-Fund.

Information relating to the Management Company's ESG Policy can be found at "am.oddo-bhf.com".

Further information on the ESG Strategy of the Sub-Fund to be disclosed pursuant to article 8(1), (2) and (2a) of the SFDR is set out in Appendix XV to this Prospectus.

Information in accordance with Article 11 of SFDR can be found in the Company's annual report, on the website 'am.oddo-bhf.com' and is available from the Company on request.

Risks

The major risks associated with investing in the Sub-Fund relate to the following elements:

- risk of capital loss;
- interest rate risk;
- credit risk;
- risk associated with high-yield bonds;
- risk associated with discretionary management;
- emerging markets risk;
- counterparty risk;
- liquidity risk of underlying assets;
- risk associated with commitments on forward financial instruments;
- sustainability risk.

The Sub-Fund will be exposed, to a limited extent, to the following risks:

- currency conversion and exchanges risks.
- risk associated with convertibles

For a comprehensive description of these risks, including special risk considerations applicable to high-yield bonds, please refer to the section "Risk Factors". This section also details other risks associated with investing in the Sub-Fund.

Typical Investors' Profile

ODDO BHF GLOBAL HIGH YIELD BOND

Typical investors have a long-term horizon (5 years) by investing in a portfolio of mainly listed transferable debt securities of global issuers, with an emphasis on lower quality debt issues. The investor should also have

experience with more volatile products and accept that these debt securities are speculative and subject to greater risk of loss of income and principal than higher rated securities.

Shares available

Shares that can be issued by the Company in the Sub-Fund have the following features (grouped by categories of Shares):

Name	Initial Subscription Price	Minimum Initial Investment	Minimum Subsequent Investment	Sales Charge (in % of the Net Asset Value per Share)	Redemption Fee (in % of the Net Asset Value per Share)
"I" Shares	Euro 1,000	Euro 250,000	1/1000 th of a Share	Up to 2%	None
"R" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"N" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"P" Shares	Euro 1,000	Euro 10,000,000	1/1000 th of a Share	None	None
"F" Shares	Euro 1,000	Euro 250,000	1/1000 th of a Share	None	None

Shares may be offered in currencies other than the Euro, in which case the initial subscription price and the minimum initial investment amount of these Shares (i) will have the same facial value when expressed in GBP, USD or CHF, and (ii) will be ten times the above amounts when expressed in SEK (in order to reflect the FX rate between the Euro and the SEK).

Additional and up-to-date information on the Share Classes specifically offered in the Sub-Fund may be obtained free of charge by any person on am.oddo-bhf.com.

ODDO BHF GLOBAL TARGET 2031

12. ODDO BHF Global Target 2031

Investment Objectives and Strategy

The investment objective of the Sub-Fund is to increase the value of the portfolio, in the medium and long term, through speculative (high yield) bonds from corporate issuers, rated between BB+ and CCC (Standard & Poor's or equivalent as assessed by the Management Company or according to its own internal rating), and is therefore exposed to a risk of capital loss.

The Sub-Fund seeks to outperform the hurdle rates for performance fee calculation purposes, if any, depending on the share class subscribed as described in section "Charges and expense" point b.

This objective is based on the realisation of market assumptions laid down by the Management Company. It does not under any circumstances constitute the promise of a return or a performance by the sub-fund. Investors should be aware that the performance indicated in the sub-fund's investment objective does not include all cases of default and is based on estimates in view of market assumptions made at a given time.

Investment period:

The Sub-Fund implements its investment strategy over an investment period where the end-date is fixed by the Management Company. The investment period end date is initially fixed at 31 December 2031. The Management Company may decide to extend the investment period, according to market conditions on this date and the likelihood that it can achieve what it considers to be a solid investment objective. Such an extension must be decided two months before the expiry of the previous period. Depending on market conditions, the Management Company may decide to liquidate or merge the Sub-Fund before its term ends on 31 December 2031 in accordance with Appendix IV, section 3 of this Prospectus and the Articles of Incorporation.

Benchmark index:

The Sub-Fund does not have a benchmark index.

Investment strategy:

The Sub-Fund's investment strategy is to manage, on a discretionary basis, a diversified portfolio of debt securities composed, up to a limit of 100% of the Sub-Fund's net assets, of traditional, high yield bonds rated between BB+ and CCC (by Standard & Poor's or equivalent as assessed by the Management Company, or according to its own internal rating), of which at least 60% are issued by corporate issuers with their registered office in an OECD member country and with maturities of a maximum of nine months and one day after 31 December 2031 (final maturity of the security or early redemption options at the Company's discretion). The Sub-Fund pursues a "buy-and-maintain" investment approach. It aims to select corporate bonds to optimize yield whilst controlling risk and to hold them to maturity, replacing holdings where credit concerns arise or where market opportunities enable an enhancement of expected yields.

The Management Company does not use the ratings issued by rating agencies automatically or in isolation, as it also applies its own internal analysis.

In the event of a downgrade, the Investment Manager will take the interests of Shareholders, market conditions and its own analysis of these fixed income products into account when respecting rating limits. Distressed securities are securities of entities rated CCC- and below assigned by an internationally recognised rating service such as Moody's or S&P (or deemed equivalent by the Investment Manager, or using the Investment Manager's internal rating). Should the distressed securities represent more than 10% of the Sub-Fund's net assets in the circumstances described in the preceding sentence, the proportion above 10% will be sold as soon as possible, under normal market circumstances, and in the best interest of Shareholders. The Sub-Fund will not actively invest in distressed securities.

Within the limit of 40% of the net assets, the Sub-Fund may hold securities from corporate issuers whose registered office is located outside of the OECD, including in emerging countries. The Fund seeks to maximise the portfolio's average yield-to-maturity at the maturity date of 31 December 2031 and select the issuers with the lowest default risk in light of the return offered and fundamental analysis of the various risk factors inherent to said issuers. By taking a large number of factors into account when selecting assets, the Sub-Fund can:

- adopt an investment strategy based on bond-picking, combined with technical analysis, when constructing the portfolio, while consistently seeking an attractive risk/return ratio, according to the Management Company's assessment;
- manage the portfolio's investment return depending on changes in interest rates and/or spread;
- monitor and measure geographical and sector exposure;
- integrate purchases and sales through simulations which make it possible to foresee developments in the portfolio.

The securities will be issued in any OECD member currency, including EUR, GBP, USD and/or CHF, and the currency risk will be hedged, with a maximum residual currency risk of 5%.

As detailed in Appendix I point C (12), the Sub-Fund may not invest in aggregate more than 10% of its assets in the units or shares of other UCITS or UCI.

ESG (environmental, social and governance) criteria are another factor in fundamental analysis as further described in Appendix XVI to this Prospectus.

The Investment Manager may select assets that are not included in the Fund's investment universe described in Appendix XVI to this Prospectus.

Given the Sub-Fund's performance target and specific maximum maturity for securities held, the selection of securities may vary over time at the Investment Manager's discretion, depending on market opportunities and the maturing of securities. In particular, the Sub-Fund may

ODDO BHF GLOBAL TARGET 2031

invest up to 100% of its assets in investment grade securities rated higher than BB+ (Standard & Poor's or equivalent as assessed by the Management Company or according to its own internal rating).

The Sub-Fund may hold up to 10% of its net assets in Cash on a temporary and ancillary basis.

The Investment Manager may also invest up to 100% of net assets in forward financial instruments traded on regulated or OTC markets, without seeking overexposure. The Investment Manager may take positions in order to hedge the portfolio against interest rate and credit risk.

The Investment Manager will also use swap and/or forward exchange contracts to hedge the portfolio against currency risk, though a residual risk of a maximum of 5% remains.

The Sub-Fund's maximum exposure to the markets (equities, debt securities, UCIs and derivatives) may not exceed 100% of net assets, it being understood that the maximum exposure is the sum of the net exposures to each of the markets (equity, fixed income, money) to which the Sub-Fund is exposed (the sum of long and hedging positions).

On a discretionary basis, up to 100% of the sub-fund's net assets may be allocated to index credit default swap (CDS) for hedging purposes.

The Sub-Fund may, for cash management purposes or to maximise Sub-Fund's income, use repurchase agreements and/or enter into securities lending transactions, as further described in Appendix II to this Prospectus.

Repurchase agreements or securities lending transactions shall all be conducted under market conditions and each category of transactions (i.e., repurchase agreements or securities lending transactions), may not represent more than 15% of the Sub-Fund's net assets. Cumulatively, repurchase agreements and securities lending transactions shall all be conducted under market conditions, within the limit of 15% of the Sub-Fund's net assets. This limit may be reached in the event of exceptional market conditions, that lead to greater attraction for the securities held in the Sub-Fund and therefore greater activity and opportunities for repurchase agreements and securities lending transactions.

These operations shall be performed on the debt securities and money market instruments referred above.

The target proportion of Sub-Fund's net assets to be used for repurchase agreements or securities lending transactions will be 10%, for each category of transactions (i.e. repurchase agreements or securities lending transactions). Cumulatively, the target proportion of the Sub-Fund's net assets to be used for repurchase agreements and securities lending transactions will be 10%. This proportion is the proportion expected to be reached in light of the historical market opportunities that have been observed by the Sub-Fund in the past.

Repurchase agreements or securities lending transactions

Repurchase agreements and securities lending transactions may be carried out with ODDO BHF SCA.

The remuneration received from repurchase agreements and/or securities lending transactions is repaid to the Sub-Fund, less operating costs charged by the counterparty. The remuneration of the Sub-Fund amounts to 75% of the gross revenues.

Further information on the remuneration repaid to the Sub-Fund as well as costs and fees related to the services provided by the relevant counterparty is available in the Company's annual and semi-annual reports.

Further information on the ESG Strategy of the Sub-Fund and to be disclosed pursuant to article 8(1), (2) and (2a) of Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial services sector ("SFDR") is set out in Appendix XVI to this Prospectus.

The Sub-Fund complies with Article 8 of the SFDR as it promotes environmental, social and governance characteristics into its investment strategy on the condition of good corporate governance on the part of the companies in which investments are made. The Sub-Fund is therefore suitable for investors with sustainability preferences.

Information in accordance with Article 11 of SFDR can be found in the Company's annual report, on the website 'am.oddo-bhf.com' and is available from the Company on request.

Risks

The major risks associated with investing in the Sub-Fund relate to the following elements:

- Risk of capital loss
- Credit risk
- Interest rate risk
- Risk associated with discretionary management
- Emerging market risk
- Liquidity risk of underlying assets
- Counterparty risk
- Risks associated with securities financing transactions and collateral management
- Risk associated with high yield bonds
- Risks associated with portfolio concentration
- Risk associated with commitments on forward financial instruments
- Unknown risk
- Sustainability risk

The Sub-Fund will be exposed, to a limited extent, to the following risks:

- Currency conversion and exchange risk

For a comprehensive description of these risks, including special risk considerations applicable to high-yield bonds, please refer to the section "Risk Factors". This section also details other risks associated with investing in the Sub-Fund.

Typical Investors' Profile

ODDO BHF GLOBAL TARGET 2031

Typical investors have a long-term horizon (6 years) by investing in a portfolio of mainly listed transferable debt securities of corporate issuers, with an emphasis on lower quality debt issues. The investor should also have experience with more volatile products and accept that these debt securities are speculative and subject to greater

risk of loss of income and principal than higher rated securities. The recommended minimum investment horizon is the term through to the end of each investment period and each renewed investment period (i.e. through to 31 December 2031 for the first period).

Shares available

Shares that can be issued by the Company in the Sub-Fund have the following features (grouped by categories of Shares):

Name	Initial Subscription Price	Minimum Initial Investment	Minimum Subsequent Investment	Sales Charge (in % of the Net Asset Value per Share)	Redemption Fee (in % of the Net Asset Value per Share)
"I" Shares	Euro 1,000	Euro 250,000	1/1000 th of a Share	Up to 2%	None
"R" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"N" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"F" Shares	Euro 1,000	Euro 250,000	1/1000 th of a Share	None	None

Shares may be offered in currencies other than the Euro, in which case the initial subscription price and the minimum initial investment amount of these Shares (i) will have the same facial value when expressed in GBP, USD or CHF, and (ii) will be ten times the above amounts when expressed in SEK (in order to reflect the FX rate between the Euro and the SEK).

Additional and up-to-date information on the Share Classes specifically offered in the Sub-Fund may be obtained free of charge by any person on am.oddobhf.com.

ODDO BHF GLOBAL TARGET IG 2031

13. ODDO BHF Global Target IG 2031

Investment Objectives and Strategy

The investment objective of the Sub-Fund is to increase the value of the Sub-fund's portfolio, in the medium and long term, through the discretionary selection of at least 80% of bonds from private or public issuers rated at least BBB- (Standard & Poor's or equivalent as assessed by the Management Company or according to its own internal rating), which involves a risk of capital loss.

The Sub-Fund seeks to outperform the hurdle rates for performance fee calculation purposes, if any, depending on the share class subscribed as described in section "Charges and expense" point b.

There is a risk that issuers' real financial situation may be worse than expected. These adverse conditions will reduce the Sub-Fund's performance. The investment objective may not be achieved as a result.

This objective is based on the realisation of market assumptions laid down by the Management Company. It does not under any circumstances constitute the promise of a return or a performance by the Sub-Fund.

Investors should be aware that the performance indicated in the sub-fund's investment objective does not include all cases of default and is based on estimates in view of market assumptions made at a given time.

Investment Period

The Sub-Fund implements its investment strategy over an investment period where the end-date is fixed by the Management Company.

The investment period end date is initially fixed at 31 December 2031. The Management Company may decide to extend the investment period, according to market conditions on this date and the likelihood that it can achieve what it considers to be a solid investment objective. Such an extension must be decided two months before the expiry of the previous period.

Depending on market conditions, the Management Company may decide to liquidate or merge the Sub-Fund before its term ends on 31 December 2031.

Benchmark index

The Sub-Fund does not have a benchmark index. The average maturity of the Sub-Fund's bond portfolio is around six years as of the Sub-Fund's inception date. This average maturity decreases each year to become equal to that of a money market investment in 2031.

Investment strategy

The Sub-fund's investment strategy is to manage, on a discretionary basis, a diversified portfolio of debt securities and/or money market instruments, 80% of which shall be from private or public issuers rated at least BBB- (by Standard & Poor's or equivalent as assessed by the Management Company, or according to its own internal rating), also including cash, and shall be repayable no later than nine months and one day after 31 December 2031 (final maturity of the security or early redemption options at the Sub-Fund's discretion). The Sub-Fund pursues a "buy and maintain" strategy. It aims to select corporate

bonds to optimise yield whilst controlling risk and hold them to maturity, replacing holdings where credit concerns arise or where market opportunities enable an enhancement of expected yields.

The Sub-Fund may invest up to 20% in instruments issued by entities rated between BB+ and B- "high yield" (S&P, Moody's or deemed equivalent by the Investment Manager or through an internal rating system at the Investment Manager)."

Up to 100% of the Sub-Fund's net assets may be invested in entities whose activities are primarily conducted in a country that is not a member of the OECD, resulting in economic exposure to emerging markets.

The Management Company does not use the ratings issued by rating agencies automatically or in isolation, as it also applies its own internal analysis.

In the event of a downgrade, the Investment Manager will take the interests of Shareholders, market conditions and its own analysis of these fixed income products into account when respecting rating limits. Investment in unrated debt securities or rated lower than BBB- is limited to 20% of the total assets of the Sub-Fund. This limit of 20% includes the unrated bonds which can amount to 10% of the total assets of the Sub-Fund. "Distressed securities are securities of entities that are experiencing default, or are under bankruptcy, rated CCC- and below assigned by an internationally recognised rating service such as Moody's or S&P (or deemed equivalent by the Investment Manager, or using the Investment Manager's internal rating). Should the distressed securities represent more than 10% of the Sub-Fund's net assets in the circumstances described in the preceding sentence, the proportion above 10% will be sold as soon as possible, under normal market circumstances, and in the best interest of Shareholders. The Sub-Fund will not actively invest in distressed securities. In addition, and in the event of a downgrade, the Investment Manager will not necessarily take any action. The Investment Management will only rebalance if the 20% limit is reached with respect to securities rated under BB+ or below. In the event of a downgrade below the minimum Rating of B- the fixed income product will be sold as soon as possible, under normal market circumstances, and in the best interest of Shareholders.

The securities will be issued in any OECD member currency, including EUR, GBP, USD and/or CHF, and the currency risk will be hedged, with a maximum residual currency risk of 5%.

The Sub-Fund seeks to maximise the portfolio's average return at maturity (31 December 2031).

ESG (environmental, social and governance) criteria are another factor in fundamental analysis as further described in Appendix XVII to this Prospectus.

ODDO BHF GLOBAL TARGET IG 2031

The management team may select securities that are not included in the Sub-Fund's investment universe described in Appendix XVII to this Prospectus.

Given the Fund's performance target and specific maximum maturity for securities held, the selection of securities may vary over time at the portfolio manager's discretion, depending on market opportunities and the maturing of securities.

As detailed in Appendix I point C (12), the Sub-Fund may not invest in aggregate more than 10% of its assets in the units or shares of other UCITS or UCI.

The Sub-Fund may hold up to 10% of its net assets in Cash on a temporary and ancillary basis.

The Investment Manager may also invest up to 100% of net assets in forward financial instruments traded on regulated or OTC markets, without seeking overexposure. The Investment Manager may take positions in order to hedge the portfolio against interest rate and credit risk.

The Sub-Fund's maximum exposure to the markets (equities, debt securities, UCIs and derivatives) may not exceed 100% of net assets, it being understood that the maximum exposure is the sum of the net exposures to each of the markets (equity, fixed income, money) to which the Sub-Fund is exposed (the sum of long and hedging positions).

The Sub-Fund may have the possibility, at the discretion of the Management Company and the Investment Manager, to enter into Credit Default Swaps (Index) as buyer or seller.

The Investment Manager will also use swap and/or forward exchange contracts to hedge the portfolio against currency risk through a residual rate risk of a maximum of 5% remains.

The Sub-fund does not use total return swap. The Sub-Fund may, for cash management purposes or to maximise Sub-Fund's income, use repurchase agreements and/or enter into securities lending transactions, as further described in Appendix II to this Prospectus.

Repurchase agreements or securities lending transactions shall all be conducted under market conditions and each category of transactions (i.e., repurchase agreements or securities lending transactions), may not represent more than 15% of the Sub-Fund's net assets. Cumulatively, repurchase agreements and securities lending transactions shall all be conducted under market conditions, within the limit of 15% of the Sub-Fund's net assets. This limit may be reached in the event of exceptional market conditions, that lead to greater attraction for the securities held in the Sub-Fund and therefore greater activity and opportunities for repurchase agreements and securities lending transactions.

These operations shall be performed on the debt securities and money market instruments referred above.

The target proportion of Sub-Fund's net assets to be used for repurchase agreements or securities lending transactions will be 10%, for each category of transactions (i.e. repurchase agreements or securities lending transactions). Cumulatively, the target proportion of the

Sub-Fund's net assets to be used for repurchase agreements and securities lending transactions will be 10%. This proportion is the proportion expected to be reached in light of the historical market opportunities that have been observed by the Sub-Fund in the past.

Repurchase agreements or securities lending transactions Repurchase agreements and securities lending transactions may be carried out with ODDO BHF SCA.

The remuneration received from repurchase agreements and/or securities lending transactions is repaid to the Sub-Fund, less operating costs charged by the counterparty. The remuneration of the Sub-Fund amounts to 75% of the gross revenues.

Further information on the remuneration repaid to the Sub-Fund as well as costs and fees related to the services provided by the relevant counterparty is available in the Company's annual and semi-annual reports.

Further information on the ESG Strategy of the Sub-Fund and to be disclosed pursuant to article 8(1), (2) and (2a) of Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial services sector ("SFDR") is set out in Appendix XVII to this Prospectus.

The Sub-Fund complies with Article 8 of the SFDR as it promotes environmental, social and governance characteristics into its investment strategy on the condition of good corporate governance on the part of the companies in which investments are made. The Sub-Fund is therefore suitable for investors with sustainability preferences.

Information in accordance with Article 11 of SFDR can be found in the Company's annual report, on the website 'am.oddo-bhf.com' and is available from the Company on request.

Risks

The major risks associated with investing in the Sub-Fund relate to the following elements:

- Risk of capital loss;
- Credit risk
- Interest rate risk;
- Risk associated with discretionary management;
- Emerging market risk
- Liquidity risk of underlying assets;
- Counterparty risk;
- Risks associated with securities financing transactions and collateral management;
- Risk associated with high yield bonds;
- Risks associated with portfolio concentration;
- Risk associated with commitments on forward financial instruments;
- Unknown risk;
- Sustainability risk.

ODDO BHF GLOBAL TARGET IG 2031

The Sub-Fund will be exposed, to a limited extent, to the following risks:

- Currency conversion and exchange risk

For a comprehensive description of these risks, including special risk considerations applicable to high-yield bonds, please refer to the section "Risk Factors". This section also details other risks associated with investing in the Sub-Fund.

Typical Investors' Profile

The Sub-Fund is intended for investors seeking exposure to the bond markets through to the product's maturity, and

who are willing to accept the risks arising from such exposure.

The amount that is appropriate to invest in this Sub-Fund depends on your personal wealth. To determine this amount, investors should consider their personal wealth/assets, their financial needs between now and the Sub-Fund's maturity, and their willingness to accept risks or their preference for a more prudent investment. It is also highly recommended that investors sufficiently diversify their investments so as not to be exposed solely to the risks of this Sub-Fund.

Shares available

Shares that can be issued by the Company in the Sub-Fund have the following features (grouped by categories of Shares):

Name	Initial Subscription Price	Minimum Initial Investment	Minimum Subsequent Investment	Sales Charge (in % of the Net Asset Value per Share)	Redemption Fee (in % of the Net Asset Value per Share)
"I" Shares	Euro 1,000	Euro 250,000	1/1000 th of a Share	Up to 2%	None
"R" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"N" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"F" Shares	Euro 1,000	Euro 250,000	1/1000 th of a Share	None	None

Shares may be offered in currencies other than the Euro, in which case the initial subscription price and the minimum initial investment amount of these Shares (i) will have the same facial value when expressed in GBP, USD or CHF, and (ii) will be ten times the above amounts when expressed in SEK (in order to reflect the FX rate between the Euro and the SEK).

Additional and up-to-date information on the Share Classes specifically offered in the Sub-Fund may be obtained free of charge by any person on am.oddo-bhf.com.

ODDO BHF GLOBAL NAVIGATOR

14. ODDO BHF Global Navigator

Investment Objectives and Strategy

The Sub-Fund's investment objective is to seek capital growth over the long term by investing a minimum of 60 % of its assets in exchange-traded funds (ETFs), up to 10 % in exchange-traded commodities (ETCs) and up to 40 % in other UCITS and/or other UCIs, targeting a diversified number of asset classes globally.

Investment strategy

The Sub-Fund is actively managed and references the benchmark 60% MSCI AC World Index NR + 40% Bloomberg Global Aggregate Bond Index for performance comparison.

The Sub-Fund will indirectly invest in equities and fixed income securities of any type in the international markets through ETFs, other UCITS and/or other UCIs.

Specifically, the Sub-Fund will invest 80% to 100% of its net assets in ETFs, other UCITS and/or other UCIs (including ETFs) to gain exposure to equities and fixed income securities (Investment grade and/or High Yield), money market instruments, and derivatives. Within this bucket, ETFs represent at least 60% of the assets of the Sub-Fund.

The exposure to equities and fixed income is done through an in-depth analysis of the microeconomic and macroeconomic environments. During favourable equities market conditions, the Sub-Fund tends to overweight equities, whereas during unfavourable equities market conditions, the Sub-Fund tends to overweight in fixed income.

The Sub-Fund will always invest a minimum of 25 % of its net assets in equity participations as defined in the German Investment Taxation Act.

The Sub-Fund may invest up to 10% of its assets in ETCs; ETCs are negotiable debt instruments.

The Sub-Fund may hold Cash on a temporary and ancillary basis up to 20% of the net assets of the Sub-Fund. The Sub-Fund may also hold Cash Equivalents appropriate to provide for redemptions or to meet other liquidity needs. These assets may consist of money market instruments.

The Sub-Fund may also be indirectly exposed to (in % of its net assets):

- From 25% to 75% in equities through ETFs, units or shares of open-ended UCITS and/or UCIs;
- From 0% to 100% in bonds (being either investment or below investment-grade fixed or floating rate bonds, issued by corporate or sovereign issuers) through ETFs, units or shares of open-ended UCITS and/or UCIs;
- Up to 10% in commodities, other than precious metals, through ETFs, ETCs, units or shares of open-ended UCITS and/or UCIs;

- Up to 10% in precious metals through ETFs, ETCs, units or shares of open-ended UCITS and/or UCIs;
- Up to 40% in securities from emerging markets which are not members of the OECD.

The Sub-Fund may be exposed to currency risk up to 100%, and up to 40% in non-OECD currencies.

The Sub-Fund may use derivatives for investment, efficient portfolio management and hedging purposes.

Derivatives may include:

- Futures (equities, fixed-income, currency)
- Options (equities, fixed-income, currency)
- Forwards (currency)

The Sub-Fund's maximum net exposure to equities, bonds (excluding money market) and commodities (including derivatives) may not exceed 150% of net assets, while the net exposure to equity (including derivatives) and fixed income instruments (including derivatives) respectively may not exceed 100 % each.

The maximum net exposure is the sum of the net exposures to each market to which the Sub-Fund is exposed (the sum of long and hedging positions).

The Sub-Fund may use financial derivatives instruments to hedge currency risk or to hedge or gain exposure to equity risk, interest rate risk or credit risk (for efficient portfolio management), as described in section "Investment Objectives and Policies", Point A. and under "Investment Restrictions" in Appendix I and "Investment Techniques and Instruments" in Appendix II. The Sub-Fund may in particular have the possibility, at the discretion of the Management Company and the Investment Manager, to enter into Credit Default Swaps (Index) as buyer or seller.

The Sub-Fund does not use total return swaps.

The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

In accordance with the provisions of Article 6 of the SFDR, the Investment Manager does not consider sustainability risks or "principal adverse impacts" on sustainability factors in the investment decision-making process, as they are not part of the strategy of the Sub-Fund. However, the Investment Manager considers minimum sustainability safeguards across its funds through Management Company's Exclusion Policy that excludes specific sectors because of the materiality of their sustainability risks and through the exclusion of companies that do not respect the Principles of the United Nations Global Compact. The Management Company has signed the United Nations Principles for Responsible Investment (PRI) and also the CDP (previously known as Carbon Disclosure Project).

Information relating to the Management Company's ESG Policy can be found at "am.oddo-bhf.com".

Risks

The major risks associated with investing in the Sub-Fund relate to the following elements:

- Risk associated with discretionary management;

ODDO BHF GLOBAL NAVIGATOR

- Risk of capital loss;
- Interest rate risk;
- Equity risk
- Credit risk
- Emerging countries risk;
- Liquidity risk of underlying assets;
- Counterparty risk;
- Risks associated with the use of overexposure;
- Exchange rate risk;
- Risk associated with high yield bonds;
- Risk linked to commodities price fluctuations;

For a comprehensive description of these risks, please refer to the section "Risk Factors". This section also details other risks associated with investing in the Sub-Fund.

This Sub-Fund is suitable for investors seeking exposure through a tactical allocation to fixed income and equity markets over a recommended investment horizon of five years and who are willing to accept the risks arising from such exposure

The amount that is appropriate to invest in this Sub-Fund depends on your personal wealth. To determine this amount, investors should consider their personal wealth/assets, their current financial needs and those in three years as well as their willingness to accept risks or their preference for a more prudent investment. It is also highly recommended that investors sufficiently diversify their investments so as not to be exposed solely to the risks of this Sub-Fund.

Typical investors' profile

Shares available

Shares that can be issued by the Company in the Sub-Fund have the following features (grouped by categories of Shares):

Name	Initial Subscription Price	Minimum Initial Investment	Minimum Subsequent Investment	Sales Charge (in % of the Net Asset Value per Share)	Redemption Fee (in % of the Net Asset Value per Share)

ODDO BHF Laufzeitfonds 2032

15. ODDO BHF Laufzeitfonds 2032

Investment Objectives and Strategy

The investment objective of the Sub-Fund is to increase the value of its portfolio, in the medium and long term, through investment in speculative (high yield) bonds from corporate issuers, rated between BB+ and CCC (Standard & Poor's or equivalent as assessed by the Management Company or according to its own internal rating), and is therefore exposed to a risk of capital loss. Except for accumulation Shares, the Sub-Fund aims to pay a dividend at regular intervals at least two times a year.

This objective is based on the realisation of market assumptions laid down by the Management Company. It does not under any circumstances constitute the promise of a return or a performance by the Sub-Fund. Investors should be aware that the performance indicated in the Sub-Fund's investment objective does not include all cases of default and is based on estimates in view of market assumptions made at a given time.

Investment period:

The Sub-Fund implements its investment strategy over an investment period where the end-date is fixed by the Management Company. The investment period end date is initially fixed at 31 December 2032. The Management Company expects to liquidate the Sub-Fund when its term ends on or around 31 December 2032 in accordance with Appendix IV, section 3 of this Prospectus and the Articles of Incorporation. As such, the Sub-Fund is a maturity fund (Laufzeitfonds) intended to be liquidated at maturity.

Benchmark index:

The Sub-Fund does not have a benchmark index.

Investment strategy:

The Sub-Fund's investment strategy is to manage, on a discretionary basis, a diversified portfolio of debt securities composed, up to a limit of 100% of the Sub-Fund's net assets, of traditional, high yield bonds rated between BB+ and CCC (by Standard & Poor's or equivalent as assessed by the Management Company, or according to its own internal rating), of which at least 60% are issued by corporate issuers with their registered office in an OECD member country and with maturities of a maximum of nine months and one day after 31 December 2032 (final maturity of the security or early redemption options at the Company's discretion). The Sub-Fund pursues a "buy and maintain" strategy. It aims to select corporate bonds to optimise yield whilst controlling risk and hold them to maturity replacing holdings where credit concerns arise or where market opportunities enable an enhancement of expected yields.

The Management Company does not use the ratings issued by rating agencies automatically or in isolation, as it also applies its own internal analysis.

In the event of a downgrade, the Investment Manager will take the interests of Shareholders, market conditions and its own analysis of these fixed income products into account when respecting rating limits. Distressed securities are securities of entities rated CCC- and below assigned by an internationally recognised rating service such as Moody's or

S&P (or deemed equivalent by the Investment Manager, or using the Investment Manager's internal rating). Should the distressed securities represent more than 10% of the Sub-Fund's net assets in the circumstances described in the preceding sentence, the proportion above 10% will be sold as soon as possible, under normal market circumstances, and in the best interest of Shareholders. The Sub-Fund will not actively invest in distressed securities.

Within the limit of 40% of the net assets, the Sub-Fund may hold securities from corporate issuers whose registered office is located outside of the OECD, including in emerging countries. The Sub-Fund seeks to maximise the portfolio's average yield-to-maturity at the maturity date of 31 December 2032 and select the issuers with the lowest default risk in light of the return offered and fundamental analysis of the various risk factors inherent to said issuers. By taking a large number of factors into account when selecting assets, the Sub-Fund can:

- adopt an investment strategy based on bond-picking, combined with technical analysis, when constructing the portfolio, while consistently seeking an attractive risk/return ratio, according to the Investment Manager's assessment;
- manage the portfolio's investment return depending on changes in interest rates and/or spread;
- monitor and measure geographical and sector exposure;
- integrate purchases and sales through simulations which make it possible to foresee developments in the portfolio.

The securities will be issued in any OECD member currency, including EUR, GBP, USD and/or CHF, and the currency risk will be hedged, with a maximum residual currency risk of 5%.

As detailed in Appendix I point C (12), the Sub-Fund may not invest in aggregate more than 10% of its assets in the units or shares of other UCITS or UCI.

ESG (environmental, social and governance) criteria are another factor in fundamental analysis as further described in Appendix XIX to this Prospectus.

The Investment Manager may select assets that are not included in the Sub-Fund's investment universe described in Appendix XIX to this Prospectus.

Given the Sub-Fund's performance target and specific maximum maturity for securities held, the selection of securities may vary over time at the Investment Manager's discretion, depending on market opportunities and the maturing of securities. In particular, the Sub-Fund may invest up to 100% of its assets in investment grade securities rated higher than BB+ (Standard & Poor's or equivalent as assessed by the Management Company or according to its own internal rating).

The Sub-Fund may hold up to 10% of its net assets in Cash on a temporary and ancillary basis.

The Investment Manager may also invest up to 100% of net assets in forward financial instruments traded on regulated

ODDO BHF - Laufzeitfonds 2032

or OTC markets, without seeking overexposure. The Investment Manager may take positions in order to hedge the portfolio against interest rate and credit risk.

The Investment Manager will also use swap and/or forward exchange contracts to hedge the portfolio against currency risk, though a residual risk of a maximum of 5% remains.

The Sub-Fund's maximum exposure to the markets (equities, debt securities, UCIs and derivatives) may not exceed 100% of net assets, it being understood that the maximum exposure is the sum of the net exposures to each of the markets (equity, fixed income, money) to which the Sub-Fund is exposed (the sum of long and hedging positions).

On a discretionary basis, up to 100% of the Sub-Fund's net assets may be allocated to index credit default swap (CDS) for hedging purposes.

The Sub-Fund may, for cash management purposes or to maximise Sub-Fund's income, use repurchase agreements and/or enter into securities lending transactions, as further described in Appendix II to this Prospectus.

Repurchase agreements or securities lending transactions shall all be conducted under market conditions and each category of transactions (i.e., repurchase agreements or securities lending transactions), may not represent more than 15% of the Sub-Fund's net assets. Cumulatively, repurchase agreements and securities lending transactions shall all be conducted under market conditions, within the limit of 15% of the Sub-Fund's net assets. This limit may be reached in the event of exceptional market conditions, that lead to greater attraction for the securities held in the Sub-Fund and therefore greater activity and opportunities for repurchase agreements and securities lending transactions. These operations shall be performed on the debt securities and money market instruments referred to above.

The target proportion of Sub-Fund's net assets to be used for repurchase agreements or securities lending transactions will be 10%, for each category of transactions (i.e. repurchase agreements or securities lending transactions). Cumulatively, the target proportion of the Sub-Fund's net assets to be used for repurchase agreements and securities lending transactions will be 10%. This proportion is the proportion expected to be reached in light of the historical market opportunities that have been observed by the Sub-Fund in the past.

Repurchase agreements and securities lending transactions may be carried out with ODDO BHF SCA.

The remuneration received from repurchase agreements and/or securities lending transactions is repaid to the Sub-Fund, less operating costs charged by the counterparty. The remuneration of the Sub-Fund amounts to 75% of the gross revenues.

Further information on the remuneration repaid to the Sub-Fund as well as costs and fees related to the services provided by the relevant counterparty is available in the Company's annual and semi-annual reports.

Further information on the ESG Strategy of the Sub-Fund and to be disclosed pursuant to article 8(1), (2) and (2a) of Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial services sector ("SFDR") is set out in Appendix XVI to this Prospectus.

The Sub-Fund complies with Article 8 of the SFDR as it promotes environmental, social and governance characteristics into its investment strategy on the condition of good corporate governance on the part of the companies in which investments are made. The Sub-Fund is therefore suitable for investors with sustainability preferences.

Information in accordance with Article 11 of SFDR can be found in the Company's annual report, on the website 'am.oddo-bhf.com' and is available from the Company on request.

Risks

The major risks associated with investing in the Sub-Fund relate to the following elements:

- Risk of capital loss
- Credit risk
- Interest rate risk
- Risk associated with discretionary management
- Emerging market risk
- Liquidity risk of underlying assets
- Counterparty risk
- Risks associated with securities financing transactions and collateral management
- Risk associated with high yield bonds
- Risks associated with portfolio concentration
- Risk associated with commitments on forward financial instruments
- Unknown risk
- Sustainability risk

The Sub-Fund will be exposed, to a limited extent, to the following risks:

- Currency conversion and exchange risk

For a comprehensive description of these risks, including special risk considerations applicable to high-yield bonds, please refer to the section "Risk Factors". This section also details other risks associated with investing in the Sub-Fund.

Typical Investors' Profile

Typical investors have a long-term horizon (6 years) by investing in a portfolio of mainly listed transferable debt securities of corporate issuers, with an emphasis on lower quality debt issues. The investor should also have experience with more volatile products and accept that these debt securities are speculative and subject to greater risk of loss of income and principal than higher rated securities. The recommended minimum investment horizon is the term through to the end of the investment period (i.e. through to 31 December 2032).

Shares available

ODDO BHF - Laufzeitfonds 2032

Shares that can be issued by the Company in the Sub-Fund have the following features (grouped by categories of Shares):

Name	Initial Subscription Price	Minimum Initial Investment	Minimum Subsequent Investment	Sales Charge (in % of the Net Asset Value per Share)	Redemption Fee (in % of the Net Asset Value per Share)
"I" Shares	Euro 1,000	Euro 250,000	1/1000 th of a Share	Up to 2%	None
"R" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None
"N" Shares	Euro 100	Euro 100	1/1000 th of a Share	Up to 5%	None

Shares may be offered in currencies other than the Euro, in which case the initial subscription price and the minimum initial investment amount of these Shares (i) will have the same facial value when expressed in GBP, USD or CHF, and (ii) will be ten times the above amounts when expressed in SEK (in order to reflect the FX rate between the Euro and the SEK).

Additional and up-to-date information on the Share Classes specifically offered in the Sub-Fund may be obtained free of charge by any person on am.oddo-bhf.com.

RISK FACTORS

The investments within each Sub-Fund are subject to market fluctuations and to the risks inherent in all investments; accordingly, no assurance can be given that the investment objectives will be achieved.

Risk of capital loss

The Sub-Funds are not guaranteed or protected; Shareholders may not get back their initial investment in full.

Risk associated with discretionary management

This risk is linked to the investment style, which is based on expectations regarding the performance of the various markets. There is a risk that a Sub-Fund may not be invested in the best-performing markets or securities at all times. A Sub-Fund's performance therefore depends on the Management Company's or the relevant Investment Manager's ability to anticipate movements in the markets or in individual securities. This risk may result in a fall in the Net Asset Value and/or a capital loss for the investor.

Fixed income securities

Investment in fixed income securities is subject to inter alia interest rate risk, sector, security and credit risk. The values of fixed income securities held by the Sub-Funds generally will vary inversely with changes in interest rates and such variation may affect Share prices accordingly.

Equity securities

Investing in equity securities may offer a higher rate of return than those in short term and long term debt securities. However, the risks associated with investments in equity securities may also be higher, because the investment performance of equity securities depends upon factors which are difficult to predict. Such factors include the possibility of sudden or prolonged market declines and risks associated with individual companies. The fundamental risks associated with any equity portfolio are the risk that the value of the investments it holds might decrease in value. Equity security values may fluctuate in response to the activities of an individual company or in response to general market and/or economic conditions. Historically, equity securities have provided greater long-term returns and have entailed greater short-term risks than other investment choices.

Interest rate risk

This corresponds to the risk linked to a rise in bond market interest rates, which causes bond prices and therefore the Net Asset Value of the relevant Sub-Fund to fall.

Credit risk

This is the risk of a downgrading of an issuer's credit rating, or in an extreme case its default, which would have a negative impact on the price of the debt securities issued and therefore on the Net Asset Value of a Sub-Fund, potentially resulting in loss of capital. Credit risk varies according to expectations, bond maturities and the level of confidence in each issuer. This may restrict the liquidity of the securities of a particular issuer and have a negative impact on the Net Asset Value of a Sub-Fund, especially if the Sub-Fund liquidates its positions in a market where transaction volumes are low.

Counterparty risk

This is the risk of a counterparty's collapse, causing it to default on payment. A Sub-Fund may be exposed to the counterparty risk caused by the use of derivatives contracted over-the-counter with credit institutions or contracts for the temporary purchase or sale of securities. Such Sub-Fund is therefore exposed to the risk that one of these credit institutions may not be able to honour its commitments in connection with such instruments.

Volatility risk

This risk is linked to an asset's propensity to fluctuate substantially, either for a particular reason or in line with the market's general movements. The more an asset fluctuates over the short term, the more it is regarded as volatile and therefore more risky. A reduction in volatility may cause convertible bond prices to fall and consequently lead to a fall in the Sub-Fund's Net Asset Value.

Modelling risk

A Sub-Fund's stock selection process may make particular use of a portfolio building tool designed by the Management Company, the relevant Investment Manager or by an external provider. There is a risk that the data processing tool will not be efficient, as there is no guarantee that previous situations will repeat themselves.

Rule 144A Securities

The Sub-Funds may invest in so-called Rule 144A- Securities which are securities that are not registered in the US under the 1933 Act, but can be sold in the US to certain institutional buyers. A Sub-Fund may invest in Rule 144A Securities, provided

that such securities are issued with registration rights pursuant to which such securities may be registered under the 1933 Act and traded on the US OTC Fixed Income Securities market. Such securities shall be considered as newly issued transferable securities.

In the event that any such securities are not registered under the 1933 Act within one year of issue, at such time, such securities shall be considered as securities which are not traded on an official stock exchange or other Regulated Market and therefore accordingly the Sub-Fund shall invest no more than 10% of the net assets of such Sub-Fund in such securities.

Warrants

The investments in warrants involve a greater degree of risk, as the greater volatility in the prices of warrants may result in greater volatility in the price of shares.

Subordinated Debts

A subordinated debt security is a debt security that ranks below other debt securities of the issuer as to claims on assets or earnings should the issuer fail to meet its payment obligations.

Subordinated debt securities are more likely to suffer a partial or complete loss in the case of any default or bankruptcy of the issuer, because all obligations to holders of senior debt must be satisfied first. Certain subordinated bonds are callable meaning the issuer has the right to buy it back at a specified date and price. The issuer may be able to extend the maturity date further or defer or reduce the coupon payment.

Contingent Convertible Bonds

Contingent Convertible Bonds (CoCos) are debt securities issued by international companies, predominantly banks. A Sub-Fund which invests to a large extent in the asset class might therefore be exposed to *industry concentration risk*. To qualify as Additional Tier 1 Capital under the Basle III capital requirements, CoCos need to be able to be written down (*write-down risk*) or converted into equity (*conversion risk*) when a certain trigger equity level relative to risk weighted assets is reached (*trigger level risk*). The structure of these instruments is innovative yet untested in the market. In a stressed environment market participants may view the activation of a trigger by single issuer as a systemic event, causing price contagion, volatility and illiquidity in the entire asset class (*unknown risk*). In stressed market conditions, the liquidity profile of the issuer of these instruments can deteriorate significantly and it may be difficult to find a willing buyer which means that a significant discount may be required in order to sell it (*liquidity risk*). Under the market circumstances prevailing at the date of this prospectus, the attractive yield of CoCos relative to more highly rated debt issues of the same issuer or similarly rated debt issues of other issuers has been a primary reason for strong demand from investors. The yield may - compared to the yield of other instruments - not adequately compensate the risks associated with them (*yield/valuation risk*). A CoCo must be issued as a perpetual instrument, callable at pre-determined levels only with the approval of the competent authority. It cannot be assumed that the perpetual CoCos will be called on the call date scheduled and the investor may not receive return of principal as expected on call date or indeed at any date (*call extension risk*). Coupon payments are entirely discretionary and may be cancelled at any time, for any reason (*coupon cancellation risk*). The CoCos may suffer from a reduction in capital or from a conversion into equity capital, potentially at a discounted price, or from suspension of interest payments, prepayment or from other factors in accordance with their terms in case certain events are triggered. The principal amount of a CoCo may be lost on a permanent or temporary basis. Contrary to classic capital hierarchy, the holders of CoCos may suffer a loss of capital when equity holders do not (*capital structure inversion risk*). In addition the risk of capital loss may increase in times of adverse market conditions. This may be unrelated to the performance of the issuing companies. The investment in CoCos involves a higher degree of risk as triggers may inter alia be caused on the basis of credit events, non-public regulatory events, the capital ratio of the issuing company falling below a certain level or the share price of the issuer falling to a particular level for a certain period of time. The investment may lose value or generate the risk of equity investments and there is no guarantee that the amount invested in a CoCo will be repaid at a certain date as their termination and redemption is subject to prior authorisation of the competent supervisory authority.

Convertible Bonds

Convertible bonds represent a halfway house between bonds and shares, with the particularity of introducing an element of equity risk into a fixed-income instrument that already features interest rate and credit risk. Since equity markets are more volatile than fixed-income markets, holding these instruments results in an increase in portfolio risk. The value of convertible bonds depends on several factors: the level of interest rates, changes in the price of the underlying equities, changes in the price of the derivative embedded in the convertible bond. These various factors may result in a fall in a Sub-Fund's Net Asset Value.

Small and medium companies

The investments in securities of smaller, newer companies may be riskier than the investments in larger, more established companies as the stocks of medium-size and small companies are usually less stable in price and less liquid than the stocks of larger companies.

Risk associated with investment in hedge funds

A Sub-Fund may invest in alternative investment funds that apply alternative management, and in particular arbitrage, strategies. This type of fund may present risks inherent to the investment techniques thus applied. The Sub-Fund's Net Asset Value could therefore fall.

Risk linked to changes in commodities prices

Commodities components may fluctuate in significantly different ways from traditional securities markets (equities, bonds). Climate and geopolitical factors may also affect supply and demand of the underlying commodity in question; in other words, these factors may alter the expected scarcity of the underlying commodity on the market. Nevertheless, within a single commodity market out of the three main commodity markets represented (energy, metals and agricultural products), the movements of components may be more strongly correlated with one another. Consequently, these exposures may prove unfavourable, particularly in the case of a downturn in the sector in question, in the absence of liquidity on this market, if the manager's forecasts prove misguided or if the economic, and in particular geopolitical, climate becomes unfavourable to commodities. They may therefore negatively impact the Sub-Fund's Net Asset Value.

Risks associated with investing in commodities or precious metals

Investments that provide exposure to commodities involve additional risks beyond those associated with traditional investments. In particular, political, military and natural events may affect the production and trade of commodities or precious metals and therefore the financial instruments providing exposure to commodities or precious metals. Terrorism and other criminal activities may impact the availability of commodities or precious metals and thus also negatively affect financial instruments offering exposure to commodities.

Exchange Rates

Some of the Sub-Funds are invested in securities or derivatives instruments denominated in a number of different currencies other than the Reference Currency (as defined hereinafter under "Net Asset Value") in which the Sub-Funds are denominated; changes in foreign currency exchange rates will affect the value of Shares held in such Sub-Funds.

Currency conversion risks

Where Classes of Shares of a Sub-Fund may be subscribed or redeemed in currencies different from that in which the Sub-Fund is denominated (its Reference Currency), investors in Shares of that Class should note that fluctuations in the exchange rate between the Reference Currency and the currency in which the different Classes of Shares of a Sub-Fund may be subscribed or redeemed, may affect the performance of the Shares of that Class independent of the performance of the Sub-Fund's investments. The costs of currency exchange transactions in connection with the purchase, redemption and exchange of Shares of that Class will be borne by the relevant Class of Shares and will be reflected in the Net Asset Value of that Class.

Liquidity Risk

Even relatively small orders for purchases or sales of illiquid securities (securities that cannot be sold readily) may lead to significant price changes. If an asset is not liquid, there is the risk that the asset cannot be sold or can only be sold at a significant discount to the purchase price. The lack of liquidity of an asset may cause its purchase price to increase significantly. From time to time, the counterparties with which the Sub-Funds effect transactions might cease making markets or quoting prices in financial instruments. In such instances, the Sub-Funds might be unable to enter into a desired transaction or to enter into an offsetting transaction with respect to an open position, which might adversely affect performance.

Region, Country and Industry Concentration Risk

If a Sub-Fund focuses its investments on certain markets or types of investment, e.g. certain regions, countries or industries, by definition this concentration does not allow the same scope of diversification of risks across different markets as would be possible if investments were not as concentrated. Consequently, a Sub-Fund is particularly dependent on the development of these investments or of individual or related markets or of companies included in those markets.

Emerging Markets

In certain countries, there is the possibility of expropriation of assets, confiscatory taxation, political or social instability or diplomatic developments which could affect investment in those countries. There may be less publicly available information about certain financial instruments than some investors would find customary and entities in some countries may not be subject to accounting, auditing and financial reporting standards and requirements comparable to those to which certain investors may be accustomed. Certain financial markets, while generally growing in volume, have, for the most part, substantially less volume than more developed markets, and securities of many companies are less liquid and their prices more volatile than securities of comparable companies in more sizeable markets. There are also varying levels of government

supervision and regulation of exchanges, financial institutions and issuers in various countries. In addition, the manner in which foreign investors may invest in securities in certain countries, as well as limitations on such investments, may affect the investment operations of certain Sub-Funds.

Emerging country debt will be subject to high risk and will not be required to meet a minimum rating standard and may not be rated for creditworthiness by any internationally recognised credit rating organization. The issuer or governmental authority that controls the repayment of an emerging country's debt may not be able or willing to repay the principal and/or interest when due in accordance with the terms of such debt. As a result of the foregoing, a government obligor may default on its obligations. If such an event occurs, the Company may have limited legal recourse against the issuer and/or guarantor. Remedies must, in some cases, be pursued in the courts of the defaulting party itself, and the ability of the holder of foreign government debt securities to obtain recourse may be subject to the political climate in the relevant country. In addition, no assurance can be given that the holders of commercial debt will not contest payments to the holders of other foreign government debt obligations in the event of default under their commercial bank loan agreements.

Settlement systems in emerging markets may be less well organized than in developed markets. Thus, there may be a risk that settlement may be delayed and that cash or securities of the Sub-Funds may be in jeopardy because of failures or of defects in the systems. In particular, market practice may require that payment shall be made prior to receipt of the security which is being purchased or that delivery of a security must be made before payment is received. In such cases, default by a broker or bank (the "Counterparty") through whom the relevant transaction is effected might result in a loss being suffered by Sub-Funds investing in emerging market securities.

The Company will seek, where possible, to use Counterparties whose financial status is such that this risk is reduced. However, there can be no certainty that the Company will be successful in eliminating this risk for the Sub-Funds, particularly as Counterparties operating in emerging markets frequently lack the substance or financial resources of those in developed countries.

There may also be a danger that, because of uncertainties in the operation of settlement systems in individual markets, competing claims may arise in respect of securities held by or to be transferred to the Sub-Funds. Furthermore, compensation schemes may be non-existent or limited or inadequate to meet the Company's claims in any of these events.

Investment in China

Certain Sub-Funds may invest in securities or instruments which have exposure to the Chinese market. China is in the process of adopting international accounting, auditing and financial reporting standards. Many Chinese companies still do not follow such reporting standards and there are notable differences in accounting and disclosure practices in China. These include the area of the valuation of property and other assets (in particular inventory and investments and provisions against debtors), accounting for depreciation, consolidation, deferred taxation and contingencies and the treatment of exchange differences. Less information may be available to investors and such information may be out of date.

The central government of China is socialist and, while a liberal attitude towards foreign investment and capitalism prevails at present, a future move against foreign investment is a possibility. The reformist elements which now dominate Chinese politics remain ideologically socialist and political factors may outweigh economic policies and the encouragement of foreign investment. The value of the Fund's assets may be affected by uncertainties such as changes in government policies, taxation, currency repatriation restrictions, permitted foreign ownership levels and other developments in the law or regulations of China.

China has established consolidated company law, however certain matters of concern to foreign investors (for example insolvency, responsibility of directors and negligence or fraud) are not adequately dealt with or only covered in a number of national and local laws and regulations.

The exposure may be obtained via various channels including the Qualified Foreign Institutional Investor (QFII) scheme, the Renminbi Qualified Foreign Institutional Investor (RQFII) scheme or Stock Connect. Furthermore, direct exposure may also be obtained via Stock Connect, H-Shares or indirectly via access products such as participation notes, equity-linked notes or similar financial instruments, or through other UCIs that invest in China, where the underlying assets consist of securities issued by companies quoted on regulated markets in China, and/or the performance of which is linked to the performance of securities issued by companies quoted on regulated markets in China. Other than risks involved in investments on an international basis and in emerging markets, as well as other risks of investments generally as described above which are applicable to investments in China, investors should also note the additional specific risks below.

High-Yield Bonds

The ODDO BHF Euro High Yield Bond, the ODDO BHF Euro Credit Short Duration, the ODDO BHF Convertibles Global, the ODDO BHF Credit Opportunities, the ODDO BHF Global High Yield Bond, the ODDO BHF Global Target 2031, the ODDO BHF Laufzeitfonds 2032, the ODDO BHF Global Credit Short Duration and the ODDO BHF Global Navigator may invest to a

large extent or even without limitation in debt securities rated below “Baa3” by Moody’s, below “BBB-” by S&P or below investment grade by other recognized rating agencies, or in unrated securities determined by the Company to be of comparable quality. These bonds are subject to greater risk of loss of income and principal than higher-rated bonds and are considered to be predominantly speculative. They may be more susceptible to real or perceived adverse economic and competitive industry conditions than investment grade securities. The market for such securities may be thinner and less active than that for higher-rated securities, which can adversely affect the prices at which these securities can be sold and the Management Company’s ability to establish their value. In addition, adverse publicity and investor perceptions about high-yield bonds, whether or not based on fundamental analysis, may tend to decrease the market value and liquidity of such bonds.

The Management Company or the relevant Investment Manager will try to reduce the risk of investment in such securities through credit analysis, diversification and attention to current developments and trends in interest rates and economic conditions. However, there can be no assurance that losses will not occur.

The ODDO BHF Euro High Yield Bond, the ODDO BHF Global High Yield Bond, the ODDO BHF Laufzeitfonds 2032 and the ODDO BHF Global Target 2031 may also purchase securities bearing the lowest ratings issued by Moody’s, S&P or another rating agency, or determined by the Management Company or the relevant Investment Manager to be of comparable quality. Debt securities with such ratings are in payment default, the issuer of such securities may be in bankruptcy, and the securities may be regarded as having extremely poor prospects of attaining higher ratings. Non-rated securities will also be considered for investment when the Management Company or the relevant Investment Manager believes that the financial condition of the issuers of such securities, or the protection afforded by the terms of the securities themselves, limit the risk to the Sub-Funds.

Stock Connect

Where permitted, certain Sub-Funds may invest in China via Stock Connect. Stock Connect is a mutual market access program through which foreign investors such as the Sub-Funds can deal in selected securities listed on a People’s Republic of China (“PRC”) stock exchange through the Hong Kong Stock Exchange (“SEHK”) and the clearing house in Hong Kong.

The securities which can be accessed through Stock Connect are, at the date of this Prospectus, all constituent stocks of the SSE 180 Index, the SSE 380 Index and all China A shares listed on the Shanghai Stock Exchange (“SSE”), and certain other securities as well as, since 5 December 2016, selected securities listed on the Shenzhen Stock Exchange (“SZSE”) including any constituent stock of the SZSE Component Index and SZSE Small/Mid Cap Innovation Index which has a market capitalisation of RMB6 billion or above and all SZSE-listed shares of companies which have issued both China A shares and H shares (the “Stock Connect Shares”). At the initial stage of the northbound Shenzhen trading link, investors eligible to trade shares that are listed on the ChiNext Board of SZSE may be limited. It is expected that the list of eligible securities which may be accessed through Stock Connect will develop over time. In addition to the Stock Connect Shares described in this paragraph, a Sub-Fund may, subject to investment policy, invest in any other security listed on the SSE or SZSE which is made available in the future through Stock Connect.

Stock Connect currently comprises a northbound link, through which Hong Kong and overseas investors like the Company may purchase and hold Stock Connect Shares and a southbound link, through which investors in mainland China (i.e. the PRC with the exception of the special administrative regions of Hong Kong and Macau, the “Mainland China”) may purchase and hold shares listed on the SEHK.

Risks linked with dealing in securities in China via Stock Connect. To the extent that a Sub-Fund’s investments in China are dealt via Stock Connect, such dealing may be subject to additional risk factors. In particular, investors should note that Stock Connect is a new trading program. The relevant regulations are untested and subject to change. Stock Connect is subject to quota limitations which may restrict a Sub-Fund’s ability to deal via Stock Connect on a timely basis. This may impact that Sub-Fund’s ability to implement its investment strategy effectively.

Investors should note further that under the relevant regulations a security may be recalled from the scope of Stock Connect. This may adversely affect the Sub-Fund’s ability to meet its investment objective, e.g. when the investment manager wishes to purchase a security which is recalled from the scope of Stock Connect.

Pre-trade check. PRC law provides that a sell order may be rejected if an investor does not have sufficient available China A shares in its account. SEHK will apply a similar check on all sell orders of Stock Connect Shares on the northbound trading link at the level of SEHK’s registered exchange participants (“Exchange Participants”) to ensure there is no overselling by any individual exchange participant (“Pre-Trade Checking”). In addition, Stock Connect investors will be required to comply with any requirements relating to Pre-Trade Checking imposed by the applicable regulator, agency or authority with jurisdiction, authority or responsibility in respect of Stock Connect (“Stock Connect Authorities”).

This Pre-Trade Checking requirement may require a pre-trade delivery of the Stock Connect Shares from a Stock Connect investor’s domestic custodian or sub-custodian to the Exchange Participant which will hold and safekeep such securities so as to ensure that they can be traded on a particular trading day. There is a risk that creditors of the Exchange Participant may seek to assert that such securities are owned by the Exchange Participant and not the Stock Connect investor, if it is not made

clear that the Exchange Participant acts as a custodian in respect of such securities for the benefit of the Stock Connect investor.

Where a Sub-Fund trades Stock Connect Shares through a broker affiliated to the Company's sub-custodian, who is an Exchange Participant and a clearing agent of its affiliated broker, no pre-trade delivery of securities is required and the above risk is mitigated.

Beneficial owner of the Stock Connect Shares. Stock Connect Shares will be held following settlement by brokers or custodians as clearing participants in accounts in the Hong Kong Central Clearing and Settlement System ("CCASS") maintained by the Hong Kong Securities and Clearing Corporation Limited ("HKSCC") as central securities depository in Hong Kong and nominee holder. HKSCC in turn holds these Stock Connect Shares of all its participants through a "single nominee omnibus securities account" in its name registered with ChinaClear, the central securities depository in Mainland China.

Because HKSCC is only a nominee holder and not the beneficial owner of these Stock Connect Shares, in the unlikely event that HKSCC becomes subject to winding up proceedings in Hong Kong, investors should note that these Stock Connect Shares will not be regarded as part of the general assets of HKSCC available for distribution to creditors even under Mainland China law. However, HKSCC will not be obliged to take any legal action or enter into court proceedings to enforce any rights on behalf of investors in these Stock Connect Shares in Mainland China. Foreign investors like a Sub-Fund investing through the Stock Connect holding the Stock Connect Shares through HKSCC are the beneficial owners of the assets and are therefore eligible to exercise their rights through the nominee only.

Not protected by Investor Compensation Fund. Investors should note that any northbound or southbound trading under Stock Connect will not be covered by Hong Kong's Investor Compensation Fund nor the China Securities Investor Protection Fund and thus investors will not benefit from compensation under such schemes. Hong Kong's Investor Compensation Fund is established to pay compensation to investors of any nationality who suffer pecuniary losses as a result of default of a licensed intermediary or authorised financial institution in relation to exchange-traded products in Hong Kong. Examples of default are insolvency, bankruptcy or winding up, breach of trust, defalcation, fraud, or misfeasance.

Restriction on day trading. Save with a few exceptions, day (turnaround) trading is generally not permitted on the China A shares market. If a Sub-Fund buys Stock Connect Shares on a dealing day (T), the Sub-Fund may not be able to sell the Stock Connect Shares until on or after T+1 day.

Quotas used up. Dealing on Stock Connect is subject to daily quota limitations. Once the daily quota is used up, acceptance of the corresponding buy orders will also be immediately suspended and no further buy orders will be accepted for the remainder of the day. Buy orders which have been accepted will not be affected by the using up of the daily quota, while sell orders will be continued to be accepted. Depending on the aggregate quota balance situation, buying services will be resumed on the following trading day.

Difference in trading day and trading hours. Due to differences in public holiday between Hong Kong and Mainland China or other reasons such as bad weather conditions, there may be a difference in trading days and trading hours in the markets accessible through Stock Connect. Stock Connect will only operate on days when these markets are open for trading and when banks in both markets are open on the corresponding settlement days.

So it is possible that there are occasions when it is a normal trading day for the Mainland China market but it is not possible to carry out any Stock Connect Shares trading in Hong Kong. The Management Company and/ or the investment manager, as the case may be, should take note of the days and the hours during which Stock Connect is open for business and decide according to its own risk tolerance capability whether or not to take on the risk of price fluctuations in Stock Connect Shares during the time when Stock Connect is not trading.

The recalling of eligible stocks and trading restrictions. A stock may be recalled from the scope of eligible stocks for trading via Stock Connect for various reasons, and in such event the stock can only be sold but is restricted from being bought. This may affect the investment portfolio or strategies of the Management Company and/or the investment manager, as the case may be. The Management Company and/or the investment manager, as the case may be, should therefore pay close attention to the list of eligible stocks as provided and renewed from time to time by the PRC and Hong Kong authorities.

Under Stock Connect, the Management Company and/or the investment manager, as the case may be, will only be allowed to sell Stock Connect Shares but restricted from further buying if: (i) the Stock Connect Share subsequently ceases to be a constituent stock of the relevant indices; (ii) the Stock Connect Share is subsequently under "risk alert"; and/or (iii) the corresponding H share of the Stock Connect Share subsequently ceases to be traded on SEHK. The Management Company and/or the investment manager, as the case may be, should also note that price fluctuation limits would be applicable to Stock Connect Shares.

Trading costs. In addition to paying trading fees and stamp duties in connection with Stock Connect Shares trading, a Sub-Fund carrying out trading via Stock Connect should also take note of any new portfolio fees, dividend tax and tax concerned with income arising from stock transfers which would be determined by the relevant authorities.

Local market rules, foreign shareholding restrictions and disclosure obligations. Under Stock Connect, China A shares listed companies and trading of China A shares are subject to market rules and disclosure requirements of the China A shares market. Any changes in laws, regulations and policies of the China A shares market or rules in relation to Stock Connect may affect share prices. The investment manager should also take note of the foreign shareholding restrictions and disclosure obligations applicable to China A shares.

The Management Company and/or the investment manager, as the case may be, will be subject to restrictions on trading (including restriction on retention of proceeds) in China A shares as a result of its interest in the China A shares. The investment manager is solely responsible for compliance with all notifications, reports and relevant requirements in connection with its interests in China A shares.

Under the current Mainland China rules, once an investor holds up to 5% of the shares of a company listed in Mainland China, the investor is required to disclose his interest within three working days and during which he cannot trade the shares of that company. The investor is also required to disclose any change in his shareholding and comply with related trading restrictions in accordance with Mainland China rules.

According to existing Mainland China practices, the Sub-Fund as beneficial owners of China A shares traded via Stock Connect cannot appoint proxies to attend shareholders' meetings on its behalf.

Clearing, settlement and custody risks. HKSCC and ChinaClear have established the clearing links between the relevant exchanges and each will become a participant of the other to facilitate clearing and settlement of cross-border trades. For cross-border trades initiated in a market, the clearing house of that market will on one hand clear and settle with its own clearing participants, and on the other hand undertake to fulfil the clearing and settlement obligations of its clearing participants with the counterparty clearing house.

Hong Kong and overseas investors which have acquired Stock Connect Shares through northbound trading should maintain such securities with their brokers' or custodians' stock accounts with CCASS (operated by HKSCC).

No manual trade or block trade. Currently there is no manual trade facility or block trade facility for Stock Connect Shares transactions under northbound trading. A Sub-Fund's investment options may become limited as a result.

Order priority. Trade orders are entered into China Stock Connect System ("CSC") based on time order. Trade orders cannot be amended but may be cancelled and re-entered into the CSC as new orders at the back of the queue. Due to quota restrictions or other market intervention events, there can be no assurance that trades executed through a broker will be completed.

Execution issues. Stock Connect trades may, pursuant to the Stock Connect rules, be executed through one or multiple brokers that may be appointed by the Company for northbound trading. Given the Pre-Trade Checking requirements and hence the pre-trade delivery of Stock Connect Shares to an Exchange Participant, the Management Company and/or the investment manager, as the case may be, may determine that it is in the interest of a Sub-Fund that it only executes Stock Connect trades through a broker who is affiliated to the Fund's sub-custodian that is an Exchange Participant. In that situation, whilst the Management Company and/or the investment manager, as the case may be, will be cognisant of its best execution obligations it will not have the ability to trade through multiple brokers and any switch to a new broker will not be possible without a commensurate change to the Fund's sub-custody arrangements.

No off-exchange trading and transfers. Market participants must match, execute or arrange the execution of any sale and buy orders or any transfer instructions from investors in respect of any Stock Connect Shares in accordance with the Stock Connect rules. This rule against off-exchange trading and transfers for trading of Stock Connect Shares under northbound trading may delay or disrupt reconciliation of orders by market participants. However, to facilitate market players in conducting northbound trading and the normal course of business operation, off-exchange or "non-trade" transfer of Stock Connect Shares for the purposes of post-trade allocation to different funds/sub-funds by fund managers have been specifically allowed.

Currency risks. Northbound investments by a Sub-Fund in the Stock Connect Shares will be traded and settled in Renminbi ("RMB"). If a Sub-Fund holds a Share Class denominated in a local currency other than RMB, the Sub-Fund will be exposed to currency risk if the Sub-Fund invests in a RMB product due to the need for the conversion of the local currency into RMB. During the conversion, the Sub-Fund will also incur currency conversion costs. Even if the price of the RMB asset remains the same when a Sub-Fund purchases it and when the Sub-Fund redeems/sells it, the Sub-Fund will still incur a loss when it converts the redemption/sale proceeds into local currency if RMB has depreciated.

Risk of ChinaClear default. ChinaClear has established a risk management framework and measures that are approved and supervised by the CSRC. Pursuant to the general rules of CCASS, if ChinaClear (as the host central counterparty) defaults, HKSCC will, in good faith, seek recovery of the outstanding Stock Connect Shares and monies from ChinaClear through available legal channels and through ChinaClear's liquidation process, if applicable.

HKSCC will in turn distribute the Stock Connect Shares and/or monies recovered to clearing participants on a pro-rata basis as prescribed by the relevant Stock Connect authorities. Although the likelihood of a default by ChinaClear is considered to be remote, investors in the relevant Sub-Funds should be aware of this arrangement and of this potential exposure.

Risk of HKSCC default. A failure or delay by the HKSCC in the performance of its obligations may result in a failure of settlement, or the loss, of Stock Connect Shares and/or monies in connection with them and a Sub-Fund and its investors may suffer losses as a result. Neither the Company nor the Management Company or the investment manager shall be responsible or liable for any such losses.

Ownership of Stock Connect Shares. Stock Connect Shares are uncertificated and are held by HKSCC for its accountholders. Physical deposit and withdrawal of Stock Connect Shares are not available currently under the northbound trading for a Sub-Fund.

A Sub-Fund's title or interests in, and entitlements to Stock Connect Shares (whether legal, equitable or otherwise) will be subject to applicable requirements, including laws relating to any disclosure of interest requirement or foreign shareholding restriction. It is uncertain whether the Chinese courts would recognise the ownership interest of the investors to allow them standing to take legal action against the Chinese entities in case disputes arise. This is a complex area of law and investors should seek independent professional advice.

The above may not cover all risks related to Stock Connect and any above mentioned laws, rules and regulations are subject to change.

Bond Connect

Where permitted, certain Sub-Funds may invest in China via Bond Connect. Bond Connect is a mutual bond market access link between Hong Kong and the PRC which facilitates investment in the China Interbank Bond Market ("CIBM") through mutual access and connection arrangements in respect of trading, custody and settlement between the related financial infrastructure institutions of Hong Kong and the PRC. Under the prevailing regulations in the PRC, eligible foreign investors who wish to invest through Bond Connect may do so via an offshore custody agent approved by the Hong Kong Monetary Authority ("Offshore Custody Agent"), who will be responsible for the account opening with the relevant onshore custody agent approved by the People's Bank of China ("PBOC"). As the account opening for investment in the CIBM market via Bond Connect has to be carried out via an Offshore Custody Agent, the relevant Sub-Fund is subject to the risks of default or errors on the part of the Offshore Custody Agent.

Securities invested by a Sub-Fund via Bond Connect will be held in accounts maintained by the Central Moneymarkets Units ("CMU") as central securities depository in Hong Kong and nominee holder. Because CMU is only a nominee holder and not the beneficial owner of the securities, in the unlikely event that CMU becomes subject to winding up proceedings in Hong Kong, investors should note that securities will not be regarded as part of the general assets of CMU available for distribution to creditors even under PRC law. However, CMU will not be obliged to take any legal action or enter into court proceedings to enforce any rights on behalf of investors in securities in the PRC. A failure or delay by the CMU in the performance of its obligations may result in a failure of settlement, or the loss, of securities and/or monies in connection with them and the relevant Sub-Funds and its investors may suffer losses as a result. Neither Sub-Funds nor the Management Company and /or the investment manager shall be responsible or liable for any such losses.

Trading in securities via Bond Connect may be subject to clearing and settlement risk. If the PRC clearing house defaults on its obligation to deliver securities / make payment, the Sub-Fund may suffer delays in recovering its losses or may not be able to fully recover its losses.

Investments through Bond Connect are not subject to any quota but the relevant authorities may suspend account opening or trading via Bond Connect, the relevant Sub-Fund's ability to invest in CIBM will be limited, and the relevant Sub-Fund may not be able to effectively pursue its investment strategy or it may have an adverse effect on the relevant Sub-Fund's performance as the relevant Sub-Fund may be required to dispose of its CIBM holdings.

CIBM Risk: the CIBM is an OTC market outside the two main stock exchanges in China. On the CIBM, institutional investors trade sovereign and corporate bonds on a one-to-one quote-driven basis. The CIBM accounts for more than 95% of outstanding bond values of total trading volume in China. The CIBM is regulated and supervised by the PBOC. Investors should be aware that China's bond market is still in development and trading on the CIBM exposes Sub-Funds to increased:

- *Liquidity risk*: the bid and offer spread of fixed income securities trading on the CIBM may be high. Sub-Funds may therefore incur significant trading costs and may even suffer losses when selling such investments. In the absence of a regular and active secondary market, the Sub-Funds may not be able to sell their bond holdings at prices the investment manager considers advantageous and may need to hold the bonds until their maturity date;
- *Settlement risk*: the transaction settlement method in the CIBM is for delivery versus payment of security by the counterparty. Where the counterparty does not perform its obligations under a transaction, the Sub-Funds will sustain losses.

CIBM Direct Access Risk: the CIBM Direct Access is the PRC investment program revised in 2016 under which certain foreign institutional investors such as the Company and its Sub-Funds may invest, without particular license or quota, directly in fixed income securities dealt on the CIBM via an onshore bond settlement agent (the “Bond Settlement Agent”), which will have the responsibility for making the relevant filings and account opening with the relevant PRC authorities in particular the PBOC.

Participation in the CIBM Direct Access by foreign institutional investors (such as the Company) is governed by rules and regulations as promulgated by the mainland Chinese authorities, i.e. the PBOC and State Administration of Foreign Exchange (“SAFE”). Such rules and regulations may be amended from time to time (with retrospective effect) and include (but are not limited to):

- the “Announcement (2016) No 3” issued by the PBOC on 24 February 2016;
- the “Implementation Rules for Filing by Foreign Institutional Investors for Investment in Interbank Bond Markets” issued by the Shanghai Head Office of PBOC on 27 May 2016;
- the “Circular concerning the Foreign Institutional Investors’ Investment in Interbank bond market in relation to foreign currency control” issued by SAFE on 27 May 2016; and
- any other applicable regulations promulgated by the relevant authorities.

The CIBM Direct Access rules and regulations are relatively new. The application and interpretation of such investment regulations are therefore relatively untested and there is no certainty as to how they will be applied as the PRC authorities and regulators have been given wide discretion in such investment regulations and there is no precedent or certainty as to how such discretion may be exercised now or in the future. In addition, there can be no assurance that the CIBM Direct Access rules and regulations will not be abolished in the future. Sub-Funds, which invest in the PRC markets through the CIBM Direct Access, may be adversely affected as a result of any such changes or abolition.

Investors should also be aware that the CIBM Direct Access also exposes them to the following risk:

- *Restrictions to remittances and repatriations risk*: foreign investors (such as the Company) may remit investment principal in renminbi (“RMB”) or foreign currency into the PRC for investing in the CIBM under the CIBM Direct Access. A Sub-Fund using the CIBM Direct Access will need to remit investment principal matching at least 50% of its anticipated investment size within nine (9) months after filing with the PBOC, or else an updated filing will need to be made through the onshore Bond Settlement Agent.

Where a Sub-Fund repatriates funds out of the PRC, the ratio of RMB to foreign currency (“Currency Ratio”) should generally match the original Currency Ratio when the investment principal was remitted into PRC, with a maximum permissible deviation of 10%. However, to the extent an outward repatriation is in the same currency as the inward remittance the Currency Ratio restriction will not apply.

Certain restrictions may be imposed by the PRC authorities on investors participating in the CIBM Direct Access and/or the Bond Settlement Agent which may have an adverse effect on a Sub-Fund’s liquidity and performance. Repatriations conducted in RMB are currently permitted daily and are not subject to repatriation restrictions (such as lock-up periods) or prior approval, although authenticity and compliance reviews will be conducted, and reports on remittances and repatriations will be submitted to the relevant PRC authorities by the Bond Settlement Agent. There is no assurance, however, that PRC rules and regulations will not change or that repatriation restrictions will not be imposed in the future. Furthermore, as the Bond Settlement Agent’s review on authenticity and compliance is conducted on each repatriation, the repatriation may be delayed or even rejected by the Bond Settlement Agent in case of non-compliance with the CIBM Direct Access rules and regulations. Any restrictions imposed in the future by the PRC authorities, or rejection or delay by the Bond Settlement Agent, on repatriation of the invested capital and net profits may impact on the Sub-Fund’s ability to meet redemption requests from the shareholders. It should be noted that the actual time required for the completion of the relevant repatriation will be beyond the control of the Management Company and the investment manager.

In order to participate in the CIBM Direct Access, the Management Company will file an application through the Bond Settlement Agent to the PBOC, specifying among other things the anticipated volume of investment to be made through the CIBM Direct Access for each Sub-Fund which may invest in China. In the event the anticipated volume of investment is reached, a further filing for an increase will need to be made through the Bond Settlement Agent with the PBOC. There can be no assurance that such increase will be accepted by the PBOC which may limit a Sub-Fund's exposure to securities dealt on the CIBM.

- *Securities and cash accounts:* onshore PRC securities are registered in the name of "the full name of the management company – the name of the Sub-Fund" in accordance with the relevant rules and regulations, and maintained by the Bond Settlement Agent in electronic form via a securities account with the China Central Depository & Clearing Co (CCDC)/Shanghai Clearing House (SCH) and onshore cash will be maintained on a cash account with the Bond Settlement Agent.

A separate filing per Sub-Fund wishing to invest through the CIBM Direct Access will be made to the PBOC to allow the individual beneficial ownership of a Sub-Fund to be identified. Beneficial ownership of RMB securities acquired through CIBM Direct Access has been acknowledged in the FAQ published by the PBOC on 30 May 2016. Beneficial ownership is however an untested concept in the PRC.

Investors should note that cash deposited in the cash account of the Sub-Fund with the Bond Settlement Agent will not be segregated but will be a debt owing from the Bond Settlement Agent to the Sub-Fund as a depositor. Such cash will be co-mingled with cash belonging to other clients of the Bond Settlement Agent. In the event of bankruptcy or liquidation of the Bond Settlement Agent, the Sub-Fund will not have any proprietary rights to the cash deposited in such cash account, and the Sub-Fund will become an unsecured creditor, ranking *pari passu* with all other unsecured creditors, of the Bond Settlement Agent. The Sub-Fund may face difficulty and/or encounter delays in recovering such debt, or may not be able to recover it in full or at all, in which case the Sub-Fund will suffer losses.

- *Bond Settlement Agent risk:* there is a risk that the Sub-Fund may suffer losses, whether direct or consequential, from: (i) the acts or omissions in the settlement of any transaction or in the transfer of funds or securities by the Bond Settlement Agent; or (ii) the default or bankruptcy of the Bond Settlement Agent; or (iii) the disqualification of the Bond Settlement Agent from acting in such capacity either on a temporary or permanent basis. Such acts, omissions, default or disqualification may also adversely affect a Sub-Fund in implementing its investment strategy or disrupt the operations of a Sub-Fund, including causing delays in the settlement of any transaction or the transfer of any funds or securities in the PRC or in recovering assets, which may in turn adversely impact the net asset value of a Sub-Fund.

In addition, the PBOC is vested with the power to impose regulatory sanctions if the Bond Settlement Agent violates any provision of the CIBM Direct Access rules. Such sanctions may adversely impact on the investment by the Company through the CIBM Direct Access.

Call Risk

A Sub-Fund that invests in fixed income securities may be subject to call risk. Call risk refers to the possibility that an issuer may exercise its right to redeem a fixed income security earlier than expected (a call). Issuers may call outstanding securities prior to their maturity for a number of reasons (e.g., declining interest rates, changes in credit spreads and improvements in the issuer's credit quality). If an issuer calls a security in which a Sub-Fund has invested, the Sub-Fund may not recoup the full amount of its initial investment and may be forced to reinvest in lower-yielding securities, securities with greater credit risks or securities with other, less favourable features.

Government Investment Restrictions

Government regulations and restrictions in certain countries, including countries in Asia and the Pacific region, Africa, Eastern Europe and Latin America, may limit the amount and types of securities that may be purchased by a Sub-Fund or the sale of such securities once purchased. Such restrictions may also affect the market price, liquidity and rights of securities that may be purchased by a Sub-Fund, and may increase Sub-Fund expenses. In addition, the repatriation of both investment income and capital is often subject to restrictions such as the need for certain governmental consents, and even where there is no outright restriction, the mechanics of repatriation may affect certain aspects of the operation of a Sub-Fund. In particular, a Sub-Fund's ability to invest in the securities markets of several of the Asian countries and other emerging countries is restricted or controlled to varying degrees by laws restricting foreign investment and these restrictions may, in certain circumstances, prohibit a Sub-Fund from making direct investments.

Use of Derivatives and other Investment Techniques

The Sub-Funds may employ techniques and instruments relating to Transferable Securities and other financial liquid assets for efficient portfolio management and hedging purposes i.e. to increase or decrease their exposure to changing security prices,

interest rates, currency exchange rates, commodity prices or other factors that affect security values. These techniques may include the use of options, forward currency exchange contracts, futures contracts, swaps and other derivatives (as set out in section "Investment Objectives and Policies", point A.), as well as other investment techniques described in Appendix II "Investment Techniques and Instruments".

Each of the Sub-Funds may seek to protect or enhance the returns from the underlying assets by using options, futures and swap contracts and by entering into forward foreign exchange transactions in currency. For some Sub-Funds, these techniques and instruments may even be used as a principle investment objective in which case this will be reflected in the investment policy of the relevant Sub-Fund. The ability to use these strategies may be limited by market conditions and regulatory limits and there can be no assurance that the objective sought to be attained from the use of these strategies will be achieved. Participation in the options or futures markets and in swap contracts and in currency exchange transactions involves investment risks and transaction costs to which the Sub-Funds would not be subject if the Company did not use these strategies. If the relevant Investment Manager's or the Management Company's predictions of movements in the direction of the securities, foreign currency and interest rate markets are inaccurate, the adverse consequences to a Sub-Fund may leave the Company in a worse position than if such strategies were not used.

Risks inherent in the use of options, foreign currency, swaps and futures contracts and options on futures contracts include, but are not limited to: (a) dependence on the relevant Investment Manager's or the Management Company's ability to predict correctly movements in the direction of interest rates, securities prices and currency markets; (b) imperfect correlation between the price of options and futures contracts and options thereon and movements in the prices of the securities or currencies being hedged; (c) the fact that skills needed to use these strategies are different from those needed to select portfolio securities; (d) the possible absence of a liquid secondary market for any particular instrument at any time; and (e) the possible inability of a Sub-Fund to purchase or sell a portfolio security at a time that otherwise would be favourable for it to do so, or the possible need for a Sub-Fund to sell a portfolio security at a disadvantageous time.

Where a Sub-Fund enters into swap transactions, it is exposed to a potential counterparty risk. In case of insolvency or default of the swap counterparty, such event would affect the assets of the Sub-Fund. To mitigate the counterparty risk, the Sub-Funds will only enter into these transactions with first class financial institutions specializing in this type of transactions on the basis of standardized documentation such as the International Swaps and Derivatives Association (ISDA) Master Agreement.

Please see Appendix II "Investment Techniques and Instruments" for more information.

Risks associated with securities financing transactions and collateral management

Investors may be exposed to legal risk (arising from the legal documentation, the application of agreements and the limits imposed by them) and to the risk associated with the reuse of securities received as collateral, given that the Net Asset Value of a Sub-Fund may vary depending on fluctuations in the value of the securities acquired through investment in cash received as collateral. In exceptional market conditions, investors may also be exposed to liquidity risk, making it difficult, for example, to trade certain securities.

Risk associated with commitments on forward financial instruments

Without seeking overexposure, a Sub-fund may invest up to 100% of its net assets in forward financial instruments (in particular futures, options, etc.), which may present a downside risk to its Net Asset Value.

Risks linked to the use of overexposure

In relation to the use of forward and conditional financial instruments (futures, options, etc.), maximum exposure to the different Classes of Shares may exceed 100% of the Net Asset Value of certain Sub-Funds in order to generate leverage. The risk therein relates to a fall in the Net Asset Value of the Sub-Fund if market developments are adverse. In the event of unfavourable changes in the strategies used, the Net Asset Value may fall more significantly than the markets to which the Sub-Fund is exposed. This leverage has the effect of amplifying expected gains, but also heightens the risk of losses.

Credit Default Swaps

Some Sub-Funds may also enter into Credit Default Swap transactions which can be subject to higher risk than direct investment in debt securities. The Sub-Funds may employ Credit Default Swaps for hedging or gain exposure and for efficient portfolio management purposes, i.e. to increase or decrease their exposure to changing security prices or other factors affecting security values.

The "buyer" (of protection) in a Credit Default Swap transaction is obliged to pay the "seller" a periodic stream of payments over the term of the contract provided that no event of default on an underlying reference obligation has occurred. If an event of default occurs, the seller must pay the buyer the full notional value, or "par value", of the reference obligation in exchange for the reference obligation, an equivalent deliverable obligation or the market value.

If no event of default or decrease of credit quality occurs with regard to the reference obligation, the Sub-Funds (if buyers) will lose their investment and recover nothing. However, if an event of default occurs, the Sub-Funds (if buyers) will receive the full notional value of the reference obligation that may have little or no value. In case of a rise in credit quality with regard to the reference obligation, the Sub-Funds (as buyers) may generate a loss in case of a close-out of the Credit Default Swap before expiry.

As sellers, the Sub-Funds receive a fixed rate of income throughout the term of the contract, provided that there is no event of default. If an event of default occurs, the Sub-Funds must pay the buyer the full notional value of the reference obligation and will receive only the defaulted reference obligation or the market value of the reference obligation. In case of a decline in credit quality with regard to the reference obligation, the Sub-Funds may generate a loss in case of a close-out of the Credit Default Swap before expiry.

In addition to the risk factors addressed in the preceding section "Use of Derivatives and other Investment Techniques", the market for Credit Derivatives may from time to time be less liquid than debt securities markets. The Sale of a Credit Derivative may increase the risk exposure of the Sub-Funds to the Market (Leverage).

Risks associated with Security Tokens

Prospective investors are urged to understand the technical implications of the Security Tokens classes before investing.

Loss of keys

The power of disposal over a security token arises through possession of the private key. If the owner of a private wallet loses this key, which cannot be recovered by the network, the associated security token can no longer be transferred and therefore lose their economic value. The private key for a wallet created by the UCI Administrator is hosted by the Registrar and Transfer Agent and subject to controls aiming at reducing the risk of erroneous or non-allowed transactions involving the Shares. Non-custodial wallets created by a third-party wallet provider (i.e. provided by the investor that manages directly the public and private key) may however also be allowed by the UCI Administrator. In such a case, the Shareholder will bear all the risks related to this wallet.

Theft of the private key

The private cryptographic keys (private keys) required to access security token can be spied on in a similar way to passwords using malware. By spying on private keys, an attacker also gains access to the investor's security tokens. The Registrar and Transfer Agent may not in all cases be able to retrieve the security tokens for the benefit of the affected investor.

Technological and Cybersecurity risk

Each blockchain used to record transactions in security tokens is based on a specific cryptographic procedure. These procedures or the implementation of these procedures may prove to be insufficiently secure in the future, meaning that there is a risk that the functionality of the blockchain may be impaired or completely destroyed, for example by cyber-attacks. There is also a risk that consensus mechanisms may fail or be attacked, preventing transactions from being recorded or validated. There may be unknown technical vulnerabilities within the Registrar and Transfer Agent's blockchain system or an underlying technology and cryptographic or other security mechanisms that authenticate previous blockchain transactions could be compromised or hacked. A security breach or failure of one blockchain could undermine investors' confidence in blockchain technology, resulting in reduced willingness to issue and invest in blockchain-based assets.

Regulatory risk

If governments or supervisory authorities change existing regulations, apply them differently or introduce new regulations, changes in the value of Security tokens are to be expected. Severe restrictions due to government regulation or changes to the regulatory classification within individual countries can lead to changes in the acceptance of security tokens. Even the announcement of new regulatory measures may impact the functioning, transferability or acceptance of security tokens. In addition, sanction regimes may affect consensus mechanisms (e.g. proof-of-stake validators located in sanctioned jurisdictions), adding complexity to compliance.

Software/program code errors

Like all software-based systems, security tokens and the DLT on which they rely are not safe from software errors. If such faults cannot be rectified by software corrections or cooperative behaviour on the part of the parties involved, there is a risk of losses because the blockchain as the software basis of the security tokens is no longer trusted, or total losses because the blockchain as a whole is no longer functional. Errors in the program code can give third parties unauthorized access to security tokens or render the entire blockchain worthless.

Custody risk

To protect against data loss or attacks, companies offer the secure storage of crypto assets and security tokens as a service. The providers of such wallets store them in accordance with very high security standards and implement corresponding security concepts. However, these also do not guarantee 100% security. There is a risk that the technologies used could also become the target of cyber or physical attacks. There is a risk that security tokens may be lost, devalued or rendered unusable due to a technical malfunction. In this case, there is a risk of total loss. Failure, negligence or insolvency of such service providers may further impact investors' ability to access their security tokens.

Wallet transfer errors

When transferring security tokens to your own wallets, there is a risk that the target addresses entered are incorrect, do not belong to your own wallet or that an incorrect wallet address is transmitted due to a hacker attack or computer virus.

Limited scope of wallets provided by the UCI Administrator

Investors which chose to have security tokens subscribed to be delivered into a wallet provided for by the UCI Administrator are advised that such wallet is only eligible to hold fund shares administered by the UCI Administrator. Any other token transferred to such wallet will be blocked. The unblocking of such other token may take considerable time and effort.

Privacy Risk

In case a public blockchain is used, the transaction history from the issuance or redemptions of security tokens (other than shareholder personal identifying information) will be publicly available through a block explorer. However, only the wallet address derived from the public key will be exposed to the public. The personal identifying information required to associate a public key representing a share with the owner of this share will be maintained in a separate database off-chain and will not be accessible to the public. However, in case of data security breach of this database stored off-chain, this information can be used to determine the investor's identity and the full transaction history in the fund will be exposed.

Investors holding their security tokens in a wallet may also be subject to cyber-crime risk performed by techniques specific to the blockchain like dusting when small fractions of assets are transferred to wallets in order to follow such wallet's transactions and ultimately disclose the wallet holder's identity. There is a risk of data privacy loss and if the investor's identity is known, such investor may be subject to further fraudulent attacks like phishing.

Risk associated with the wallet required for storing and transferring Security Tokens

Tokens must be securely stored in a wallet provided by the UCI Administrator or by the investor, if such wallet is approved (whitelisted) by the UCI Administrator. In the latter case, it is the responsibility of each investor to ensure: (i) compatibility of the wallet with the DLT used for maintaining the Sub-Fund's register, (ii) accuracy of information provided to the UCI Administrator regarding the wallet, (iii) compliance with the regulatory framework governing its use and the entity operating it, (iv) its security, and (v) secrecy of access methods enabling token transfers (especially the wallet's private key). Any factors affecting compatibility, accuracy, regulatory compliance, security, or confidentiality may impact the issuance, redemption, and transfer of the Sub-Fund's shares, potentially leading to partial or total loss of investment. Prospective investors are advised to comprehend the technical implications of the Sub-Fund's shares offered, considering their DLT registration, before investing.

Market Adoption

Tokenised share classes may not achieve broad market adoption or may remain limited in size or liquidity. In such circumstances, the Company may consider various options, including restructuring or winding down the relevant tokenised share classes or discontinuing the use of DLT and reverting to traditional share registration.

Additional operational and liability risks

Blockchain systems may experience delays, network congestion or operational overloads, which could prevent or delay the recording of transactions. In such cases, the Company may temporarily suspend or revert to alternative record-keeping methods (e.g. book-entry form) until operations are restored. Failures, malfunctions or market events affecting DLT systems may expose the Company to civil liability, regulatory scrutiny or increased operational costs, and may affect the Company's ability to conduct its operations efficiently. Finally, there is a risk that blockchain-based issuance may not reach the same level of scalability or acceptance as traditional dematerialised securities.

Comparison of risks between tokenised and non-tokenised Shares

Security Tokens issued by the Company do not bear materially greater risks than non-tokenised registered Shares. The specific risks known and applicable to Security Tokens, as described in the risk factors above, are residual in nature and are mitigated as follows:

(i) Risk of unintentional transfer: a Security Token could in principle be transferred to an unintended wallet. This risk is materially mitigated by the whitelisting mechanism implemented by the UCI Administrator, in addition to off-chain AML-KYC existing procedures, pursuant to which transfers are only permitted to wallets that have been approved and whitelisted by the UCI Administrator prior to the transfer. Even in case of whitelisted wallets, a transfer between the wallets could not be initiated without the UCI Administrator's involvement, which will ensure that the transfer may occur according to the prospectus and operational procedures.

(ii) Risk related to non-custodial wallets: where an investor holds Security Tokens in a non-custodial wallet for which it manages its own private keys, loss or theft of those keys could prevent the investor from initiating transfers on the DLT. However, the UCI Administrator maintains a centralised mirror register of all Security Token holdings, which constitutes the authoritative record of ownership independently of the state of the DLT. Provided the investor is able to establish its identity to the UCI Administrator's satisfaction by reference to the centralised register, the UCI Administrator is able to proceed with a burn of the affected tokens and a remint to a new approved wallet. Where the investor holds Security Tokens in a wallet created by the UCI Administrator (custodial wallet), the UCI Administrator holds the relevant private keys and retains the ability to recover Security Tokens upon verified identification of the investor.

In both cases, the centralised register maintained by the UCI Administrator prevails over the DLT record and serves as the definitive record of ownership for the purposes of the above recovery mechanism.

Operational Risk

An investment in a Sub-Fund can involve operational risks arising from factors such as processing errors, human errors, inadequate or failed internal or external processes, failure in systems and technology, changes in personnel and errors caused by third-party service providers. The occurrence of any of these failures, errors or breaches could result in a loss of information, business or regulatory scrutiny, or other events, any of which could have a material adverse effect on a Sub-Fund. While the Sub-Funds seek to minimize such events through controls and oversight, there may still be failures that could cause losses to a Sub-Fund.

Cyber Security Risk

The Company, the Management Company and their service providers (including the Investment Manager(s), the Depositary and UCI Administrator and the distributors ("Affected Persons") may be susceptible to operational and information security and related risks of cyber security incidents. In general, cyber incidents can result from deliberate attacks or unintentional events. Cyber security attacks include, but are not limited to, gaining unauthorised access to digital systems (e.g., through "hacking" or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data or causing operational disruption. Cyber attacks also may be carried out in a manner that does not require gaining unauthorised access, such as causing denial-of-service attacks on websites (i.e., efforts to make services unavailable to intended users). Cyber security incidents affecting the Affected Persons have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, including by interference with a fund's ability to calculate its NAV; impediments to trading for a Sub-Fund's portfolio; the inability of Shareholders to transact business with the Company; violations of applicable privacy, data security or other laws; regulatory fines and penalties; reputational damage; reimbursement or other compensation or remediation costs; legal fees; or additional compliance costs. Similar adverse consequences could result from cyber security incidents affecting issuers of securities in which a Sub-Fund invests, counterparties with which a Sub-Fund engages in transactions, governmental and other regulatory authorities, exchange and other financial market operators, banks, brokers, dealers, insurance companies and other financial institutions and other parties. While information risk management systems and business continuity plans have been developed which are designed to reduce the risks associated with cyber security, there are inherent limitations in any cyber security risk management systems or business continuity plans, including the possibility that certain risks have not been identified.

Legal risk

The Company may be subject to a number of unusual risks, including inadequate investor protection, contradictory legislation, incomplete, unclear and changing laws, ignorance or breaches of regulations on the part of other market participants, lack of established or effective avenues for legal redress, lack of standard practices and confidentiality customs characteristic of developed markets and lack of enforcement of existing regulations. There can be no assurance that this difficulty in protecting and enforcing rights will not have a material adverse effect on the Company and its operations.

Specifically, investors should note that, in compliance with the relevant provisions of the UCITS Directive governing the provision of services on a cross-border basis by authorised management companies, the Company is managed by a management company authorised under French law and regulated by the AMF whereas the Company is authorised under the 2010 Law and regulated by the Regulatory Authority. In general terms, as further detailed in the UCITS Directive, French law governs matters relating to the organisation of the Management Company whereas the 2010 Law governs matters relating to the constitution and functioning of the Company. However, specific situations may occur where it may be unclear whether French law or Luxembourg law applies to, and/or whether the AMF or the Regulatory Authority has jurisdiction over, the activities of the Management Company and the Company, thereby leading to legal uncertainty.

Custody Risk

The Company's securities are generally held for the benefit of the Company's shareholders on the depositary's balance sheet. Nevertheless, investors should note that, they are exposed to the risk of the depositary not being able to fully meet its obligations to restate in a short timeframe all of the assets of the Company or the relevant Sub-Fund in case of insolvency or bankruptcy of the depositary. Securities and debt obligations (including loan participations) held by the depositary will be segregated from other assets of the depositary which mitigates but does not exclude the risk of non-restitution in case of bankruptcy or insolvency. However, no such segregation applies to cash which increases the risk of non-restitution in case of bankruptcy or insolvency.

The depositary does not keep all the assets of the Company itself but uses a network of sub-depositaries which are not part of the same group of companies as the depositary. Investors are also exposed to the risk of bankruptcy or insolvency of the sub-depositaries. The Company may invest in markets where custodial and/or settlement systems are not fully developed.

Sustainability risk

Pursuant to the SFDR, the Sub-Funds are required to disclose the manner in which sustainability risks are integrated into the investment decisions and the results of the assessment of the likely impacts of sustainability risks on the returns of the Sub-Funds.

The sustainability risk refers to an environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of the investments made by the relevant Sub-Fund.

Environmental:

- sector risks associated with the environmental footprint of the business;
- physical and transition risks associated with climate change;
- materiality of environmental controversies and management of related conflicts of interest;
- dependency of the business on natural capital; and
- risks associated to the business' activities, products and services which may impact on the environment.

Social:

- sector risks associated with health and safety
- environmental and social risks in the supply chain;
- management of the social climate and development of human capital;
- management of quality and risks associated with consumers' safety;
- management and materiality of social/society-related controversies; and
- management of the innovation capabilities and intangible assets.

Governance:

- quality and transparency of the financial and non-financial communication;
- sector risks associated with bribery and cybersecurity;
- quality of the supervisory corporate bodies;
- quality and sustainability of the corporate governance framework;
- management of corporate-governance related conflicts of interest;
- regulatory risks; and
- integration into and management of sustainability within the business' strategy.

Quantitative Model Risk

In respect of Sub-Funds using a quantitative model, there can be no assurance that the use of such quantitative model will result in the Sub-Fund achieving its investment objective. The Investment Manager will apply the model to in-scope US equities to construct the portfolio and to manage the overall portfolio risk. The final selection of companies for inclusion in the portfolio will depend on a variety of factors, such as the quality and accuracy of data inputs and the successful integration of the quantitative models.

Any errors or limitations in the systematic quantitative models may result in different outcomes to those anticipated by the Investment Manager. Such models that have been formulated on the basis of past market data may not be predictive of future price movements and may not be reliable if unusual or disruptive events cause market moves, the nature or size of which are inconsistent with the historic performance of individual markets.

The use of the quantitative model techniques also presents the risk that errors may go undetected for a long period of time. Such errors might never be detected or might be detected only after the Sub-Fund has sustained a loss (or reduced performance). Quantitative investment techniques also require timely and efficient execution of transactions as failure to do so may result in lost profits for the Sub-Fund.

Errors, non-compliance and corrective actions

Net Asset Value calculation error, non-compliance with the investment rules and other errors at the level of the Company and/or a particular Sub-Fund pursuant to circular CSSF 24/856 on the Protection of investors in case of an NAV calculation error, an instance of non-compliance with the investment rules and other errors at UCI level, as it may be amended from time to time (the "Circular CSSF 24/856") may occur due to various reasons, including but not limited to human error, system failures, incorrect data inputs, misinterpretation of valuation rules or investment guidelines, or operational failures.

Such an error or non-compliance shall be addressed in accordance with the principles set out in Circular CSSF 24/856.

For those of the Investors who acquire their shares through a financial intermediary, attention is drawn to the fact that where an error or non-compliance occurs at the level of the Company and/or a particular Sub-Fund, they may be affected when a compensation is paid out as a result of such error or non-compliance. In order to mitigate this risk, the Company has taken the relevant steps to ensure that all necessary information related to the error/non-compliance (for instance, the error period with the start date and end date, the erroneous Net Asset Value and the corrected Net Asset Value per day during the error period, the list of subscription and redemption per day during the error period, the impact per day during the error period) is provided

to the financial intermediaries acting on behalf of the Investors, in order for these financial intermediaries to take on their responsibility and proceed to the necessary compensation towards these Investors.

MANAGEMENT COMPANY

The Company has appointed ODDO BHF Asset Management SAS to serve as its designated management company in accordance with the 2010 Law pursuant to a management company agreement effective as of 1 February 2016 (the "Management Company Agreement").

ODDO BHF Asset Management SAS was incorporated on 14 April 1987 as a public limited liability company (*société anonyme*) for an unlimited period of time under the laws of France under the name of ODDO Asset Management S.A. Its Articles have been amended for the last time on 23 March 2017 and were published in the "Registre du commerce et des sociétés". The share capital amounts to Euro 9 500 000. It is registered, as a management company, on the official register of the "Autorité des marchés financiers" under n°GP99011.

Under this Management Company Agreement, the Management Company provides investment management, administrative and marketing services to the Company, subject to the overall supervision and control of the Board of Directors. The Management Company Agreement provides for a term of unlimited duration and may be terminated by either party upon three months' prior written notice. For its services, the Company will pay quarterly compensation to the Management Company as set forth in the section "Fees and Expenses".

In fulfilling its responsibilities set forth by the 2010 Law and the Management Company Agreement, the Management Company is permitted to delegate all or a part of its functions and duties to third parties, provided that it retains responsibility and oversight over such delegates. The appointment of third parties is subject to the approval of the Company and the Regulatory Authority. The Management Company's liability shall not be affected by the fact that it has delegated its functions and duties to third parties.

The Management Company is in charge of the day-to-day operations of the Company. It has delegated the following functions to third parties: investment management, central administration as well as marketing and distribution. For a detailed description of the delegation of the aforementioned functions to third parties, see sections "Investment Managers", "UCI Administrator" and "Distributors".

The Management Company shall at all times act in the best interests of the Shareholders and according to the provisions set forth by the 2010 Law, the Prospectus and the Articles. In compliance with the relevant articles of the 2010 Law, the Management Company shall meet the requirements imposed by French laws as regards its organization, the delegation requirements, risk management procedures, prudential and supervision rules, rules of conduct applicable to it for the portfolio management of UCITS and the reporting requirements. The Management Company shall further comply with the Luxembourg rules as regards the constitution and functioning of the Company.

The governing body of the Management Company is responsible for drawing up, approving and supervising the remuneration policy. It must ensure in particular that the remuneration policy encourages the alignment of risks taken by its employees with those of the funds managed by the Management Company, those of investors in these funds and those of the Management Company itself. The remuneration policy established by the governing body meets the requirements stemming from the European directive 2014/91/EU dated 23 July 2014 (as implemented in French law). This policy is consistent with and promotes sound and effective risk management and does not encourage risk taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the investment funds that the Management Company manages. The remuneration policy is in line with the business strategy, objectives, values and interests of the Management Company and the investment funds that it manages and of the investors in such investment funds and includes measures to avoid conflicts of interest. Where remuneration is performance-related, the assessment of performance is set in a multi-year framework appropriate to the holding period recommended to the investors of the UCITS managed by the Management Company in order to ensure that the assessment process is based on the longer-term performance of the UCITS and its investment risks and that the actual payment of performance-based components of remuneration is spread over the same period. Fixed and variable components of total remuneration are appropriately balanced and the fixed remuneration component represents a sufficiently high proportion of the total remuneration to allow the operation of a fully flexible policy on variable components, including the possibility to pay no variable remuneration component. The Management Company determines each year the persons classified as risk takers pursuant to applicable French law. The list of employees classified as risk takers is submitted to the remuneration committee and to the governing body of the Management Company. Regarding the payment of the variable remuneration, the Management Company has set a threshold for triggering the deferred payment of a portion of variable remuneration. Thus, an employee whose variable remuneration exceeds the aforementioned threshold will mandatorily receive a portion of this variable remuneration in a deferred manner. Deferred remuneration will amount to 40% of the entire variable remuneration, from the first euro, without any additional threshold or excess. Provisions relating to the deferred part of

variable remuneration shall be calculated in a tool created by the Management Company. This tool consists of a basket comprising the flagship funds of each of the Management Company's management strategies, and the breakdown between each of these funds is made pro rata assets under management by the Management Company within each of the strategies. Further information on the up-to-date remuneration policy, including, without limitation, a description of the calculation method applied to remunerations and advantages, the identity of persons responsible for awarding the remuneration and benefits, including the composition of the remuneration committee, is available on the internet website of the Management Company (<http://am.oddo-bhf.com/France/EN/Pages/InformationsReglementaires.aspx>) and also made available free of charge in written form upon request of the investor to the Management Company.

INVESTMENT MANAGERS

In order to implement the investment policies of certain of the Sub-Funds, the Management Company has delegated the management of the assets of certain Sub-Funds to the Investment Manager(s) listed below pursuant to a sub-investment management agreement with each Investment Manager.

The Management Company has appointed the following investment management companies to provide investment management services to the Management Company with regard to investments and investment strategies for certain Sub-Funds of the Company:

- ODDO BHF Asset Management GmbH, Düsseldorf.
- Wellington Management International Limited, London.

- ODDO BHF Asset Management GmbH and Wellington Management International Limited are referred to hereinafter as "Investment Managers".

Subject to an express delegation given by the Management Company pursuant to the above agreements, the Investment Managers have discretion, on a day-to-day basis and subject to the overall control and responsibility of the Management Company to purchase and sell securities and otherwise to manage the portfolios of certain Sub-Funds.

ODDO BHF Asset Management GmbH shall be in charge of the management of the following Sub-Funds: ODDO BHF Sustainable Euro Corporate Bond, ODDO BHF Euro High Yield Bond, ODDO BHF Euro Credit Short Duration, ODDO BHF Credit Opportunities, ODDO BHF US Equity Trend, ODDO BHF Global Credit Short Duration, ODDO BHF Global High Yield Bond, ODDO BHF Global Target 2031, ODDO BHF Global Target IG 2031, and ODDO BHF Laufzeitfonds 2032.

ODDO BHF Asset Management GmbH has in turn designated ODDO BHF Asset Management SAS to act as financial investment consultant of ODDO BHF Credit Opportunities for the bond segments.

ODDO BHF Asset Management GmbH is a company created on 19 January 1970 under the laws of the Federal Republic of Germany. Its registered office is at Herzogstrasse 15, 40217 Düsseldorf, Germany.

Wellington Management International Limited shall be in charge of the management of ODDO BHF Convertibles Global.

Wellington Management International Limited is a company created on 7 September 2001 under the laws of the United Kingdom. Its registered office is Cardinal Place, 80 Victoria Street London, SW1E 5JL, United Kingdom.

While the Management Company is at all times subject to the direction of the Board of Directors, the management agreement and the relevant sub-investment management agreements provide that the Management Company or the Investment Managers appointed by it are responsible for the management of the Sub-Funds. Therefore, the responsibility for making decisions to buy, sell or hold a particular security, rests with the Management Company or the Investment Managers appointed by it, subject to the control, supervision, direction and instruction of the Board of Directors.

DEPOSITARY

CACEIS Bank, Luxembourg Branch, established at 5, allée Scheffer, L-2520 Luxembourg and registered with the Luxembourg Register of Commerce and Companies under number B 209.310, is acting as Depositary of the Company in accordance with a depositary agreement dated 2 November 2016 as amended from time to time (the "Depositary Agreement") and the relevant provisions of the 2010 Law and all regulations regarding UCITS (the "UCITS Rules").

CACEIS Bank, Luxembourg Branch is acting as a branch of CACEIS Bank, a public limited liability company (*société anonyme*) incorporated under the laws of France, having its registered office located at 1-3, place Valhubert, 75013 Paris, France, registered with the French Register of Trade and Companies under number 692 024 722 RCS Paris.

CACEIS Bank is an authorised credit institution supervised by the European Central Bank (“ECB”) and the Autorité de contrôle prudentiel et de résolution (“ACPR”). It is further authorised to exercise through its Luxembourg branch banking and central administration activities in Luxembourg.

Investors may consult upon request at the registered office of the Company, the Depositary Agreement to have a better understanding and knowledge of the limited duties and liabilities of the Depositary.

The Depositary has been entrusted with the custody and/or, as the case may be, recordkeeping and ownership verification of the Company's assets, and it shall fulfil the obligations and duties provided for by Part I of the 2010 Law and UCITS Rules. In particular, the Depositary shall ensure an effective and proper monitoring of the Company' cash flows.

In due compliance with the UCITS Rules, the Depositary shall:

- i. ensure that the sale, issue, re-purchase, redemption and cancellation of shares of the Company are carried out in accordance with the applicable national law and the UCITS Rules or the Articles;
- ii. ensure that the value of the shares is calculated in accordance with UCITS Rules and the Articles and the procedures laid down in the UCITS Directive;
- iii. carry out the instructions of the Company or the Management Company, unless they conflict with the UCITS Rules, or the Articles;
- iv. ensure that in transactions involving the Company's assets any consideration is remitted to the Company within the usual time limits; and
- v. ensure that the Company's income is allocated in accordance with the UCITS Rules and the Articles.

The Depositary may not delegate any of the obligations and duties set out in (i) to (v) of this clause.

In compliance with the provisions of the UCITS Directive, the Depositary may, under certain conditions, entrust part or all of the assets which are placed under its custody and/or recordkeeping to correspondents or third party custodians as appointed from time to time. The Depositary's liability shall not be affected by any such delegation, unless otherwise specified, but only within the limits as permitted by the 2010 Law.

A list of these correspondents /third party custodians are available on the website of the Depositary (www.caceis.com section “veille réglementaire”). Such list may be updated from time to time. A complete list of all correspondents/third party custodians may be obtained, free of charge and upon request, from the Depositary. Up-to-date information regarding the identity of the Depositary, the description of its duties and of conflicts of interest that may arise, the safekeeping functions delegated by the Depositary and any conflicts of interest that may arise from such a delegation are also made available to investors on the website of the Depositary, as mentioned above, and upon request. There are many situations in which a conflict of interest may arise, notably when the Depositary delegates its safekeeping functions or when the Depositary also performs other tasks on behalf of the Company, such as administrative agency, registrar agency and client communication agency services. These situations and the conflicts of interest thereto related have been identified by the Depositary.

The Company and the Depositary may terminate the Depositary Agreement at any time by giving ninety (90) days' notice in writing. The Company may, however, dismiss the Depositary only if a new depositary bank is appointed within two months to take over the functions and responsibilities of the Depositary. After its dismissal, the Depositary must continue to carry out its functions and responsibilities until such time as the entire assets of the Company have been transferred to the new depositary bank.

Conflicts of Interest

In order to protect the Company's and its Shareholders' interests and comply with applicable regulations, a policy and procedures designed to prevent situations of conflicts of interest and monitor them when they arise have been set in place within the Depositary, aiming namely at:

- a. identifying and analysing potential situations of conflicts of interest;
- b. recording, managing and monitoring the conflict of interest situations either in:
 - relying on the permanent measures in place to address conflicts of interest such as maintaining separate legal entities, segregation of duties, separation of reporting lines, insider lists for staff members; or

- implementing a case-by-case management to (i) take the appropriate preventive measures such as drawing up a new watch list, implementing a new Chinese wall, making sure that operations are carried out at arm's length and/or informing the concerned Shareholders of the Company, or (ii) refuse to carry out the activity giving rise to the conflict of interest.

The Depositary has established a functional, hierarchical and/or contractual separation between the performance of its UCITS depositary functions and the performance of other tasks on behalf of the Company, notably, administrative agency, registrar agency and client communication agency services.

The Depositary has no decision-making discretion or any advice duty relating to the Company's investments. The Depositary is a service provider to the Company and is not responsible for the preparation of this Prospectus and therefore accepts no responsibility for the accuracy of any information contained in this Prospectus or the validity of the structure and investments of the Company.

UCI ADMINISTRATOR

Caceis Bank, Luxembourg Branch (hereafter also referred to as "Caceis") has been designated by the Management Company to provide under the terms of the central administration agreement effective as of 2 November 2016, UCI administrative services in respect of Company, including general administration as well as bookkeeping and maintenance of all accounts of the Company, the periodic determination of the Net Asset Value, the preparation and filing of the Company's financial reports and the liaison with the Auditors as well as the performance of the client communication function.

Investors' attention is drawn to the fact that the Shares may with the consent of the Shareholder be issued on DLT. In such case, from a technical standpoint, the Shares are issued as Security Tokens. The DLT used for the shareholder register is currently Polygon Pos. The list of DLT supported for tokenised shares may be expanded at the discretion of the Management Company and the UCI Administrator.

Caceis has also undertaken to provide the Company under the terms of the central administration agreement, effective as of 2 November 2016 with registrar and transfer agency and client communication agency services. As such, Caceis will be responsible for handling the processing of subscriptions for Shares, dealing with requests for redemption and conversion and accepting transfers of funds, for the payment of distributions, if any, for the payment of the redemption price by the Company, for the safe keeping of the Register of Shareholders of the Company, redemption or conversion and providing and supervising the mailing of statements, reports, notices and other documents to the Shareholders.

CACEIS Bank, Luxembourg Branch, established at 5, allée Scheffer, L-2520 Luxembourg and registered with the Luxembourg Register of Commerce and Companies under number B 209.310, is acting as a branch of CACEIS Bank, a public limited liability company (*société anonyme*) incorporated under the laws of France, having its registered office located at 1-3, place Valhubert, 75013 Paris, France, registered with the French Register of Trade and Companies under number 692 024 722 RCS Paris.

DISTRIBUTORS

The Management Company has delegated the distribution and marketing services to ODDO BHF SCA and also enters into arrangements with other distributors, to market and place each of the Sub-Fund's Shares in various countries throughout the world except the United States, its territories or possessions, or other areas subject to its jurisdiction (subject to certain exceptions) and where prohibited.

The distributors may conclude contractual arrangements with dealers as their agents (individually referred to as a "sub-distributor" and collectively referred to as the "sub-distributors") for the distribution of Shares of any of the Sub-Funds outside the United States of America (its territories or possessions, or other areas subject to its jurisdiction) and any other jurisdiction that may require other distribution arrangements.

The distributors and the sub-distributors may be involved in the collection of subscription and redemption orders on behalf of the Company and any of the Sub-Funds and may, in that case, provide a nominee service for investors purchasing Shares through them. Investors may elect to make use of such nominee service pursuant to which the nominee will hold the Shares in its name for and on behalf of the investors who shall be entitled at any time to claim direct title to the Shares and who, in order to empower the nominee to vote at any general meeting of Shareholders, shall provide the nominee with specific or general voting instructions to that effect.

The distributors and the sub-distributors shall, to the extent required by the UCI Administrator Agent in Luxembourg, forward application forms, and shall furthermore forward cheques (made payable to the Company) or wire monies in respect of

applications for Shares, to the Transfer Agent, acting on behalf of the Company, and will then be paid the sales charge in respect to Shares issued pursuant thereto.

LUXEMBOURG ANTI-MONEY LAUNDERING REGULATIONS

The Company, the Management Company, the distributors, any sub-distributors and the UCI Administrator as appropriate, will at all times comply with any obligations imposed by any applicable laws, rules and regulations with respect to money laundering and, in particular, with the Luxembourg law dated 27 October 2010 against money laundering and terrorism financing, as amended, as well as with the Regulatory Authority's circulars or regulations in such connection and will furthermore adopt procedures designed to ensure, to the extent applicable, that they shall comply with the foregoing undertaking.

To that end, the Company, the Management Company, the distributors, sub-distributors and the UCI Administrator may request information necessary to establish the identity of a potential investor and the origin of subscription proceeds. Failure to provide documentation may result in a delay or rejection by the Company of any subscription or exchange or a delay in payout of redemption of Shares by such investor. For the avoidance of doubt, the same process applies in the context of the Security Tokens.

In the context of Security Tokens, AML/CFT checks may also include the verification of the wallet used to hold or transfer such Security Tokens. Only wallets which have successfully passed the applicable technical and AML/CFT assessments conducted by the UCI Administrator (the "whitelisted wallets") may be used for the issuance, transfer or redemption of Security Tokens.

THE SHARES

The Company may issue Shares in each Class of the separate Sub-Funds.

The Company offers separate Classes, grouped into several categories of Shares. Classes with the letter "C" (with the exception of "GC" Classes of Shares", which may be accumulation Shares or distribution Shares) and "X" in their denomination are Classes of Shares that capitalise their income, whereas Classes of Shares with the letter "D" in their denomination are Classes of Shares that pay-out periodic dividends on an annual basis, or more frequently if the Board of Directors decides to do so.

Classes of Shares with the letter "R" in their denomination may be acquired by any type of investors (i.e. retail and Institutional Investors").

As from December 11th, 2017, Classes of Shares with the letter "I" in their denomination may be acquired by eligible counterparties and professional investors within the meaning of Directive 2014/65/EU of the European Parliament and of the Council of 15 May 2014 on markets in financial instruments, amended by Directive (EU) 2016/1034 of 23 June 2016 only⁴.

GC Classes of Shares are reserved to (i) insurance companies, approved by the Management Company, to represent unit-linked products subscribed as part of "advisory management" contracts in their range and for (ii) ODDO BHF SCA's clients having signed an advisory agreement with an ODDO BHF SCA financial investment advisory partner. GC Shares may be accumulation Shares or distribution Shares.

Classes of Shares with the letter "N" in their denomination are available solely at the discretion of the Management Company and will not pay any distribution fees or rebates.

As from December 11th, 2017, Classes of Shares with the letter "N" in their denomination are reserved to (i) investors subscribing via an intermediary providing the service of investment advice on an independent basis pursuant to the European Directive 2014/65/EU (so-called "MIFID II Directive"), (ii) investors subscribing via a financial intermediary on the basis of a fee agreement concluded between the investor and the intermediary and mentioning that the intermediary is exclusively paid by the investor, (iii) companies providing the service of portfolio management pursuant to the MIFID II Directive, (iv) UCIs managed by the ODDO BHF Group entities, and (v) ODDO BHF SCA when providing the service of investment advice on the basis of a written fee agreement concluded with its client⁵.

⁴ Prior to December 11th, 2017, Classes of Shares with the letter "I" in their denomination may be acquired by Institutional Investors only. Investments made before December 11th, 2017 are not subject to the new eligibility criteria but remain subject to the previous eligibility criteria. Additional and new investments made as from December 11th, 2017 by existing investors not meeting the new eligibility criteria will no longer be accepted.

⁵ Prior to December 11th, 2017, Classes of Shares with the letter "N" in their denomination are reserved to i) Italian Institutional Investors and Swiss investors, (ii) retail investors if they invest via a distributor, financial adviser, platform or other intermediary on the basis of a specific agreement or commission agreement concluded between the investor and the intermediary and (iii)

Classes of Shares with the letter "P" in their denomination may be offered to Institutional Investors only who have made a prior arrangement with the Management Company. Classes of Shares with the letter "X" in their denomination may be offered to Institutional Investors only subject to the prior conclusion of a special individual agreement between the Shareholder and the Management Company. The Management Company may, at its own discretion, decide whether to approve the issue of "X" Shares, whether it is prepared to make the necessary arrangement or to conclude a special individual agreement and how any special individual agreement is to be structured. Notwithstanding the above, and the Class of Shares with the letter "X" in its denomination offered in the ODDO BHF Sustainable Euro Corporate Bond and in the Euro High Yield Bond Sub-Funds shall be dedicated to S-Bank.

Classes of Shares with the letter "F" in their denomination may be offered to all investors. The Company will cease to issue an "F" Class of Shares after the cut off time of the day on which the assets under management of such relevant Class of Shares reach EUR 100 million for the first time or, in any case, 6 months after the launch the relevant Class of Shares.

Classes of Shares with the letters "oN", together or separately, in their denomination may be offered only to clients of the private banking division of ODDO BHF SE or ODDO BHF (Schweiz) AG benefiting from portfolio management or investment advisory services provided by a company of the ODDO BHF Group.

Classes of Shares with the letter "S" in their denomination may be acquired by any type of investors (i.e. retail and Institutional Investors) solely at the discretion of the Management Company.

Shares may be denominated in different currencies. The term "EUR" refers to the single currency of the EU Member States that belong to the Economic and Monetary Union, the Euro. The term "USD" refers to the currency of the United States of America, the U.S. dollar. The term "CHF" refers to the currency of Switzerland, the Swiss franc. The term "GBP" refers to the currency of the United Kingdom, the British pound. The term "SEK" refers to the currency of Sweden, the Swedish crown.

Classes of Shares followed by [H] are hedged against the Reference Currency of the respective Sub-Fund (subject to any specific rule provided for a particular Sub-Fund) or when the hedged Class of Shares is denominated in the same Reference Currency than the Sub-Fund, the Company will hedge these Class of Shares against the currency risk arising from assets that are not denominated in the Reference Currency of the Sub-Fund. The characteristics of the hedged Classes of Shares remain unchanged with the exception that the costs in relation to the hedging shall be borne by such Classes. The Net Asset Value of all the Classes of Shares of a Sub-Fund may be affected by such hedging transaction.

Classes of Shares with the letter "w" in their denomination are Classes of Shares without performance fees.

The net proceeds from the subscriptions are invested in the specific portfolio of assets constituting the relevant Sub-Fund.

The Board of Directors shall maintain for each Sub-Fund a separate portfolio of assets. As between Shareholders, each portfolio of assets shall be invested for the exclusive benefit of the relevant Sub-Fund.

The Board of Directors shall ensure that the assets attributable to a Sub-Fund will remain segregated from those of any other Sub-Fund and that any party contracting or transacting with the Company on behalf of a Sub-Fund agrees that each Sub-Fund is to be treated as if it were a separate legal entity and, accordingly, that any such party shall have no rights against the Company as a whole or any other Sub-Fund other than the relevant Sub-Fund.

Shares in any Sub-Fund shall be issued in registered form or uncertified bearer shares and/or global certificate held in custody by a clearing and settlement system. Registered and bearer shares may be provided, inter alia, through Clearstream Banking Euroclear, Fund Settle, Vestima and/or other centralised management systems. Shareholders should note that Euroclear will only accept delivery for whole Shares.

The inscription of the Shareholder's name in the Register of Shares evidences his or her right of ownership of such registered Shares, including, where applicable, by entry into a blockchain based Register Distributed Ledger Technologies (DLT)/ (DEEP, Dispositif Electronique d'Enregistrement Partagé), or any other blockchain based Register established in compliance with the legal framework applicable to it) kept by the UCI Administrator or another registrar authorized by the Company.

Please also see Section 5 "Form of Shares" for a more detailed description.

UCIs and mandates managed by the Management Company. Investments made before December 11th, 2017 are not subject to the new eligibility criteria but remain subject to the previous eligibility criteria. Additional and new investments made as from December 11th, 2017 by existing investors not meeting the new eligibility criteria will no longer be accepted.

The Company draws the investors' attention to the fact that any investor will only be able to fully exercise his investor rights directly against the Company, notably the right to participate in general Shareholders' meetings if the investor is registered himself and in his own name in the Shareholders' Register. In cases where an investor invests in the Company through an intermediary investing into the Company in his own name but on behalf of the investor, it may not always be possible for the investor to exercise certain Shareholder's rights directly against the Company. Investors are advised to take advice on their rights.

Unless a Share certificate is required, a holder of registered Shares shall only receive a written confirmation of his or her shareholding. The Board of Directors recommends that investors hold non-certificated Shares as these have the advantage that conversion and redemption instructions will be effected without the requirement to surrender a certificate.

All Shares must be fully paid-up; they are of no par value and carry no preferential or preemptive rights. Each Share of the Company to whatever Sub-Fund it belongs is entitled to one vote at any general meeting of Shareholders, in compliance with Luxembourg law and the Articles.

Fractional registered Shares may be issued to up to one thousand of a Share, and such fractional Shares shall not be entitled to vote but shall be entitled to a participation in the net results and in the proceeds of liquidation attributable to the relevant Class of Shares in the relevant Sub-Fund on a pro rata basis.

ISSUE AND SALE OF SHARES

Shares are made available through the distributors or the sub-distributors. Subscriptions for Shares may also be sent directly to the Company in Luxembourg.

After the initial offer period (if any), the offering price per Share of each Class in the relevant Sub-Fund (the "Offer Price") is the total of (i) the Net Asset Value per Share of such Class plus (ii) the sales charge, if any, as stated below. The Offer Price is available for inspection at the registered office of the Company.

Shares of each Sub-Fund may be issued by the Company on any Valuation Day as defined in Appendix III hereinafter.

Investors will be allotted Shares of the relevant Class within the relevant Sub-Fund as determined as of the relevant Valuation Day (as defined in Appendix III hereinafter) following receipt of the application form provided that such application is received at the registered office of the Transfer Agent on behalf of the Company from the subscriber or any intermediary before the cut-off time of the relevant Sub-Fund. Applications received after that time will be processed on the next Valuation Day, considering subscriptions are dealt with an unknown Net Asset Value.

Subscription and redemption requests are centralised by the Transfer Agent every Valuation Day until 12:00 p.m. (noon), Luxembourg time (or such other time as specified for a particular Sub-Fund) and are executed on the basis of the Net Asset Value of the same day. Applications for subscriptions of Shares cannot be cancelled after 12.00 p.m. (noon), Luxembourg time (or such other time as specified for a particular Sub-Fund).

Security Tokens may be switched into traditional Shares and vice versa. The Registrar and Transfer Agent will burn/issue the Security Tokens in the blockchain and issue/delete the traditional Shares in the Register.

The order and settlement of subscription orders is further described in Section 5 "Form of Shares" and Section 9 "Settlement" of this Prospectus.

Orders will generally be forwarded to the Transfer Agent by the distributors or the sub-distributors on the date received provided the order is received by such distributors or sub-distributors prior to such deadline as may from time to time be established in the office in which the order is placed. The distributors and the sub-distributors are not permitted to withhold placing orders whether with the aim of benefiting from a price change or otherwise.

The Management Company, on behalf of each Sub-Fund, has entered into arrangements with the distributors providing for payment of "sales charges", which may not exceed 5% of the Net Asset Value of the relevant Shares being issued. The distributors may pass on a portion of such sales charge to any sub-distributor. The distributors may share the sales charge received by it with any of the sub-distributors as it may in its discretion determine.

If in any country in which the Shares are offered, local law or practice requires or permits a lower sales charge than that listed above for any individual purchase order for Shares, the distributors and the sub-distributors may offer such Shares for sale within such country at a total price less than the applicable price set forth above, but in accordance with the maximum amounts permitted by the law or practice of such country.

Investors may be required to complete a purchase application for Shares or other documentation satisfactory to the Company or to the distributors or any sub-distributor indicating that the purchaser is not a "U.S. Person", as such term is defined herein. Application forms containing such representation are available from the Company or from the distributors and the sub-distributors.

Payments for Classes of Shares with the letter "I" or "P", Classes of Shares "GC" and Classes with the letter "X" in their denomination will be required to be made in the Reference Currency of the relevant Sub-Fund or in any other currency specified by the investor (in which case any currency conversion cost shall be borne by the investor) within three (3) Business Days from the relevant Valuation Day.

Payments for Classes of Shares with the letter "R" or "N" in their denomination in each Sub-Fund may be made in Euro, US Dollar, Swiss Franc, GBP or SEK. Any currency conversion costs relating to the conversion of the subscription price for these Classes of Shares into the Reference Currency of the relevant Sub-Fund shall be borne by such Class of Shares. Payment will be required to be made within three (3) Business Days from the relevant Valuation Day.

In case of Security Tokens subscribed for at the UCI Administrator, payment may be made in EUROD Stablecoin issued by ODDO BHF SCA. The transfer of EUROD should be made to a dedicated address designated by the UCI Administrator prior to 12 p.m. Luxembourg time on the day the application was made. Subscription in Security Token will only be accepted and Security Token issued against EUROD for the next Valuation Day if the respective subscription amount in EUROD has been received prior to 12 p.m. Luxembourg time on the application day. If EUROD are not received in due time, order will be rejected.

Upon the issue of Shares, the Company retains an amount per Share equal to the Net Asset Value per Share of such Class on the date the order was dealt with.

The minimum investment per Class of Shares is described above for each Sub-Fund and is subject to the discretion of the Board of Directors to accept lesser amounts. Unless otherwise provided for a particular Sub-Fund, there is no minimum holding applicable.

Fractions of registered Shares may be issued up to one thousand of a Share.

Written confirmations of shareholdings will be sent to Shareholders within six (6) Business Days after the relevant Valuation Day and certificates (if any) will be sent to Shareholders within fourteen (14) Business Days after the relevant Valuation Day.

The Company may agree to issue Shares as consideration for a contribution in kind of securities, in compliance with the conditions set forth by Luxembourg law, in particular the obligation to deliver a valuation report from the auditor of the Company ("réviseur d'entreprises agréé") which shall be available for inspection by any Shareholder at the registered office of the Company and provided that such securities comply with the investment objectives and policies of the relevant Sub-Fund described herein. Any costs incurred in connection with a contribution in kind of securities shall be borne by the relevant Shareholder(s).

The Company reserves the right to reject any application in whole or in part, in which case subscription monies paid, or the balance thereof, as appropriate, will be returned to the applicant within ten (10) Business Days thereafter or to suspend at any time and without prior notice the issue of Shares in one, several or all of the Sub-Funds. In particular, the Board of Directors shall have the discretion to reject any application for subscription of Shares in a Sub-Fund where the net assets have reached an amount to be considered as the maximum level for such Sub-Fund to be operated in an economically efficient manner.

Market Timing and Late Trading

Subscriptions, redemptions and conversions of Shares should be made for investment purposes only. The Company does not permit market-timing or other excessive trading practices. Excessive, short-term (market-timing) trading practices may disrupt portfolio management strategies and harm fund performance. The Board of Directors or the Transfer Agent have the power to reject subscription or conversion orders from Shareholders that it suspects of using market-timing practice. The Board of Directors also has the power to redeem all Shares held by a Shareholder who is or has been engaged in excessive trading. Neither the Board of Directors nor the Company will be held liable for any loss resulting from rejected orders or mandatory redemptions.

CONVERSION OF SHARES

Shareholders have the right, subject to the provisions hereinafter specified, to convert Shares of any Class in a Sub-Fund for Shares of the same Class in another Sub-Fund.

Conversions from any Class of Shares to Class with the letter "X" in their denomination or "P" Shares are not permitted, subject to the discretion of the Board of Directors to accept conversion requests from Institutional Investors.

The rate at which Shares of any Class in any Sub-Fund shall be converted will be determined by reference to the respective Net Asset Values of the relevant Shares, calculated as of the same Valuation Day following receipt of the documents referred to below. Conversions are dealt with at an unknown Net Asset Value.

Applications for conversions of Shares cannot be cancelled after 12.00 p.m. (noon), Luxembourg time or such other time as specified for a particular Sub-Fund).

There is presently no conversion fee. The Board of Directors reserves however the right to introduce a conversion fee when appropriate, provided however, that the introduction of a conversion fee is subject to a one (1) month' prior notice during which the Shareholders shall have the right to redeem their Shares free of charges. In such event, the Prospectus will be amended accordingly.

A conversion of Shares of one Sub-Fund for Shares of another Sub-Fund within the same Class of Shares will be treated as a redemption of Shares and a simultaneous purchase of Shares. A converting Shareholder may, therefore, realise a taxable gain or loss in connection with the conversion under the laws of the country of the Shareholder's citizenship, residence or domicile.

In the case of conversions involving the Shares of Sub-Funds expressed in different Reference Currencies, the conversion order will require the conversion of the Reference Currency from one Sub-Fund to another. Consequently, the number of Shares of the new Sub-Fund obtained in a conversion will be affected by the net foreign exchange rate, if any, applied to such exchange. Any such foreign currency exchange rate transactions will be effected on behalf of and at the expense of the investor.

The Company has established the following formula in relation to the conversion of Shares:

$$S-F1 * NAV 1 * FX/NAV2 = S-F2$$

S-F1 is the number of Shares of the Sub-Fund or Class converted out of;

NAV1 is the Net Asset Value per Share of the Sub-Fund or Class converted out of;

NAV2 is the Net Asset Value per Share of the Sub-Fund or Class converted into;

FX is the foreign exchange rate, if any, applied to conversions between the Sub-Funds denominated in different currencies, as provided to the Company by the Depositary, or such other bank as the Management Company may designate, on the relevant Valuation Day, or, if such day is a bank holiday in the country in whose currency either the Sub-Fund converted out of or the Sub-Fund converted into is denominated, the next Business Day during which banks in both countries are open for business; and

S-F2 is the number of Shares of the Sub-Fund or Class converted into, obtained in the conversion.

Shares may be tendered for conversion on any Valuation Day.

All terms and notices regarding the redemption of Shares shall equally apply to the conversion of Shares.

No conversion of Shares will be effected until the following documents have been received at the registered office of the Transfer Agent (on behalf of the Company) from the distributors or any sub-distributor or directly from the Shareholder:

- a duly completed conversion form or other written notification acceptable to the Transfer Agent;
- if applicable, the relevant Share certificate with the transfer form duly completed together with any other documentation that may be requested by the Transfer Agent from time to time.

Fractions of registered Shares may be issued on conversion to up to one thousandth of a Share.

In converting Shares of a Sub-Fund for Shares of another Sub-Fund within the same Class, a Shareholder must meet applicable minimum investment requirements imposed by the acquired Sub-Fund or Class.

If, as a result of any request for conversion, the aggregate Net Asset Value of the Shares held by any Shareholder in any Class within any Sub-Fund would fall below the minimum amount indicated in the section "Issue and Sale of Shares", the Company may treat such request as a request to convert the entire shareholding of such Shareholder in such Class in such Sub-Fund.

Shares of any Class in any Sub-Fund will not be converted in circumstances where the calculation of the Net Asset Value per Share of the relevant Sub-Funds is suspended by the Company pursuant to Article 12 of the Articles.

REDEMPTION OF SHARES

Each Shareholder of the Company may at any time request the Company to redeem on any Valuation Day all or any of the Shares held by such Shareholder in any Class in any of the Sub-Funds.

Shareholders desiring to have all or any of their Shares redeemed should apply in writing or by fax to the Company at the registered office of the Transfer Agent, or through the distributors or sub-distributors.

The distributors and the sub-distributors may transmit redemption requests to the Transfer Agent on behalf of the Shareholders including duly completed Share certificates where they have been issued to the Shareholders.

Redemption requests should contain the following information (if applicable): the identity and address of the Shareholder requesting the redemption, the number of Shares to be redeemed, the relevant Sub-Fund and Class of Shares, whether the Shares are issued with or without a Share certificate, the name in which such Shares are registered and details as to whom payment should be made. Share certificates in proper form (if any) and all necessary documents to complete the redemption should be enclosed with such application. For registered certificated Shares, the transfer form on the back of the certificate must be duly completed.

Shareholders have to take due care and bear responsibility that the certificates of the Shares to be redeemed, if any, are received in proper form at the registered office of the Company.

Shareholders will have their Shares redeemed on any Valuation Day provided that the applications have been received prior to 12.00 p.m. (noon) Luxembourg time (or such other time as specified for a particular Sub-Fund), on that Valuation Day. Applications for redemptions of Shares cannot be cancelled after 12.00 p.m. (noon), Luxembourg time (or such other time as specified for a particular Sub-Fund).

Applications received after the cut-off will be processed on the next Valuation Day, considering redemptions are dealt with at an unknown Net Asset Value.

Shares will be redeemed at a price equal to the Net Asset Value per Share of the relevant Class in the relevant Sub-Fund (the "Redemption Price"). Please refer to the information relevant for each Sub-Fund for the amount of redemption fee that may be charged to each investor. The redemption fee shall revert to the Company for compensation of the costs incurred with respect to the redemption process.

The Redemption Price shall be paid not later than three (3) Business Days from the relevant Valuation Day or from the date on which the redemption request details and Share certificates (if any) have been received by the Company, whichever is the later date.

Redemptions in respect of Securities Token may be requested by an investor in EUROD. Such redemptions in EUROD will require a wallet and the redemption proceeds will be transmitted to the investor's wallet within three (3) Business Days after the Valuation Day, for which the redemption request was received by the UCI Administrator prior to 12 p.m. Luxembourg time.

Payment of the Redemption Price will be made by wire transfer and/or cheque mailed to the Shareholder at the address indicated by him or her or by bank order to an account indicated by the Shareholder, at such Shareholder's expense and at the Shareholder's risk. Payment of the Redemption Price will not be processed until the Subscription Price on the purchase of Shares has been paid.

The Redemption Price Classes of Shares with the letter "I", "X" or "P", Classes of Shares "GC", if any, will be paid in the Reference Currency of the relevant Class in the Sub-Fund or in any other freely convertible currency specified by the Shareholder. In the last case, any currency conversion cost shall be borne by the Shareholder.

The Redemption Price of Classes of Shares with the letter "R" or "N" in their denomination in any Sub-Fund will be paid in Euro, US Dollar, Swiss Franc, GBP or SEK. Any currency conversion costs incurred in relation with the conversion of the Redemption Price of these Classes of Shares from the Reference Currency of the relevant Sub-Fund into Euro, US Dollar, Swiss Franc, GBP or SEK shall be borne by such Class of Shares. Shareholders should however note that in relation to these Classes of Shares, any currency conversion costs that arise due to the fact that they ask for payment of the Redemption Price in a different currency than the Subscription Price shall be borne by the relevant Shareholder. The Redemption Price may be higher or lower than the price paid at the time of subscription or purchase.

The Company shall have the right, if the Board of Directors so determines, to satisfy payment of the Redemption Price to any Shareholder who agrees, in specie by allocating to the holder investments from the portfolio of assets set up in connection with such Class of Shares equal in value as of the Valuation Day on which the Redemption Price is calculated, to the value of the Shares to be redeemed ("redemption in kind"). The nature and type of assets to be transferred in such case shall be determined on a fair and reasonable basis and without prejudicing the interests of the other holders of Shares of the relevant Class of Shares and the valuation used shall be confirmed by a special report of the Auditor to the Company, to the extent required by Luxembourg law. The costs of any such transactions shall be borne by the transferee.

Shares of any Class in any Sub-Fund will not be redeemed if the calculation of the Net Asset Value per Share in such Sub-Fund is suspended by the Company in accordance with Article 12 of the Articles.

In the event that for any reason the value of the total net assets in any Sub-Fund or the value of the net assets of any Class of Shares within a Sub-Fund has decreased to, or has not reached, an amount determined by the Board of Directors to be the minimum level for such Sub-Fund, or such Class of Shares, to be operated in an economically efficient manner or in case of a substantial modification in the political, economic or monetary situation or as a matter of economic rationalisation, the Board of Directors may decide to compulsorily redeem all the Shares of the relevant Class or Classes at the Net Asset Value per Share (taking into account actual realisation prices of investments and realisation expenses) calculated on the Valuation Day or Valuation Time during the course of a Valuation Day at which such decision shall take effect. The Company shall serve a notice to the holders of the relevant Class or Classes of Shares prior to the effective date for the compulsory redemption, which will indicate the reasons and the procedure for the redemption operations: registered holders shall be notified in writing. Unless it is otherwise decided in the interests of, or to keep equal treatment between the Shareholders, the Shareholders of the Sub-Fund concerned may continue to request redemption or conversion of their Shares free of charge (but taking into account actual realisation prices of investments and realisation expenses) prior to the date effective for the compulsory redemption. Redemption proceeds corresponding to Shares not surrendered at the date of the compulsory redemption of the relevant Shares by the Company shall be deposited with the Caisse de Consignation on behalf of the person entitled thereto. If not claimed, they shall be forfeited in accordance with Luxembourg law.

Gate provision for capping redemptions:

The Board of Directors may make use of a gate provision. This allows redemption requests from Shareholders of the Sub-Fund to be spread out over several Valuation Days when they exceed a given, objectively calculated level.

Method applied:

The gate trigger threshold is set at 5% of the net assets of the relevant Sub-Fund. Sub-Fund's Shareholders are reminded that the gate trigger threshold corresponds to the ratio between:

- the difference on the same Valuation Day between (i) the total amount of these redemptions, and (ii) the total amount of these subscriptions; and
- the net assets of such Sub-Fund.

The Sub Funds have several Share Classes, and the threshold that triggers the procedure shall be the same for all of the Sub-Fund's Share Classes. The threshold for applying the gate is in line with the frequency of the Sub Fund's Net Asset Value calculation, its investment objectives and the liquidity of the assets in its portfolio. The latter is specified in the Company's Articles. Centralised redemptions are based on all of the Sub-Fund's assets, not specific Classes. The gate may entitle the Board of Directors to differ a redemption requests for a maximum of 10 Valuation Days. When redemption requests exceed the gate trigger threshold, the Board of Directors may decide to satisfy more redemption requests than the gate allows, and thus partially or totally execute orders that are eligible to be blocked.

Notifying shareholders:

If the gate threshold is triggered, all Shareholders of the relevant Sub-Fund(s) will be informed by any means via the Management Company's website (<http://am.oddo-bhf.com>). Shareholders of the Sub-Fund whose orders were not executed will be notified individually as soon as possible.

Processing of unexecuted orders:

Redemption orders shall be executed for all Shareholders of the Sub-Fund who have made redemption requests since the last Valuation Day in equal proportion. Orders that have not been executed will be automatically carried forward to the next Valuation Day; they will not be given priority over new redemption orders submitted for the following Valuation Day. Under no circumstances may Shareholders of the Sub-Fund in question revoke redemption orders that were not executed and have been automatically carried forward.

Example showing how the provision is applied:

If total redemption requests for a Sub-Fund amount to 10% of net assets of this Sub-Fund, but the trigger threshold is 5% of net assets, the Board of Directors may decide to satisfy redemption requests corresponding to up to 7.5% of net assets (and thus execute 75% of all redemption requests instead of the 50% it would have if it had strictly applied the 5% gate).

Swing Pricing mechanism:

Large subscriptions and redemptions may affect the Net Asset Value of any Sub-Fund of the Company owing to the cost of restructuring the portfolio in the event of investments and divestments. This cost may arise from the difference between the transaction price and the valuation price, taxes or brokerage charges.

In order to safeguard the interests of Shareholders investing for the medium/long term, the Board of Directors has decided to apply a Swing Pricing mechanism to the Sub-Fund above a trigger threshold as further specified below.

Once the daily balance of subscriptions/redemptions exceeds, in absolute terms, a trigger threshold determined in advance, an adjustment will therefore be made to the Net Asset Value of the relevant Sub-Fund. Consequently, the Net Asset Value will be increased (or, where applicable, decreased) if the balance (in absolute terms) of subscriptions/redemptions exceeds the threshold. The sole aim of this price adjustment mechanism is to protect the Shareholders of the Sub-Fund by limiting the impact of these subscriptions/redemptions on the Net Asset Value of the Sub-Fund. This mechanism does not generate any additional costs for Shareholders of the relevant Sub-Fund. Rather, it spreads the costs in such a way that the Shareholders of the Sub-Fund do not bear any costs associated with transactions caused by subscriptions/redemptions made by incoming or outgoing Shareholders. The Net Asset Value will be adjusted upward when there are large cash inflows into the Sub-Fund (in case of subscriptions) and downward when there are large outflows (in case of redemptions).

The trigger threshold is expressed as a percentage of the Sub-Fund's total assets. In normal market conditions, the adjustment for any given Valuation Day will not be larger than 2% of what the Net Asset Value would otherwise be. In exceptional market conditions (including, but not limited to, widening bid offer spreads often as a result of high market volatility and/or illiquidity, exceptional market conditions market disruptions), however, this maximum level may be increased up to 5% to protect the interests of Shareholders.

The trigger threshold and swing factor (corresponding to the cost of restructuring the portfolio) are determined by the Board of Directors. The swing factor is reviewed monthly.

Risk indicators are calculated based on the potentially adjusted Net Asset Value of the Sub-Fund. As such, use of the Swing Pricing mechanism may affect the Sub Fund's volatility and, occasionally, its performance. However, and where applicable, any performance fee will be charged on the basis of the unswung Net Asset Value.

In accordance with the regulations, only those responsible for its implementation are aware of the details of this mechanism, such as the trigger threshold percentage. This information must not be made public under any circumstances.

DISTRIBUTION POLICY

The Company may distribute the net investment income and any realized capital gains. Furthermore, the Company may distribute any non-realized capital gains and any other assets.

Classes with the letter "C" (with the exception of "GC" Classes of Shares") and "X" in their denomination are Classes of Shares that capitalise their income, whereas Classes of Shares with the letter "D" are Classes of Shares that out periodic dividends on an annual basis, or more frequently if the Board of Directors decides to do so. GC Shares may be accumulation Shares or distribution Shares.

If Shareholders have applied in the Application Form for the reinvestment of such dividends, no sales charge will be imposed on reinvestments of distributions.

In the event that a dividend is paid in one or several Sub-Funds, such dividend will be paid to Shareholders by cheque, mailed to their address as shown on the register of Shareholders or by bank transfer. Dividend cheques not cashed within five (5) years will be forfeited and will accrue for the benefit of the Sub-Fund out of which the dividend is payable. No interest shall be paid on a distribution declared by the Company and kept by it at the disposal of its beneficiary.

In any event, no distribution may be made if, as a result, the Net Asset Value of the Company would fall below Euro 1,250,000.

INCOME EQUALISATION

The Company applies a so-called income equalisation procedure for the Share Classes of the Sub-Funds. This means that the proportional income and realised capital gains/losses accruing during the financial year which the acquirer of Shares must pay as part of the subscription price and which the seller of Shares receives as payment as part of the redemption price is continuously netted. The expenses incurred are accounted for in the calculation of the income equalisation procedure.

The income equalisation procedure serves to adjust fluctuations in the relationship between income and realised capital gains/losses on the one hand and other assets on the other hand, that are caused through net inflows or outflows due to the issue or redemption of Shares. Otherwise, every net inflow of capital would reduce the Share of income and realised capital gains/loss on the Net Asset Value of a Sub-Fund and each outflow would increase it.

CHARGES AND EXPENSES

Operating Expenses

The Company pays out of the assets of the relevant Sub-Fund all expenses payable by the Company (hereinafter the "Total Operating Expenses") which shall include but not be limited to formation expenses, fees payable to its Management Company and investment adviser (if any), performance related fees payable to its Management Company, fees and expenses payable to its accountants, Depositary and its correspondents (if any), UCI Administrator, its Listing Agent, any paying agent, any distributor and permanent representatives in places of registration, as well as any other agent employed by the Company, the remuneration of the Directors and their reasonable out-of-pocket expenses, insurance coverage, and reasonable travelling costs in connection with board meetings, fees and expenses for legal and auditing services including the costs of providing tax information certificates for domestic and foreign tax purposes, the costs for enforcement and implementation of the justifiable legal rights of the Company and for defence against claims made against the Company that seem unjustified, any fees and expenses involved in registering and maintaining the registration of the Company with any governmental agencies or stock exchanges in the Grand Duchy of Luxembourg and in any other country, costs and expenses of publication and distribution of Net Asset Values, a reasonable portion of advertising costs and other costs incurred in connection with the offer and the distribution of Shares, reporting and publishing expenses, including the costs of preparing, printing, advertising and distributing prospectuses, explanatory memoranda, periodical reports or registration statements, and the costs of any reports to Shareholders, the costs of assessing the standing of a Sub-Fund by recognised rating agencies, the costs for calculating risk and performance figures as well as the remuneration of any collateral management agent if the Management Company has entrusted third parties with the provision of such services, costs related to the use of index names, in particular licence fees, all taxes, duties, governmental and similar charges, and all other operating expenses, including the cost of buying and selling assets, interest, bank charges and brokerage, postage, telephone and telex as well as any fees and costs associated with the provision of the Shares on the DLT or against EUROD.

The Company may accrue administrative and other expenses of a regular or recurring nature based on an estimated amount rateably for yearly or other periods. As regards subscriptions, redemptions and conversions made by a Shareholder by means of a paying agent in any country (e.g. such as Italy) where the Company is registered for public distribution, the fees and costs connected to the payment intermediation services may however be charged to the Shareholder.

Charges relating to the creation of a new Sub-Fund shall be written off over a period not exceeding five (5) years against the assets of that Sub-Fund and in such amounts in each year as determined by the Board of Directors on an equitable basis. The new created Sub-Fund shall not bear a pro rata of the costs and expenses incurred in connection with the formation of the Company and the initial issue of Shares, which have not already been written off at the time of the creation of the new Sub-Fund.

The UCI Administrator and the Depositary are entitled to receive a fee of up to 0,045% p.a. calculated monthly as a percentage of the Net Asset Value of each Class of Shares within each Sub-Fund and payable monthly in arrears. These percentage figures also include the transaction fees on portfolio transactions charged by the Depositary and its correspondents.

- a) The Management Company will be paid, out of the assets of each of the Sub-Funds, an investment management fee, equal to a percentage per annum of the daily Net Asset Value of each Class of Shares within each Sub-Fund and payable quarterly in arrears. The investment management fees amount to the following percentage figures:

b) In addition to the investment management fee mentioned in a) above, the Management Company may be paid on an annual basis in arrears, out of the assets of certain Sub-Fund a Performance-related fee (the "Performance Fee"), as follows, being noted that classes of Shares with the letter "w" in their denomination are Classes of Shares without performance fees.

At the date of this Prospectus:

Sub-Fund charging Performance Fees	Rate of performance fees
<p>ODDO BHF Credit Opportunities</p>	<p>For “R”, “N”, “F”, “oN”, “S” share classes:</p>
	<p>A maximum of 10% of the Sub-Fund's outperformance relative to the benchmark index, once past underperformance over the previous five years has been offset, and provided that the absolute return is positive (*).</p>
	<p>The benchmark index is consistent with the Sub-Fund's investment objective and strategy.</p>
	<p>For “I”, “X” and “P” share classes:</p>
	<p>A maximum of 10% of the Sub-Fund's outperformance relative to the benchmark index, once past underperformance over the previous five years has been offset (*).</p>
<p>ODDO BHF Global Credit Short Duration</p>	<p>For “R”, “N”, “F”, “oN”, “S” share classes:</p>
	<p>A maximum of 10% of the Sub-Fund's outperformance relative to the benchmark index, once past underperformance over the previous five years has been offset, and provided that the absolute return is positive (*).</p>
	<p>The benchmark index is consistent with the Sub-Fund's investment objective and strategy.</p>
	<p>For “I”, “X” and “P” share classes:</p>
	<p>A maximum of 10% of the Sub-Fund's outperformance relative to the benchmark index, once past underperformance over the previous five years has been offset (*).</p>
<p>ODDO BHF US Equity Trend</p>	<p>For “R”, “N”, “F”, “oN”, “S” share classes:</p>
	<p>A maximum of 10% of the Sub-Fund's outperformance relative to the benchmark index, once past underperformance over the previous five years has been offset, and provided that the absolute return is positive (*).</p>
	<p>The benchmark index is consistent with the Sub-Fund's investment objective and strategy.</p>
	<p>For “I”, “X” and “P” share classes:</p>
	<p>A maximum of 10% of the Sub-Fund's outperformance relative to the benchmark index, once past underperformance over the previous five years has been offset (*).</p>
<p>ODDO BHF Artificial Intelligence</p>	<p>For “R”, “N”, “F”, “oN”, “S” share classes:</p>
	<p>A maximum of 20% of the Sub-Fund's outperformance relative to the benchmark index, once past underperformance over the previous five years has been offset, and provided that the absolute return is positive (*).</p>
	<p>The benchmark taken into account for the calculation of the performance fee will be considered in the same currency as the Share concerned, except in the case of hedged Shares for which the Benchmark will always be expressed in USD, the currency of the ODDO BHF Artificial Intelligence.</p>
<p>The benchmark index is consistent with the Sub-Fund's investment objective and strategy.</p>	

	<p>For "I", "X" and "P" share classes:</p> <p>A maximum of 20% of the Sub-Fund's outperformance relative to the benchmark index, once past underperformance over the previous five years has been offset (*).</p> <p>The benchmark taken into account for the calculation of the performance fee will be considered in the same currency as the Share concerned, except in the case of hedged Shares for which the Benchmark will always be expressed in USD, the currency of the ODDO BHF Artificial Intelligence.</p> <p>The benchmark index is consistent with the Sub-Fund's investment objective and strategy.</p>
ODDO BHF Green Planet	<p>For "R", "N", "F", "oN", "S" share classes:</p> <p>A maximum of 20% of the Sub-Fund's outperformance relative to the benchmark index, once past underperformance over the previous five years has been offset, and provided that the absolute return is positive (*).</p> <p>The benchmark taken into account for the calculation of the performance fee will be considered in the same currency as the Share concerned, except in the case of hedged Shares for which the Benchmark will always be expressed in USD, the currency of the ODDO BHF Green Planet.</p> <p>The benchmark index is consistent with the Sub-Fund's investment objective and strategy.</p> <p>The investment universe used by the Sub-Fund is different from its benchmark index to allow consideration of attractive investments outside the benchmark and selecting issuers that are identified as attractive by the Fund Management after applying all filters of the ESG requirements and the Investment Strategy.</p> <p>For "I", "X" and "P" share classes:</p> <p>A maximum of 20% of the Sub-Fund's outperformance relative to the benchmark index, once past underperformance over the previous five years has been offset (*).</p> <p>The benchmark taken into account for the calculation of the performance fee will be considered in the same currency as the Share concerned, except in the case of hedged Shares for which the Benchmark will always be expressed in USD, the currency of the ODDO BHF Green Planet.</p> <p>The benchmark index is consistent with the Sub-Fund's investment objective and strategy.</p> <p>The investment universe used by the Sub-Fund is different from its benchmark index to allow consideration of attractive investments outside the benchmark and selecting issuers that are identified as attractive by the Fund Management after applying all filters of the ESG requirements and the Investment Strategy.</p>
ODDO BHF Green Planet	<p>For "I", "R", "N", "F", "P" share classes:</p> <p>A maximum of 10% of the Sub-Fund's outperformance relative to the benchmark index, once past underperformance over the previous five years has been offset, and provided that the absolute return is positive (*).</p> <p>The benchmark index is consistent with the Sub-Fund's investment objective and strategy.</p>
ODDO BHF Global High Yield Bond	<p>For "I", "R", "N", "F", share classes:</p> <p>A maximum of 10% of the Sub-Fund's outperformance above the hurdle rate, once past underperformance over the previous five years has been offset, and provided that the absolute return is positive (*).</p> <p>The selection of the hurdle rate is consistent with the Sub-Fund's investment objective and strategy.</p> <p>For CR-EUR, CR-CHF [H], CR-USD [H] and DR-EUR shares: the Investment Manager aims to achieve an annualised performance (net of fees) above 2,80% over an investment period running from the Sub-Fund inception date to 31st December 2031 at the latest;</p>

	<p>For CI-EUR, CI-CHF [H], CI-USD [H] and DI-EUR shares: the Investment Manager aims to achieve an annualised performance (net of fees) above 3.30% over an investment period running from the Sub-Fund inception date to 31st December 2031 at the latest;</p> <p>For CN-EUR, CN-CHF [H] and DN-EUR shares: the Investment Manager aims to achieve an annualised performance (net of fees) above 3.15% over an investment period running from the Sub-Fund inception date to 31 December 2031 at the latest;</p> <p>For F shares: the Investment Manager aims to achieve an annualised performance (net of fees) above 3,50% over an investment period running from the Sub-Fund inception date to 31 December 2031 at the latest.</p>
<p>ODDO BHF Global Target IG 2031</p>	<p>For "I", "R", "N", "F", hare classes:</p> <p>A maximum of 10% of the Sub-Fund's outperformance above hurdle rate, once past underperformance over the previous five years has been offset, and provided that the absolute return is positive (*).</p> <p>The selection of the hurdle rate is consistent with the Sub-Fund's investment objective and strategy.</p> <p>For CR-EUR shares: the Investment Manager aims to achieve an annualised performance (net of fees) above 2.30% over an investment period running from the Sub-fund inception date to 31 December 2031 at the latest;</p> <p>For CI-EUR shares: the Investment Manager aims to achieve an annualised performance (net of fees) above 2,60% over an investment period running from the Sub-fund inception date to 31 December 2031 at the latest;</p> <p>For CN-EUR shares: the Investment Manager aims to achieve an annualised performance (net of fees) above 2.50% over an investment period running from the Sub-fund inception date to 31 December 2031 at the latest;</p> <p>For F shares: the Investment Manager aims to achieve an annualised performance (net of fees) above 2,75% over an investment period running from the Sub-Fund inception date to 31 December 2031 at the latest;</p>

* Performance fee: will be deducted for the benefit of the Management Company in the following manner:

- The Performance Fee is based on a comparison between the performance of the Sub-Fund and that of its benchmark index, hurdle rate or trigger threshold when applicable, and includes a method for clawing back past underperformance.
- The Sub-Fund's performance is determined on the basis of its book value after taking into account fixed management fees and before deduction of the performance fee.
- Outperformance is calculated on the basis of the "indexed asset" method, which is used to simulate a fictitious asset experiencing the same subscription and redemption conditions as the Sub-Fund, while enjoying the same performance as their benchmark index/ hurdle rate. This indexed asset is then compared with the Sub-Fund's assets. The difference between the two is the Sub-Fund's outperformance relative to the benchmark index/hurdle rate.
- Whenever the NAV is calculated, provided that the Sub-Fund's performance exceeds that of the benchmark index/hurdle rate, a performance fee provision is booked. In the event that the Sub-Fund underperforms its benchmark index/hurdle rate between two net asset values, any previously accumulated provision shall be reduced accordingly. The amounts by which the provision is reduced cannot exceed the amount previously accumulated. The performance fee is calculated and provisioned separately for each Sub-Fund share class.
- The benchmark index/hurdle rate will be calculated in the Share currency, regardless of the currency in which the relevant Share is denominated, except in the case of Shares hedged against currency risk, for which the benchmark index/hurdle rate will be calculated in the Fund's reference currency.
- The performance fee is measured over a calculation period that corresponds to the Sub-Fund's financial year (the "Calculation Period"). Each Calculation Period starts on the last business day of the Sub-Fund's financial year, and ends on the last business day of the next financial year. For share classes launched during a Calculation Period, the first Calculation Period will last at least 12 months and end on the last business day of the next financial year. The total performance fee is payable to the Management Company annually after the Calculation Period has ended.
- In the event of redemptions, if a performance fee provision has been booked, then the proportion of the provision attributable to these redemptions is crystallised and definitively allocated to the Management Company.
- The horizon over which performance is measured is a rolling period of five years ("Performance Reference Period"). The clawback mechanism may be partially reset at the end of this period. This means that after five years of cumulative underperformance over the Performance Reference Period, underperformance may be partially reset on a rolling annual basis,

wiping out the first year of underperformance during the Performance Reference Period concerned. In relation to the Performance Reference Period concerned, underperformance in the first year may be offset by outperformance in the following years of the Performance Reference Period.

- Over a given Performance Reference Period, any past underperformance must be clawed back before performance fees become payable again.
- Where a performance fee is crystallised at the end of a Calculation Period (except when due to redemptions), a new Performance Reference Period begins.
- For "R", "N", "F", "oN", "S" share classes: No performance fee is payable if the absolute performance of the Share is negative. The absolute performance is defined as the difference between the current net asset value and the last net asset value calculated at the end of the previous Calculation Period (Reference Net Asset Value).
- For "I", "X" and "P" share classes: shareholders are informed that, subject to the condition of outperformance over the relevant benchmark/or hurdle rate, performance fees may be paid to the Management Company even in the event of negative absolute performance.

Example of the operation of the performance fees applied to "R", "N", "F", "oN", "S" share classes:

Year	UCI Net Asset Value (base 100 at the beginning of year 1)	Annual Performance UCI	Annual performance of the benchmark	Annual Relative Performance	Under Performance to be offset in the following year	Payment of a Performance Fee	Comment
1	105.0	5.0%	-1.0%	6.0%	0.0%	YES	Annual outperformance AND positive absolute performance over the year
2	91.30	-13.1%	-5.1%	-8.0%	-8.0%	NO	Sous-performance annuelle
3	94.09	3.1%	1.1%	2.0%	-6.0%	NO	The underperformance of year 2 is only partially compensated in year 3
4	89.09	-5.3%	-6.3%	1.0%	-5.0%	NO	The underperformance of year 2 is only partially compensated in year 4
5	100.88	13.2%	11.2%	2.0%	-3.0%	NO	The underperformance of year 2 is only partially compensated in year 5
6	102.91	2.0%	1.0%	1.0%	0.0%	NO	The underperformance of year 2 is only partially compensated in year 6. However, the residual underperformance (-2%) is erased for year 7 (end of the 5-year period)
7	99.83	-3.0%	-1.0%	-2.0%	-2.0%	NO	Annual underperformance
8	96.83	-3.0%	-8.0%	5.0%	0.0%	NO	The underperformance of year 7 is fully compensated in year 8 but the annual absolute performance is negative: no performance fee is paid.

Example of the operation of the performance fees applied to “I”, “X” and “P” share classes:

Year	UCI Net Asset Value (base 100 at the beginning of year 1)	Annual Performance UCI	Annual performance of the benchmark	Annual Relative Performance	Under Performance to be offset in the following year	Payment of a Performance Fee	Comment
1	105.00	5.0%	-1.0%	6.0%	0.0%	YES	Annual outperformance
2	91.30	-13.1%	-5.1%	-8.0%	-8.0%	NO	Annual underperformance
3	94.09	3.1%	1.1%	2.0%	-6.0%	NO	The underperformance of year 2 is only partially compensated in year 3
4	89.09	-5.3%	-6.3%	1.0%	-5.0%	NO	The underperformance of year 2 is fully compensated in year 4
5	100.88	13.2%	11.2%	2.0%	-3.0%	NO	The underperformance of year 2 is fully compensated in year 5
6	102.91	2.0%	1.0%	1.0%	0.0%	NO	The underperformance of year 2 is only partially compensated in year 6. However, the residual underperformance (-2%) is erased for year 7 (end of the five-year period).
7	99.83	-3.0%	-1.0%	-2.0%	-2.0%	NO	Annual underperformance
8	96.83	-3.0%	-8.0%	5.0%	0.0%	YES	The underperformance of year 7 is fully compensated in year 8

The Management Company shall be responsible for paying the remuneration due to any Investment Manager out of its fee. Rebates on the investment management fee may be granted by the Management Company to certain distributors and/or investors.

The Management Company has adopted written plan setting out actions, which it will take with respect to the relevant Sub-Funds in the event that any of the benchmarks listed above materially changes or ceases to be provided (the “**Contingency Plan**”), as required by article 28(2) of the Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds, as may be amended or supplemented from time to time (the “**Benchmarks Regulation**”). Shareholders may access the Contingency Plan at the registered office of the Company and via the Management Company’s website am.oddo-bhf.com.

The benchmarks listed above in b) of Charges and Expenses are being provided by the entity specified next to the name of the relevant benchmark, in its capacity as administrator of such benchmark, as defined in the Benchmarks Regulation (each a “**Benchmark Administrator**” and collectively the “**Benchmark Administrators**”). The status of each Benchmark Administrator in relation to the ESMA register referred to in article 36 of the Benchmarks Regulation (the “**Register**”) as of the date of this visa-stamped Prospectus is set out in the table below:

Sub-Fund	Benchmark	Administrator	Status of the administrator
ODDO BHF Sustainable Euro Corporate Bond	Markit iBoxx Euro Corporate Total Return	IHS Markit Benchmark Administration Limited	Listed in register as an administrator authorised pursuant to article 32 of the Benchmarks Regulation.
ODDO BHF Euro High Yield Bond	ICE BofA BB-B Euro High Yield Non-Financial Fixed & Floating Rate Constrained Index (HEAG Index)	ICE Data Indices, LLC	The administrator is located in a third country and has applied for recognition to ESMA prior 31 December 2025.
ODDO BHF Convertibles Global	Thomson Reuters Global Focus Hedged Convertible Bond	Thomson Reuters Benchmark Services Limited	Listed in register as an administrator authorised pursuant to article 32 of the Benchmarks Regulation.
ODDO BHF Objectifs Revenus	€STR + 15 bp	European Money Markets Institute	Listed in register as an administrator authorised pursuant to article 34 of the Benchmarks Regulation.
ODDO BHF Credit Opportunities	€STR +2% (capitalised)	European Money Markets Institute	Listed in register as an administrator authorised pursuant to article 34 of the Benchmarks Regulation.
ODDO BHF Global Credit Short Duration	€STR +1.5% (capitalised)	European Money Markets Institute	Listed in the register as an administrator authorised pursuant to article 34 of the Benchmarks Regulation.
ODDO BHF US Equity Trend	S&P 500 NR	S&P Dow Jones Indices LLC	Listed in the register as an administrator authorised pursuant to article 33 of the Benchmarks Regulation.
ODDO BHF Artificial Intelligence	MSCI World NR	MSCI Limited	Listed in the register as an administrator authorised pursuant to article 33 of the Benchmarks Regulation.
ODDO BHF Green Planet	MSCI ACWI NR Index	MSCI Limited	Listed in the register as an administrator authorised pursuant to article 33 of the Benchmarks Regulation
ODDO BHF Global High Yield	ICE BofA BB-B Global High Yield Non-Financial Constrained Total Return Index (Hedged in EUR)	Ice Data Indices, LLC	The administrator is located in a third country and has applied for recognition to ESMA prior 31 December 2025.
ODDO BHF Global Navigator	60% MSCI AC World Index NR + 40% Bloomberg Global Aggregate Bond Index	MSCI Limited Bloomberg	Listed in the register as an administrator authorised pursuant to article 33 of the Benchmarks Regulation.

The Management Company has drawn up robust written plans containing measures it would take if components of the benchmark index change significantly or become unavailable.

Should any Benchmark Administrator or Benchmark's status change, this Prospectus will be updated accordingly.

Soft commissions

The Management Company and each of the Investment Managers may enter into soft commission arrangements with brokers under which certain business services are obtained for third parties and are paid for by the brokers out of the commissions they receive from transactions of the Management Company or the Investment Managers. Consistent with obtaining best

execution, brokerage commissions on portfolio transactions for the Company may be directed by the Management Company or the Investment Managers to brokers in recognition of research services furnished by them as well as for services rendered in the execution of orders by such brokers.

The Company soft commission arrangements are subject to the following conditions: (i) the Management Company or the Investment Managers will act at all times in the best interest of the Company when entering into soft commission arrangements; (ii) the services provided will be in direct relationship to the activities of the Management Company or the Investment Managers; (iii) brokerage commissions on portfolio transactions for the Company will be directed by the Management Company or the Investment Managers to broker that are entities and not to individuals; (iv) the Management Company or the Investment Managers will provide reports to the Board of Directors with respect to soft commission arrangements including the nature of the services it received in relation thereto; and (v) soft commission arrangements shall be disclosed in the periodic reports.

TAXATION

The following summary is based on the law and practice currently applicable in the Grand Duchy of Luxembourg and is subject to changes therein.

A. Taxation of the Company in Luxembourg

The Company is not liable to any Luxembourg tax on profits or income, nor are distributions paid by the Company liable to any Luxembourg withholding tax. The Company is, however, liable in Luxembourg to a tax of 0.05% per annum of its Net Asset Value, such tax being payable quarterly on the basis of the value of the aggregate net assets of the Sub-Funds at the end of the relevant calendar quarter. This rate is however of 0.01% per annum for:

- a) Undertakings whose exclusive object is the collective investment in Money Market Instruments and the placing of deposits with credit institutions;
- b) undertakings whose exclusive object is the collective investment in deposits with credit institutions; and
- c) individual compartments of UCIs with multiple compartments referred to in the 2010 Law, as well as for individual classes of securities issued within a UCI or within a compartment of a UCI with multiple compartments, provided that the securities of such compartments or classes are reserved to one or more institutional investors.

Under certain conditions, exemptions from subscription tax may apply.

No stamp duty or other tax is payable in Luxembourg on the issue of Shares. No Luxembourg tax is payable on the realised capital appreciation of the assets of the Company.

General

Dividends and interest received by the Company on its investments may be subject to non-recoverable withholding or other taxes in the countries of origin.

B. Taxation of Shareholders

Luxembourg taxation of Shareholders

Under current legislation, Shareholders are not subject to any capital gains, income or withholding tax in Luxembourg except for (i) those domiciled, resident or having a permanent establishment in Luxembourg, or (ii) non-residents of Luxembourg who personally or by attribution hold, directly or indirectly, 10% or more of the issued Share capital of the Company and who dispose of all or part of their holdings within six months from the date of acquisition, or (iii) in some limited cases, some former residents of Luxembourg who personally or by attribution hold, directly or indirectly, 10% or more of the issued Share capital of the Company.

Any dividends, other distributions of income made by the Company or payments of the proceeds of sale and/or redemption of Shares in the Company, may as from 1 July 2005 (depending on the investment portfolio of the SICAV) be subject to the withholding tax and/or information providing regime imposed by EU Savings Tax Directive 2003/48/EC of 3 June 2003 (the "Directive") on taxation of savings income in the form of interest payments, where payment is made to a Shareholder who is an individual resident in a Member State for the purposes of the Directive (or a "residual entity" established in a Member State) by a paying agent resident in another Member State. Certain other jurisdictions (including Switzerland) have, or are proposing to introduce, an equivalent withholding tax and/or information providing regime in respect of payments made through a paying agent established in such jurisdictions. The Luxembourg Government introduced the automatic exchange of information from 1 January 2015 on.

The above information is not exhaustive and does not constitute legal or tax advice. Prospective investors should consult their own professional advisers as to the implications of their subscribing for, purchasing, holding, exchanging or disposing of Shares of the Company.

General

It is expected that Shareholders in the Company will be resident for tax purposes in many different countries. Consequently, no attempt is made in the Prospectus to summarise the taxation consequences for each investor of subscribing, converting, holding or redeeming or otherwise acquiring or disposing of Shares in the Company. These consequences will vary in accordance with the law and practice currently in force in a Shareholder's country of citizenship, residence, domicile or incorporation and with his personal circumstances.

Specific provisions of the German Investment Taxation Act

Without prejudice to the above, further considerations are laid down herein regarding the German Investment Tax Act (GITA).

The GITA provides for a partial tax exemption for certain German residents investing in equity investment funds (subject to a minimum equity quota of 51%) or mixed investment funds (subject to a minimum equity quota of 25%). This new tax treatment will enter into force on 1 January 2018 (though the GITA itself has come into effect as of 27 July 2016, with certain changes being applicable as of 1 January 2016 with retroactive effect).

For each relevant Sub-Fund it is stipulated in the 'Investment Objectives and Policies' Section of this Prospectus as to whether the Sub-Fund invests in a minimum equity quota as set forth by the GITA. The Investment Objectives and Policies, as disclosed in this Prospectus, are determined by the Board of Directors of the Company in accordance with Article 18 of the Company's Articles.

For this purpose, 'equity participations' shall mean, in accordance with Section 2 para.8 of the GITA:

- participations in capital companies which are listed on a stock exchange or listed on an organised market;
- participations in capital companies which are not real estate companies and which are incorporated in a member state of the European Union or the European Economic Area and are subject to income taxation for capital companies there and are not tax-exempt;
- participations in capital companies which are incorporated in a third country and are subject to income taxation for capital companies there at a minimum rate of 15% and are not tax-exempt;
- shares or units in equity investment funds according to Section 2 para. 6 of the GITA with an amount of 51 % of their value; and
- shares or units in mixed investment funds according to Section 2 para. 7 of the GITA with an amount of 25 % of their value.

There are no tax implications for a Feeder Sub-Fund in Luxembourg investing in a Master UCITS.

Investors should inform themselves of, and when appropriate consult their professional advisers on, the possible tax consequences of subscribing for, buying, holding, converting, redeeming or otherwise disposing of Shares under the laws of their country of citizenship, residence, or domicile or incorporation.

MEETINGS OF, AND REPORTS TO, SHAREHOLDERS

Notice of any general meeting of Shareholders (including those considering amendments to the Articles or the dissolution and liquidation of the Company or of any Sub-Fund) shall be mailed to each registered Shareholder at least eight (8) days' prior to the meeting and shall be published to the extent required by Luxembourg law in the *Recueil Electronique des Sociétés et Associations* (the "RESA" previously known as "Mémorial") and in any Luxembourg and other newspaper(s) that the Board of Directors may determine.

If the Articles are amended, such amendments shall be filed with the Chancery of the District Court of Luxembourg and published in the RESA.

The Company publishes annually a detailed audited report on its activities and on the management of its assets; such report shall include, inter alia, the combined accounts relating to all the Sub-Funds, a detailed description of the assets of each Sub-Fund and a report from the Auditor.

The Company further publishes semi-annual unaudited reports, including, inter alia, a description of the investments underlying the portfolio of each Sub-Fund and the number of Shares issued and redeemed since the last publication.

The aforementioned documents are prepared within four (4) months for the annual reports and two (2) months for the semi-annual reports of the date thereof and copies may be obtained free of charge by any person at the registered office of the Company and on am.oddobhf.com and www.fundinfo.com.

The accounting year of the Company commences on the 1st November of each year and terminates on the 31st October of the following year.

The annual general meeting takes place at the registered office of the Company or at such other place in the Grand-Duchy of Luxembourg as may be specified in the notice of meeting on the first Friday in the month of March at 10.00 a.m. If such day is a legal or a bank holiday in Luxembourg, the annual general meeting shall be held on the next following Business Day.

The Shareholders of any Sub-Fund may hold, at any time, general meetings to decide on any matters which relate exclusively to such Sub-Fund.

The combined accounts of the Company are maintained in Euro being the Reference Currency of the share capital. The financial statements relating to the separate Sub-Funds shall also be expressed in the Reference Currency for the Sub-Funds.

APPENDIX I:

INVESTMENT RESTRICTIONS

The Company shall, based upon the principle of risk spreading, have power to determine the corporate and investment policy for the investments for each Sub-Fund, the Reference Currency, as the case may be, and the course of conduct of the management and business affairs of the Company.

Any Sub-Fund may, to the widest extent permitted by and under the conditions set forth in applicable Luxembourg laws and regulations, but in accordance with the provisions set forth in the sales documents of the Company, subscribe, acquire and/or hold Shares to be issued or issued by one or more Sub-Funds of the Company. In this case and subject to conditions set forth in applicable Luxembourg laws and regulations, the voting rights, if any, attaching to these Shares are suspended for as long as they are held by the Sub-Fund concerned. In addition and for as long as these Shares are held by a Sub-Fund, their value will not be taken into consideration for the calculation of the net assets of the Company for the purposes of verifying the minimum threshold of the net assets imposed by the 2010 Law.

Except to the extent that more restrictive rules are provided for in connection with a specific Sub-Fund under "Investment Objectives and Policies" in the Prospectus, the investment policy of each Sub-Fund shall comply with the rules and restrictions laid down hereafter:

A. Investments in the Sub-Funds shall consist solely of:

- (1) Transferable Securities and Money Market Instruments admitted to or dealt in on a Regulated Market;
- (2) Transferable Securities and Money Market Instruments dealt in on an Other Regulated Market in a Member State;
- (3) Transferable Securities and Money Market Instruments admitted to official listing on a stock exchange of an Other State or dealt in on an Other Regulated Market in an Other State;
- (4) recently issued Transferable Securities and Money Market Instruments, provided that:
 - the terms of issue include an undertaking that application will be made for admission to official listing on a stock exchange in an Other State or on a Regulated Market or on any Other Regulated Market as described under (1)-(3) above;
 - such admission is secured within one year of issue;
- (5) units of UCITS authorised according to the UCITS Directive and/or other UCIs within the meaning of the 2010 Law, whether situated in a Member State or in an Other State, provided that:
 - such other UCIs are authorised under laws which provide that they are subject to supervision considered by the Regulatory Authority to be equivalent to that laid down in Community law, and that cooperation between authorities is sufficiently ensured (currently the United States, Canada, Switzerland, Iceland, Australia, New Zealand, Hong Kong, Norway and Japan);
 - the level of protection for shareholders in such other UCIs is equivalent to that provided for shareholders in a UCITS, and in particular that the rules on assets segregation, borrowing, lending, and short sales of Transferable Securities and Money Market Instruments are equivalent to the requirements of the UCITS Directive;
 - the business of the other UCIs is reported in half-yearly and annual reports to enable an assessment of the assets and liabilities, income and operations over the reporting period;
 - no more than 10% of the assets of the UCITS or of the other UCIs, whose acquisition is contemplated, can, according to their constitutional documents, in aggregate be invested in units of other UCITS or other UCIs;
- (6) deposits with credit institutions which are repayable on demand or have the right to be withdrawn, and maturing in no more than 12 months, provided that the credit institution has its registered office in a Member State or, if the registered office of the credit institution is situated in an Other State, provided that it is subject to prudential rules considered by the Regulatory Authority as equivalent to those laid down in Community law;

- (7) financial derivative instruments, *i.e.* in particular options, futures, including equivalent cash-settled instruments, dealt in on a Regulated Market or on an Other Regulated Market referred to in (1), (2) and (3) above, and/or financial derivative instruments dealt in over-the-counter ("OTC derivatives"), provided that:
- (i) the underlying consists of instruments covered by this Section A., financial indices, interest rates, foreign exchange rates or currencies, in which the Sub-Fund may invest according to its investment objectives; the counterparties to OTC derivative transactions are institutions subject to prudential supervision, and belonging to the categories approved by the Regulatory Authority, and
- the OTC derivatives are subject to reliable and verifiable valuation on a daily basis and can be sold, liquidated or closed by an offsetting transaction at any time at their fair value at the Company's initiative;
- (ii) under no circumstances shall these operations cause the Sub-Fund to diverge from its investment objectives;
- (8) Money Market Instruments other than those dealt in on a Regulated Market or on an Other Regulated Market, to the extent that the issue or the issuer of such instruments is itself regulated for the purpose of protecting investors and savings, and provided that such instruments are:
- issued or guaranteed by a central, regional or local authority or by a central bank of a Member State, the European Central Bank, the EU or the European Investment Bank, an Other State or, in case of a Federal State, by one of the members making up the federation, or by a public international body to which one or more Member States belong, or
 - issued by an undertaking any securities of which are dealt in on Regulated Markets or on Other Regulated Markets referred to in (1), (2) or (3) above, or
 - issued or guaranteed by an establishment subject to prudential supervision, in accordance with criteria defined by Community law, or by an establishment which is subject to and complies with prudential rules considered by the Regulatory Authority to be at least as stringent as those laid down by Community law; or
 - issued by other bodies belonging to the categories approved by the Regulatory Authority provided that investments in such instruments are subject to investor protection equivalent to that laid down in the three paragraphs directly above and provided that the issuer is a SICAV whose capital and reserves amount to at least ten million Euro (10,000,000 Euro) and which presents and publishes its annual accounts in accordance with directive 78/660/EEC, is an entity which, within a Group of Companies which includes one or several listed companies, is dedicated to the financing of the group or is an entity which is dedicated to the financing of securitisation vehicles which benefit from a banking liquidity line.

B. Each Sub-Fund may however:

- (1) Invest up to 10% of its assets in assets other than those referred to above under A (1) through (4) and (8).
- (2) Hold Cash on a temporary and ancillary basis up to 20% of the net asset of the Sub-Fund; such restriction may exceptionally and temporarily be exceeded for a period of time strictly necessary if the Company considers that such breach is justified by an exceptionally unfavourable market conditions and is in the best interest of the Shareholders.

The Sub-Fund may also hold Cash Equivalents appropriate to provide for redemptions or to meet other liquidity needs, as may be further described in the investment objectives and policies of the relevant Sub-Funds.

For the sole purpose of processing subscriptions or redemptions of Security Tokens, the Sub-Fund may hold e-money tokens as defined in article 3(1)(7) of Regulation (EU) 2023/1114 (also known as the Markets in Crypto-Assets Regulation – MiCAR). Such e-money tokens will be considered as ancillary liquid assets within the meaning of the CSSF FAQ concerning the Luxembourg Law of 17 December 2010 relating to undertakings for collective investment. When received through subscriptions, the e-money tokens shall be converted to bank deposits at sight or invested in eligible assets as soon as practicable.

- (3) Borrow up to 10% of its assets, provided that such borrowings are made only on a temporary basis. Collateral arrangements with respect to the writing of options or the purchase or sale of forward or futures contracts are not deemed to constitute "borrowings" for the purpose of this restriction.
- (4) Acquire foreign currency by means of a back-to-back loan.

C. In addition, the Company shall comply in respect of the assets of each Sub-Fund with the following investment restrictions per issuer:

(a) Risk Diversification rules

For the purpose of calculating the restrictions described in (1) to (5), (8), (9), (13) and (14) hereunder, companies which are included in the same Group of Companies are regarded as a single issuer.

To the extent an issuer is a legal entity with multiple portfolios where the assets of a portfolio are exclusively reserved to the investors in such portfolio and to those creditors whose claim has arisen in connection with the creation, operation and liquidation of that portfolio, each portfolio is to be considered as a separate issuer for the purpose of the application of the risk spreading rules described under items (1) to (5), (7) to (9) and (12) to (14) hereunder.

• **Transferable Securities and Money Market Instruments**

- (1) No Sub-Fund may purchase additional Transferable Securities and Money Market Instruments of any single issuer if:
 - (i) upon such purchase more than 10% of its assets would consist of Transferable Securities or Money Market Instruments of one single issuer; or
 - (ii) the total value of all Transferable Securities and Money Market Instruments of issuers in each of which it invests more than 5% of its assets would exceed 40% of the value of its assets. This limitation does not apply to deposits and OTC derivative transactions made with financial institutions subject to prudential supervision.
- (2) A Sub-Fund may invest on a cumulative basis up to 20% of its assets in Transferable Securities and Money Market Instruments issued by the same Group of Companies.
- (3) The limit of 10% set forth above under (1)(i) is increased to 35% in respect of Transferable Securities and Money Market Instruments issued or guaranteed by a Member State, by its local authorities, by any Other State or by a public international body of which one or more Member State(s) are member(s).
- (4) The limit of 10% set forth above under (1)(i) is increased up to 25% in respect of qualifying debt securities issued prior to 8 July 2022 by a credit institution which has its registered office in a Member State and which, under applicable law, is submitted to specific public supervision in order to protect the holders of such qualifying debt securities, and with regard to covered bonds as defined in article 3 (1) of the Directive 2019/2162 of the European Parliament and of the Council of 27 November 2019 on the issue of covered bonds and covered bond public supervision and amending Directives 2009/65/EC and 2014/59/EU. For the purposes hereof, "qualifying debt securities" are securities issued prior to 8 July 2022 the proceeds of which are invested in accordance with applicable law in assets providing a return which will cover the debt service through to the maturity date of the securities and which will be applied on a priority basis to the payment of principal and interest in the event of a default by the issuer, and securities which comply with article 3 (1) of the Directive 2019/2162 of the European Parliament and of the Council of 27 November 2019 on the issue of covered bonds and covered bond public supervision and amending Directives 2009/65/EC and 2014/59/EU. To the extent that a relevant Sub-Fund invests more than 5% of its assets in qualifying debt securities issued by such an issuer, the total value of such investments may not exceed 80% of the assets of such Sub-Fund.
- (5) The securities specified above under (3) and (4) are not to be included for purposes of computing the ceiling of 40% set forth above under (1) (ii).
- (6) **Notwithstanding the ceilings set forth above, each Sub-Fund is authorized to invest, in accordance with the principle of risk spreading, up to 100% of its assets in Transferable Securities and Money Market Instruments issued or guaranteed by a Member State, by its local authorities, by any other member state of the Organization for Economic Cooperation and Development ("OECD") such as the United States or by a public international body of which one or more Member State(s) are member(s), provided that (i) such securities are part of at least six different issues and (ii) the securities from any such issue do not account for more than 30% of the total assets of such Sub-Fund.**
- (7) Without prejudice to the limits set forth hereunder under (b), the limits set forth in (1) are raised to a maximum of 20% for investments in stocks and/or bonds issued by the same body when the aim of the Sub-Fund's investment policy is to replicate the composition of a certain stock or bond index which is recognized by the Regulatory Authority, on the following basis:
 - the composition of the index is sufficiently diversified,

- the index represents an adequate benchmark for the market to which it refers,
- it is published in an appropriate manner.

The limit of 20% is raised to 35% where that proves to be justified by exceptional market conditions in particular in Regulated Markets where certain Transferable Securities or Money Market Instruments are highly dominant. The investment up to this limit is only permitted for a single issuer.

- **Bank Deposits**

- (8) A Sub-Fund may not invest more than 20% of its assets in deposits made with the same body.

- **Derivative Instruments**

- (9) The risk exposure to a counterparty in an OTC derivative transaction may not exceed 10% of the Sub-Fund's assets when the counterparty is a credit institution referred to in A. (6) above or 5% of its assets in other cases.
- (10) Investment in financial derivative instruments shall only be made, and within the limits set forth in (2), (5) and (14), provided that the exposure to the underlying assets does not exceed in aggregate the investment limits set forth in (1) to (5), (8), (9), (13) and (14). When the Sub-Fund invests in index-based financial derivative instruments, these investments do not necessarily have to be combined to the limits set forth in (1) to (5), (8), (9), (13) and (14).
- (11) When a Transferable Security or Money Market Instrument embeds a derivative, the latter must be taken into account when complying with the requirements of A (7) (ii) and C (a) (10) and (D) hereunder as well as with the risk exposure and information requirements laid down in the sales documents of the Company.

- **Units of Open-Ended Funds**

- (12) Unless otherwise provided in the investment policy of a particular Sub-Fund, no Sub-Fund may invest more than 10% of its assets in the units of a single UCITS or other UCI referred to under point A (5); furthermore, unless otherwise provided in the investment policy of a particular Sub-Fund, no Sub-Fund may invest in aggregate more than 10% of its assets in the units or shares of other UCITS or UCI.

For the purpose of the application of this investment limit, each portfolio of a UCI with multiple portfolios within the meaning of Article 181 of the 2010 Law is to be considered as a separate issuer provided that the principle of segregation of the obligations of the various portfolios vis-à-vis third parties is ensured.

When a Sub-Fund has acquired shares or units of UCITS, UCITS-ETF and/or other UCIs, the assets of the respective UCITS or other UCIs do not have to be combined for the purposes of the limits laid down in (1) to (5), (8), (9), (13) and (14).

When a Sub-Fund invests in the units of other UCITS and/or other UCIs that are managed, directly or by delegation, by the Management Company or any appointed Investment Manager (referred to as the "Manager" in the present and in the two subsequent paragraphs) or by any other SICAV with which the Manager is linked by common management or control or by way of a direct or indirect stake of more than 10% of the capital or votes, the Manager or other SICAV may not charge subscription or redemption fees on account of the Sub-Fund's investment in the units of such other UCITS and/or UCIs.

- **Combined limits**

- (13) Notwithstanding the individual limits laid down in (1), (8) and (9) above, a Sub-Fund may not combine:
- investments in Transferable Securities or Money Market Instruments issued by,
 - deposits made with, and/or
 - exposures arising from OTC derivative transactions or efficient portfolio transactions undertaken
- with a single body in excess of 20% of its assets.
- (14) The limits set out in (1), (3), (4), (8), (9) and (13) above may not be combined, and thus investments in Transferable Securities or Money Market Instruments issued by the same body, in deposits or derivative instruments made with this body carried out in accordance with (1), (3), (4), (8), (9) and (13) above may not exceed a total of 35% of the assets of each Sub-Fund of the Company.

(b) Limitations on Control

- (15) No Sub-Fund may acquire such amount of shares carrying voting rights which would enable the Company to exercise a significant influence over the management of the issuer.
- (16) No Sub-Fund may acquire (i) more than 10% of the outstanding non-voting shares of any one issuer; (ii) more than 10% of the outstanding debt securities of any one issuer; (iii) more than 10% of the Money Market Instruments of any one issuer; or (iv) more than 25% of the outstanding shares or units of any one UCITS and/or UCI.

The limits set forth in (ii) to (iv) may be disregarded at the time of acquisition if at that time the gross amount of bonds or of the Money Market Instruments or the net amount of the instruments in issue cannot be calculated.

The ceilings set forth above under (15) and (16) do not apply in respect of:

- Transferable Securities and Money Market Instruments issued or guaranteed by a Member State or by its local authorities;
- Transferable Securities and Money Market Instruments issued or guaranteed by any Other State;
- Transferable Securities and Money Market Instruments issued by a public international body of which one or more Member State(s) are member(s);
- shares in the capital of a company which is incorporated under or organized pursuant to the laws of an Other State provided that (i) such company invests its assets principally in securities issued by issuers of that State, (ii) pursuant to the laws of that State a participation by the relevant Sub-Fund in the equity of such company constitutes the only possible way to purchase securities of issuers of that State, and (iii) such company observes in its investment policy the restrictions set forth under C., items (1) to (5), (8), (9) and (12) to (16); and
- shares in the capital of subsidiary companies which, exclusively on behalf of the Company carry on only the business of management, advice or marketing in the country where the subsidiary is located, in regard to the redemption of Shares at the request of Shareholders.

D. In addition, the Company shall comply in respect of its assets with the following investment restrictions per instrument:

Each Sub-Fund shall ensure that its global risk exposure relating to financial derivative instruments does not exceed its total net value.

The exposure is calculated taking into account the current value of the underlying assets, the counterparty risk, foreseeable market movements and the time available to liquidate the positions.

E. Finally, the Company shall comply in respect of the assets of each Sub-Fund with the following investment restrictions:

- (1) No Sub-Fund may acquire commodities or precious metals or certificates representative thereof. For the avoidance of doubt, transactions in foreign currencies, financial instruments, indices, or Transferable Securities as well as futures and forward contracts, options and swaps are not considered as commodities for the purposes of this restriction.
- (2) No Sub-Fund may invest in real estate provided that investments may be made in securities secured by real estate or interests therein or issued by companies which invest in real estate or interests therein.
- (3) No Sub-Fund may issue warrants or other rights to subscribe for its Shares.
- (4) A Sub-Funds may not grant loans or guarantees in favour of a third party, provided that such restriction shall not prevent each Sub-Fund from investing in non fully paid-up Transferable Securities, Money Market Instruments or other financial instruments, as mentioned under A., items (5), (7) and (8).
- (5) The Company may not enter into short sales of Transferable Securities, Money Market Instruments or other financial instruments as listed under A., items (5), (7) and (8).

F. For Master-Feeder structure only the Company shall comply with the following investment restrictions:

Any Sub-Fund acting as a "feeder" within the meaning of Article 77 of the 2010 Law ("Feeder UCITS") of a master UCITS ("Master UCITS") must invest at least 85% of its assets in units of such Master UCITS.

A Master UCITS is a UCITS or one of its sub-funds that a) has at least one Feeder UCITS among its unitholders; b) is not itself a Feeder UCITS; and c) does not hold units of a Feeder UCITS.

A Feeder UCITS may invest up to 15% of its assets in one or more of the following items:

- (a) cash on an ancillary basis in accordance with the second paragraph of Article 41(2) of the 2010 Law,
- (b) financial derivative instruments, which may be used only for hedging purposes in accordance with Article 41(1)(g) and Article 42(2) and (3), and
- (c) movable and immovable property which is essential for the direct pursuit of its business, if the feeder UCITS is an investment company.

Where applicable, the description of the Sub-Fund must contain information on the fees and expenses incurred as a result of the Sub-Fund's investment in the Feeder UCITS and the description of the Sub-Fund must indicate the aggregate fees and expenses of the Master and the Feeder UCITS.

G. Notwithstanding anything to the contrary herein contained:

- (1) The ceilings set forth above may be disregarded by each Sub-Fund when exercising subscription rights attaching to Transferable Securities and Money Market Instruments in such Sub-Fund's portfolio.
- (2) If such ceilings are exceeded for reasons beyond the control of a Sub-Fund or as a result of the exercise of subscription rights, such Sub-Fund must adopt as its priority objective in its sale transactions the remedying of such situation, taking due account of the interests of its Shareholders.

The Sub-Fund has the right to determine additional investment restrictions to the extent that those restrictions are necessary to comply with the laws and regulations of countries where Shares of the Company are offered or sold.

H. Global Risk Exposure and Risk Management

The Management Company must employ a risk-management processes which enables it to monitor and measure at any time the risk of the positions in its Sub-Funds and their contribution to the overall risk profile of its Sub-Funds.

In relation to financial derivative instruments the Management Company must employ a process (or processes) for accurate and independent assessment of the value of OTC derivatives and the Management Company shall ensure for each Sub-Fund that the global risk exposure relating to financial derivative instruments does not exceed the total net value of its portfolio.

The global risk exposure is calculated taking into account the current value of the underlying assets, the counterparty risk, future market movements and the time available to liquidate the positions.

Each Sub-Fund may invest, according to its investment policy and within the limits laid down in Appendix I "Investment Restrictions" and in Appendix II "Investment Techniques and Instruments" in financial derivative instruments provided that the exposure to the underlying assets does not exceed in aggregate the investment limits laid down in Appendix I.

When a Sub-Fund invests in index-based financial derivative instruments, these investments do not necessarily have to be combined to the limits laid down in Appendix I "Investment Restrictions" item C (a) (1)-(5), (8), (9), (13) and (14).

When a Transferable Security or Money Market Instrument embeds a derivative, the latter must be taken into account when complying with the requirements of this Section.

The Company calculates all the Sub-Funds' overall exposure using the commitment method, except for the ODDO BHF Credit Opportunities where the Company uses the Absolute Value at Risk method.

Under the commitment approach, all financial derivative positions of the Sub-Fund are converted into the market value of the equivalent position in the underlying assets. Netting and hedging arrangements may be taken into account when calculating global exposure, where these arrangements do not disregard obvious and material risks and result in a clear reduction in risk exposure. Under this approach, the global exposure of a Sub-Fund is limited to 100% of its Net Asset Value.

VaR is a measure of the maximum potential loss on all the positions held by the Sub-Fund due to market risk rather than leverage. More particularly, VaR measures the maximum potential loss at a given confidence level (probability) over a specific time period (holding period) under normal market conditions.

The calculation of VaR should be carried out in accordance with the following parameters (the "VaR Parameters"):

- one-sided confidence interval of 99 %;
- holding period equivalent to 1 month (20 Business Days);
- effective observation period (history) of risk factors of at least 1 year (250 Business Days) unless a shorter observation period is justified by a significant increase in price volatility (for instance extreme market conditions);
- updates to the data set on a quarterly basis, or more frequent when market prices are subject to material changes; and
- at least daily calculation.

A confidence interval and/or a holding period differing from the VaR Parameters in (a) and (b) above may be used by a Sub-Fund provided the confidence interval is not below 95% and the holding period does not exceed 1 month (20 Business Days).

Absolute VaR method

The Absolute VaR method will be used if the risk/return profile of a Sub-Fund changes frequently or if the definition of a benchmark is not possible. The Absolute VaR approach requires that, on any day, the VaR of the portfolio cannot be greater than 20% of the Net Asset Value of the Sub-Fund. If different VaR Parameters are being used to calculate VaR, the maximum absolute VaR limit of 20% should be rescaled to reflect the new VaR Parameters. Shareholders should refer below for the expected level of leverage and method used for the determination of the expected level of leverage.

Expected Level of Leverage

Where a Sub-Fund determines its global exposure on the basis of the Absolute VaR method, as specified for each Sub-Fund, leverage shall be determined by taking into account the financial derivative instruments entered into by the Sub-Fund, the reinvestment of collateral received in relation to efficient portfolio management transactions as well as any use of collateral within any other efficient portfolio management transaction, in particular in respect of any other securities lending transaction of collateral. With respect to financial derivative instruments, leverage shall be calculated as the sum of the notionals of the derivatives used. The expected level of leverage for each Sub-Fund as well as the possibility of a higher level of leverage is specified for each Sub-Fund hereunder.

The Company calculates each of the ODDO BHF Credit Opportunities' overall exposure using the Absolute VaR method with a confidence level of 99% and a horizon of 20 Business Days.

Under this approach, the expected leverage is 200%, but it may be higher under certain market conditions.

I. Ukraine Crisis

Pursuant to the provisions of EU Regulation No. 833/2014, the subscription of shares is prohibited from 12 April 2022 to any Russian or Belarusian national, to any natural person residing in Russia or Belarus or to any legal person, entity or body established in Russia or Belarus except nationals of a Member State and natural persons holding a temporary or permanent residence permit in a Member State.

APPENDIX II: INVESTMENT TECHNIQUES AND INSTRUMENTS

The Company may employ techniques and instruments relating to Transferable Securities and other financial liquid assets for efficient portfolio management and hedging purposes, in compliance with applicable laws and regulations, including CSSF Circular 08/356, CSSF Circular 14/592, and SFTR. When these operations concern the use of derivative instruments, these conditions and limits shall conform to the provisions laid down in Appendix I "Investment Restrictions".

Furthermore, the Company may, for efficient portfolio management purposes, enter into Securities Lending and Repurchase Agreement Transactions, provided that the rules set out in this Appendix II are complied with.

To the extent provided for in respect of a particular Sub-Fund, the Company may use techniques and instruments relating to eligible financial securities and money market instruments, and in particular repo transactions, acquisition transactions or temporary transfer of securities, provided that these techniques and instruments are used for the purpose of efficient portfolio management or cash management purpose.

In any case, these techniques and instruments shall not cause the Company to deviate from its objectives as set out in the Prospectus.

II. - The techniques and instruments mentioned meet the following criteria:

1. They will be used according to market conditions, i.e. these techniques and instruments, in the context of the efficient portfolio management will generate the highest possible yield at a given risk level or the lowest possible risk at a given yield level compared to other investments that can be made by the relevant Sub-Fund in accordance with its investment policy and restrictions. They will be used temporarily according to the market opportunities, as the Sub-Funds operate exclusively in "specific" repurchase agreements, i.e. the borrower pays a "rent" to the relevant Sub-Fund for the duration of the securities' borrowing. The Sub-Funds react to market fluctuations independently of interest rates as the transactions are indexed to a floating rate + margin (€STR). In addition, the transactions can be terminated at any time with a 24 hours' notice. The Sub-Funds lend indiscriminately to issuers as long as the income/gain is advantageous for the performance of the relevant Sub-Fund. Almost all issuers can be borrowed in the repo market to meet the demands of liquidity providers or arbitrageurs in accordance with the investment policy of the relevant Sub-Fund;
2. They are economically appropriate, in the sense that their implementation is profitable;
3. They are used to achieve the following objective: generate additional capital or income for the Company, through the transaction itself and/or through the reinvestment of cash collateral;
4. The risks they entail are taken into account in an appropriate manner by the risk management process of the Company.

As at the date of this Prospectus, none of the Sub-Funds engage in buy-sell back transactions, sell buy-back transactions or reverse repurchase agreement transactions within the meaning of SFTR. Neither does any Sub-Fund borrow securities. Should any of the Sub-Funds make use of such instruments, the Prospectus shall be amended accordingly.

Under no circumstances shall these operations cause a Sub-Fund to diverge from its investment objectives as laid down under "Investment Objectives and Policies" in the Prospectus or substantially increase the stated risk profile of a Sub-Fund.

In order to limit the exposure of a Sub-Fund to the risk of default of the counterparty under a Securities Lending and Repurchase Agreements Transactions, the Sub-Fund will receive cash only as collateral, as further specified in section C (Collateral policy) below.

Assets received under a Securities Lending Transactions and Repurchase Agreements Transactions (other than collateral) are held by the Depository or its delegate in accordance with section titled "Depository" of this Prospectus.

A. Securities Lending

Securities lending transactions consist in transactions whereby a lender transfers securities or instruments to a borrower, subject to a commitment that the borrower will return equivalent securities or instruments on a future date or when requested to do so by the lender, such transaction being considered as securities lending for the party transferring the securities or instruments and being considered as securities borrowing for the counterparty to which they are transferred.

Where specified in the "Investment Objectives and Policies" section of this Prospectus for a Sub-fund, the Company, for that

Sub-Fund, may enter into Securities Lending transactions provided that it complies with the following rules:

- (i) the counterparty must be a first class bank, first class broker/dealer or such other first class financial institution that is regarded permissible counterparty under Luxembourg law, as the same may be amended from time to time.
- (ii) it may only lend or borrow securities or instruments either directly, through a standardised system organised by Euroclear or Clearstream Banking or another recognised clearing institution or through a lending system organised by a financial institution subject to prudential supervision rules considered by the CSSF as equivalent to those provided by EU law and specialised in this type of transaction; and
- (iii) it is entitled at any time, under the terms of the agreement, to request the return of the securities or instruments lent or to terminate the agreement. The term of the agreement must not exceed 30 days (unless such contract is terminable at any time). Moreover, the Company cannot lend more than 50% of the total value of the relevant Sub-Fund unless the contract is terminable at any time, without charge.
- (iv) it may not lend securities which serve as underlying instruments linked to derivative financial instruments. Securities used to provide cover in respect of derivatives on an exchange rate or currency are not regarded as being linked to the said derivative.

The principal risk when lending securities is that the borrower might become insolvent or refuse to honor its obligations to return the securities. In this event, a Sub-Fund could experience delays in recovering its securities and may possibly incur a capital loss. A Sub-Fund may also incur a loss in reinvesting the cash collateral it receives. Such a loss may arise due to a decline in the value of the investment made with cash collateral received from a securities lending counterparty. A decline in the value of such investment of the cash collateral would reduce the amount of collateral available to be returned by the Sub-Fund to the securities lending counterparty at the conclusion of the securities lending contract. The Sub-Fund would be required to cover the difference in value between the collateral originally received and the amount available to be returned to the counterparty, thereby resulting in a loss to the Sub-Fund.

B. Repurchase Agreements

Repurchase agreements consist of transactions governed by an agreement whereby a party sells securities or instruments to a counterparty, subject to a commitment to repurchase them, or substituted securities or instruments of the same description, from the counterparty at a specified price on a future date specified, or to be specified, by the transferor. Such transactions are commonly referred to as repurchase agreements for the party selling the securities or instruments.

This investment technique permits authorized Sub-Fund to earn a fixed rate of return insulated from market fluctuations during such period.

Where specified in the "Investment Objectives and Policies" section of this Prospectus for a Sub-fund, the Company, for that Sub-Fund, may enter into repurchase agreements transactions as buyer or seller of securities or instruments. Such transactions are, in particular, subject to the following conditions:

- (i) the counterparty must be subject to prudential supervision rules considered by the CSSF as equivalent to those prescribed by EU law; and
- (ii) the Sub-Fund must be able, at any time, to terminate the agreement or recall the full amount of cash in any securities or instruments subject to a repurchase agreement. Fixed-term transactions that do not exceed seven days should be considered as arrangements on terms that allow cash or assets to be recalled at any time;
- (iii) the Company may not sell securities which are used as underlying instruments linked to derivative financial instruments, which have been lent. Securities used to provide cover in respect of derivatives on an exchange rate or currency are not regarded as being linked to the said derivative.

The principal risk when repurchase agreements is that the counterparty might become insolvent or refuse to honor its obligations to repurchase or substitute the securities. In this event, a Sub-Fund could experience delays in recovering or substituting its securities and may possibly incur a capital loss. A Sub-Fund may also incur a loss in reinvesting the cash collateral it receives. Such a loss may arise due to a decline in the value of the investment made with cash collateral received from a counterparty. A decline in the value of such investment of the cash collateral would reduce the amount of collateral available to be returned by the Sub-Fund to the counterparty at the conclusion of the repurchase agreement. The Sub-Fund would be required to cover the difference in value between the collateral originally received and the amount available to be returned to the counterparty, thereby resulting in a loss to the Sub-Fund.

C. Methods of calculating and sharing the return on temporary purchases and sales of securities

In the event of temporary sales of securities (security lending or repurchase agreements), the resulting payment, net of fees, is entirely allocated to the Sub-Funds. The fees, which represent 25% of the gross revenues, are paid back to the counterparty. With the exception of fees payable to the counterparty, no other direct fee shall be charged to the Sub-Fund in the event of temporary sales of securities. The Management Company shall not receive any payment resulting from these operations. The counterparty of the Sub-Funds is ODDO BHF SCA as principal agent.

For further information, please refer to the Fund's Annual Report.

D. Collateral policy

This section sets out the policy adopted by the Management Company for the management of collateral received for the benefit of each Sub-Fund in the context of OTC financial derivatives instruments and efficient portfolio management techniques (Securities Lending and Repurchase Agreement Transactions). All cash or assets received by a Sub-Fund in the context of efficient portfolio management techniques will be considered as collateral for the purposes of this section.

Eligible collateral

Collateral received for the benefit of a Sub-Fund may be used to reduce its counterparty risk exposure if it complies with the conditions set out in applicable laws and regulations. In particular, collateral received for the benefit of a Sub-Fund should comply with the following conditions:

- (i) collateral other than cash should be of high quality, highly liquid and traded on a regulated market or multilateral trading facility with transparent pricing in order that it can be sold quickly at a price that is close to pre-sale valuation;
- (ii) collateral should be valued at least on a daily basis and assets that exhibit high price volatility should not be accepted as collateral unless suitably conservative haircuts are in place, as further specified below;
- (iii) collateral should be issued by an entity that is independent from the counterparty and is expected not to display a high correlation with the performance of the counterparty;
- (iv) collateral should be sufficiently diversified in terms of countries, markets and issuers. The maximum exposure of a Sub-Fund to any given issuer included in the basket of collateral received is limited to 20% of the net assets of the Sub-Fund. When the Sub-Fund is exposed to different counterparties, collateral received should be aggregated to calculate the 20% limit of exposure to a single issuer. By way of derogation, this limit may be exceeded and up to 100% of the collateral received by a Sub-Fund may consist in Transferable Securities and Money Market Instruments issued or guaranteed by a Member State, by one or more of its local authorities, **by a member State of the OECD or the Group of Twenty (G20) such as the United States of America, by the Republic of Singapore, by the Hong Kong Special Administrative Region of the People's Republic of China**, or by a public international body of which one or more Member States are members, provided that such securities or instruments are part of a basket of collateral comprised of securities or instruments of at least six different issues and that securities or instruments from any one issue do not account for more than 30% of the net assets of the Sub-Fund;
- (v) where there is a title transfer, collateral received should be held by the Depositary or one of its sub-custodians to which the Depositary has delegated the custody of such collateral. For other types of collateral arrangement (e.g. a pledge), collateral can be held by a third party custodian which is subject to prudential supervision and which is unrelated to the provider of the collateral;
- (vi) collateral should be capable of being fully enforced by the Company at any time without reference to or approval from the counterparty; and
- (vii) where applicable, collateral received should also comply with the control limits set out in Appendix I (Investment Restrictions) of this Prospectus.

Subject to the above conditions, permitted forms of collateral consist only of cash in Euro.

Level of collateral

The level of collateral required for OTC financial derivatives transactions and efficient portfolio management techniques will be determined as per the agreements in place with the individual counterparties, taking into account factors including the nature and characteristics of transactions, the creditworthiness and identity of counterparties and prevailing market conditions. At all times the counterparty exposure not covered by collateral will remain below the applicable counterparty risk limits set out in this Prospectus.

It is expected that the amount of collateral posted by a counterparty in favour of each Sub-Fund will be such that the net exposure of the relevant Sub-Fund to that counterparty arising from OTC financial derivatives transactions and efficient portfolio management techniques is aimed to be zero percent (0%) of its Net Asset Value on each Valuation Day: each Sub-Fund is expected to be fully collateralised.

Haircut policy

No haircut will be applicable to collateral in the form of cash

Reinvestment of collateral

Non-cash collateral received for the benefit of a Sub-Fund may not be sold, re-invested or pledged. Cash collateral received for the benefit of a Sub-Fund can only be:

- (i) placed on deposit with a credit institution which has its registered office in a Member State or a credit institution located in a third-country which is subject to prudential rules considered by the CSSF as equivalent to those laid down in EU law;
- (ii) invested in high-quality government bonds;
- (iii) invested in short-term money market funds as defined in the Guidelines on a Common Definition of European Money Market Funds issued by ESMA (CESR/10-049) as may be amended from time to time.

Re-invested cash collateral should be diversified in accordance with the diversification requirements applicable to non-cash collateral as set out above. Re-investment of cash collateral involves certain risks for the Sub-Fund, as described in section Risk Factors

Centrally cleared OTC derivatives

The Company may enter into OTC derivatives cleared through a clearinghouse that serves as a central counterparty. Generally, centrally-cleared OTC derivatives may be cleared under the agency model or the principal-to-principal model. Under the principal-to-principal model there is usually one transaction between the Company and its clearing broker and another back-to-back transaction between the clearing broker and the central counterparty, whereas under the agency model there is one transaction between the Company and the central counterparty. For these trades, the Company will post and/or receive collateral for the benefit of a Sub-Fund in the form of margin payments, as agreed with the clearing broker in accordance with the rules of the applicable clearinghouse, including rules on acceptable forms of collateral, collateral level, valuation and haircuts. The Company will ensure that variation margin receivable from the clearing broker is consistent with its collateral policy. Central clearing is designed to reduce counterparty credit risk and increase liquidity compared to bilaterally-cleared OTC derivatives, but it does not eliminate those risks completely.

E. Management of conflicts of interest

Due to its size, its membership of the Oddo BHF group, the creation of a Franco-German asset management business line and the various investment services offered and the management expertise offered, the Management Company is likely to encounter, in the normal course of its business, the following situation that could generate conflicts of interest.

The Management Company uses the services of the ODDO group as principal agent for securities financing transactions (securities lending under repurchase agreements).

With regard to securities lending/repurchase agreements carried out with ODDO BHF SCA, the resulting payment, net of fees, is entirely allocated to the Sub-Funds. The fees, which represent 25% of the gross revenues, are paid back to the counterparty. No other direct fee shall be charged to the Sub-Fund. The Management Company shall not receive any payment resulting from

these operations. The counterparty of the Sub-Funds is ODDO BHF SCA as principal agent. This appears to be in line with market practice.

The Management Company has implemented procedures, controls and limits to manage these potential conflicts of interest as effectively as possible. It also has a governance system that is independent of the ODDO group. As a result, no member of the ODDO Group management holds a management position in the Management Company and vice versa.

With the support of the Management Company's compliance department, employees and their line managers in the Management Company are responsible for the permanent and diligent detection of conflicts of interest, whether proven or potential.

Employees who detect or think they have detected a conflict of interest must immediately alert the head of control, who helps managers and heads of department with their decision-making process in managing conflicts of interest.

If a conflict of interest is deemed to exist that is not covered by an existing procedure, the head of control makes a recommendation to the management committee or executive committee of the Management Company on the basis of best market practices.

In accordance with article 35 of the EU DR of 19/12/2012, the Management Company keeps and regularly updates a register listing the collective investment activities exercised by it or on its own behalf for which a conflict of interest that represents a significant interest of harming the interests of one or several of its clients or UCITS has occurred or, in the case of an ongoing activity, is likely to occur.

In some complex or specific cases, the Management Company may decide that the organisational measures taken by the Management Company are not sufficient to guarantee that the risk of harming clients' interests can be avoided.

In this case, the Management Company clearly informs them before acting in their name of the general nature or source of these conflicts of interest.

APPENDIX III:

DETERMINATION OF THE NET ASSET VALUE

1) Calculation and Publication

The Net Asset Value per Share of each Class in respect of each Sub-Fund shall be calculated in the Reference Currency of such Sub-Fund and shall be determined as of any Valuation Day (as more specifically defined hereinafter) by dividing the net assets of the Company attributable to such Class of Shares in such Sub-Fund (being the value of the portion of assets less the portion of liabilities attributable to such Class on any such Valuation Day) by the total number of Shares in the relevant Class then outstanding. The Net Asset Value per Share may be rounded up or down to the nearest unit of the relevant currency, as the Board of Directors shall determine.

If, since the time of determination of the Net Asset Value per Share on the relevant Valuation Day, there has been a material change in the quotations in the markets on which a substantial portion of the investments attributable to the relevant Sub-Fund are dealt in or quoted, the Company may, in order to safeguard the interests of the Shareholders and the Company, cancel the first valuation and carry out a second valuation. All subscription, redemption and conversion requests shall be treated on the basis of this second valuation.

The Net Asset Value per Share of each Sub-Fund is determined on each Business Day (except December 24th) in Luxembourg ("Valuation Day"). The Net Asset Value per Share shall be calculated on the basis of the value of the underlying investments of the relevant Sub-Fund pursuant to Article 11 of the Articles (See "Appendix VI").

The Net Asset Value per Share and the issue, redemption and conversion prices per Share of each Class in each Sub-Fund may be obtained during business hours at the registered office of the Company.

2) Temporary Suspension of the Calculation

In each Sub-Fund, the Company may temporarily suspend the calculation of the Net Asset Value per Share and the issue, redemption and conversion of Shares, pursuant to Article 12 of the Articles (See "Appendix VI").

Notice of the beginning and of the end of any period of suspension shall be given by the Company to all the Shareholders by way of publication and may be sent to Shareholders affected, i.e. having made an application for subscription, redemption or conversion of Shares for which the calculation of the Net Asset Value has been suspended.

Any application for subscription, redemption or conversion of Shares is irrevocable except in case of suspension of the calculation of the Net Asset Value per Share in the relevant Sub-Fund, in which case Shareholders may give notice that they wish to withdraw their application.

If no such notice is received by the Company, such application will be dealt with on the first Valuation Day as determined for each relevant Sub-Fund following the end of the period of suspension.

APPENDIX IV:

GENERAL INFORMATION

1) Corporate Information

The Company was incorporated on 18 December 1998 under the name of "WestLB Compass Fund" and is governed by the Companies Law and by the 2010 Law, as they have been or may be amended in the future.

Launch Date	Sub-Funds
30/06/2000	ODDO BHF Euro High Yield Bond
13/03/2002	ODDO BHF Sustainable Euro Corporate Bond
01/06/2011	ODDO BHF Euro Credit Short Duration

	ODDO BHF Laufzeitfonds 2032

The registered office of the Company is established at 5, Allée Scheffer L-2520 Luxembourg, Grand Duchy of Luxembourg. The Company is recorded at the "Registre de Commerce et des Sociétés" with the District Court of Luxembourg under the number B 67 580.

The Articles have been published in the Mémorial of 1 February 1999 and have been filed with the Chancery of the District Court of Luxembourg together with the "Notice légale" on the issue and sale of Shares. The latest amendment of the Articles was made on 4 January 2018, a publication in the RESA acknowledging such amendment was made on 17 January 2018.

Any interested person may inspect these documents at the Chancery of the District Court of Luxembourg; copies are available on request at the registered office of the Company.

The minimum capital of the Company, as provided by law, is Euro 1,250,000.-. The capital of the Company is represented by fully paid-up Shares of no par value.

The Company is open-ended which means that it may, at any time on the request of the Shareholders, redeem its Shares at prices based on the applicable Net Asset Value per Share.

In accordance with the Articles, the Board of Directors may issue Shares in each Sub-Fund. A separate portfolio of assets is maintained for each Sub-Fund and is invested in accordance with the investment objective applicable to the relevant Sub-Fund. As a result, the Company is an "Umbrella Fund" enabling investors to choose between one or more investment objectives by investing in one or more Sub-Funds.

The Board of Directors of the Company may from time to time decide to create further Sub-Funds; in that event, the Prospectus will be updated and amended so as to include detailed information on the new Sub-Funds.

The share capital of the Company will be expressed in Euro being the Reference Currency of the Company and will be equal, at any time, to the total value of the net assets of all the Sub-Funds.

The Articles, at Article 10, contain provisions enabling the Company to restrict or prevent the ownership of Shares (See "Appendix VI").

2) Dissolution and Liquidation of the Company

The Company may at any time be dissolved by a resolution of the general meeting of Shareholders subject to the quorum and majority requirements applicable for amendments to the Articles.

Whenever the share capital falls below two-thirds of the minimum capital indicated in Article 5 of the Articles, the question of the dissolution of the Company shall be referred to a general meeting of Shareholders by the Board of Directors. The general meeting, for which no quorum shall be required, shall decide by simple majority of the Shares represented at the meeting.

The question of the dissolution of the Company shall also be referred to a general meeting of Shareholders whenever the share capital falls below one-fourth of the minimum capital set by Article 5 of the Articles; in such event, the general meeting shall be held without any quorum requirement and the dissolution may be decided by Shareholders holding one-fourth of the Shares represented at the meeting.

The meeting must be convened so that it is held within a period of forty days as from ascertainment that the net assets have fallen below two-thirds or one-fourth of the legal minimum, as the case may be.

Liquidation shall be carried out by one or several liquidators, who may be physical persons or legal entities, duly approved by the relevant Luxembourg supervisory authority and appointed by the general meeting of Shareholders which shall determine their powers and their compensation.

The net proceeds of liquidation corresponding to each Class of Shares within each Sub-Fund shall be distributed by the liquidators to the holders of Shares of the relevant Class in the relevant Sub-Fund in proportion to their holding of such Shares in such Class.

Should the Company be voluntarily or compulsorily liquidated, its liquidation will be carried out in accordance with the provisions of the 2010 Law. Such law specifies the steps to be taken to enable Shareholders to participate in the distribution(s) of the liquidation proceeds and provides for a deposit in escrow at the "Caisse de Consignation" at the time of the close of liquidation. Amounts not claimed from escrow within the statutory limitation period shall be liable to be forfeited in accordance with the provisions of Luxembourg law.

3) Termination, Division and Amalgamation of Sub-Funds or classes of Shares

In the event that for any reason the value of the total net assets in any Sub-Fund or the value of the net assets of any Class of Shares within a Sub-Fund has decreased to, or has not reached, an amount determined by the Board of Directors to be the minimum level for such Sub-Fund, or such Class of Shares, to be operated in an economically efficient manner or in case of a substantial modification in the political, economic or monetary situation or as a matter of economic rationalisation, the Board of Directors may decide to compulsorily redeem all the Shares of the relevant Class or Classes at the Net Asset Value per Share (taking into account actual realisation prices of investments and realisation expenses) calculated on the Valuation Day or Valuation Time during the course of a Valuation Day at which such decision shall take effect. The Company shall serve a notice to the holders of the relevant Class or Classes of Shares prior to the effective date for the compulsory redemption, which will indicate the reasons and the procedure for the redemption operations: registered holders shall be notified in writing. Unless it is otherwise decided in the interests of, or to keep equal treatment between the Shareholders, the Shareholders of the Sub-Fund concerned may continue to request redemption or conversion of their Shares free of charge (but taking into

account actual realisation prices of investments and realisation expenses) prior to the date effective for the compulsory redemption.

Under the same circumstances provided for in this section, the Board of Directors may decide to reorganise a Sub-Fund or a Class of Shares by means of a division into two or more Sub-Funds or Classes of Shares, by means of an amalgamation with another Sub-Fund or another Luxembourg or foreign UCITS or by means of an amalgamation of a Class of Shares into another Class of Shares.

Notwithstanding the powers conferred to the Board of Directors by the preceding paragraph, the general meeting of Shareholders of any one or all Classes of Shares issued in any Sub-Fund may, upon proposal from the Board of Directors, (i) redeem all the Shares of the relevant Class or Classes and refund to the Shareholders the Net Asset Value of their Shares (taking into account actual realisation prices of investments and realisation expenses) calculated on the Valuation Day, or the Valuation Time during the course of a Valuation Day, at which such decision shall take effect, or (ii) decide upon the division of a Sub-Fund or a Class of Shares or the amalgamation with another Sub-Fund or another Luxembourg or foreign UCITS. There shall be no quorum requirements for such general meeting of Shareholders which shall decide by resolution taken by simple majority of the votes cast if such decision does not result in the liquidation of the Company.

Assets which may not be distributed to their beneficiaries upon the implementation of the redemption will be deposited with the Caisse de Consignation on behalf of the persons entitled thereto. If not claimed, they shall be forfeited in accordance with Luxembourg law.

All redeemed Shares shall be cancelled.

Any amalgamation of a Sub-Fund within the Company shall be decided by the Board of Directors unless the Board of Directors decides to submit the decision for an amalgamation to a meeting of Shareholders of the Class or Sub-Fund concerned. No quorum is required for this meeting and decisions are taken by the simple majority of the votes cast. In case of an amalgamation of a Sub-Fund where, as a result, the Company ceases to exist, the amalgamation shall be decided by a meeting of Shareholders resolving in accordance with the quorum and majority requirements for amending the Articles of Incorporation.

Any amalgamation of a Sub-Fund shall be subject to the provisions on amalgamations set forth in the 2010 Law and any implementation regulation.

APPENDIX V:

Documents Available

Copies of the following documents may be obtained during usual business hours on any Business Day in Luxembourg at the registered office of the Company:

- (i) the Articles of Incorporation of the Company;
- (ii) the agreement on services referred to under the heading "Depositary";
- (iii) the agreement on services referred to under the heading "UCI Administrator";
- (iv) the management company agreement;
- (v) the agreements with the Investment Manager(s) referred to under the heading " Investment Managers";
- (vi) the agreements with the distributors referred to under the heading "Distributors";
- (vii) the latest reports and accounts referred to under the heading "Meetings of, and Reports to, Shareholders";
- (viii) the Luxembourg law of 17 December 2010 on undertakings for collective investment and the Luxembourg law of 10 August 1915 on commercial companies, as amended.

Appendix VI:

Excerpts from the Articles of Incorporation

Article 10. - Restrictions on Ownership of Shares

The Company may restrict the ownership of shares in the Company by any person, firm or corporate body, if, in the opinion of the Company, such holding may be detrimental to the Company, if it may result in a breach of any law, Luxembourg or foreign, or, of these Articles of Incorporation or the sales documents of the Company or, if as a result thereof the Company may become exposed to tax disadvantages or other financial disadvantages that it would not have otherwise incurred (such persons, firms or corporate bodies to be determined by the Board of Directors being herein referred to as "Prohibited Persons").

For such purposes the Company may:

A.- decline to issue any shares and decline to register any transfer of shares, where it appears to it that such registry or transfer would or might result in legal or beneficial ownership of such shares by a Prohibited Person; and

B.- at any time require any person whose name is entered in, or any person seeking to register the transfer of shares on the Register of shareholders, to provide any information and/or supporting documents, which it may consider necessary for the purpose of determining whether or not beneficial ownership of such shareholder's shares remains with a Prohibited Person, or whether such registry will result in beneficial ownership of such shares by a Prohibited Person; and

C.- decline to accept the vote of any Prohibited Person at any meeting of shareholders of the Company; and

D.- where it appears to the Company that any Prohibited Person either alone or in conjunction with any other person is a beneficial owner of shares, instruct such shareholder to sell his shares and to provide to the Company evidence of the sale within thirty (30) days of the notice. If such shareholder fails to comply with the instruction, the Company may compulsorily redeem or cause to be redeemed from any such shareholder all shares held by such shareholder in the following manner:

(1) The Company shall serve a second notice (the "purchase notice") upon the shareholder holding such shares or appearing in the Register of shareholders as the owner of the shares to be purchased, specifying the shares to be purchased as aforesaid, the manner in which the purchase price will be calculated and the name of the purchaser.

Any such notice may be served upon such shareholder by posting the same in a prepaid registered envelope addressed to such shareholder at his last address known to or appearing in the books of the Company. The said shareholder shall thereupon forthwith be obliged to deliver to the Company the share certificate or certificates representing the shares specified in the purchase notice.

Immediately after the close of business on the date specified in the purchase notice, such shareholder shall cease to be the owner of the shares specified in such notice and, in the case of registered shares, his name shall be removed from the Register of shareholders, and in the case of bearer shares, the certificate or certificates representing such shares shall be cancelled.

(2) The price at which each such share is to be purchased (the "purchase price") shall be an amount based on the net asset value per share of the relevant class as at the Valuation Day or Valuation Time during the course of a Valuation Day specified by the Board of Directors for the redemption of shares in the Company next preceding the date of the purchase notice or next succeeding the surrender of the share certificate or certificates representing the shares specified in such notice, whichever is lower, all as determined in accordance with Article 8 hereof, less any service charge provided therein.

(3) Payment of the purchase price will be made available to the former owner of such shares normally in the currency fixed by the Board of Directors for the payment of the redemption price of the shares of the relevant class and will be deposited for payment to such owner by the Company with a bank in Luxembourg or elsewhere (as specified in the purchase notice) upon final determination of the purchase price following surrender of the share certificate or certificates specified in such notice and unmatured dividend coupons attached thereto. Upon service of the purchase notice as aforesaid such former owner shall have no further interest in such shares or any of them, nor any claim against the Company or its assets in respect thereof, except the right to receive the purchase price (without interest) from such bank following effective surrender of the share certificate or certificates as aforesaid. Any redemption proceeds receivable by a shareholder under this paragraph, but not collected within a period of five years from the date specified in the purchase notice, may not thereafter be claimed and shall revert to the relevant class or classes of shares. The Board of Directors shall have power from time to time to take all steps necessary to perfect such reversion and to authorise such action on behalf of the Company.

(4) The exercise by the Company of the power conferred by this Article shall not be questioned or invalidated in any case, on the ground that there was insufficient evidence of ownership of shares by any person or that the true ownership of any shares

was otherwise than appeared to the Company at the date of any purchase notice, provided in such case the said powers were exercised by the Company in good faith.

"Prohibited Person" as used herein does neither include any subscriber to shares of the Company issued in connection with the incorporation of the Company while such subscriber holds such shares nor any securities dealer who acquires shares with a view to their distribution in connection with an issue of shares by the Company. "Prohibited Person" includes a "U.S. Person" as defined in the sales document of the Company.

The board of directors may restrict the issue and transfer of shares of a class to the institutional investors within the meaning of Article 174 of the 2010 Law ("Institutional Investor(s)"). The board of directors may, at its discretion, delay the acceptance of any subscription application for shares of a class reserved for Institutional Investors until such time as the Company has received sufficient evidence that the applicant qualifies as an Institutional Investor. If it appears at any time that a holder of shares of a class reserved to Institutional Investors is not an Institutional Investor, the board of directors will convert the relevant shares into shares of a class which is not restricted to Institutional Investors (provided that there exists such a class with similar characteristics) or compulsorily redeem the relevant shares in accordance with the provisions set forth above in this Articles of Incorporation. The board of directors will refuse to give effect to any transfer of shares and consequently refuse for any transfer of shares to be entered into the Register of shareholders in circumstances where such transfer would result in a situation where shares of a class restricted to Institutional Investors would, upon such transfer, be held by a person not qualifying as an Institutional Investor.

In addition to any liability under applicable law, each shareholder who does not qualify as an Institutional Investor, and who holds shares in a class restricted to Institutional Investors or any shareholder precluded from holding shares in the Company, shall hold harmless and indemnify the Company, the board of directors, the other shareholders of the relevant class and the Company's agents for any damages, losses and expenses resulting from or connected to such holding circumstances where the relevant shareholder had furnished misleading or untrue documentation or had made misleading or untrue representations to wrongfully establish its status or has failed to notify the Company of its change of such status.

Article 11.- Calculation of Net Asset Value per Share

The net asset value per share of each class of shares shall be calculated in the Reference Currency (as defined in the sales documents for the shares) of the relevant Sub-Fund and, to the extent applicable within a Sub-Fund, expressed in the currency of quotation for the relevant class of shares. It shall be determined as of any Valuation Day, or any Valuation Time during the course of a Valuation Day, by dividing the net assets of the Company attributable to each class of shares, being the value of the portion of assets less the portion of liabilities attributable to such class, on any such Valuation Day, or any such Valuation Time during the course of a Valuation Day, by the number of shares in the relevant class then outstanding, in accordance with the Valuation Rules set forth below. The net asset value per share may be rounded up or down to the nearest unit of the relevant currency as the Board of Directors shall determine. If since the time of determination of the net asset value there has been a material change in the quotations in the markets on which a substantial portion of the investments attributable to the relevant class of shares are dealt in or quoted, the Company may, in order to safeguard the interests of the shareholders and the Company, cancel the first valuation and carry out a second valuation.

The valuation of the net asset value of the different classes of shares shall be made in the following manner:

I. The assets of the Company shall include:

- 1) all cash on hand or on deposit, including any interest accrued thereon;
- 2) all bills and demand notes payable and accounts receivable (including proceeds of securities sold but not delivered);
- 3) all bonds, time notes, certificates of deposit, shares, stock, debentures, debenture stocks, subscription rights, warrants, options and other securities, financial instruments and similar assets owned or contracted for by the Company (provided that the Company may make adjustments in a manner not inconsistent with paragraph (a) below with regards to fluctuations in the market value of securities caused by trading ex-dividends, ex-rights, or by similar practices);
- 4) all stock dividends, cash dividends and cash distributions receivable by the Company to the extent information thereon is reasonably available to the Company;
- 5) all interest accrued on any interest-bearing assets owned by the Company except to the extent that the same is included or reflected in the principal amount of such asset;

- 6) the preliminary expenses of the Company, including the cost of issuing and distributing shares of the Company, insofar as the same have not been written off;
- 7) all other assets of any kind and nature including expenses paid in advance.

The value of such assets shall be determined as follows:

- (a) the value of any cash on hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid and not yet received shall be deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof shall be arrived at after making such discount as the Company may consider appropriate in such case to reflect the true value thereof;
- (b) the value of transferable securities, money market instruments and any financial assets listed or dealt in on a stock exchange or on a regulated market, or any other regulated market, are generally valued at the last available known price in the relevant market prior to the time of valuation. Fixed income securities not traded on such markets are generally valued at the last available price or yield equivalents obtained from one or more dealers or pricing services approved by the Board of Directors; if such prices are not representative of their value, such assets are stated at the fair value at which it is expected they may be resold, as determined in good faith by or under the direction of the Board of Directors;
- (c) all other transferable securities, money market instruments and any financial assets, including equity and debt securities, for which prices are supplied by a pricing agent but are not deemed to be representative of market value, are valued at fair value as determined in good faith pursuant to procedures established by the Board of Directors.
- (d) money market instruments with a remaining maturity of one year or less will be valued by the amortized cost method, which approximates market value. Under this valuation method, the relevant Sub-Fund's investments are valued at their acquisition cost as adjusted for amortisation of premium or accretion of discount rather than at market value;
- (e) units or shares of open-ended undertakings for collective investment will be valued at their last determined and available net asset value or, if such price is not representative of the fair market value of such assets, then the price shall be determined by the Company on a fair and equitable basis. Units or shares of a closed-ended undertaking for collective investment will be valued at their last available stock market value;
- (f) futures, forward or options contracts not traded on a stock exchange or on regulated markets, or on other regulated markets shall be valued at their net liquidating value determined, pursuant to the policies established by the Board of Directors, on a basis consistently applied for each different variety of contracts. The value of futures, forward or options contracts traded on a stock exchange or on regulated markets, or on other regulated markets shall be based upon the last available settlement or closing prices as applicable to these contracts on a stock exchange or on regulated markets, or on other regulated markets on which the particular futures, forward or options contracts are traded on behalf of the Company; provided that if a future, forward or options contract could not be liquidated on the day with respect to which assets are being determined, the basis for determining the liquidating value of such contract shall be such value as the Board of Directors may deem fair and reasonable;
- (g) interest rate swaps will be valued on the basis of their market value established by reference to the applicable interest rate curve.

Credit default swaps and total return swaps will be valued at fair value under procedures approved by the Board of Directors. As these swaps are not exchange-traded, but are private contracts into which the Company and a swap counterparty enter as principals, the data inputs for valuation models are usually established by reference to active markets. However it is possible that such market data will not be available for credit default swaps and total return swaps near the Valuation Day. Where such markets inputs are not available, quoted market data for similar instruments (e.g. a different underlying instrument for the same or a similar reference entity) will be used provided that appropriate adjustments be made to reflect any differences between the credit default swaps and total return swaps being valued and the similar financial instrument for which a price is available. Market input data and prices may be sourced from exchanges, a broker, an external pricing agency or a counterparty.

If no such market input data are available, credit default swaps and total return swaps will be valued at their fair value pursuant to a valuation method adopted by the Board of Directors which shall be a valuation method widely accepted as good market practice (i.e. used by active participants on setting prices in the market place or which has demonstrated to provide reliable estimate of market prices) provided that adjustments that the Board of Directors may deem fair and reasonable be made. The Company's auditor will review the appropriateness of the valuation

methodology used in valuing credit default swaps and total return swaps. In any way the Company will always value credit default swaps and total return swaps on an arm-length basis.

All other swaps will be valued at fair value as determined in good faith pursuant to procedures established by the Board of Directors;

- (h) all other securities, instruments and other assets will be valued at fair market value, as determined in good faith pursuant to procedures established by the Board of Directors;
- (i) assets denominated in a currency other than that in which the relevant Net Asset Value will be expressed, will be converted at the relevant foreign currency spot rate on the relevant Valuation Day. In that context account shall be taken of hedging instruments used to cover foreign exchange risks.

The Company is entitled to deviate from the valuation rules set out in (b), (c), (d), (e), (f) and (g) above in valuing the assets attributable to any given class by adding to the prices referred to in (b), (c), (d), (e), (f) and (g) above an amount reflecting the estimated cost of the acquisition of corresponding assets, in the event the Company expects further investments to be made on behalf of the Sub-Fund to which such class belongs, or by deducting from the prices referred to in (b), (c), (d), (e), (f) and (g) above an amount reflecting the estimated cost of the disposal of such assets, in the event the Company expects investments attributable to such Sub-Fund to which such class belongs to be sold.

The Board of Directors, in its discretion, may permit some other method of valuation to be used if it considers that such valuation better reflects the fair value of any asset of the Company.

II. The liabilities of the Company shall include:

- 1) all loans, bills and accounts payable;
- 2) all accrued interest on loans of the Company (including accrued fees for commitment for such loans);
- 3) all accrued or payable expenses (including but not limited to administrative expenses, management fees, including incentive fees, custodian fees, and corporate agents' fees);
- 4) all known liabilities, present and future, including all matured contractual obligations for payments of money or property, including the amount of any unpaid dividends declared by the Company;
- 5) an appropriate provision for future taxes based on capital and income to the Valuation Day or Valuation Time during the course of a Valuation Day, as determined from time to time by the Company, and other reserves (if any) authorised and approved by the Board of Directors, as well as such amount (if any) as the Board of Directors may consider to be an appropriate allowance in respect of any contingent liabilities of the Company;
- 6) all other liabilities of the Company of whatsoever kind and nature reflected in accordance with generally accepted accounting principles. In determining the amount of such liabilities the Company shall take into account all expenses payable by the Company which shall comprise formation expenses, fees payable to its investment managers, investment advisers, fees and expenses payable to its accountants, custodian and its correspondents, domiciliary, administrative, registrar and transfer agent, listing agent, any paying agent, any distributor and permanent representatives in places of registration, as well as any other agent employed by the Company, the remuneration of the directors and their reasonable out-of-pocket expenses, insurance coverage, and reasonable travelling costs in connection with board meetings, fees and expenses for legal and auditing services, any fees and expenses involved in registering and maintaining the registration of the Company with any Governmental agencies or stock exchanges in the Grand Duchy of Luxembourg and in any other country, reporting and publishing expenses, including the cost of preparing, printing, advertising and distributing prospectuses, explanatory memoranda, periodical reports or registration statements, the costs of printing share certificates and the costs of any reports to shareholders, all taxes, duties, governmental and similar charges, and all other operating expenses, including the cost of buying and selling assets, interest, bank charges and brokerage, postage, telephone and telex. The Company may accrue administrative and other expenses of a regular or recurring nature based on an estimated amount rateably for yearly or other periods.

III. The assets shall be allocated as follows:

The Board of Directors shall establish a Sub-Fund in respect of each class of shares and may establish a Sub-Fund in respect of multiple classes of shares in the following manner:

- (a) if multiple classes of shares relate to one Sub-Fund, the assets attributable to such classes shall be commonly invested pursuant to the specific investment policy of the Sub-Fund concerned provided however, that within a Sub-Fund, the

Board of Directors is empowered to define classes of shares so as to correspond to (i) a specific distribution policy, such as entitling to distributions or not entitling to distributions and/or (ii) a specific sales and redemption charge structure and/or (iii) a specific management or advisory fee structure, and/or (iv) a specific assignment of distribution, shareholder services or other fees and/or (v) the currency or currency unit in which the class may be quoted and based on the rate of exchange between such currency or currency unit and the Reference Currency of the relevant Sub-Fund and/or (vi) the use of different hedging techniques in order to protect in the Reference Currency of the relevant Sub-Fund the assets and returns quoted in the currency of the relevant class of shares against long-term movements of their currency of quotation and/or (vii) such other features as may be determined by the Board of Directors from time to time in compliance with applicable law;

- (b) the proceeds to be received from the issue of shares of a class shall be applied in the books of the Company to the class or classes of shares issued in respect of such Sub-Fund, and, as the case may be, the relevant amount shall increase the proportion of the net assets of such Sub-Fund attributable to the class of shares to be issued;
- (c) the assets, liabilities, income and expenditure attributable to a Sub-Fund shall be applied to the class or classes of shares issued in respect of such Sub-Fund, subject to the provisions hereabove under (a);
- (d) where any asset is derived from another asset, such derivative asset shall be attributable in the books of the Company to the same class or classes of shares as the assets from which it was derived and on each revaluation of an asset, the increase or decrease in value shall be applied to the relevant class or classes of shares;
- (e) in the case where any asset or liability of the Company cannot be considered as being attributable to a particular class of shares, such asset or liability shall be allocated to all the classes of shares pro rata to their respective net asset values or in such other manner as determined by the Board of Directors acting in good faith, provided that (i) where assets, on behalf of several Sub-Funds are held in one account and/or are co-managed as a segregated pool of assets by an agent of the Board of Directors, the respective right of each class of shares shall correspond to the prorated portion resulting from the contribution of the relevant class of shares to the relevant account or pool, and (ii) the right shall vary in accordance with the contributions and withdrawals made for the account of the class of shares, as described in the sales documents for the shares of the Company, and finally (iii) all liabilities, whatever class of shares they are attributable to, shall, unless otherwise agreed upon with the creditors, be binding upon the Company as a whole;
- (f) upon the payment of distributions to the holders of any class of shares, the net asset value of such class of shares shall be reduced by the amount of such distributions.

All valuation regulations and determinations shall be interpreted and made in accordance with generally accepted accounting principles.

In the absence of bad faith, gross negligence or manifest error, every decision in calculating the net asset value taken by the Board of Directors or by any bank, company or other organization which the Board of Directors may appoint for the purpose of calculating the net asset value, shall be final and binding on the Company and present, past or future shareholders.

IV. For the purpose of this article:

- 1) shares of the Company to be redeemed shall be treated as existing and taken into account until immediately after the time specified by the Board of Directors on the Valuation Day on which such valuation is made and from such time and until paid by the Company the price therefore shall be deemed to be a liability of the Company;
- 2) shares to be issued by the Company shall be treated as being in issue as from the time specified by the Board of Directors on the Valuation Day on which such valuation is made and from such time and until received by the Company the price therefore shall be deemed to be a debt due to the Company;
- 3) all investments, cash balances and other assets expressed in currencies other than the Reference Currency of the relevant Sub-Fund shall be valued after taking into account the market rate or rates of exchange in force at the date and time for determination of the net asset value of shares; and
- 4) where on any Valuation Day or Valuation Time during the course of a Valuation Day the Company has contracted to:
 - purchase any asset, the value of the consideration to be paid for such asset shall be shown as a liability of the Company and the value of the asset to be acquired shall be shown as an asset of the Company;
 - sell any asset, the value of the consideration to be received for such asset shall be shown as an asset of the Company and the asset to be delivered shall not be included in the assets of the Company;

provided however, that if the exact value or nature of such consideration or such asset is not known on such Valuation Day, or such Valuation Time during the course of a Valuation Day, then its value shall be estimated by the Company.

The net asset value may be adjusted as the board of directors or its delegate may deem appropriate to reflect, among other considerations, any dealing charges including any dealing spreads, fiscal charges and potential market impact resulting from shareholder's transactions.

A dilution levy may be imposed on deals as specified in the sales documents of the Company. Any such dilution levy should not exceed a certain percentage of the net asset value determined from time to time by the board of directors and disclosed in the sales documents of the Company. This dilution levy will be calculated taking into account the estimated costs, expenses and potential impact on security prices that may be incurred to meet redemption and conversion requests.

- 5) The Company may invest and manage all or any part of the assets established for two or more Sub-Funds (for the purposes hereof "Participating Sub-Funds") on a pooled basis. Any such asset pool shall be formed by transferring to it cash or other assets (subject to such assets being appropriate in respect of the investment policy of the Sub-Fund concerned) from each of the Participating Sub-Funds. Thereafter, the Company may from time to time make further transfers to each asset pool. Assets may also be transferred back to a Participating Sub-Fund up to the amount of the participation of the Sub-Fund concerned. The Share of a Participating Sub-Fund in an asset pool shall be measured by reference to notional units of equal value in the asset pool. On formation of an asset pool, the Company shall determine the initial value of notional units (which shall be expressed in such currency as the Company may consider appropriate) and shall allocate to each Participating Sub-Fund notional units having an aggregate value equal to the amount of cash (or the value of other assets) contributed. Thereafter, the value of the units shall be determined by dividing the net assets of the asset pool by the number of notional units existing.

When additional cash or assets are contributed to or withdrawn from an asset pool, the allocation of notional units of the Participating Sub-Fund concerned will be increased or reduced, as the case may be, by a number of notional units determined by dividing the amount of cash or the value of assets contributed or withdrawn by the current value of a Share a unit in such asset pool. Where a contribution is made in cash, it may be treated for the purpose of this calculation as reduced by an amount which the Company considers appropriate to reflect fiscal charges and dealing and purchase costs which may be incurred in investing the cash concerned; in the case of cash withdrawal, a corresponding deduction may be made to reflect costs which may be incurred in realising securities or other assets of the asset pool.

Dividends, interest and other distributions of an income nature earned in respect of the assets in an asset pool will be applied to such asset pool and cause the respective net assets to increase. Upon the dissolution of the Company, the assets in an asset pool will be allocated to the Participating Sub-Funds in proportion to their respective participation in the asset pool.

Article 12.- Frequency and Temporary Suspension of Calculation of Net Asset Value per Share, of Issue, Redemption and Conversion of Shares

With respect to each class of shares, the net asset value per share and the price for the issue, redemption and conversion of shares shall be calculated from time to time by the Company or any agent appointed thereto by the Company, at least twice a month at a frequency determined by the Board of Directors, such date being referred to herein as the "Valuation Day"; provided that to the extent the net asset value per share is calculated at several moments in time during the course of the same Valuation Day, each such moment shall be referred to herein as a "Valuation Time" during the course of the relevant Valuation Day.

The Company may suspend the determination of the net asset value per share of any particular class and the issue and redemption of its shares from its shareholders as well as the conversion from and to shares of each class:

- a) during any period when any of the principal stock exchanges, regulated markets or any other regulated market in a Member State or in another state, on which any substantial portion of the investments of the Company attributable to such class of shares from time to time is quoted or dealt in, or when one or more foreign exchange markets in the currency in which a substantial portion of the assets of the class is denominated, is closed otherwise than for ordinary holidays, or during which dealings therein are restricted or suspended, provided that such restriction or suspension affects the valuation of the investments of the Company attributable to a class quoted thereon; or
- b) during the existence of any state of affairs which constitutes an emergency in the opinion of the Board of Directors as a result of which disposals or valuation of assets owned by the Company attributable to such class of shares would be impractical; or

- c) during any breakdown in the means of communication or computation normally employed in determining the price or value of any of the investments of such class of shares or the current price or values on any stock exchange or other market in respect of the assets attributable to such class of shares; or
- d) when for any other reason the prices of any investments owned by the Company attributable to any class of shares cannot promptly or accurately be ascertained; or
- e) during any period when the Company is unable to repatriate funds for the purpose of making payments on the redemption of the shares of such class or during which any transfer of funds involved in the realisation or acquisition of investments or payments due on redemption of shares cannot in the opinion of the Board of Directors be effected at normal rates of exchange;
- f) in the event of the publication (i) of a convening notice to a general meeting of shareholders at which a resolution to wind up the Company or a Sub-Fund is to be proposed, or of the decision of the board of directors to wind up one or more Sub-Funds, or (ii) to the extent that such a suspension is justified for the protection of the shareholders, of the notice of the general meeting of shareholders at which the merger of the Company or a Sub-Fund is to be proposed, or of the decision of the Board of Directors to merge one or more Sub-Funds;
- g) where in the opinion of the board of directors circumstances, which are beyond the control of the board of directors, make it impracticable or unfair vis-à-vis the shareholders to continue trading the shares or in any other circumstance(s) where a failure to do so might result in the Company or its shareholders incurring any liability to taxation or suffering other pecuniary disadvantages or other detriment to which the Company or its shareholders might not otherwise have suffered;
- h) during any period when the net asset value of any subsidiary of the Company may not be determined accurately.

Any such suspension shall be publicised, if appropriate, by the Company and may be notified to shareholders having made an application for subscription, redemption or conversion of shares for which the calculation of the net asset value has been suspended.

Such suspension as to any class of shares shall have no effect on the calculation of the net asset value per share, the issue, redemption and conversion of shares of any other class of shares.

Any request for subscription, redemption or conversion shall be irrevocable except in the event of a suspension of the calculation of the net asset value.

Appendix VII:

PRIVACY STATEMENT – INVESTORS AND RELATED PARTIES

The Company and/or, where applicable, the Management Company, may, each as data controller, come into possession of and process personal data of natural persons who are Shareholders or applicants for Shares (“Investors”), as well as of their directors, officers, employees and beneficial owners (the “Data Subjects”), in the context of their investment in the Company and, in particular, but not limited to, when provided at the time of completing their investment through the Application Form or any other means as referred to in the Prospectus.

This personal data may include, without limitation, the Data Subjects’ first name and last name, residential address, e-mail address, telephone number and other contact details, gender, date and place of birth, nationality, citizenship and profession, copies of identity card/passport number or other national identifier, tax details (such as tax identifier, status under FATCA and CRS), financial details, functions and powers (the “Personal Data”).

In the event that relevant Investor is not the Data Subject to whom the personal data relates, this Investor shall inform the relevant Data Subject(s) about the processing of their personal data for the purposes described herein, provide these persons with a copy of this notice and, where necessary and appropriate, obtain in advance their consent that may be required for the processing of their personal data. We may assume that Investors have complied with the undertakings contained herein.

Personal Data will be processed in compliance with the requirements of the EU Regulation 2016/679 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data (“GDPR”) and in accordance with the provisions of any data protection law applicable in Luxembourg (including but not limited to the law of 1st August 2018 on the organization of the National Commission for Data Protection and the general regime on data protection, as may be amended or replaced) (together the “Data Protection Laws”) and processing systems will be designed to ensure the highest level of protection for the personal data.

Personal Data supplied by Data Subjects is processed in order to enter into and execute the subscription in the Company (i.e. to perform any pre-contractual measures as well as the Application Form entered into by the Data Subjects), for the legitimate interests of the Data Controller and to comply with the legal obligations imposed on the Data Controller. In particular, the Company and/or the Management Company (or any of their affiliates, agents, employees, delegates or sub-contractors) may process the Personal Data for the following purposes:

1. To allow and facilitate investments for Shares in the Company and their ongoing management and administration (including creation, update and maintenance of Investors’ accounts and of the Register of Shareholders, processing of subscriptions, redemptions and conversions of Shares, performance of any corporate actions in relation to holdings of Shares);
2. Fund administration purposes, compliance by the Company or the Management Company with their contractual obligations and pursuance of legitimate interests and purposes (including payments of dividends, information and reporting to Investors, handling of complaints, convening and holding of general meetings of Shareholders);
3. Compliance with applicable laws and regulations, such as, but not limited to, applicable anti-money laundering rules (leading to know your customer verifications), applicable tax requirements (notably under the FATCA or the European Directive 2014/107/EU, known as “CRS”), late trading and market timing practices, periodic and ad hoc reporting to Investors and local authorities, compliance with judicial orders;
4. for any other particular purpose, where the Data Subject has consented to the processing for such a purpose;
5. Client relationship management.

The “legitimate interests” of the Data Controller referred to above include: (a) the processing purpose described in point 5. of the above paragraph of this clause; (b) the provision of the proof, in the event of a dispute, of a transaction or any commercial

communication; as well as in connection with any proposed purchase, merger or acquisition of any part of the Company's business; and (c) exercising the business of the Company in accordance with reasonable market standards.

Given the purposes for which the processing of Personal Data is envisaged, the Company and, when applicable, the Management Company does/do not anticipate obtaining the consent to do so. If we were to rely on consent to process the Data Subjects' personal data, we will contact them to obtain this consent. In the case consent is relied upon, these subjects will have the right to withdraw their consent at any time.

In accordance with the GDPR principles, the Personal Data is not retained for longer than is necessary for the purposes for which it is processed and is subject to applicable retention periods.

Personal Data may be collected directly by the Company or by its Management Company or by one or several of their delegates, agents or third party service providers, including primarily the Depositary and Paying Agent and the UCI Administrator, acting as "data processors" under the GDPR.

In certain circumstances, delegates, agents or third party service providers of the Company and/or, if applicable, of the Management Company, such as the Depositary and Paying Agent and the UCI Administrator, that otherwise process personal data as data processors of the Company (and/or, if applicable, the Management Company), may also act as data controllers if and when processing Personal Data for the purposes of complying with their own legal and regulatory obligations (in particular in the context of their own anti-money laundering and know your customers processes).

In addition to the Company and the Management Company, personal data might be shared with delegates, agents and service providers of the Company and/or the Management Company, as well as with courts and public and administrative authorities (it being specified that these authorities, in particular tax authorities, may themselves transmit the Information to other authorities, in particular tax authorities). The Company and, when applicable the Management Company, as well as the above recipients may further disclose the personal data to their representatives, employees and to other entities within their group as well as to other third parties for the purposes mentioned above and for internal investigations and reporting.

Personal Data might be shared and transferred by the aforementioned entities within or outside of the EEA, in which later case they shall ensure that the Personal Data is protected by either an adequacy decision of the European Commission or appropriate safeguards such as EU model contracts, binding corporate rules, approved code of conduct, approved certification mechanisms. In particular, the Management Company might transfer personal data to the ODDO BHF Group subsidiary located in Tunis, ODDO BHF Tunis, for IT administration purposes, in which case the transfer of the data and its processing are governed by the standard contractual clauses of the European Commission C(2010) 593, guaranteeing an adequate level of protection (a copy of these standard contractual clauses can be obtained by writing to dpo@oddo-bhf.com).

In accordance with and subject to the GDPR and other applicable laws, Data Subjects shall have the right to access the personal data processed for the purposes described above and to request the correction of this data if they can prove that it is inaccurate, its deletion, to restrict the use of your Personal Data, to object to the processing of such data and a right of portability on the data. To the extent that the processing of the personal data is a legal obligation or is intended to enable the performance of contractual obligations, any refusal by the Data Subjects to communicate the required data as well as any exercise of a right to limit the processing of the data may lead the Company to reject the subscription or redeem the Shares, more generally to be unable to perform all or part of the services covered by the Company's documentation.

Should Data Subjects have any question, request or concern about the processing of their personal data hereunder, they can send an email to dpo@oddo-bhf.com or a mail at the Registered office of the Company or of the Management Company (each as mentioned on page 4 of the Prospectus). Data Subjects can also raise any question or lodge a complaint about the processing of their personal data with the Luxembourg data protection authority (CNPD) or, if they reside outside of Luxembourg, with a supervisory authority in the EEA Member State where they live or work or in the Member State where the alleged breach of the GDPR has taken place.

This Notice is kept under regular review and may be updated from time to time.

GLOSSARY

"Absolute VaR"	absolute value at risk
"Administration Agreement"	an agreement made between the Company, the Management Company and the UCI Administrator effective as of 1 February 2016
"Articles"	the articles of incorporation of the Company;
"Auditor"	KPMG Audit;
"Board of Directors"	the board of directors from time to time of the Company;
"Business Day"	any day on which banks are open for normal banking business in Luxembourg;
"Business Day in the UK"	any day on which banks are open for normal banking business in the United Kingdom of Great Britain and Northern Ireland;
"UCI Administrator"	Caceis Bank, Luxembourg Branch;
"Class"	a class of Shares in a Sub-Fund of the Company; Share Classes may differ in their charges, fee structure, use of income, persons authorised to invest, minimum investment amount, Reference Currency, the possibility of a currency hedge in a Share Class or other characteristics;
"Cash"	bank deposits at sight within the meaning of question 14 of the CSSF FAQ concerning the Luxembourg Law of 17 December 2010 relating to undertakings for collective investment;
"Cash Equivalent"	money market instruments within the meaning of question 15 of the CSSF FAQ concerning the Luxembourg Law of 17 December 2010 relating to undertakings for collective investment, including commercial paper;
"Companies Law"	the Luxembourg law of 10 August 1915 on Commercial Companies, as amended;
"Company"	SICAV ODDO BHF;
"CSSF Circular 08/356"	CSSF Circular 08/356 relating to the rules applicable to undertakings for collective investment when they employ certain techniques and instruments relating to transferable securities and money market instruments;
"CSSF Circular 14/592"	CSSF Circular 14/592 relating to ESMA Guidelines on ETFs and other UCITS issues;
"Depository and Paying Agent"	Caceis Bank, Luxembourg Branch;
"Eligible Market"	a regulated market in an Eligible State which operates regularly and is recognized and open to the public;
"Eligible State"	any member state of the OECD and all other countries of the American continents, Europe, Asia, Africa and Oceania;
"Eligible Transferable Securities"	(i) transferable securities admitted to official listing on a stock exchange in an Eligible State; and/or (ii) transferable securities dealt in on another Eligible Market; and/or (iii) recently issued transferable securities, provided that the terms of issue include an undertaking that application will be made for admission to official listing on a stock exchange in an Eligible State or on an Eligible Market and such admission is achieved within a year of the issue;
"ESMA"	the European Securities and Markets Authority;

“EU”	current and any future member countries of the European Union;
“EUROD”	an euro-denominated stablecoin issued by ODDO BHF SCA, which is intended to qualify as an e-money token within the meaning of MiCAR, and may be used as a digital settlement asset for subscriptions and redemptions of tokenised shares processed through the UCI Administrator;
“Group of Companies”	companies belonging to the same body of undertakings and which must draw up consolidated accounts in accordance with Council Directive 83/349/EEC of 13 June 1983 on consolidated accounts and according to recognized international accounting rules;

- (E) any trust if -
 - (i) a court within the United States is able to exercise primary supervision over the administration of the trust, and
 - (ii) one or more United States persons have the authority to control all substantial decisions of the trust.

II. Foreign estate or trust.

(A) Foreign estate. The term "foreign estate" means an estate the income of which, from sources without the United States which is not effectively connected with the conduct of a trade or business within the United States, is not includible in gross income under subtitle A.

(B) Foreign trust. The term "foreign trust" means any trust other than a trust described in paragraph I;

"Valuation Day"

each day (except for December 24th) which is a Business Day.

Appendix VIII:

Environmental and/or social characteristics

Product name: ODDO BHF SUSTAINABLE EURO CORPORATE BOND⁶

ODDO BHF Sustainable Euro Corporate Bond ("Sub-Fund" or "Fund") is a Sub-Fund of SICAV ODDO BHF ("SICAV").

Legal entity identifier (LEI-CODE) : 47U0WTO0RVIPRTCR8T92

Sustainable Investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significant harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

DOES THIS FINANCIAL PRODUCT HAVE A SUSTAINABLE INVESTMENT OBJECTIVE?	
●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: N/A <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: N/A	<input checked="" type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 50 % of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments

WHAT ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS ARE PROMOTED BY THIS FINANCIAL PRODUCT?

The Sub-Fund's ESG approach aims to promote good carbon emissions management:

- By excluding issuers involved in high-carbon sectors such as coal and unconventional oil and gas, as described in the management company's Exclusion Policy;
- And, at the same time, ensuring that the Sub-Fund's average carbon intensity is better than that of its benchmark.

⁶ The Sub-Fund complies with the ESMA ESMA34-1592494965-657 guidelines on funds' name using ESG or sustainability related terms. Notably, the Sub-Fund will exclude investments in companies referred to in Article 12(1)(a) to (g) of CDR (EU) 2020/1818: "The Paris aligned Benchmark exclusions".

I. First stage: exclusions:

The Sub-Fund applies the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com. This exclusion policy notably covers coal, tobacco, and non-conventional weapons. In addition, the Sub-Fund excludes the production of adult entertainment, conventional weapons and nuclear sectors from all investments, and it applies the Paris Aligned Benchmark exclusions.

II. Second stage: ESG rating and carbon intensity

This involves taking into account the ESG rating of the securities comprising the investment universe. To this end, the management team relies on ESG ratings provided by the external data provider MSCI ESG Research.

In the event that an issuer has not been rated by MSCI ESG Research, the Management Company has two options:

- o Firstly, it may use the ESG rating assigned to the securities of the issuer concerned by the Management company.
- o Secondly, if the management company has not assigned an ESG rating to the securities of the issuer concerned, it may generate a substitute ESG rating, which is defined, among other things, by an average based on MSCI's ESG ratings according to the sector of activity, the size of the company and the country of domicile. The use of this substitute rating ends when MSCI ESG Research generates its own ESG rating for the issuer concerned or when an ESG rating is assigned by the management company.

In addition, the management company may review an ESG rating provided by MSCI. This review is carried out by the ESG team and may result in the replacement of the MSCI ESG rating with a new internal ESG rating.

. The Management Company pledges that at least 90% of the issuers in the portfolio shall have an ESG rating (taking the weighting of each share into account). This minimum allows us to be aware of the main sustainability-related opportunities and risks for the majority of the Sub-Fund's assets.

Besides the integration of ESG ratings, the Sub-Fund commits to having a better carbon intensity (weighted average of Scope 1 and 2 CO2 emissions divided by the revenue of each company in which the Sub-fund invests) than that of its Benchmark.

● WHAT SUSTAINABILITY INDICATORS ARE USED TO MEASURE THE ATTAINMENT OF EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THIS FINANCIAL PRODUCT?

The following sustainability indicators are used to measure the achievement of ESG characteristics:

- The **ESG coverage rate**, based on the commitment that at least 90% of the Sub-Fund's securities have an ESG rating after taking into account the weighting of each security and excluding cash, derivatives, sovereigns, and quasi-sovereigns;
- The weighted average **ESG rating** of the Sub-fund to assess the fulfillment of environmental, social, and governance characteristics;
- The Sub-fund's **sustainable investment**, which will be at least 50%;
- The Sub-fund's **carbon intensity** (weighted average of Scope 1 and 2 CO2 emissions divided by the revenue of each company in which the Sub-fund invests), particularly in relation to that of the benchmark. Finally, for at least 90% of the securities comprising the net assets of the Sub-fund data in relation to carbon intensity are available, after taking into account the weighting of each security and excluding cash, derivatives, sovereigns, and quasi-sovereigns.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● WHAT ARE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY INTENDS TO MAKE AND HOW DOES THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The Sub-Fund references the objectives described above in its ESG strategy but does not seek to select its investments on the basis of one or more of these objectives only. The contributions to these objectives are taken into account by the sustainability indicators used by the ESG strategy.

As such the Sub-Fund intends to capture both aspects of a company contribution: its positive environmental and/or social output contribution coming from 1/ companies' products and/or services revenues or 2/ its contribution to environmental and/or social objective thanks to companies' wide operations when aligned with environmental and/or social targets.

To be eligible as a Sustainable Investment, a company must pass at least one of the criteria detailed below:

a) Criteria "based on company operations":

- Implied Temperature Rise « ITR »:

Company operations for which climate targets initiatives are maintaining temperature rise below or equal to 2°C, in line with Paris Agreement's pathway of 2°C or below, is considered to contribute to an environmental objective and as such qualify as a Sustainable Investment. We use MSCI ITR data to assess the temperature alignment.

- SBTi approved emission targets:

Greenhouse gas emissions are mentioned as one possibility to measure an environmental objective. Our approach to measuring sustainable investments also includes companies that have their GHG emissions reduction targets approved by the Science-Based Targets initiative (SBTi).

b) Criteria "based on company revenue activities":

- Sustainable Solutions Revenues:

We assess how an economic activity contributes to specific environmental or social objectives. In that respect we use MSCI "Sustainable Impact Revenue" data field. The "Sustainable Impact Revenue" is between 0% and 100% and represents a specific share of companies' overall revenue.

- EU Taxonomy aligned revenue:

The EU Taxonomy is designed to identify economic activities that tackle environmental or social objectives. However, only two of the six defined environmental objectives are fully scoped for the time being. For a company, we will use the taxonomy alignment as reported as the percentage of revenue that are generated by taxonomy aligned activities.

- EU Taxonomy aligned capex:

For a company, we will use the taxonomy alignment as reported as the percentage of capital expenditures that are generated by taxonomy aligned activities.

- "Green percentage" of a firm patent:

This indicator helps us to identify companies that derived revenues and held patents on emission-reduction technologies and practices to be contributing to an environmental objective.

c) Additional criteria: Sustainable bonds:

We consider that green, social and sustainability bonds can qualify as sustainable investments as long as the use of proceeds are used to finance projects that contribute positively to an environmental and/or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

HOW DO THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY INTENDS TO MAKE, NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The following approach is defined to comply with Article 2 (17) of the SFDR.

- **Sectors excluded from investment:**
The Sub-Fund applies the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com. This exclusion policy notably covers coal, tobacco, and non-conventional weapons. In addition, the Sub-Fund excludes the production of adult entertainment, conventional weapons and nuclear sectors from all investments, and it applies the Paris Aligned Benchmark exclusions.
- **Controversies:** The most controversial companies according to our MSCI ESG data provider, and after confirmation by the ESG team for a second check, will not be considered sustainable.
- **Consideration of major negative impacts:** In order not to significantly undermine sustainability objectives, the Investment Manager defines control rules (pre-trade) for selected significantly harmful activities: exposure to controversial weapons (0% tolerance), and serious violations of the UN Global Compact principles and the Organization for Economic Co-operation and Development (OECD) guidelines for multinational enterprises (0% tolerance).
- **Dialogue, engagement and voting:** our dialogue, engagement and voting policies support the objective of avoiding significant harm by identifying the most important risks and have our voice heard to generate change and improvement.

HOW HAVE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS BEEN TAKEN INTO ACCOUNT?

Regulation (EU) 2020/852 defines certain areas of concern that may have a negative impact ("PAI").

The Investment Manager applies pre-trade rules on two PAIs:

- exposure to controversial weapons (PAI 14 and 0% tolerance),
- Serious violations of the UN Global Compact principles and the Organization for Economic Co-operation and Development (OECD) guidelines for multinational enterprises (PAI 10 and 0% tolerance).

In addition, MSCI ESG analysis includes when the data is available, the monitoring of greenhouse gas emissions (PAI 1), exposure to fossil fuels (PAI 4), share of non-renewable energy consumption and production (PAI 5), energy consumption intensity by high climate impact sectors (PAI 6), activities with a negative impact on biodiversity-sensitive areas (PAI 7), the lack of processes and compliance mechanisms to monitor adherence to the UN Global Compact and OECD Guidelines for Multinational Enterprises (PAI 11), the unadjusted gender pay gap (PAI 12), and board parity (PAI 13). The Investment

Manager also includes two other PAIs: the deforestation policy (PAI 15) and the lack of a human rights policy (PAI 9).

Further information on the Investment Manager's consideration of PAI is available on am.oddo-bhf.com.

– HOW ARE THE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS? DETAILS:

The Investment Manager ensures that the Sub-Fund's sustainable investments are aligned by applying its United Nations Global Compact (UNGC) exclusion list, as set out in the Investment Manager's exclusion policy. Proven violations of the OECD Guidelines for Multinational Enterprises and/or the United Nations Guiding Principles on Business and Human Rights will also result in exclusion.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

DOES THIS FINANCIAL PRODUCT CONSIDER PRINCIPAL ADVERSE IMPACTS ON SUSTAINABILITY FACTORS?

Yes, in accordance with the provisions of Article 8 of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (SFDR), the Investment Manager takes sustainability risks into account by integrating ESG (Environmental, Social and Governance) criteria into its investment decision-making process, as set out in the “Investment Strategy” section. This process also makes it possible to assess the management team's ability to manage the adverse sustainability impacts of their business activities.

No

WHAT INVESTMENT STRATEGY DOES THIS FINANCIAL PRODUCT FOLLOW?

The Sub-Fund is actively managed and aims to provide long term capital appreciation by managing a portfolio investing at least 2/3 of its total assets in transferable debt securities of public or private corporations in all sectors (including financial institutions) and integrating ESG (Environmental, Social, and Governance) criteria in parallel.

The investment universe of the Sub-Fund is made up of the companies included in the Markit iBoxx Euro Corporate Total Return index. As part of the investment process, the Investment Manager has full discretion over the composition of the Sub-Fund's portfolio and may deviate from the investment universe.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

First, the Investment Manager takes ESG (Environment, Social and Governance) criteria into account in two stages:

- First stage: sector exclusion

The Sub-Fund applies the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com. This exclusion policy notably covers coal, tobacco, and non-conventional weapons. In addition, the Sub-Fund excludes the production of adult entertainment, conventional weapons and nuclear sectors from all investments, and it applies the Paris Aligned Benchmark exclusions.

- Second stage: ESG ratings and carbon intensity

This involves taking into account the ESG rating of the securities comprising the investment universe. To this end, the management team relies on ESG ratings provided by the external data provider MSCI ESG Research.

In the event that an issuer has not been rated by MSCI ESG Research, the Management Company has two options:

- o Firstly, it may use the ESG rating assigned to the securities of the issuer concerned by the Management company.

- o Secondly, if the management company has not assigned an ESG rating to the securities of the issuer concerned, it may generate a substitute ESG rating, which is defined, among other things, by an average based on MSCI's ESG ratings according to the sector of activity, the size of the company and the country of domicile. The use of this substitute rating ends when MSCI ESG Research generates its own ESG rating for the issuer concerned or when an ESG rating is assigned by the management company.

In addition, the management company may review an ESG rating provided by MSCI. This review is carried out by the ESG team and may result in the replacement of the MSCI ESG rating with a new internal ESG rating.

The management team takes into account the weighting of the securities held in the portfolio when calculating the average ESG score of the Sub-Fund.

The Management Company pledges that at least 90% of the issuers in the portfolio shall have an ESG rating (taking the weighting of each share into account).

Besides the integration of ESG ratings, the Sub-Fund commits to having a better carbon intensity (weighted average of Scope 1 and 2 CO₂ emissions divided by the revenue of each company in which the Sub-fund invests) than that of its Benchmark.

● WHAT ARE THE BINDING ELEMENTS OF THE INVESTMENT STRATEGY USED TO SELECT THE INVESTMENTS TO ATTAIN EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THIS FINANCIAL PRODUCT?

The binding elements of the Sub-fund are the following:

- The **ESG coverage rate**, based on the commitment that at least 90% of the Sub-fund's securities have an ESG rating after taking into account the weighting of each security and excluding cash, derivatives, sovereigns, and quasi-sovereigns;
- The Sub-fund's **sustainable investment**, which will be at least 50%;
- The Sub-fund's **carbon intensity** (weighted average of Scope 1 and 2 CO₂ emissions divided by the revenue of each company in which the Sub-fund invests), particularly in relation to that of the benchmark. Finally, for at least 90% of the securities comprising the net assets of the Sub-fund data in relation to carbon intensity are available, after taking into account the weighting of each security and excluding cash, derivatives, sovereigns, and quasi-sovereigns.

● WHAT IS THE COMMITTED MINIMUM RATE TO REDUCE THE SCOPE OF THE INVESTMENTS CONSIDERED PRIOR TO THE APPLICATION OF THAT INVESTMENT STRATEGY?

The management team does not take into account a minimum commitment rate to reduce the scope of the investments envisaged before applying the investment strategy.

● WHAT IS THE POLICY TO ASSESS GOOD GOVERNANCE PRACTICES OF THE INVESTEE COMPANIES?

ODDO BHF Asset Management's Responsible Investment Policy details our definition and assessment of what constitutes good governance practices. Good governance practices can be assessed using a number of criteria, such as anti-corruption policies and practices, executive compensation policies, shareholder structure, quality of financial communication, and business ethics.

WHAT IS THE ASSET ALLOCATION PLANNED FOR THIS FINANCIAL PRODUCT?

The Sub-Fund is actively managed and aims to provide long term capital appreciation by managing a portfolio investing at least 2/3 of its total assets in transferable debt securities of public or private corporations in all sectors (including financial institutions) and integrating an ESG (Environmental, Social, and Governance) criteria analysis in parallel.

At least 80% of net assets must be aligned with environmental and social characteristics.

The Sub-Fund may hold up to 20% of its net assets in the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The Sub-Fund has a minimum 50% of sustainable investments. However, the Sub-Fund may hold investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Sub-Fund has a minimum of 0,5% of the net assets - weighted by the proportion of revenue aligned with the taxonomy for each issuer - invested in activities aligned with the taxonomy.

A minimum of 49,5% of the Sub-Fund's net assets are invested in other environmental investments and the Sub-Fund may hold social investment without minimum.

At least 90% of the issuers in the portfolio have an ESG rating after taking into account the weighting of each security. Target funds with an ESG rating on fund level are also taken into account.

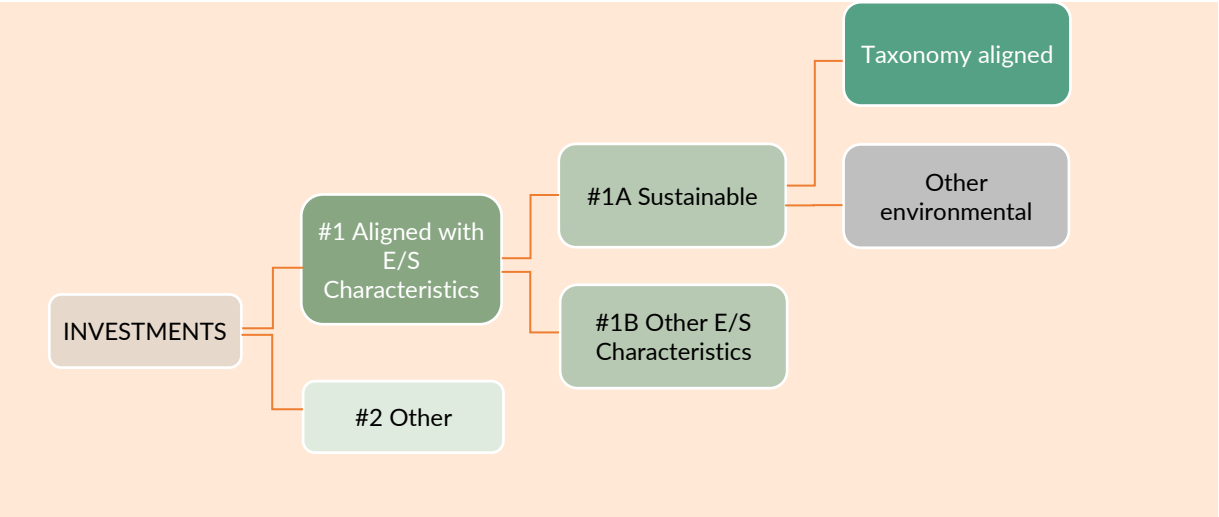

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Asset allocation describes the share of investments in specific assets. Taxonomy-aligned activities are expressed as a share of:

-turnover reflecting the share of revenue from green activities of investee companies.

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

-operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **HOW DOES THE USE OF DERIVATIVES ATTAIN THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THE FINANCIAL PRODUCT?**

Derivatives are not actively used to enhance ESG alignment or decrease ESG risk. As part of the investment strategy, the Sub-Fund is allowed to enter into derivatives for investment and hedging purposes.

DOES THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES THAT COMPLY WITH THE EU TAXONOMY⁷ ?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The fund manager analyses the portfolio positions according to ESG criteria. Fossil gases are not excluded for the Sub-Fund. A minimum proportion of activities connected with fossil gases that correspond to the Taxonomy is not intended for the Sub-Fund.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

⁷ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory not on the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

TO WHAT MINIMUM EXTENT ARE SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE ALIGNED WITH THE EU TAXONOMY?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● WHAT IS THE MINIMUM SHARE OF INVESTMENTS IN TRANSITIONAL AND ENABLING ACTIVITIES?

The minimum percentage is 0%.

WHAT IS THE MINIMUM SHARE OF SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE THAT ARE NOT ALIGNED WITH THE EU TAXONOMY?

There is a minimum share of 49.5 % of sustainable investments with an environmental objective, which are not aligned with the EU Taxonomy.

WHAT IS THE MINIMUM SHARE OF SOCIALLY SUSTAINABLE INVESTMENTS?

The minimum percentage of sustainable investments with a social objective is 0% but the Sub-Fund may make investments with a social objective.

WHAT INVESTMENTS ARE INCLUDED UNDER "#2 OTHER", WHAT IS THEIR PURPOSE AND ARE THERE ANY MINIMUM ENVIRONMENTAL OR SOCIAL SAFEGUARDS?

The investments included in "#2 Other" are derivatives and other ancillary assets (like money market instruments) as set out in the section "Investment Strategy" of the Sub-Fund. There are no minimum environmental or social safeguards applied.

IS A SPECIFIC INDEX DESIGNATED AS A REFERENCE BENCHMARK TO DETERMINE WHETHER THIS FINANCIAL PRODUCT IS ALIGNED WITH THE ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS THAT IT PROMOTES?

The benchmark of the Sub-Fund is not intended to be aligned with the environmental and/or social characteristics promoted by the Sub-Fund.

- HOW IS THE REFERENCE BENCHMARK CONTINUOUSLY ALIGNED WITH EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THE FINANCIAL PRODUCT?

Non applicable.

- HOW IS THE ALIGNMENT OF THE INVESTMENT STRATEGY WITH THE METHODOLOGY OF THE INDEX ENSURED ON A CONTINUOUS BASIS?

Non applicable.

- HOW DOES THE DESIGNATED INDEX DIFFER FROM A RELEVANT BROAD MARKET INDEX?

Non applicable.

- WHERE CAN THE METHODOLOGY USED FOR THE CALCULATION OF THE DESIGNATED INDEX BE FOUND?

Non applicable.

WHERE CAN I FIND MORE PRODUCT SPECIFIC INFORMATION ONLINE?

Further information on how the Investment Manager takes ESG criteria into account will be available in the Sub-Fund's annual report and on https://am.oddo-bhf.com/france/fr/investisseur_professionnel/home.

** Regulation (EU) 2019/2088 on sustainability-related disclosure requirements in the financial services sector

Appendix IX:

Environmental and/or social characteristics

Product name: ODDO BHF EURO HIGH YIELD BOND

ODDO BHF EURO HIGH YIELD BOND ("Sub-Fund" or "Fund") is a Sub-Fund of SICAV ODDO BHF ("SICAV").

Legal entity identifier (LEI-CODE): LL29W0HLYGYF238K8529

Sustainable Investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

DOES THIS FINANCIAL PRODUCT HAVE A SUSTAINABLE INVESTMENT OBJECTIVE?	
<input type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: N/A <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: N/A	<input checked="" type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10 % of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments

WHAT ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS ARE PROMOTED BY THIS FINANCIAL PRODUCT?

The Sub-Fund promotes both environmental and social characteristics that are reflected in the Investment Manager's ESG internal rating model construction and weighting.

As part of the internal ESG rating model, the following criteria, among others, can be analyzed:

- Environmental: climate change, natural capital, pollution and waste, environmental opportunities
- Social: human capital, client capital, supply chain, cybersecurity
- Governance: corporate governance, leadership, corporate behavior

Close attention is paid to the analysis of human capital and corporate governance, which has an impact on the final ESG rating of each company. We believe that poor human capital management or

corporate governance failures pose a major risk to the execution of a company's strategy and therefore to its valuation.

The analysis of controversies (industrial accidents, pollution, corruption, anti-competitive practices, product safety, supply chain management, etc.), based on information provided by our external non-financial data provider, is integrated into the rating process and directly influences the ESG rating of each company.

● WHAT SUSTAINABILITY INDICATORS ARE USED TO MEASURE THE ATTAINMENT OF EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THIS FINANCIAL PRODUCT?

The Investment Manager's ESG analysis model uses all the characteristics and indicators mentioned in the above paragraph and the monthly ESG reporting currently presents indicators demonstrating their achievement as follows

- The weighted average internal ESG score of the Sub-Fund shall be better than the benchmark.
-
- At least 75% of the issuers in the portfolio have an ESG rating after taking into account the weighting of each security.
- The Sub-Fund's sustainable investment will be at least 10 %.

● WHAT ARE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY INTENDS TO MAKE AND HOW DOES THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The Fund references the objectives described above in its ESG strategy but does not seek to select its investments on the basis of one or more of these objectives only. The contributions to these objectives are taken into account by the sustainability indicators used by the ESG strategy.

As such the Sub-Fund intends to capture both aspects of a company contribution: it's positive environmental and/or social output contribution coming from 1/ companies' products and/or services revenues or 2/ its contribution to environmental and/or social objective thanks to companies' wide operations when aligned with environmental and/or social targets.

To be eligible as a Sustainable Investment, a company must pass at least one of the criteria detailed below:

a) Criteria "based on company operations":

- Implied Temperature Rise « ITR »:

Company operations for which climate targets initiatives are maintaining temperature rise below or equal to 2°C, in line with Paris Agreement's pathway of 2°C or below, is considered to contribute to an environmental objective and as such qualify as a Sustainable Investment. We use MSCI ITR data to assess the temperature alignment.

- SBTi approved emission targets:

Greenhouse gas emissions are mentioned as one possibility to measure an environmental objective. Our approach to measuring sustainable investments also includes companies that have their GHG emissions reduction targets approved by the Science-Based Targets initiative (SBTi).

b) Criteria "based on company revenue activities":

- Sustainable Solutions Revenues:

We assess how an economic activity contributes to specific environmental or social objectives. In that respect we use MSCI “Sustainable Impact Revenue” data field. The “Sustainable Impact Revenue” is between 0% and 100% and represents a specific share of companies’ overall revenue.

- EU Taxonomy aligned revenue:

The EU Taxonomy is designed to identify economic activities that tackle environmental or social objectives. However, only two of the six defined environmental objectives are fully scoped for the time being. For a company, we will use the taxonomy alignment as reported as the percentage of revenue that are generated by taxonomy aligned activities.

- EU Taxonomy aligned capex:

For a company, we will use the taxonomy alignment as reported as the percentage of capital expenditures that are generated by taxonomy aligned activities.

- “Green percentage” of a firm patent:

This indicator helps us to identify companies that derived revenues and held patents on emission-reduction technologies and practices to be contributing to an environmental objective.

c) Additional criteria: Sustainable bonds:

We consider that green, social and sustainability bonds can qualify as sustainable investments as long as the use of proceeds are used to finance projects that contribute positively to an environmental and/or social objective.

● HOW DO THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY INTENDS TO MAKE, NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The following approach is defined to comply with Article 2 (17) of the SFDR**.

- **Sectors excluded from investment:** The Sub-Fund applies the common exclusion framework as detailed in the Management Company’s exclusion policy, which is available at am.oddo-bhf.com.. In addition, the Sub-Fund excludes production of adult entertainment from all investments. Details relating to the Investment Manager’s Exclusion Policy containing further details on ESG integration and exclusion thresholds can be found at “am.oddo-bhf.com”.
- **Controversies:** The most controversial companies according to our MSCI ESG data provider, and after confirmation by the ESG team for a second check, will not be considered sustainable.
- **Consideration of major negative impacts:** In order not to significantly undermine sustainability objectives, the Investment Manager defines control rules (pre-trade) for selected significantly harmful activities: exposure to controversial weapons (0% tolerance), and serious violations of the UN Global Compact principles and the Organization for Economic Co-operation and Development (OECD) guidelines for multinational enterprises (0% tolerance).
- **Dialogue, engagement and voting:** our dialogue, engagement and voting policies support the objective of avoiding significant harm by identifying the most important risks and have our voice heard to generate change and improvement.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

HOW HAVE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS BEEN TAKEN INTO ACCOUNT?

Regulation (EU) 2020/852 defines certain areas of concern that may have a negative impact ("PAI").

The Investment Manager applies pre-trade rules on two PAIs:

- exposure to controversial weapons (PAI 14 and 0% tolerance),
- Serious violations of the UN Global Compact principles and the Organization for Economic Co-operation and Development (OECD) guidelines for multinational enterprises (PAI 10 and 0% tolerance).

In addition, the Investment Manager includes other PAIs in its ESG analysis for companies where the information is available, but without strict control rules. The collection of PAI data is used to define the Investment Manager's final ESG rating.

ESG analysis includes when the data is available monitoring of greenhouse gas emissions (PAI 1), exposure to fossil fuels (PAI 4), share of non-renewable energy consumption and production (PAI 5), energy consumption intensity by high climate impact sectors (PAI 6), activities with a negative impact on biodiversity-sensitive areas (PAI 7), the lack of processes and compliance mechanisms to monitor adherence to the UN Global Compact and OECD Guidelines for Multinational Enterprises (PAI 11), the unadjusted gender pay gap (PAI 12), and board parity (PAI 13). The Investment Manager also includes two other PAIs: the deforestation policy (PAI 15) and the lack of a human rights policy (PAI 9).

Further information on the Investment Manager's consideration of PAI is available on am.oddo-bhf.com.

HOW ARE THE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS? DETAILS:

The Investment Manager ensures that the Sub-Fund's sustainable investments are aligned by applying its United Nations Global Compact (UNGC) exclusion list, as set out in the Investment Manager's exclusion policy. Proven violations of the OECD Guidelines for Multinational Enterprises and/or the United Nations Guiding Principles on Business and Human Rights will also result in exclusion.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

DOES THIS FINANCIAL PRODUCT CONSIDER PRINCIPAL ADVERSE IMPACTS ON SUSTAINABILITY FACTORS?

Yes, in accordance with the provisions of Article 8 of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (SFDR), the Investment Manager takes sustainability risks into account by integrating ESG (Environmental, Social and Governance) criteria into its investment decision-making process, as set out in the “Investment Strategy” section. This process also makes it possible to assess the management team’s ability to manage the adverse sustainability impacts of their business activities.

No

WHAT INVESTMENT STRATEGY DOES THIS FINANCIAL PRODUCT FOLLOW?

ESG (Environment, Social and Governance) criteria are a complement to the credit analysis and are fully integrated into the investment process. The approach is based on two successive stages.

- First stage: The Sub-Fund applies the common exclusion framework as detailed in the Management Company’s exclusion policy, which is available at am.oddo-bhf.com. In addition, the Sub-fund excludes production of adult entertainment from all investments.
- Second stage: It consists in assigning an ESG rating to a large majority of companies in the investment universe.

As part of the internal ESG rating model, the following criteria, among others, can be analyzed:

- Environmental: climate change, natural capital, pollution and waste, environmental opportunities
- Social: human capital, client capital, supply chain, cybersecurity
- Governance: corporate governance, leadership, corporate behavior

Close attention is paid to the analysis of human capital and corporate governance, which has an impact on the final ESG rating of each company. We believe that poor human capital management or corporate governance failures pose a major risk to the execution of a company’s strategy and therefore to its valuation.

Our analyses are conducted in collaboration by our ESG analyst team, which collaborates closely with the investment teams. It enables us to identify the non-financial risks to which each issuer is potentially exposed, which can impact the company financially or its operating environment. The analysis of controversies (industrial accidents, pollution, corruption, anti-competitive practices, product safety, supply chain management, etc.), based on information provided by our external non-financial data provider, is integrated into the rating process and directly influences the ESG rating of each company.

This ESG analysis results in an internal rating on a scale of 1 (worst) to 5 (best).

In the event that an issuer has not been rated by the internal ESG rating model, the Management Company may use the ESG ratings of MSCI ESG Research.

The ESG internal team will analyze the issuers selected by the Investment Manager’s management team, consequently, at least 75% of the issuers in the portfolio have an ESG rating after taking into account the weighting of each security. Target funds with an ESG rating on fund level are also taken into account.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

This ESG scoring system impacts the sub-fund structure by limiting exposure to companies showing lower ESG scores, to ensure a certain overall ESG quality level of the Sub-Fund. In particular, the weighted average internal ESG rating of the Sub-Fund shall be better than the benchmark.

● **WHAT ARE THE BINDING ELEMENTS OF THE INVESTMENT STRATEGY USED TO SELECT THE INVESTMENTS TO ATTAIN EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THIS FINANCIAL PRODUCT?**

The Sub-Fund applies the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com. In addition, the Sub-Fund excludes production of adult entertainment from all investments. The other binding elements are the following:

-
- The weighted average internal ESG rating of the Sub-Fund shall be better than the benchmark.
- At least 75% of the issuers in the portfolio have an ESG rating after taking into account the weighting of each security.
- The Sub-Fund's sustainable investment will be at least 10 %.

● **WHAT IS THE COMMITTED MINIMUM RATE TO REDUCE THE SCOPE OF THE INVESTMENTS CONSIDERED PRIOR TO THE APPLICATION OF THAT INVESTMENT STRATEGY?**

There is no minimum rate.

● **WHAT IS THE POLICY TO ASSESS GOOD GOVERNANCE PRACTICES OF THE INVESTEE COMPANIES?**

ODDO BHF Asset Management's Responsible Investment Policy details our definition and assessment of what constitutes good governance practices.

Good governance practices can be assessed using a number of criteria, such as anti-corruption policies and practices, executive compensation policies, shareholder structure, quality of financial communication, and business ethics.

WHAT IS THE ASSET ALLOCATION PLANNED FOR THIS FINANCIAL PRODUCT?

The Sub-Fund is actively managed and aims to provide a high level of income and capital growth.

At least 75 % of net assets must be aligned with environmental and social characteristics.

The Sub-Fund may hold up to 25 % of its net assets in the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The Sub-Fund has a minimum 10% of sustainable investments. However, the Sub-Fund may hold investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Sub-Fund has a minimum of 0,2% of the net assets - weighted by the proportion of revenue aligned with the taxonomy for each issuer - invested in activities aligned with the taxonomy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Asset allocation describes the share of investments in specific assets

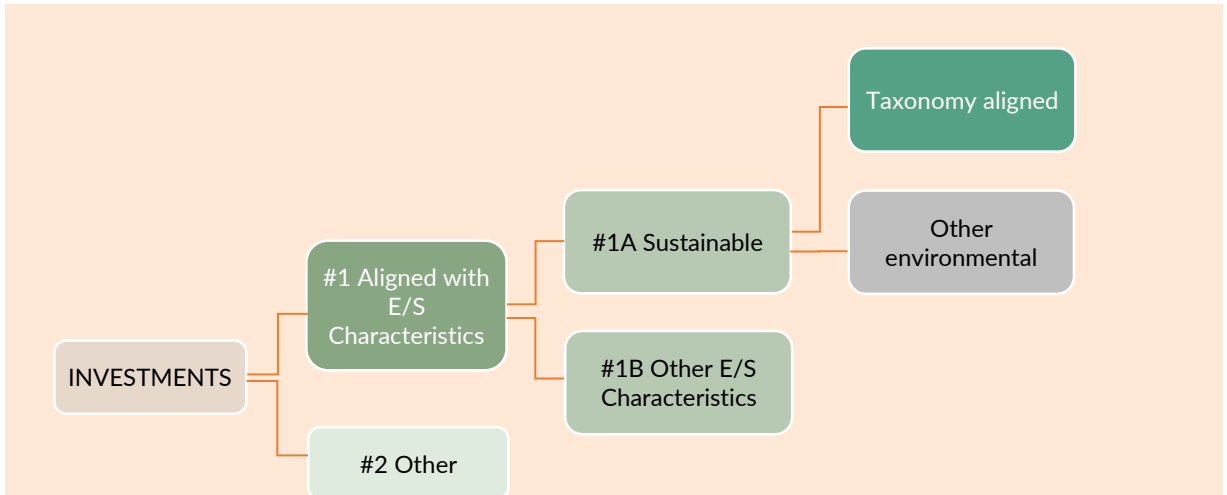

Taxonomy-aligned activities are expressed as a share of:

-turnover reflecting the share of revenue from green activities of investee companies.

-capital expenditure (CapEx) showing the green investments made by investee

A minimum of 9,8% of the Sub-Fund's net assets are invested in other environmental investments and the Sub-Fund may hold social investment without minimum.

At least 75% of the issuers in the portfolio have an ESG rating after taking into account the weighting of each security. Target funds with an ESG rating on fund level are also taken into account. The remaining 25% may include investments of the financial product which are neither aligned with the environmental or social characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● HOW DOES THE USE OF DERIVATIVES ATTAIN THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THE FINANCIAL PRODUCT?

Derivatives are not actively used to enhance ESG alignment or decrease ESG risk. As part of the investment strategy, the Sub-Fund is allowed to enter into derivatives for investment and hedging purposes.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● DOES THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES THAT COMPLY WITH THE EU TAXONOMY ?⁸

- Yes
 In fossil gas In nuclear energy
 No

The fund manager analyses the portfolio positions according to ESG criteria. Investments in nuclear energy and fossil gases are not excluded for the Sub-Fund. A minimum proportion of activities connected with nuclear energy and/or fossil gases that correspond to the Taxonomy is not intended for the Sub-Fund.

TO WHAT MINIMUM EXTENT ARE SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE ALIGNED WITH THE EU TAXONOMY?

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● WHAT IS THE MINIMUM SHARE OF INVESTMENTS IN TRANSITIONAL AND ENABLING ACTIVITIES?

The minimum percentage is 0%.

WHAT IS THE MINIMUM SHARE OF SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE THAT ARE NOT ALIGNED WITH THE EU TAXONOMY?

There is a minimum share of 9.8 % of sustainable investments with an environmental objective, which is not aligned with the EU Taxonomy.

WHAT IS THE MINIMUM SHARE OF SOCIALLY SUSTAINABLE INVESTMENTS?

The minimum percentage of sustainable investments with a social objective is 0%, but the Sub-Fund may make investments with a social objective.

⁸ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory not on the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

WHAT INVESTMENTS ARE INCLUDED UNDER “#2 OTHER”, WHAT IS THEIR PURPOSE AND ARE THERE ANY MINIMUM ENVIRONMENTAL OR SOCIAL SAFEGUARDS?

The investments included in “#2 Other” are derivatives and other ancillary assets (like money market instruments) as set out in the section “Investment Strategy” of the Sub-Fund and/or investments of the financial product which are neither aligned with the environmental or social characteristics. There are no minimum environmental or social safeguards applied.

IS A SPECIFIC INDEX DESIGNATED AS A REFERENCE BENCHMARK TO DETERMINE WHETHER THIS FINANCIAL PRODUCT IS ALIGNED WITH THE ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS THAT IT PROMOTES?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Sub-Fund has not defined a benchmark which is intended to be aligned with the environmental and/or social characteristics promoted by the Sub-Fund.

- HOW IS THE REFERENCE BENCHMARK CONTINUOUSLY ALIGNED WITH EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THE FINANCIAL PRODUCT?

Non applicable.

- HOW IS THE ALIGNMENT OF THE INVESTMENT STRATEGY WITH THE METHODOLOGY OF THE INDEX ENSURED ON A CONTINUOUS BASIS?

Non applicable.

- HOW DOES THE DESIGNATED INDEX DIFFER FROM A RELEVANT BROAD MARKET INDEX?

Non applicable.

- WHERE CAN THE METHODOLOGY USED FOR THE CALCULATION OF THE DESIGNATED INDEX BE FOUND?

Non applicable.

WHERE CAN I FIND MORE PRODUCT SPECIFIC INFORMATION ONLINE?

Further information on how the Investment Manager takes ESG criteria into account will be available in the Sub-Fund's annual report and on am.oddo-bhf.com.

**Regulation (EU) 2019/2088 on sustainability-related disclosure requirements in the financial services sector

Appendix X:

Environmental and/or social characteristics

Product name: ODDO BHF EURO CREDIT SHORT DURATION

ODDO BHF Euro Credit Short Duration ("Sub-Fund" or "Fund") is a Sub-Fund of SICAV ODDO BHF ("SICAV").

Legal entity identifier (LEI-CODE) : AZEBJ8BY4JQK6HGX1N65

DOES THIS FINANCIAL PRODUCT HAVE A SUSTAINABLE INVESTMENT OBJECTIVE?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective:** N/A

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of **sustainable investments with a social objective:** N/A

It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

WHAT ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS ARE PROMOTED BY THIS FINANCIAL PRODUCT?

The Sub-Fund promotes both environmental and social characteristics that are reflected in the Investment Manager's ESG internal rating model construction and weighting.

As part of the internal ESG rating model, the following criteria, among others, can be analyzed:

- Environmental: climate change, natural capital, pollution and waste, environmental opportunities
- Social: human capital, client capital, supply chain, cybersecurity
- Governance: corporate governance, leadership, corporate behavior

Close attention is paid to the analysis of human capital and corporate governance, which has an impact on the final ESG rating of each company. We believe that poor human capital management or corporate governance failures pose a major risk to the execution of a company's strategy and therefore to its valuation.

The analysis of controversies (industrial accidents, pollution, corruption, anti-competitive practices, product safety, supply chain management, etc.), based on information provided by our external non-financial data provider, is integrated into the rating process and directly influences the ESG rating of each company.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● WHAT SUSTAINABILITY INDICATORS ARE USED TO MEASURE THE ATTAINMENT OF EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THIS FINANCIAL PRODUCT?

The Investment Manager's ESG analysis model uses all the characteristics and indicators mentioned in the above paragraph and the monthly ESG reporting currently presents indicators demonstrating their achievement as follows:

- The weighted average internal ESG rating of the Sub-Fund shall be better than the investment universe..
- At least 75% of the issuers in the portfolio have an ESG rating after taking into account the weighting of each security.
- The Sub-Fund will have a minimum proportion of 10% of sustainable investments.

● WHAT ARE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY INTENDS TO MAKE AND HOW DOES THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The Fund references the objectives described above in its ESG strategy but does not seek to select its investments on the basis of one or more of these objectives only. The contributions to these objectives are taken into account by the sustainability indicators used by the ESG strategy.

As such the Sub-Fund intends to capture both aspects of a company contribution: it's positive environmental and/or social output contribution coming from 1/ companies' products and/or services revenues or 2/ its contribution to environmental and/or social objective thanks to companies' wide operations when aligned with environmental and/or social targets.

To be eligible as a Sustainable Investment, a company must pass at least one of the criteria detailed below:

a) Criteria "based on company operations":

- Implied Temperature Rise « ITR »:

Company operations for which climate targets initiatives are maintaining temperature rise below or equal to 2°C, in line with Paris Agreement's pathway of 2°C or below, is considered to contribute to an environmental objective and as such qualify as a Sustainable Investment. We use MSCI ITR data to assess the temperature alignment.

- SBTi approved emission targets:

Greenhouse gas emissions are mentioned as one possibility to measure an environmental objective. Our approach to measuring sustainable investments also includes companies that have their GHG emissions reduction targets approved by the Science-Based Targets initiative (SBTi).

b) Criteria "based on company revenue activities":

- Sustainable Solutions Revenues:

We assess how an economic activity contributes to specific environmental or social objectives. In that respect we use MSCI "Sustainable Impact Revenue" data field. The "Sustainable Impact Revenue" is between 0% and 100% and represents a specific share of companies' overall revenue.

- EU Taxonomy aligned revenue:

The EU Taxonomy is designed to identify economic activities that tackle environmental or social objectives. However, only two of the six defined environmental objectives are fully scoped for the time being. For a company, we will use the taxonomy alignment as reported as the percentage of revenue that are generated by taxonomy aligned activities.

- EU Taxonomy aligned capex:

For a company, we will use the taxonomy alignment as reported as the percentage of capital expenditures that are generated by taxonomy aligned activities.

- "Green percentage" of a firm patent:

This indicator helps us to identify companies that derived revenues and held patents on emission-reduction technologies and practices to be contributing to an environmental objective.

c) Additional criteria: Sustainable bonds:

We consider that green, social and sustainability bonds can qualify as sustainable investments as long as the use of proceeds are used to finance projects that contribute positively to an environmental and/or social objective.

HOW DO THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY INTENDS TO MAKE, NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The following approach is defined to comply with Article 2 (17) of the SFDR**.

- **Sectors excluded from investment:** The Sub-Fund applies the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com. In addition, the Sub-Fund excludes production of adult entertainment from all investments.
- **Controversies:** The most controversial companies according to our MSCI ESG data provider, and after confirmation by the ESG team for a second check, will not be considered sustainable.
- **Consideration of major negative impacts:** In order not to significantly undermine sustainability objectives, the Investment Manager defines control rules (pre-trade) for selected significantly harmful activities: exposure to controversial weapons (0% tolerance), and serious violations of the UN Global Compact principles and the Organization for Economic Co-operation and Development (OECD) guidelines for multinational enterprises (0% tolerance).

Dialogue, engagement, and voting: our dialogue, engagement and voting policies support the objective of avoiding significant harm by identifying the most important risks and have our voice heard to generate change and improvement.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

– HOW HAVE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS BEEN TAKEN INTO ACCOUNT?

Regulation (EU) 2020/852 defines certain areas of concern that may have a negative impact ("PAI").

The Investment Manager applies pre-trade rules on two PAIs:

- Exposure to controversial weapons (PAI 14 and 0% tolerance)
- Serious violations of the UN Global Compact principles and the Organization for Economic Co-operation and Development (OECD) guidelines for multinational enterprises (PAI 10 and 0% tolerance).

In addition, the Investment Manager includes other PAIs in its ESG analysis for companies where the information is available, but without strict control rules. The collection of PAI data is used to define the Investment Manager's final ESG rating.

ESG analysis includes when the data is available monitoring of greenhouse gas emissions (PAI 1), exposure to fossil fuels (PAI 4), share of non-renewable energy consumption and production (PAI 5), energy consumption intensity by high climate impact sectors (PAI 6), activities with a negative impact on biodiversity-sensitive areas (PAI 7), the lack of processes and compliance mechanisms to monitor adherence to the UN Global Compact and OECD Guidelines for Multinational Enterprises (PAI 11), the unadjusted gender pay gap (PAI 12), and board parity (PAI 13). The Investment Manager also includes two other PAIs: the deforestation policy (PAI 15) and the lack of a human rights policy (PAI 9).

Further information on the Investment Manager's consideration of PAI is available on am.oddo-bhf.com.

– HOW ARE THE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS? DETAILS:

The Investment Manager ensures that the Sub-Fund's sustainable investments are aligned by applying its United Nations Global Compact (UNGC) exclusion list, as set out in the Investment Manager's exclusion policy. Proven violations of the OECD Guidelines for Multinational Enterprises and/or the United Nations Guiding Principles on Business and Human Rights will also result in exclusion.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

DOES THIS FINANCIAL PRODUCT CONSIDER PRINCIPAL ADVERSE IMPACTS ON SUSTAINABILITY FACTORS?

Yes, in accordance with the provisions of Article 8 of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (SFDR), the Investment Manager takes sustainability risks into account by integrating ESG (Environmental, Social and Governance) criteria into its investment decision-making process, as set out in the “Investment Strategy” section. This process also makes it possible to assess the management team’s ability to manage the adverse sustainability impacts of their business activities.

No

WHAT INVESTMENT STRATEGY DOES THIS FINANCIAL PRODUCT FOLLOW?

The Sub-Fund is actively managed and aims to provide a high level of income and capital growth as described in the section “Investment Strategy” of the Sub-Fund.

ESG (Environment, Social and Governance) criteria are a complement to the credit analysis and are fully integrated into the investment process. The approach is based on two successive stages.

- First stage: The Sub-Fund applies the common exclusion framework as detailed in the Management Company’s exclusion policy, which is available at am.oddo-bhf.com. In addition, the Sub-Fund excludes the production of adult entertainment from all investments. Details relating to the Investment Manager’s Exclusion Policy containing further details on ESG integration and exclusion thresholds can be found at “am.oddo-bhf.com”.
- Second stage: It consists in assigning an ESG rating to a large majority of companies in the investment universe.

As part of the internal ESG rating model, the following criteria, among others, can be analyzed:

- Environmental: climate change, natural capital, pollution and waste, environmental opportunities
- Social: human capital, client capital, supply chain, cybersecurity
- Governance: corporate governance, leadership, corporate behavior

Close attention is paid to the analysis of human capital and corporate governance, which has an impact on the final ESG rating of each company. We believe that poor human capital management or corporate governance failures pose a major risk to the execution of a company’s strategy and therefore to its valuation.

Our analyses are conducted in collaboration by our ESG analyst team, which collaborates closely with the investment teams. It enables us to identify the non-financial risks to which each issuer is potentially exposed, which can impact the company financially or its operating environment. The analysis of controversies (industrial accidents, pollution, corruption, anti-competitive practices, product safety, supply chain management, etc.), based on information provided by our external non-financial data provider, is integrated into the rating process and directly influences the ESG rating of each company.

This ESG analysis results in an internal rating on a scale of 1 (worst) to 5 (best).

In the event that an issuer has not been rated by the internal ESG rating model, the Management Company may use the ESG ratings of MSCI ESG Research.

The internal ESG team will analyze the issuers selected by the Investment Manager's management team. Therefore, at least 75% of the issuers in the portfolio have an ESG rating after taking into account the weighting of each security. Target funds with an ESG rating on fund level are also taken into account.

This ESG scoring system impacts the sub-fund structure by limiting exposure to companies showing lower ESG scores, to ensure a certain overall ESG quality level of the Sub-Fund. In particular, the weighted average internal ESG rating of the Sub-Fund shall be better than the investment universe, defined as the following index: ICE BofA 0-5 Year Euro Developed Markets High Yield 2% Constrained Index, pursuant to the Investment Manager's internal scoring. The management team may invest in debt securities from outside the investment universe. The investment universe is only a relevant comparison element for the ESG rating of the portfolio.

● WHAT ARE THE BINDING ELEMENTS OF THE INVESTMENT STRATEGY USED TO SELECT THE INVESTMENTS TO ATTAIN EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THIS FINANCIAL PRODUCT?

The following elements are used by the Management Company to measure the attainment of the environmental and/or social characteristics promoted by the financial product:

- Exclusion policy, which is available at am.oddo-bhf.com. In addition, the Sub-Fund excludes the production of adult entertainment from all investments.
- The weighted average internal ESG rating of the Sub-Fund shall be better than the investment universe.
- 75% of the Sub-Fund has an ESG rating after taking into account the weighting of each security.
- The Sub-Fund's sustainable investment, which will be at least 10%.

As reminder, the investment universe is defined as the following index: ICE BofA 0-5 Year Euro Developed Markets High Yield 2% Constrained Index, pursuant to the Investment Manager's internal scoring. The management team may invest in debt securities from outside the investment universe. The investment universe is only a relevant comparison element for the ESG rating of the portfolio.

● WHAT IS THE COMMITTED MINIMUM RATE TO REDUCE THE SCOPE OF THE INVESTMENTS CONSIDERED PRIOR TO THE APPLICATION OF THAT INVESTMENT STRATEGY?

There is no minimum rate.

● WHAT IS THE POLICY TO ASSESS GOOD GOVERNANCE PRACTICES OF THE INVESTEE COMPANIES?

ODDO BHF Asset Management's Responsible Investment Policy details our definition and assessment of what constitutes good governance practices.

Good governance practices can be assessed using a number of criteria, such as anti-corruption policies and practices, executive compensation policies, shareholder structure, quality of financial communication, and business ethics.

● WHAT IS THE ASSET ALLOCATION PLANNED FOR THIS FINANCIAL PRODUCT?

The Sub-Fund is actively managed and aims to provide a high level of income and capital growth.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Asset Allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of

At least 75% of net assets must be aligned with environmental and social characteristics.
 The Sub-Fund may hold up to 25% of its net assets in the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

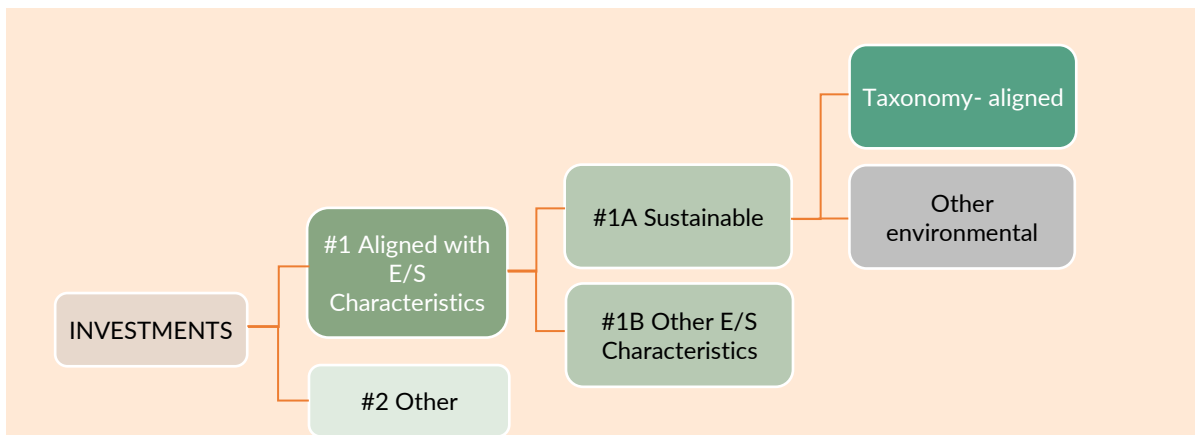

The Fund has a minimum 10% of sustainable investments. However, the Sub-Fund may hold investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Sub-Fund has a minimum of 0,2% of the net assets - weighted by the proportion of revenue aligned with the taxonomy for each issuer - invested in activities aligned with the taxonomy.

A minimum of 9,8% of the Sub-Fund's net assets are invested in other environmental investments and the Sub-Fund may hold social investment without minimum.

At least 75% of the issuers in the portfolio have an ESG rating after taking into account the weighting of each security. The remaining 25% may include investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments or with no ESG score.

Target funds with an ESG rating on fund level are also taken into account.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

● HOW DOES THE USE OF DERIVATIVES ATTAIN THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THE FINANCIAL PRODUCT?

Derivatives are not actively used to enhance ESG alignment or decrease ESG risk. As part of the investment strategy, the Sub-Fund is allowed to enter into derivatives for investment and hedging purposes.

● DOES THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES THAT COMPLY WITH THE EU TAXONOMY ?⁹

- Yes
 - In fossil gas
 - In nuclear energy

No

The fund manager analyses the portfolio positions according to ESG criteria. Investments in nuclear energy and fossil gases are not excluded for the Sub-Fund. A minimum proportion of activities connected with nuclear energy and/or fossil gases that correspond to the Taxonomy is not intended for the Sub-Fund.

TO WHAT MINIMUM EXTENT ARE SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE ALIGNED WITH THE EU TAXONOMY?

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● WHAT IS THE MINIMUM SHARE OF INVESTMENTS IN TRANSITIONAL AND ENABLING ACTIVITIES?

The minimum percentage is 0%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note on the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

WHAT IS THE MINIMUM SHARE OF SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE THAT ARE NOT ALIGNED WITH THE EU TAXONOMY?

There is a minimum share of 9.8 % of sustainable investments with an environmental objective, which are not aligned with EU Taxonomy.

WHAT IS THE MINIMUM SHARE OF SOCIALLY SUSTAINABLE INVESTMENTS?

The minimum percentage of sustainable investments with a social objective is 0%, but the Sub-Fund may make investments with a social objective.

WHAT INVESTMENTS ARE INCLUDED UNDER “#2 OTHER”, WHAT IS THEIR PURPOSE AND ARE THERE ANY MINIMUM ENVIRONMENTAL OR SOCIAL SAFEGUARDS?

The investments included in “#2 Other” are derivatives and other ancillary assets and/or investments of the financial product which are neither aligned with the environmental or social characteristics.

IS A SPECIFIC INDEX DESIGNATED AS A REFERENCE BENCHMARK TO DETERMINE WHETHER THIS FINANCIAL PRODUCT IS ALIGNED WITH THE ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS THAT IT PROMOTES?

The Sub-Fund does not have a benchmark.

- HOW IS THE REFERENCE BENCHMARK CONTINUOUSLY ALIGNED WITH EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THE FINANCIAL PRODUCT?

Non applicable.

- HOW IS THE ALIGNMENT OF THE INVESTMENT STRATEGY WITH THE METHODOLOGY OF THE INDEX ENSURED ON A CONTINUOUS BASIS?

Non applicable.

- HOW DOES THE DESIGNATED INDEX DIFFER FROM A RELEVANT BROAD MARKET INDEX?

Non applicable.

- WHERE CAN THE METHODOLOGY USED FOR THE CALCULATION OF THE DESIGNATED INDEX BE FOUND?

Non applicable.

WHERE CAN I FIND MORE PRODUCT SPECIFIC INFORMATION ONLINE?

Further information on how the Investment Manager takes ESG criteria into account will be available in the Sub-Fund’s annual report and on am.oddo-bhf.com.

** Regulation (EU) 2019/2088 on sustainability-related disclosure requirements in the financial services sector

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Appendix XI:

Environmental and/or social characteristics

Product name: ODDO BHF CREDIT OPPORTUNITIES

ODDO BHF Credit Opportunities ("Sub-Fund" or "Fund") is a Sub-Fund of SICAV ODDO BHF ("SICAV").

Legal entity identifier (LEI-CODE) : 5493006MVL1X779UVS34

Sustainable Investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significant harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

DOES THIS FINANCIAL PRODUCT HAVE A SUSTAINABLE INVESTMENT OBJECTIVE?	
●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: N/A <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: N/A	<input checked="" type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20 % of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments

WHAT ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS ARE PROMOTED BY THIS FINANCIAL PRODUCT?

The Sub-fund's ESG approach aims to promote good carbon emissions management:

- By excluding issuers involved in high-carbon sectors such as coal and unconventional oil and gas, as described in the management company's Exclusion Policy;
- And, at the same time, ensuring that the Sub-fund's average carbon intensity is better than that of its investment universe.
- :
- I. **First stage: exclusions:**

The Sub-Fund applies the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com. In addition, the Sub-Fund excludes production of adult entertainment, conventional weapons, gambling and GMO from all investments, as well as the Paris Aligned Benchmark exclusions.

II.

Second stage: ESG rating and carbon intensity:

This stage involves taking into account the ESG rating of the securities comprising the investment universe. To this end, the management team relies on ESG ratings provided by the external data provider MSCI ESG Research.

In the event that an issuer has not been rated by MSCI ESG Research, the Management Company has two options:

o Firstly, it may use the internal ESG rating assigned to the securities of the issuer concerned by the Management company.

o Secondly, if the management company has not assigned an ESG rating to the securities of the issuer concerned, it may generate a substitute ESG rating, which is defined, among other things, by an average based on MSCI's ESG ratings according to the sector of activity, the size of the company and the country of domicile. The use of this substitute rating ends when MSCI ESG Research generates its own ESG rating for the issuer concerned or when an ESG rating is assigned by the management company.

In addition, the management company may review an ESG rating provided by MSCI. This review is carried out by the ESG team and may result in the replacement of the MSCI ESG rating with a new internal ESG rating.

The management team takes into account the weighting of the securities held in the portfolio when calculating the average ESG score of the Sub-Fund. The Management Company pledges that at least 90 % of the issuers in the portfolio shall have an ESG rating (taking the weighting of each share into account). This minimum allows us to be aware of the main sustainability-related opportunities and risks for the majority of the Sub-Fund's assets.

Besides the integration of ESG ratings, the Sub-Fund commits to having a better carbon intensity (weighted average of Scope 1 and 2 CO₂ emissions divided by the revenue of each company in which the Sub-fund invests) than that of its investment universe.

WHAT SUSTAINABILITY INDICATORS ARE USED TO MEASURE THE ATTAINMENT OF EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THIS FINANCIAL PRODUCT?

The following sustainability indicators are used to measure the achievement of ESG characteristics:

- The **ESG coverage rate**, based on the commitment that at least 90% of the Sub-fund's securities have an ESG rating after taking into account the weighting of each security and excluding cash, derivatives, sovereigns, and quasi-sovereigns;
- The weighted average **ESG rating** of the Sub-fund to assess the fulfillment of environmental, social, and governance characteristics;
- The Sub-fund's **sustainable investment**, which will be at least 20%;
- The Sub-fund's **carbon intensity** (weighted average of Scope 1 and 2 CO₂ emissions divided by the revenue of each company in which the Sub-fund invests), particularly in relation to that of the investment universe. Finally, for at least 90% of the securities comprising the net assets of the Sub-fund data in relation to carbon intensity are available, after taking into account the weighting of each security and excluding cash, derivatives, sovereigns, and quasi-sovereigns.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● WHAT ARE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY INTENDS TO MAKE AND HOW DOES THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The Sub-Fund references the objectives described above in its ESG strategy but does not seek to select its investments on the basis of one or more of these objectives only. The contributions to these objectives are taken into account by the sustainability indicators used by the ESG strategy.

As such the Sub-Fund intends to capture both aspects of a company contribution: it's positive environmental and/or social output contribution coming from 1/ companies' products and/or services revenues or 2/ its contribution to environmental and/or social objective thanks to companies' wide operations when aligned with environmental and/or social targets.

To be eligible as a Sustainable Investment, a company must pass at least one of the criteria detailed below:

a) Criteria "based on company operations":

- Implied Temperature Rise « ITR »:

Company operations for which climate targets initiatives are maintaining temperature rise below or equal to 2°C, in line with Paris Agreement's pathway of 2°C or below, is considered to contribute to an environmental objective and as such qualify as a Sustainable Investment. We use MSCI ITR data to assess the temperature alignment.

- SBTi approved emission targets:

Greenhouse gas emissions are mentioned as one possibility to measure an environmental objective. Our approach to measuring sustainable investments also includes companies that have their GHG emissions reduction targets approved by the Science-Based Targets initiative (SBTi).

b) Criteria "based on company revenue activities":

- Sustainable Solutions Revenues:

We assess how an economic activity contributes to specific environmental or social objectives. In that respect we use MSCI "Sustainable Impact Revenue" data field. The "Sustainable Impact Revenue" is between 0% and 100% and represents a specific share of companies' overall revenue.

- EU Taxonomy aligned revenue:

The EU Taxonomy is designed to identify economic activities that tackle environmental or social objectives. However, only two of the six defined environmental objectives are fully scoped for the time being. For a company, we will use the taxonomy alignment as reported as the percentage of revenue that are generated by taxonomy aligned activities.

- EU Taxonomy aligned capex:

For a company, we will use the taxonomy alignment as reported as the percentage of capital expenditures that are generated by taxonomy aligned activities.

- "Green percentage" of a firm patent:

This indicator helps us to identify companies that derived revenues and held patents on emission-reduction technologies and practices to be contributing to an environmental objective.

c) Additional criteria: Sustainable bonds:

We consider that green, social and sustainability bonds can qualify as sustainable investments as on as the use of proceeds are used to finance projects that contribute positively to an environmental and/or social objective.

● HOW DO THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY INTENDS TO MAKE, NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The following approach is defined to comply with Article 2 (17) of the SFDR.

- **Sectors excluded from investment:** The Sub-Fund applies the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com. In addition, the Sub-Fund excludes production of adult entertainment, conventional weapons, GMO and gambling from all investments, as well as the Paris Aligned Benchmark exclusions.
- **Controversies:** The most controversial companies according to our MSCI ESG data provider, and after confirmation by the ESG team for a second check, will not be considered sustainable.
- **Consideration of major negative impacts:** In order not to significantly undermine sustainability objectives, the Investment Manager defines control rules (pre-trade) for selected significantly harmful activities: exposure to controversial weapons (0% tolerance), and serious violations of the UN Global Compact principles and the Organization for Economic Co-operation and Development (OECD) guidelines for multinational enterprises (0% tolerance)
- **Dialogue, engagement and voting:** our dialogue, engagement and voting policies support the objective of avoiding significant harm by identifying the most important risks and have our voice heard to generate change and improvement.

HOW HAVE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS BEEN TAKEN INTO ACCOUNT?

Regulation (EU) 2020/852 defines certain areas of concern that may have a negative impact ("PAI").

The Investment Manager applies pre-trade rules on two PAIs:

- Exposure to controversial weapons (PAI 14 and 0% tolerance),

Serious violations of the UN Global Compact principles and the Organization for Economic Co-operation and Development (OECD) guidelines for multinational enterprises (PAI 10 and 0% tolerance).

In addition, MSCI ESG analysis may include, when the data is available, the monitoring of greenhouse gas emissions (PAI 1), exposure to fossil fuels (PAI 4), share of non-renewable energy consumption and production (PAI 5), energy consumption intensity by high climate impact sectors (PAI 6), activities with a negative impact on biodiversity-sensitive areas (PAI 7), the lack of processes and compliance mechanisms to monitor adherence to the UN Global Compact and OECD Guidelines for Multinational Enterprises (PAI 11), the unadjusted gender pay gap (PAI 12), and board parity (PAI 13). The Investment Manager also includes two other PAIs: the deforestation policy (PAI 15) and the lack of a human rights policy (PAI 9).

Further information on the Investment Manager's consideration of PAI is available on am.oddo-bhf.com.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— HOW ARE THE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS? DETAILS:

The Investment Manager ensures that the Sub-Fund's sustainable investments are aligned by applying its United Nations Global Compact (UNGC) exclusion list, as set out in the Investment Manager's exclusion policy. Proven violations of the OECD Guidelines for Multinational Enterprises and/or the United Nations Guiding Principles on Business and Human Rights will also result in exclusion.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

DOES THIS FINANCIAL PRODUCT CONSIDER PRINCIPAL ADVERSE IMPACTS ON SUSTAINABILITY FACTORS?

Yes, in accordance with the provisions of Article 8 of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (SFDR), the Investment Manager takes sustainability risks into account by integrating ESG (Environmental, Social and Governance) criteria into its investment decision-making process, as set out in the “Investment Strategy” section. This process also makes it possible to assess the management team’s ability to manage the adverse sustainability impacts of their business activities.

No

WHAT INVESTMENT STRATEGY DOES THIS FINANCIAL PRODUCT FOLLOW?

The Sub-Fund is actively managed and aims to achieve a performance, net of fees, higher than €STR plus 2% (capitalized), on an annual basis by managing a portfolio investing at least 70% of its total assets in securities issued by issuers headquartered in an OECD member state and integrating ESG (Environmental, Social, and Governance) criteria in parallel.

I. The investment universe of the Sub-Fund is made up of the companies included in the following credit market indices: the ICE BofAML Euro Corporate Senior Index, the ICE BofAML BB-B Euro High Yield Non-Financial Constrained Index, the ICE BofAML Euro Subordinated Financial Index, the ICE BofA Euro Non-Financial Subordinated Index, the ICE BofAML Euro Large Cap ex Corporates Index, and the ICE BofA Non-Financial US Emerging Markets Liquid Corporate Plus Index and the ICE BofA Contingent Capital Index. As part of the investment process, the Investment Manager has full discretion over the composition of the Sub-Fund’s portfolio and may deviate from the investment universe. The Investment Manager takes ESG (Environment, Social and Governance) criteria into account in two stages.

- First stage: sector exclusion

The Sub-Fund applies the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com. In addition, the Sub-Fund excludes production of adult entertainment, conventional weapons, GMO and gambling from all investments, as well as the Paris Aligned Benchmark exclusions.

- Second stage: ESG rating and carbon intensity
This stage involves taking into account the ESG rating of the securities comprising the investment universe. To this end, the management team relies on ESG ratings provided by the external data provider MSCI ESG Research.
In the event that an issuer has not been rated by MSCI ESG Research, the Management Company has two options:
 - o Firstly, it may use the ESG rating assigned to the securities of the issuer concerned by the Management company.
 - o Secondly, if the management company has not assigned an ESG rating to the securities of the issuer concerned, it may generate a substitute ESG rating, which is defined, among other things, by an average based on MSCI's ESG ratings according to the sector of activity, the size of the company and the country of domicile. The use of this substitute rating ends when MSCI ESG Research generates its own ESG rating for the issuer concerned or when an ESG rating is assigned by the management company.

In addition, the management company may review an ESG rating provided by MSCI. This review is carried out by the ESG team and may result in the replacement of the MSCI ESG rating with a new internal ESG rating.

The management team takes into account the weighting of the securities held in the portfolio when calculating the average ESG score of the Sub-Fund.. Therefore, at least 90% of the issuers in the portfolio have an ESG rating after taking into account the weighting of each security.

Besides the integration of ESG ratings, the Sub-Fund commits to having a better carbon intensity (weighted average of Scope 1 and 2 CO2 emissions divided by the revenue of each company in which the Sub-fund invests) than that of its investment universe.

II. From this eligible universe, the Investment Manager's management team will follow an investment process as detailed in the general part of this Prospectus.

● WHAT ARE THE BINDING ELEMENTS OF THE INVESTMENT STRATEGY USED TO SELECT THE INVESTMENTS TO ATTAIN EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THIS FINANCIAL PRODUCT?

The binding elements of the Sub-fund are the following:

- The **ESG coverage rate**, based on the commitment that at least 90% of the Sub-fund's securities have an ESG rating after taking into account the weighting of each security and excluding cash, derivatives, sovereigns, and quasi-sovereigns;
- The Sub-fund's **sustainable investment**, which will be at least 20%;
- The Sub-fund's **carbon intensity** (weighted average of Scope 1 and 2 CO2 emissions divided by the revenue of each company in which the Sub-fund invests), particularly in relation to that of the investment universe. Finally, for at least 90% of the securities comprising the net assets of the Sub-fund data in relation to carbon intensity are available, after taking into account the weighting of each security and excluding cash, derivatives, sovereigns, and quasi-sovereigns.

● WHAT IS THE COMMITTED MINIMUM RATE TO REDUCE THE SCOPE OF THE INVESTMENTS CONSIDERED PRIOR TO THE APPLICATION OF THAT INVESTMENT STRATEGY?

The Investment Manager does not take into account a minimum commitment rate to reduce the scope of the investments envisaged before applying the investment strategy.

● WHAT IS THE POLICY TO ASSESS GOOD GOVERNANCE PRACTICES OF THE INVESTEE COMPANIES?

ODDO BHF Asset Management's Responsible Investment Policy details our definition and assessment of what constitutes good governance practices. Good governance practices can be assessed using a number of criteria, such as anti-corruption policies and practices, executive compensation policies, shareholder structure, quality of financial communication, and business ethics.

WHAT IS THE ASSET ALLOCATION PLANNED FOR THIS FINANCIAL PRODUCT?

The Sub-Fund is actively managed and aims to achieve a performance, net of fees, higher than €STR plus 2% (capitalized), on an annual basis by managing a portfolio investing at least 70% of its total assets in securities issued by issuers headquartered in an OECD member state and integrating an ESG (Environmental, Social, and Governance) criteria analysis in parallel.

At least 80% of net assets must be aligned with environmental and social characteristics. The Sub-Fund may hold up to 20% of its net assets in the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The Sub-Fund has a minimum 20% of sustainable investments. However, the Fund may hold investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Sub-Fund has a minimum of 0,5% of the net assets - weighted by the proportion of sales figures aligned with the taxonomy for each issuer - invested in activities aligned with the taxonomy.

A minimum of 20% of the Sub-Fund's net assets are invested in other environmental investments and the Sub-Fund may hold social investment without minimum

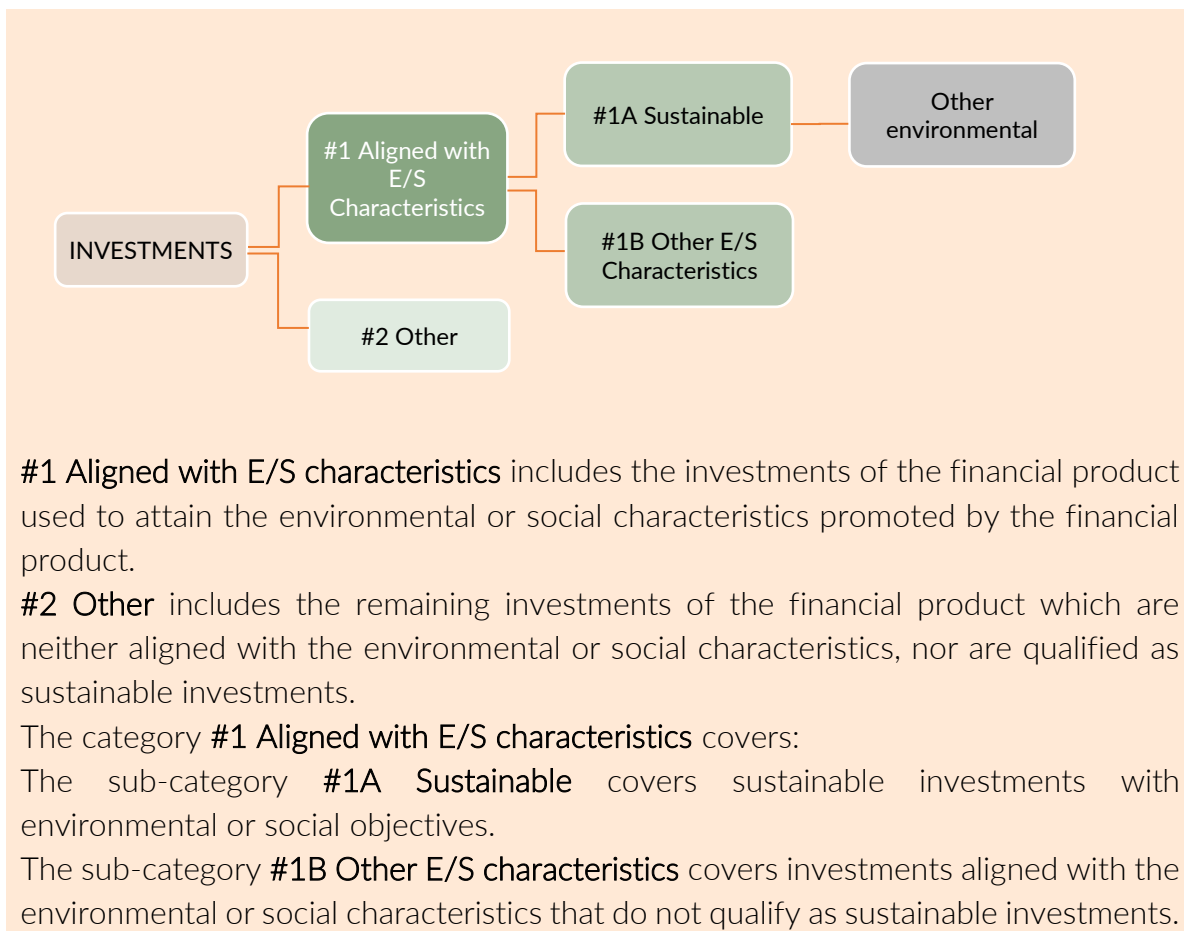

At least 90% of the issuers in the portfolio have an ESG rating after taking into account the weighting of each security. Target funds with an ESG rating on fund level are also taken into account.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Asset Allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **HOW DOES THE USE OF DERIVATIVES ATTAIN THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THE FINANCIAL PRODUCT?**

Derivatives are not actively used to enhance ESG alignment or decrease ESG risk. As part of the investment strategy, the Sub-Fund is allowed to enter into derivatives for investment and hedging purposes.

● **DOES THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES THAT COMPLY WITH THE EU TAXONOMY ?¹⁰**

- Yes
 - In fossil gas
 - In nuclear energy
- No

The fund manager analyses the portfolio positions according to ESG criteria. Investments in nuclear energy and fossil gases are not excluded for the Sub-Fund. A minimum proportion of activities connected with nuclear energy and/or fossil gases that correspond to the Taxonomy is not intended for the Sub-Fund.

¹⁰ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note on the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

TO WHAT MINIMUM EXTENT ARE SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE ALIGNED WITH THE EU TAXONOMY?

Taxonomy-aligned activities are expressed as a share of:

-turnover
reflecting the share of revenue from green activities of investee companies.

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

-operational expenditure (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities
directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities
are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

WHAT IS THE MINIMUM SHARE OF INVESTMENTS IN TRANSITIONAL AND ENABLING ACTIVITIES?

The minimum percentage is 0%.

WHAT IS THE MINIMUM SHARE OF SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE THAT ARE NOT ALIGNED WITH THE EU TAXONOMY?

There is a minimum share of 20 % of sustainable investments with an environmental objective, which are not aligned with the EU Taxonomy

WHAT IS THE MINIMUM SHARE OF SOCIALLY SUSTAINABLE INVESTMENTS?

The minimum percentage of sustainable investments with a social objective is 0%, but the Sub-Fund may make investments with a social objective.

WHAT INVESTMENTS ARE INCLUDED UNDER "#2 OTHER", WHAT IS THEIR PURPOSE AND ARE THERE ANY MINIMUM ENVIRONMENTAL OR SOCIAL SAFEGUARDS?

The investments included in "#2 Other" are derivatives and other ancillary assets (like money market instruments) as set out in the section "Investment Strategy" of the Sub-Fund. There are no minimum environmental or social safeguards applied.

IS A SPECIFIC INDEX DESIGNATED AS A REFERENCE BENCHMARK TO DETERMINE WHETHER THIS FINANCIAL PRODUCT IS ALIGNED WITH THE ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS THAT IT PROMOTES?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The benchmark of the Sub-Fund is not intended to be aligned with the environmental and/or social characteristics promoted by the Sub-Fund.

- HOW IS THE REFERENCE BENCHMARK CONTINUOUSLY ALIGNED WITH EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THE FINANCIAL PRODUCT?

Non applicable.

- HOW IS THE ALIGNMENT OF THE INVESTMENT STRATEGY WITH THE METHODOLOGY OF THE INDEX ENSURED ON A CONTINUOUS BASIS?

Non applicable.

- HOW DOES THE DESIGNATED INDEX DIFFER FROM A RELEVANT BROAD MARKET INDEX?

Non applicable.

- WHERE CAN THE METHODOLOGY USED FOR THE CALCULATION OF THE DESIGNATED INDEX BE FOUND?

Non applicable.

WHERE CAN I FIND MORE PRODUCT SPECIFIC INFORMATION ONLINE?

Further information on how the Investment Manager takes ESG criteria into account will be available in the Sub-Fund's annual report and on am.oddo-bhf.com.

** Regulation (EU) 2019/2088 on sustainability-related disclosure requirements in the financial services sector

Appendix XII:

Sustainable Investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significant harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Product name: ODDO BHF GLOBAL CREDIT SHORT DURATION

ODDO BHF Global Credit Short Duration (“Sub-Fund” or “Fund”) is a Sub-Fund of SICAV ODDO BHF (“SICAV”).

Legal entity identifier: 5493006BC8COASXXQY52

DOES THIS FINANCIAL PRODUCT HAVE A SUSTAINABLE INVESTMENT OBJECTIVE?	
●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: N/A <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: N/A	<input checked="" type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments . <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments.

WHAT ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS ARE PROMOTED BY THIS FINANCIAL PRODUCT?

The Sub-Fund promotes environmental and/or social characteristics that are reflected in the Management Company’s external ESG rating system. ESG criteria are taken into consideration through an approach which can be broken down into two stages:

I. First stage: exclusions:

The Sub-Fund applies the common exclusion framework as detailed in the Management Company’s exclusion policy, which is available at am.oddo-bhf.com. In addition, the Sub-Fund excludes production of adult entertainment from all investments.

II. Second stage:

ESG rating: This stage involves taking into account the ESG rating of the companies in the investment universe. To that end, the management team uses non-financial data and ratings provided by an external data provider, MSCI ESG Research. Additional ESG assessments from

the Management Company's research team or from a third party may also be used, particularly in the event that an issuer has not been rated by MSCI.

The management team takes into account the weighting of securities held in the portfolio when calculating the portfolio average. In the event of an ESG rating downgrade or a change in the ESG rating methodology affecting the average portfolio rating, the return to an average rating that is higher than that of the benchmark will be achieved by taking into account the interests of unitholders and market conditions. The Management Company pledges that at least 75% of the issuers in the portfolio shall have an ESG rating (taking the weighting of each share into account).

● WHAT SUSTAINABILITY INDICATORS ARE USED TO MEASURE THE ATTAINMENT OF EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THIS FINANCIAL PRODUCT?

The MSCI ESG rating model uses all of the characteristics and indicators mentioned in the paragraph above, and the monthly ESG report currently shows indicators that demonstrate their attainment as follows:

The weighted ESG score of the portfolio to assess the attainment of environmental, social and governance characteristics.

At least 75% of the issuers in the portfolio shall have an ESG rating (taking the weighting of each share into account).

● WHAT ARE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY INTENDS TO MAKE AND HOW DOES THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The Fund references the objectives described above in its ESG strategy but does not seek to select its investments on the basis of one or more of these objectives only. The contributions to these objectives are taken into account by the sustainability indicators used by the ESG strategy.

As such the Sub-Fund intends to capture both aspects of a company contribution: it's positive environmental and/or social output contribution coming from 1/ companies' products and/or services revenues or 2/ its contribution to environmental and/or social objective thanks to companies' wide operations when aligned with environmental and/or social targets.

To be eligible as a Sustainable Investment, a company must pass at least one of the criteria detailed below:

a) Criteria "based on company operations":

- Implied Temperature Rise « ITR »:

Company operations for which climate targets initiatives are maintaining temperature rise below or equal to 2°C, in line with Paris Agreement's pathway of 2°C or below, is considered to contribute to an environmental objective and as such qualify as a Sustainable Investment. We use MSCI ITR data to assess the temperature alignment.

- SBTi approved emission targets:

Greenhouse gas emissions are mentioned as one possibility to measure an environmental objective. Our approach to measuring sustainable investments also includes companies that have their GHG emissions reduction targets approved by the Science-Based Targets initiative (SBTi).

b) Criteria "based on company revenue activities":

- Sustainable Solutions Revenues:

We assess how an economic activity contributes to specific environmental or social objectives. In that respect we use MSCI "Sustainable Impact Revenue" data field. The "Sustainable Impact Revenue" is between 0% and 100% and represents a specific share of companies' overall revenue.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- EU Taxonomy aligned revenue:

The EU Taxonomy is designed to identify economic activities that tackle environmental or social objectives. However, only two of the six defined environmental objectives are fully scoped for the time being. For a company, we will use the taxonomy alignment as reported as the percentage of revenue that are generated by taxonomy aligned activities.

- EU Taxonomy aligned capex:

For a company, we will use the taxonomy alignment as reported as the percentage of capital expenditures that are generated by taxonomy aligned activities.

- “Green percentage” of a firm patent:

This indicator helps us to identify companies that derived revenues and held patents on emission-reduction technologies and practices to be contributing to an environmental objective.

c) Additional criteria: Sustainable bonds:

We consider that green, social and sustainability bonds can qualify as sustainable investments as long as the use of proceeds are used to finance projects that contribute positively to an environmental and/or social objective.

● HOW DO THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY INTENDS TO MAKE, NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The following approach is defined to comply with Article 2 (17) of the SFDR**.

- **Sectors excluded from investment:**

The Sub-fund applies the common exclusion framework as detailed in the Management Company’s exclusion policy, which is available at am.oddo-bhf.com. In addition, the Sub-Fund excludes production of adult entertainment from all investments.

- **Controversies:** The most controversial companies according to our MSCI ESG data provider, and after confirmation by the ESG team for a second check, will not be considered sustainable.

- **Consideration of major negative impacts:** In order not to significantly undermine sustainability objectives, the Investment Manager defines control rules (pre-trade) for selected significantly harmful activities: exposure to controversial weapons (0% tolerance), and serious violations of the UN Global Compact principles and the Organization for Economic Co-operation and Development (OECD) guidelines for multinational enterprises (0% tolerance).

- **Dialogue, engagement, and voting:** our dialogue, engagement and voting policies support the objective of avoiding significant harm by identifying the most important risks and have our voice heard to generate change and improvement.

— HOW HAVE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS BEEN TAKEN INTO ACCOUNT?

Regulation (EU) 2020/852 defines certain areas of concern that may have a negative impact (“PAI”).

The Investment Manager applies pre-trade rules on two PAIs:

- Exposure to controversial weapons (PAI 14 and 0% tolerance)

- Serious violations of the UN Global Compact principles and the Organization for Economic Cooperation and Development (OECD) guidelines for multinational enterprises (PAI 10 and 0% tolerance).

Furthermore, MSCI ESG Ratings integrate environmental, social and governance themes where the collection of other core PAI data for corporates and sovereigns may support their ESG rating. The ESG

analysis may include for corporates, when the data is available, the monitoring of greenhouse gas emissions (PAI 1), activities with a negative impact on biodiversity-sensitive areas (PAI 7), the lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (PAI 11), and board gender diversity (PAI 13). It also includes for sovereign issuers greenhouse gas intensity per capita (PAI 15 normally based normally on gross domestic product and not on capita) and investee countries subject to social violations (PAI 16). Nevertheless, the Management Company does not fix specific objectives or defined controlling rules on these other core PAI except the ones mentioned in the first paragraph. More information on MSCI ESG Ratings: <https://www.msci.com/zh/esg-ratings>

— HOW ARE THE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS? DETAILS:

The Investment Manager ensures that the Sub-Fund's sustainable investments are aligned by applying its United Nations Global Compact (UNGC) exclusion list, as set out in the Investment Manager's exclusion policy. Proven violations of the OECD Guidelines for Multinational Enterprises and/or the United Nations Guiding Principles on Business and Human Rights will also result in exclusion.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

DOES THIS FINANCIAL PRODUCT CONSIDER PRINCIPAL ADVERSE IMPACTS ON SUSTAINABILITY FACTORS?

Yes, in accordance with the provisions of Article 8 of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (SFDR), the Investment Manager takes sustainability risks into account by integrating ESG (Environmental, Social and Governance) criteria into its investment decision-making process, as set out in the “Investment Strategy” section. This process also makes it possible to assess the management team’s ability to manage the adverse sustainability impacts of their business activities.

No

WHAT INVESTMENT STRATEGY DOES THIS FINANCIAL PRODUCT FOLLOW?

The Sub-Fund is actively managed and references a benchmark, €STR plus 1.5% (capitalized) (the “Benchmark”), by seeking to outperform it and for performance fee calculation purposes, if any as described in the section “Investment Strategy” of the Sub-Fund.

The approach is based on two successive stages.

ESG (Environment, Social and Governance) criteria are a complement to the credit analysis and are fully integrated into the investment process. The approach is based on two successive stages.

- First stage: Exclusion

The Sub-Fund applies the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com. In addition, the Sub-Fund excludes production of adult entertainment from all investments.

- Second stage: ESG rating

This stage involves taking into account the ESG rating of the companies in the investment universe. To that end, the management team uses non-financial data and ratings provided by an external data provider, MSCI ESG Research. Additional ESG assessments from the Management Company's research team or from a third party may also be used, particularly in the event that an issuer has not been rated by MSCI.

In the event that an issuer has not been rated by MSCI ESG Research, the Management Company can use several options:

- o The use of the Management Company's ESG assessment if it exists or from a third party.
- o The use of a proxy score generated by the Management Company. To generate this proxy ESG score the Management Company calculates an average ESG score by aggregating existing ESG scores from MSCI ESG Research respecting per company the market capitalization, economy type and sector allocation. The proxy ESG score stops when the MSCI ESG Research generates its own score.

In addition, the Management Company can review an MSCI ESG Research after having received a request from the Fund Manager and based on detailed reasons. This review is done by the ESG Team by making an ESG Due Diligence and can achieve until an override of the MSCI ESG Research score by a new ESG score. This new ESG score is explained and justified in the ESG Due Diligence. The review of the MSCI ESG Research is limited to 10% of the weighted fund positions.

The management team takes into account the weighting of securities held in the portfolio when calculating the portfolio average. In the event of an ESG rating downgrade or a change in the ESG rating methodology affecting the average portfolio rating, the return to an average rating that is higher than that of the benchmark will be achieved by taking into account the interests of unitholders and market conditions. The Management Company pledges that at least 75% of the issuers in the portfolio shall have an ESG rating (taking the weighting of each share into account).

Therefore, at least 75% of the issuers in the portfolio have an ESG rating after taking into account the weighting of each security.

This ESG scoring system impacts the portfolio structure by limiting exposure to issuers exhibiting lower ESG scores and to ensure a certain overall ESG quality level of the portfolio. In particular, the weighted average ESG rating of the portfolio shall be above of the ESG weighted average of the investment universe, defined as the following index: ICE BofA 3-5 Year BB-B Global High Yield Non-Financial Constrained Index; HWXE, pursuant to the MSCI ESG Research.

The management team may invest in debt securities from outside the investment universe. The investment universe is only a relevant comparison element for the ESG rating of the portfolio.

● WHAT ARE THE BINDING ELEMENTS OF THE INVESTMENT STRATEGY USED TO SELECT THE INVESTMENTS TO ATTAIN EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THIS FINANCIAL PRODUCT?

The Sub-Fund applies:

- the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com. In addition, the Sub-Fund excludes production of adult entertainment from all investments.

- The weighted ESG score of the portfolio shall be above the MSCI weighted ESG score of the investment universe.
-
- At least 75% of the issuers in the portfolio have an ESG rating after taking into account the weighting of each security.
- The Sub-fund's sustainable investment, which will be at least 10%;

● **WHAT IS THE COMMITTED MINIMUM RATE TO REDUCE THE SCOPE OF THE INVESTMENTS CONSIDERED PRIOR TO THE APPLICATION OF THAT INVESTMENT STRATEGY?**

There is no minimum rate.

● **WHAT IS THE POLICY TO ASSESS GOOD GOVERNANCE PRACTICES OF THE INVESTEE COMPANIES?**

ODDO BHF Asset Management's Responsible Investment Policy details our definition and assessment of what constitutes good governance practices.

Good governance practices can be assessed using a number of criteria, such as anti-corruption policies and practices, executive compensation policies, shareholder structure, quality of financial communication, and business ethics. **WHAT IS THE ASSET ALLOCATION PLANNED FOR THIS FINANCIAL PRODUCT?**

At least 75 % of the Sub-Fund's net asset value is aligned with environmental and/or social characteristics.

The Sub-Fund may also hold up to 25 % in "Other", as defined below, which includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

A minimum of 10 % of the Sub-Fund's net asset value is invested in sustainable investments. The Sub-Fund may also hold assets that are aligned with environmental and/or social characteristics that do not qualify as sustainable investments.

The Fund has a minimum of 0,2% of the net assets - weighted by the proportion of revenue aligned with the taxonomy for each issuer - invested in activities aligned with the taxonomy.

A minimum of 9,8% of the Fund's net assets are invested in other environmental investments and the Fund may hold social investment without minimum.

At least 75% of the issuers in the portfolio have an ESG rating after taking into account the weighting of each security. Target funds with an ESG Rating on fund level are also taken into account. The remaining 25% may include investments of the financial product which are neither aligned with the environmental or social characteristics.

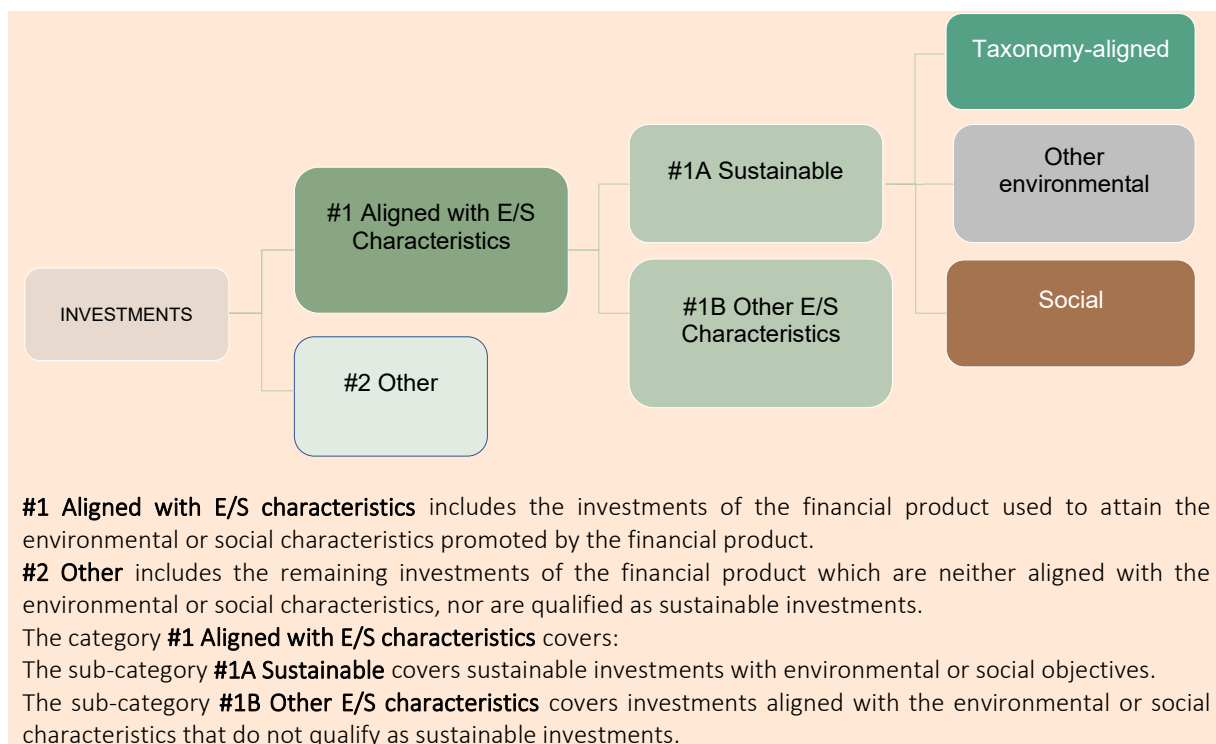

Good Governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover**, reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● HOW DOES THE USE OF DERIVATIVES ATTAIN THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THE FINANCIAL PRODUCT?

Derivatives are not actively used to enhance ESG alignment or decrease ESG risk. As part of the investment strategy, the Sub-Fund is allowed to enter into derivatives for investment and hedging purposes.

DOES THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES THAT COMPLY WITH THE EU TAXONOMY¹¹?

- Yes
 In fossil gas In nuclear energy
 No

The fund manager analyses the portfolio positions according to ESG criteria. Investments in nuclear energy and fossil gases are not excluded for the Sub-Fund. A minimum proportion of activities connected with nuclear energy and/or fossil gases that correspond to the Taxonomy is not intended for the Sub-Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● TO WHAT MINIMUM EXTENT ARE SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE ALIGNED WITH THE EU TAXONOMY?

¹¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory not on the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.**

● **WHAT IS THE MINIMUM SHARE OF INVESTMENTS IN TRANSITIONAL AND ENABLING ACTIVITIES?**

The minimum percentage is 0%.

● **WHAT IS THE MINIMUM SHARE OF SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE THAT ARE NOT ALIGNED WITH THE EU TAXONOMY?**

There is a minimum share of 9,8 % of sustainable investments with an environmental objective, which are not aligned with EU Taxonomy.

● **WHAT IS THE MINIMUM SHARE OF SOCIALLY SUSTAINABLE INVESTMENTS?**

The minimum percentage of sustainable investments with a social objective is 0%, but the Sub-Fund may make investments with a social objective.

● **WHAT INVESTMENTS ARE INCLUDED UNDER "#2 OTHER", WHAT IS THEIR PURPOSE AND ARE THERE ANY MINIMUM ENVIRONMENTAL OR SOCIAL SAFEGUARDS?**

The investments included in "#2 Other" are derivatives and other ancillary assets and/or investments of the financial product which are neither aligned with the environmental or social characteristics.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

IS A SPECIFIC INDEX DESIGNATED AS A REFERENCE BENCHMARK TO DETERMINE WHETHER THIS FINANCIAL PRODUCT IS ALIGNED WITH THE ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS THAT IT PROMOTES?

The benchmark of the Sub-Fund is not intended to be aligned with the environmental and/or social characteristics promoted by the Sub-Fund.

HOW IS THE REFERENCE BENCHMARK CONTINUOUSLY ALIGNED WITH EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THE FINANCIAL PRODUCT?

Non applicable.

HOW IS THE ALIGNMENT OF THE INVESTMENT STRATEGY WITH THE METHODOLOGY OF THE INDEX ENSURED ON A CONTINUOUS BASIS?

Non applicable.

HOW DOES THE DESIGNATED INDEX DIFFER FROM A RELEVANT BROAD MARKET INDEX?

Non applicable.

WHERE CAN THE METHODOLOGY USED FOR THE CALCULATION OF THE DESIGNATED INDEX BE FOUND?

Non applicable.

WHERE CAN I FIND MORE PRODUCT SPECIFIC INFORMATION ONLINE?

More product-specific information can be found on the website: <https://www.am.oddo-bhf.com>.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

Appendix XIII:

Sustainable Investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Product name: ODDO BHF ARTIFICIAL INTELLIGENCE

The ODDO BHF Artificial Intelligence („Sub-Fund“) is a sub-fund of SICAV ODDO BHF.

Legal entity identifier (LEI-CODE): 549300JBBFN3XZYK2J67

DOES THIS FINANCIAL PRODUCT HAVE A SUSTAINABLE INVESTMENT OBJECTIVE

Yes

- It will make a minimum of **sustainable investments with an environmental objective: 90 %**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It will make a minimum of **sustainable investments with a social objective: N/A**

No

- It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of N/A of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promotes E/S characteristics, but **will not make any sustainable investments**

WHAT IS THE SUSTAINABLE INVESTMENT OBJECTIVE OF THE FINANCIAL PRODUCT?

The Sub-Fund seeks capital growth by investing into global listed equities with exposure to the global mega trend “artificial intelligence” via a selection of related sub themes. The Sub-Fund has sustainable investment as its objective, within the meaning of Article 9 paragraph 3 of the SFDR. The Sub-Fund’s sustainable investment objective is to contribute to carbon-reduction and to seize opportunities arising from the transition to a low-carbon economy to achieve the long-term objectives of the Paris Agreement dated 12th December 2015 to limit global warming. The Sub-Fund will achieve carbon emissions 30% lower than the benchmark’s, the MSCI World NR, as measured by carbon intensity (tCO2/ mUSD revenue; aggregated at portfolio level including scope 1, scope 2 and scope 3).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

WHAT SUSTAINABILITY INDICATORS ARE USED TO MEASURE THE ATTAINMENT OF THE SUSTAINABLE INVESTMENT OBJECTIVE OF THIS FINANCIAL PRODUCT?

The sustainable investment objective is assessed by the CO2 emissions linked to the portfolio investments of the Sub-Fund as measured by carbon intensity (tons of CO2 for Scope 1, 2, and 3 / million USD revenue) aggregated at portfolio level.

HOW DO SUSTAINABLE INVESTMENTS NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The following approach is defined to respect the Article 2 (17) of the SFDR Regulation:

1. Rating exclusions: Companies with an MSCI ESG Rating of CCC and B if the MSCI ESG sub-rating is below 3 for one of the environmental, social or governance categories are systematically excluded from the initial Investment Universe MSCI World NR;

2. Sector and norm-based exclusions: The Sub-Fund applies the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com. In addition, the Sub-fund applies specific exclusions: production of adult entertainment, conventional weapons, gambling and GMOs from all investments. The Sub-Fund will also not be able to invest in energy (oil, gas and coal), materials, real estate, air freight & logistics and airlines, based on information from Bloomberg.

In the event that the Sub-Fund was invested in a company that is excluded from the investment universe, the Sub-Fund will proceed to a total disinvestment.

3. Principal adverse impact consideration: The Management Company defines controlling rules for some significantly harming activities selected: exposure to controversial weapons (PAI 14 and 0 % tolerance), exposure to companies active in the fossil fuel sector (PAI 4), and serious violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10 and 0 % tolerance). Other PAI are considered through ESG ratings or dedicated PAI data, but without specific constraints.

4. Strong controversies according to MSCI: Companies having sustainable investments according to MSCI ESG Research, but with strong controversies will be excluded from the sustainable investment computation, The MSCI Controversies Score provides an assessment of controversial events and their severity on a scores range between zero (very severe) to 10 (no recent incidents).

5. Dialogue, engagement and voting: Our dialogue, engagement and voting policies support the objective of avoiding significant harm by identifying the most material adverse impacts and have our voice heard to generate change and improvement.

HOW HAVE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS BEEN TAKEN INTO ACCOUNT?

The EU Taxonomy Regulation (EU) 2020/852 defines certain areas of concern which can cause principle adverse impact ("PAI"). The Management Company applies pre-trade rules on three PAI: exposure to controversial weapons (PAI 14 and 0 % tolerance), exposure to companies active in the fossil fuel sector (PAI 4 and 0 % tolerance), and serious violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10 and 0 % tolerance).

Furthermore, MSCI ESG Ratings integrate environmental, social and governance themes where the collection of other core PAI data for corporates and sovereigns may support their ESG rating. The ESG analysis includes for corporates, when the data is available, the monitoring of greenhouse gas emissions (PAI 1), the lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (PAI 11), and board gender diversity (PAI 13). It also includes for sovereign issuers greenhouse gas intensity per capita (PAI 15 normally based normally on gross domestic product and not on capita) and investee countries subject to social violations (PAI 16).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Nevertheless, the Management Company does not fix specific objectives or defined controlling rules on these other core PAI except the ones mentioned in the first paragraph.

More information on MSCI ESG Ratings: <https://www.msci.com/zh/esg-ratings>

— HOW ARE THE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?

The Management Company ensures that the sustainable investments of the Sub-Fund are aligned by applying its United Nations Global Compact (UNGC) exclusion list as detailed in the Management Company's exclusion policy. Proven violations of the OECD Guidelines for Multinational Enterprises and/or the United Nations Guiding Principles on Business and Human Rights will also result in exclusion.

DOES THIS FINANCIAL PRODUCT CONSIDER PRINCIPAL ADVERSE IMPACTS ON SUSTAINABILITY FACTORS?

Yes, the Management Company takes sustainability risks into account by integrating ESG (Environmental, Social and Governance) criteria into its investment decision-making process, as set out above. This process also makes it possible to assess the management team's ability to manage the adverse sustainability impacts of their business activities. Exposure to controversial weapons (PAI 14), to companies active in the fossil fuel sector (PAI 4), , and serious violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10) is not tolerated and any such issuers are excluded from the portfolio.

No

WHAT INVESTMENT STRATEGY DOES THIS FINANCIAL PRODUCT FOLLOW?

The Sub-Fund seeks capital growth by investing into global listed equities with exposure to the global mega trend “artificial intelligence” via a selection of related sub themes. The Sub-Fund has sustainable investment as its objective, within the meaning of Article 9 paragraph 3 of the SFDR. The Sub-Fund's sustainable investment objective is to contribute to carbon-reduction and to seize opportunities arising from the transition to a low-carbon economy to achieve the long-term objectives of the Paris Agreement dated 12th December 2015* to limit global warming.

I) From the Investment Universe to the eligible investment universe (the “ESG Investment Universe”):

Thanks to a selectivity approach covering a large majority of the securities in the Investment Universe, MSCI World NR, at least 20% of the Investment Universe is eliminated by applying sector and rating-based exclusions to reach the ESG Investment Universe. This selectivity approach is carried out in two stages, and then completed by carbon emissions reduction considerations:

First stage: sector exclusion

The Sub-Fund applies the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com. In addition, the Sub-Fund excludes production of adult entertainment, conventional weapons, gambling and GMOs from all investments. The Sub-Fund will also not be able to invest in energy (oil, gas and coal), materials, real estate, air freight & logistics and airlines, based on information from Bloomberg.

Details relating to the Management Company's Exclusion Policy can be found at “am.oddo-bhf.com”.

Second stage: ESG rating

This stage consists in considering ESG rating to a large majority of companies in the ESG Investment Universe.

The ESG filter of the management team's external provider of extra-financial data is based on the MSCI ESG rating that evaluates the exposure of companies to ESG related risks and opportunities on a scale of CCC (worst rating) to AAA (best rating). It is based on the sub-ratings on a scale of 0 (worst) to 10 (best) for the environment, social and governance areas. The combination of external and internal rating processes further reduces the Sub-Fund's Investment Universe to determine its eligible universe: companies that are not followed by the management teams with an MSCI ESG Rating of CCC and B if the MSCI ESG sub-rating is below 3 for one of the environmental, social or governance categories are systematically excluded from the Investment Universe.

When a company held in the portfolio is downgraded and no longer respects one of these constraints, the management team has three months to disinvest.

At least 90% of the issuers in the portfolio have an ESG rating and carbon intensity analysis (after taking into account the weighting of each security). Target funds with an ESG rating on fund level are also taken into account.

In the event that an issuer has not been rated by MSCI ESG Research, the Management Company has two options:

o Firstly, it may use the ESG rating assigned to the securities of the issuer concerned by the Management company.

o Secondly, if the management company has not assigned an ESG rating to the securities of the issuer concerned, it may generate a substitute ESG rating, which is defined, among other things, by an average based on MSCI's ESG ratings according to the sector of activity, the size of the company and the country of domicile. The use of this substitute rating ends when MSCI ESG Research generates its own ESG rating for the issuer concerned or when an ESG rating is assigned by the management company.

In addition, the management company may review an ESG rating provided by MSCI. This review is carried out by the ESG team and may result in the replacement of the MSCI ESG rating with a new internal ESG rating.

II) The carbon emission reduction:

The selectivity approach is completed by carbon-emission reduction considerations. The Sub-Fund takes into account carbon related data to achieve the long-term objectives of the Paris Agreement to limit global warming. In order to do so, the Sub-Fund will invest in companies reducing their carbon footprint by monitoring in dynamic their progress in emissions reduction in absolute on scope 1 (direct emissions from owned or controlled sources), scope 2 (indirect emissions linked to energy consumption to produce goods and services) and scope 3 (all other indirect emissions that occur in a company's value chain), using third-party provider MSCI. Further information on the methodology and ESG score, as well as ESG reporting for the Sub-Fund, is available at am.oddo-bhf.com.

The management team will consider issuers that show commitment towards climate change and/or showing potential to transition to a low-carbon economy based on several recognized market framework:

- Companies with carbon reduction strategy certified by SBTi (Science Based Target Initiative),
- Revenues alignment with the EU Taxonomy and improving green share of companies' activities,
- Companies with a credible transition plan according to the ESG team

Finally, the Sub-Fund will achieve carbon emissions 30% lower than the benchmark's, the MSCI World NR, as measured by carbon intensity (tons of CO2 fr Scope 1,2 and 3 / million USD revenue) aggregated at portfolio level.

In addition to these three stages, a minimum of 90 % of the net assets of the Sub-Fund is subject to ESG analysis, with the support of an external ESG research provider.

● **WHAT ARE THE BINDING ELEMENTS OF THE INVESTMENT STRATEGY USED TO SELECT THE INVESTMENTS TO ATTAIN THE SUSTAINABLE INVESTMENT OBJECTIVE?**

The Sub-Fund applies the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com. In addition, the Sub-fund excludes production of adult Entertainment, conventional weapons, gambling and GMOs from all investments.

The Sub-Fund will also not be able to invest in energy (oil, gas and coal), materials, real estate, air freight & logistics and airlines, based on information from Bloomberg.

ESG ratings: companies with a CCC or B rating if the MSCI ESG sub-rating is below 3 for one of the environmental, social or governance categories are systematically excluded from the Investment Universe.

Carbon intensity (tons of CO2 in scope 1, 2, 3/million USD of revenue) is targeted to be 30% lower than the carbon intensity of the benchmark index, the MSCI World NR. The Sub-Fund will make a minimum of : 90 % of sustainable investments with an environmental objective.

● **WHAT IS THE POLICY TO ASSESS GOOD GOVERNANCE PRACTICES OF THE INVESTEE COMPANIES?**

ODDO BHF Asset Management's Responsible Investment Policy details our definition and assessment of what constitutes good governance practices. Good governance practices can be assessed using a number of criteria, such as anti-corruption policies and practices, executive compensation policies, shareholder structure, quality of financial communication, and business ethics.

WHAT IS THE ASSET ALLOCATION AND THE MINIMUM SHARE OF SUSTAINABLE INVESTMENTS?

The Sub-Fund seeks capital growth by investing into global listed equities with exposure to the global mega trend "artificial intelligence" via a selection of related sub themes.

A minimum of 90 % of the Sub-Fund's net asset value is invested in sustainable investments.

The Sub-Fund may also hold up to 10% in "not sustainable", as defined below, which includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The Sub-Fund invests at least 0% of its net assets - weighted by the proportion of sales figures aligned with the taxonomy for each issuer - in activities aligned with the taxonomy.

There is a minimum of 90% of sustainable investments with an environmental objective, which are not aligned with the EU Taxonomy.

At least 90% of the issuers in the portfolio have an ESG rating after taking into account the weighting of each security. Target funds with an ESG rating on fund level are also considered.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

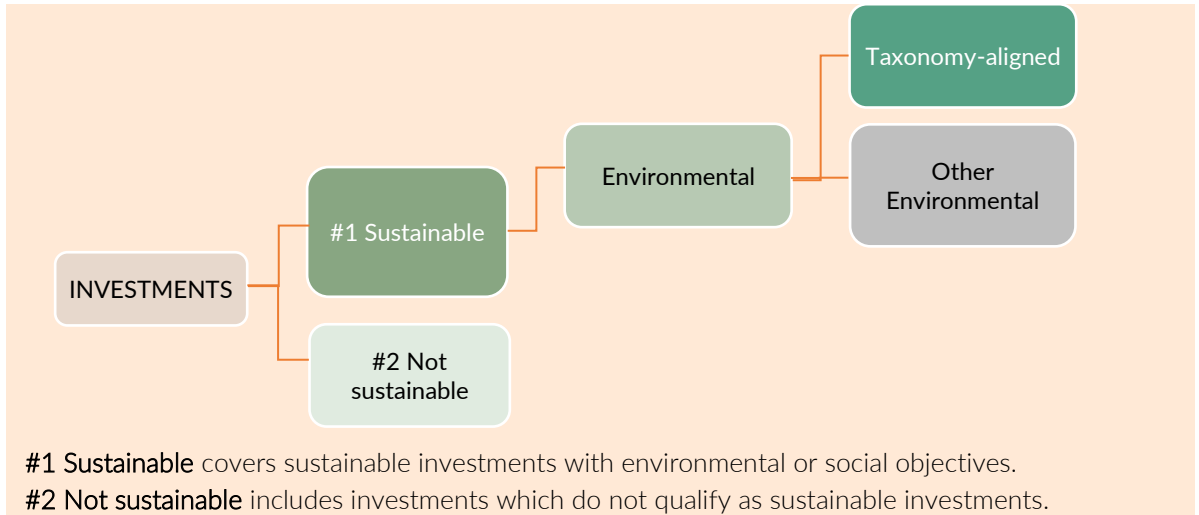

Asset allocation describes the share of investments in specific assets

Taxonomy-aligned activities are expressed as a share of:

-turnover reflecting the share of revenue from green activities of investee companies.

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

-operational expenditure (OpEx) reflecting green operational activities of investee companies.

● HOW DOES THE USE OF DERIVATIVES ATTAIN THE SUSTAINABLE INVESTMENT OBJECTIVE?

Derivatives are not actively used to enhance ESG alignment or decrease ESG risk. As part of the investment strategy, the Sub-Fund is allowed to enter into derivatives for investment and hedging purposes.

TO WHAT MINIMUM EXTENT ARE SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE ALIGNED WITH THE EU TAXONOMY ?¹²

- Yes
 - In fossil gas
 - In nuclear energy
- No

The fund manager analyses the portfolio positions according to ESG criteria. Investments in nuclear energy and fossil gases are not excluded for the Sub-Fund. A minimum proportion of activities connected with nuclear energy and/or fossil gases that correspond to the Taxonomy is not intended for the Sub-Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹² Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory not on the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

TO WHAT MINIMUM EXTENT ARE SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE ALIGNED WITH THE EU TAXONOMY?

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

WHAT IS THE MINIMUM SHARE OF INVESTMENTS IN TRANSITIONAL AND ENABLING ACTIVITIES?

The minimum percentage is 0%.

WHAT IS THE MINIMUM SHARE OF SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE THAT ARE NOT ALIGNED WITH THE EU TAXONOMY?

There is a minimum of 90 % of sustainable investments with an environmental objective, which are not aligned with the EU Taxonomy.

WHAT IS THE MINIMUM SHARE OF SUSTAINABLE INVESTMENTS WITH A SOCIAL OBJECTIVE?

The minimum percentage of sustainable investments with a social objective is 0%, but the Sub-Fund may have investments with a social objective.

WHAT INVESTMENTS ARE INCLUDED UNDER "#2 NOT SUSTAINABLE", WHAT IS THEIR PURPOSE AND ARE THERE ANY MINIMUM ENVIRONMENTAL OR SOCIAL SAFEGUARDS?

The investments included under "#2 Other" are derivatives and other ancillary assets like money market instruments with no minimum environmental or social safeguards applied. The impact of these assets is considered as neutral to the sustainable investment objective the Sub-Fund.

IS A SPECIFIC INDEX DESIGNATED AS A REFERENCE BENCHMARK TO MEET THE SUSTAINABLE INVESTMENT OBJECTIVE?

No specific benchmark is designated as sustainable benchmark to meet the sustainable investment objective.

are environmentally sustainable investments that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

Reference benchmarks
are indexes to measure whether the financial product attains the sustainable investment objective.

- HOW DOES THE REFERENCE BENCHMARK TAKE INTO ACCOUNT SUSTAINABILITY FACTORS IN A WAY THAT IS CONTINUOUSLY ALIGNED WITH THE SUSTAINABLE INVESTMENT OBJECTIVE?

Non applicable.

- HOW IS THE ALIGNMENT OF THE INVESTMENT STRATEGY WITH THE METHODOLOGY OF THE INDEX ENSURED ON A CONTINUOUS BASIS?

Non applicable.

- HOW DOES THE DESIGNATED INDEX DIFFER FROM A RELEVANT BROAD MARKET INDEX?

Non applicable.

- WHERE CAN THE METHODOLOGY USED FOR THE CALCULATION OF THE DESIGNATED INDEX BE FOUND?

Non applicable.

WHERE CAN I FIND MORE PRODUCT SPECIFIC INFORMATION ONLINE?

More product-specific information can be found on the website: am.oddo-bhf.com

* https://treaties.un.org/doc/Treaties/2016/02/20160215%2006-03%20PM/Ch_XXVII-7-d.pdf

** MSCI World NR Index is a registered trademark of MSCI Limited.

Appendix XIV:

Sustainable Investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Product name: ODDO BHF GREEN PLANET¹³

The ODDO BHF Green Planet („Sub-Fund”) is a sub-fund of SICAV ODDO BHF.

Legal entity identifier (LEI-CODE): 549300XKOCFKWDCFC63

DOES THIS FINANCIAL PRODUCT HAVE A SUSTAINABLE INVESTMENT OBJECTIVE?	
●● <input checked="" type="checkbox"/> Yes	●● <input type="checkbox"/> No
<input checked="" type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: 90 % <ul style="list-style-type: none"> <input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: N/A	<input type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of N/A of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments

WHAT IS THE SUSTAINABLE INVESTMENT OBJECTIVE OF THE FINANCIAL PRODUCT?

The Sub-Fund aims to invest in global listed equities of companies benefiting mostly from the structural trend in favor of the ecological transition, « green planet » mega trend, i.e. whose business model significantly and positively contributes to the challenges of climate change around 4 different non-exclusive sub-themes, such as: clean energy, energy efficiency, natural resources preservation and sustainable mobility. The investment in the “green planet” megatrend is considered an environmental sustainable objective.

¹³ The Sub-fund complies with the ESMA ESMA34-1592494965-657 guidelines on funds’ name using ESG or sustainability related terms- Notably, the Sub-Fund will exclude investments in companies referred to in Article 12(1)(a) to (g) of CDR (EU) 2020/1818.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

WHAT SUSTAINABILITY INDICATORS ARE USED TO MEASURE THE ATTAINMENT OF THE SUSTAINABLE INVESTMENT OBJECTIVE OF THIS FINANCIAL PRODUCT?

The Fund references the objectives described above in its ESG strategy but does not seek to select its investments on the basis of one or more of these objectives only. The contributions to these objectives are taken into account by the sustainability indicators used by the ESG strategy.

As such the Sub-Fund intends to capture both aspects of a company contribution: it's positive environmental and/or social output contribution coming from 1/ companies' products and/or services revenues or 2/ its contribution to environmental and/or social objective thanks to companies' wide operations when aligned with environmental and/or social targets.

To be eligible as a Sustainable Investment, a company must pass at least one of the criteria detailed below:

a) Criteria "based on company operations":

- Implied Temperature Rise « ITR »:

Company operations for which climate targets initiatives are maintaining temperature rise below or equal to 2°C, in line with Paris Agreement's pathway of 2°C or below, is considered to contribute to an environmental objective and as such qualify as a Sustainable Investment. We use MSCI ITR data to assess the temperature alignment.

- SBTi approved emission targets:

Greenhouse gas emissions are mentioned as one possibility to measure an environmental objective. Our approach to measuring sustainable investments also includes companies that have their GHG emissions reduction targets approved by the Science-Based Targets initiative (SBTi).

b) Criteria "based on company revenue activities":

- Sustainable Solutions Revenues:

We assess how an economic activity contributes to specific environmental or social objectives. In that respect we use MSCI "Sustainable Impact Revenue" data field. The "Sustainable Impact Revenue" is between 0% and 100% and represents a specific share of companies' overall revenue.

- EU Taxonomy aligned revenue:

The EU Taxonomy is designed to identify economic activities that tackle environmental or social objectives. However, only two of the six defined environmental objectives are fully scoped for the time being. For a company, we will use the taxonomy alignment as reported as the percentage of revenue that are generated by taxonomy aligned activities.

- EU Taxonomy aligned capex:

For a company, we will use the taxonomy alignment as reported as the percentage of capital expenditures that are generated by taxonomy aligned activities.

- "Green percentage" of a firm patent:

This indicator helps us to identify companies that derived revenues and held patents on emission-reduction technologies and practices to be contributing to an environmental objective.

c) Additional criteria: Sustainable bonds:

We consider that green, social and sustainability bonds can qualify as sustainable investments as long as the use of proceeds are used to finance projects that contribute positively to an environmental and/or social objective.

Companies without sustainable solutions revenues or with inconsistent data can be considered by the Manager's ESG team based on a second assessment in terms of the revenue alignment of these companies with the sustainable investment objectives of the Sub-Fund, as long as they respect the Manager's DNSH approach.

HOW DO SUSTAINABLE INVESTMENTS NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The following approach is defined to respect the Article 2 (17) of the SFDR Regulation:

1. Sector and norm-based exclusions:

- The Sub-Fund applies the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com.
- Other exclusions:
 - regarding energy-related activities (conventional oil and gas, coal,): see the Management Company's exclusion policy;
 - for other activities (adult entertainments, GMO, alcohol and Gambling) companies are excluded if their involvement is greater than 5% of their revenues and for tobacco the exclusion threshold is at 0%;
 - the Paris Aligned Benchmark exclusions.

This initial ESG filter is monthly reviewed according to the MSCI ESG Research. In the event that the Sub-Fund was invested in a company that is excluded from the investment universe, the Sub-Fund will proceed to a total disinvestment.

- ### 2. Principal adverse impact consideration: The Management Company defines controlling rules (pre-trade) for some significantly harming activities selected: exposure to controversial weapons (PAI 14 and 0 % tolerance), , serious violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10 and 0 % tolerance), and the Paris Aligned Benchmark exclusions (PAI 4 – exposure to companies active in the fossil fuel sector).
- ### 3. Dialogue, engagement and voting: our dialogue, engagement and voting policies support the objective of avoiding significant harm by identifying the most important risks and have our voice heard to generate change and improvement.
- ### 4. Strong controversies according to MSCI: companies having sustainable investments according to MSCI ESG Research, but with strong controversies will be excluded from the sustainable investment computation, The MSCI Controversies Score provides an assessment of controversial events and their severity on a scores range between zero (very severe) to 10 (no recent incidents). The investment universe of the Sub-Fund is restricted to companies with a MSCI ESG Controversies Score of 1 or above for Social and Governance characteristics, and 2 or above for environmental characteristics.

HOW HAVE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS BEEN TAKEN INTO ACCOUNT?

The EU Taxonomy Regulation (EU) 2020/852 defines certain areas of concern which can cause principle adverse impact ("PAI"). The Management Company applies pre-trade rules on three PAI: exposure to controversial weapons (PAI 14 and 0 % tolerance), serious violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10 and 0 % tolerance), and the Paris Aligned Benchmark exclusions (PAI 4 – Exposure to companies active in the fossil fuel sector).

Furthermore, MSCI ESG Ratings integrate environmental, social and governance themes where the collection of other core PAI data for corporates and sovereigns may support their ESG rating. The ESG analysis includes for corporates, when the data is available, the monitoring of greenhouse gas emissions (PAI 1), carbon footprint (PAI 2), carbon intensity (PAI 3), activities negatively affecting biodiversity-sensitive areas (PAI 7), the hazardous waste and radioactive waste ratio (PAI 9), the violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10), the lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (PAI 11), the unadjusted gender pay gap (PAI 12), and the board gender diversity (PAI 13). It also includes for sovereign issuers greenhouse gas intensity per capita (PAI 15 normally based normally on gross domestic product and not on capita) and investee countries subject to social violations (PAI 16).

Nevertheless, the Management Company does not fix specific objectives or defined controlling rules on these other core PAI except the ones mentioned in the first paragraph.

More information on MSCI ESG Ratings: <https://www.msci.com/zh/esg-ratings>

HOW ARE THE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?

The Management Company ensures that the sustainable investments of the Sub-Fund are aligned by applying its United Nations Global Compact (UNGC) and OECD Guidelines exclusion list as detailed in the Management Company's exclusion policy. Proven violations of the OECD Guidelines for Multinational Enterprises and/or the United Nations Guiding Principles on Business and Human Rights will also result in exclusion.

DOES THIS FINANCIAL PRODUCT CONSIDER PRINCIPAL ADVERSE IMPACTS ON SUSTAINABILITY FACTORS?

Yes, the Management Company takes sustainability risks into account by integrating ESG (Environmental, Social and Governance) criteria into its investment decision-making process, as set out above. This process also makes it possible to assess the management team's ability to manage the adverse sustainability impacts of their business activities. Exposure to controversial weapons (PAI 14), to companies active in the fossil fuel sector (PAI 4), , serious violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10), and the Paris Aligned Benchmark exclusions (PAI 4 – Exposure to companies active in the fossil fuel sector) is not tolerated and any such issuers are excluded from the portfolio.

No

WHAT INVESTMENT STRATEGY DOES THIS FINANCIAL PRODUCT FOLLOW?

Investment Strategy:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The Sub-Fund aims to invest in global listed equities of companies benefiting mostly from the structural trend in favor of the ecological transition, «green planet» mega trend, i.e. whose business model significantly and positively contributes to the challenges of climate change around 4 different non-exclusive sub-themes, such as: clean energy, energy efficiency, natural resources preservation and sustainable mobility. The investment in the “green planet” megatrend is considered an environmental sustainable objective. An extra-financial analysis based on MSCI ESG Ratings is conducted in parallel to favor companies whose ESG characteristics (Environment, Social, Governance) best contribute to limiting operational execution risks and encouraging sustainable practices.

The initial investment universe is based on the MSCI ACWI NR index** and global companies with a market capitalization greater than 500 million USD, on which an ESG (Environment, Social and Governance) screening is applied.

As part of the investment process, the Management Company has full discretion over the composition of the Sub-Fund’s portfolio and may deviate from the investment universe.

Sustainability Screening:

Companies without sustainable impact revenue or with inconsistent data can be considered sustainable investments by the Manager's ESG team based on the revenue alignment of these companies with the sustainable investment objectives of the Sub-Fund, as long as they respect the Manager's DNSH approach.

The Benchmark, the MSCI All Countries World Index, is a broad market index that do not necessarily consider in their composition or calculation methodology the ESG characteristics promoted by the Sub-Fund. For a description of the method used to calculate the Benchmark, see: <https://www.msci.com/>.

This ESG filter, which consists of a "best-in-class" approach, is based on MSCI ESG Research using the following methodology:

(1) MSCI ESG Score provides an assessment on companies’ exposure to ESG-related risks and opportunities, leading to a best-in-class rating scale from CCC (worst score) to AAA (best score). The investment universe of the Sub-Fund is restricted to companies with a MSCI ESG Score of B or better.

As part of this ESG rating process, the following criteria are analyzed in particular:

Environment: climate risk management, energy consumption, water consumption, waste management, environmental certifications, products and services with added environmental value

Social: human capital (human resources management, diversity of management teams, employee training, health and safety, etc.), supplier management, innovation...

Governance: corporate governance (preservation of minority shareholder interests, composition of governance bodies, compensation policy), fiscal responsibility, exposure to corruption risks, etc.

The relative weight of environment, social and governance in the final ESG score is based on a materiality assessment of MSCI.

(2) MSCI Controversies Score provides an assessment of controversial events and their severity on a scores range between zero (very severe) to 10 (no recent incidents). The investment universe of the Sub-Fund is restricted to companies with a MSCI ESG Controversies Score of 1 or above for social and governance, and 2 or above for environmental characteristics.

(3) MSCI Business Involvement provides an analysis of the companies to exclude according to the Fund’s exclusions.

This initial ESG filter is monthly reviewed according to MSCI ESG Research. In the event that the Sub-Fund was invested in a company that is excluded from the investment universe, the Sub-Fund will proceed to a total disinvestment.

In the event that an issuer has not been rated by MSCI ESG Research, the Management Company has two options:

- o Firstly, it may use the ESG rating assigned to the securities of the issuer concerned by the Management company.

- o Secondly, if the management company has not assigned an ESG rating to the securities of the issuer concerned, it may generate a substitute ESG rating, which is defined, among other things, by an average based on MSCI's ESG ratings according to the sector of activity, the size of the company and the country of domicile. The use of this substitute rating ends when MSCI ESG Research generates its own ESG rating for the issuer concerned or when an ESG rating is assigned by the management company.

In addition, the management company may review an ESG rating provided by MSCI . This review is carried out by the ESG team and may result in the replacement of the MSCI ESG rating with a new internal ESG rating.

A minimum of 90% of the issuers in the portfolio have an ESG rating after considering the weighting of each security, with the support of an external ESG research provider. Target funds with an ESG rating on fund level are also considered.

The management team takes into account the weighting of the securities held in the portfolio when calculating the average ESG score of the Sub-Fund.

In the event of a deterioration in the ESG ratings of the securities in the Sub-Fund or a change in the ESG rating methodology affecting the average ESG rating of the Sub-Fund, the average ESG rating of the Sub-Fund will be restored to a level higher than that of the benchmark index, after excluding the 20 % lowest-rated values based on ESG ratings and exclusions applied by the Sub-Fund, taking into account the interests of unitholders and market conditions.

The Sub-Fund is actively managed and references a benchmark, the MSCI ACWI NR USD Index (the "Benchmark"), by seeking to outperform it and for performance fee calculation purposes, if any.

This Benchmark captures companies of all capitalizations across 23 developed markets and 26 emerging markets countries. The Sub-Fund aims to outperform its Benchmark rather than replicate it precisely and may deviate from it considerably in both positive and negative terms. As part of the investment process, the Management Company has full discretion over the composition of the Sub-Fund's portfolio.

The weighted average ESG score of the portfolio is higher than the weighted average ESG score of the Benchmark, after excluding the 20%lowest -rated values based on ESG ratings and exclusions applied by the Sub-Fund.

● WHAT ARE THE BINDING ELEMENTS OF THE INVESTMENT STRATEGY USED TO SELECT THE INVESTMENTS TO ATTAIN THE SUSTAINABLE INVESTMENT OBJECTIVE?

1. Sector and norm-based exclusions:

- The Sub-Fund applies the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com.

- Other exclusions:

- regarding energy-related activities (, conventional oil and gas, coal,): see the Management Company's exclusion policy;
- for other activities (adult entertainments, GMO, Alcohol and Gambling) companies are excluded if their involvement is greater than 5% of their revenues and for tobacco the threshold exclusion is at 0%;
- the Paris Aligned Benchmark exclusions;
-

2. A minimum of sustainable investments with an environmental objective: 90 %

Good governance
practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● WHAT IS THE POLICY TO ASSESS GOOD GOVERNANCE PRACTICES OF THE INVESTEE COMPANIES?

The ODDO BHF Responsible Investment Policy details our definition and assessment of good governance practices. Good governance practices can be assessed using numerous criteria, such as anti-corruption policies and practices, executive compensation policies, shareholder structure, the quality of financial reporting, and business ethics. [WHAT IS THE ASSET ALLOCATION AND THE MINIMUM SHARE OF SUSTAINABLE INVESTMENTS?](#)

The Sub-Fund aims to invest in global listed equities of companies benefiting mostly from the structural trend in favor of the ecological transition, « green planet » mega trend, i.e. whose business model significantly and positively contributes to the challenges of climate change around 4 different non-exclusive sub-themes, such as: clean energy, energy efficiency, natural resources preservation and sustainable mobility.

A minimum of 90 % of the Sub-Fund's net asset value is invested in sustainable investments.

The Sub-Fund may also hold up to 10% in "not sustainable", as defined below, which includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

There is a minimum of 90 % of sustainable investments with an environmental objective and the Sub-Fund may hold social investment without minimum.

The Sub-Fund has 0,5% of the net assets – weighted by the proportion of revenue aligned with the taxonomy for each issuer - invested in activities aligned with the taxonomy.

A minimum of 89,5% of the net assets will be invested in other investment.

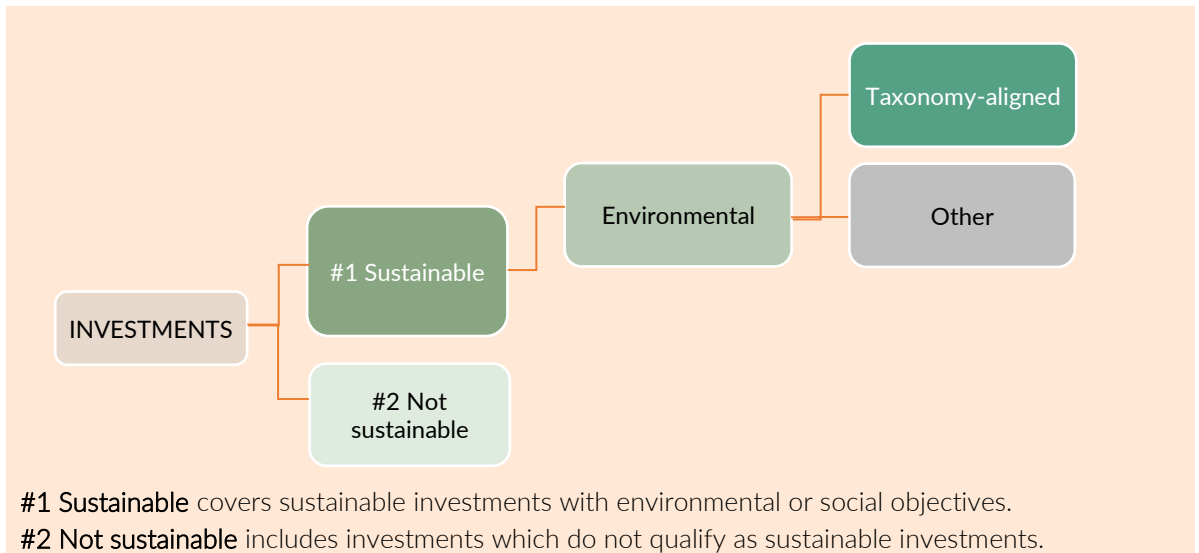

At least 90% of the issuers in the portfolio have an ESG rating after taking into account the weighting of each security. Target funds with an ESG rating on fund level are also taken into account.

Asset allocation
describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

-turnover
reflecting the share of revenue from green activities of investee companies.

-capital expenditure

● HOW DOES THE USE OF DERIVATIVES ATTAIN THE SUSTAINABLE INVESTMENT OBJECTIVE?

Derivatives are not actively used to enhance ESG alignment or decrease ESG risk. As part of the investment strategy, the Sub-Fund is allowed to enter into derivatives for investment and hedging purposes.

DOES THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND /OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY ?¹⁴

- Yes
 - In fossil gas
 - In nuclear energy
- No

The fund manager analyses the portfolio positions according to ESG criteria. Investment in fossil gases is not excluded for the Sub-Fund. A minimum proportion of activities connected with fossil gases that correspond to the Taxonomy is not intended for the Sub-Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹⁴ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory not on the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

TO WHAT MINIMUM EXTENT ARE SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE ALIGNED WITH THE EU TAXONOMY?

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

WHAT IS THE MINIMUM SHARE OF INVESTMENTS IN TRANSITIONAL AND ENABLING ACTIVITIES?

The minimum percentage is 0%.

WHAT IS THE MINIMUM SHARE OF SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE THAT ARE NOT ALIGNED WITH THE EU TAXONOMY?

There is a minimum of 89.5 % of sustainable investments with an environmental objective, which are not aligned with the EU Taxonomy.

WHAT IS THE MINIMUM SHARE OF SUSTAINABLE INVESTMENTS WITH A SOCIAL OBJECTIVE?

The minimum of sustainable investments with a social objective is 0%, but the fund may have investments with a social objective.

WHAT INVESTMENTS ARE INCLUDED UNDER "#2 NOT SUSTAINABLE", WHAT IS THEIR PURPOSE AND ARE THERE ANY MINIMUM ENVIRONMENTAL OR SOCIAL SAFEGUARDS?

The investments included under "#2 Other" are derivatives and other ancillary assets like money market instruments with no minimum environmental or social safeguards applied. These assets are considered neutral to the sustainable investment objective of the Sub-Fund.

are environmentally sustainable investments that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

IS A SPECIFIC INDEX DESIGNATED AS A REFERENCE BENCHMARK TO MEET THE SUSTAINABLE INVESTMENT OBJECTIVE?

No specific benchmark is designated as sustainable benchmark to meet the sustainable investment objective.

- HOW DOES THE REFERENCE BENCHMARK TAKE INTO ACCOUNT SUSTAINABILITY FACTORS IN A WAY THAT IS CONTINUOUSLY ALIGNED WITH THE SUSTAINABLE INVESTMENT OBJECTIVE?

Non applicable.

- HOW IS THE ALIGNMENT OF THE INVESTMENT STRATEGY WITH THE METHODOLOGY OF THE INDEX ENSURED ON A CONTINUOUS BASIS?

Non applicable.

- HOW DOES THE DESIGNATED INDEX DIFFER FROM A RELEVANT BROAD MARKET INDEX?

Non applicable.

- WHERE CAN THE METHODOLOGY USED FOR THE CALCULATION OF THE DESIGNATED INDEX BE FOUND?

Non applicable.

WHERE CAN I FIND MORE PRODUCT SPECIFIC INFORMATION ONLINE?

More product-specific information can be found on the website: am.oddo-bhf.com

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

Appendix XV

Environmental and/or social characteristics

Sustainable Investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significant harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: ODDO BHF GLOBAL HIGH YIELD BOND

ODDO BHF Global HIGH YIELD BOND (“Sub-Fund” or “Fund”) is a Sub-Fund of SICAV ODDO BHF (“SICAV”).

Legal entity identifier: 636700R6W3QJRP7SD75

DOES THIS FINANCIAL PRODUCT HAVE A SUSTAINABLE INVESTMENT OBJECTIVE?	
●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: N/A <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: N/A	<input checked="" type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments. <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

WHAT ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS ARE PROMOTED BY THIS FINANCIAL PRODUCT?

The Sub-Fund promotes environmental and/or social characteristics that are reflected in the Management Company's external ESG rating system from MSCI ESG Research. ESG criteria are taken into consideration through an approach which can be broken down into two stages:

First stage: exclusions:

The Sub-Fund applies the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com. In addition, the Sub-Fund excludes production of adult entertainment from all investments.

Second stage: ESG rating

This involves taking into account the ESG rating of the securities comprising the investment universe. To this end, the management team relies on ESG ratings provided by the external data provider MSCI ESG Research.

In the event that an issuer has not been rated by MSCI ESG Research, the Management Company has two options:

- o Firstly, it may use the ESG rating assigned to the securities of the issuer concerned by the Management company.
- o Secondly, if the management company has not assigned an ESG rating to the securities of the issuer concerned, it may generate a substitute ESG rating, which is defined, among other things, by an average based on MSCI's ESG ratings according to the sector of activity, the size of the company and the country of domicile. The use of this substitute rating ends when MSCI ESG Research generates its own ESG rating for the issuer concerned or when an ESG rating is assigned by the management company.

In addition, the management company may review an ESG rating provided by MSCI. This review is carried out by the ESG team and may result in the replacement of the MSCI ESG rating with a new internal ESG rating.

The management team takes into account the weighting of the securities held in the portfolio when calculating the average ESG score of the Sub-Fund. In the event of a deterioration in the ESG ratings of the securities in the Sub-Fund or a change in the ESG rating methodology affecting the average ESG rating of the Sub-Fund, the average ESG rating of the Sub-Fund will be restored to a level higher than that of the benchmark index, taking into account the interests of unitholders and market conditions. The Management Company pledges that at least 75% of the issuers in the portfolio shall have an ESG rating (taking the weighting of each share into account).

The benchmark of the Sub-Fund is not intended to be aligned with the environmental and/or social characteristics promoted by the Sub-Fund.

WHAT SUSTAINABILITY INDICATORS ARE USED TO MEASURE THE ATTAINMENT OF EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THIS FINANCIAL PRODUCT?

The MSCI ESG rating model uses all of the characteristics and indicators mentioned in the paragraph above, and the monthly ESG report currently shows indicators that demonstrate their attainment as follows:

- The weighted ESG score of the portfolio to assess the attainment of environmental, social and governance characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- At least 75% of the issuers in the portfolio shall have an ESG rating (taking the weighting of each share into account)

● WHAT ARE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY INTENDS TO MAKE AND HOW DOES THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The Fund references the objectives described above in its ESG strategy but does not seek to select its investments on the basis of one or more of these objectives only. The contributions to these objectives are taken into account by the sustainability indicators used by the ESG strategy.

As such the Sub-Fund intends to capture both aspects of a company contribution: it's positive environmental and/or social output contribution coming from 1/ companies' products and/or services revenues or 2/ its contribution to environmental and/or social objective thanks to companies' wide operations when aligned with environmental and/or social targets.

To be eligible as a Sustainable Investment, a company must pass at least one of the criteria detailed below:

a) Criteria "based on company operations":

- Implied Temperature Rise « ITR »:

Company operations for which climate targets initiatives are maintaining temperature rise below or equal to 2°C, in line with Paris Agreement's pathway of 2°C or below, is considered to contribute to an environmental objective and as such qualify as a Sustainable Investment. We use MSCI ITR data to assess the temperature alignment.

- SBTi approved emission targets:

Greenhouse gas emissions are mentioned as one possibility to measure an environmental objective. Our approach to measuring sustainable investments also includes companies that have their GHG emissions reduction targets approved by the Science-Based Targets initiative (SBTi).

b) Criteria "based on company revenue activities":

- Sustainable Solutions Revenues:

We assess how an economic activity contributes to specific environmental or social objectives. In that respect we use MSCI "Sustainable Impact Revenue" data field. The "Sustainable Impact Revenue" is between 0% and 100% and represents a specific share of companies' overall revenue.

- EU Taxonomy aligned revenue:

The EU Taxonomy is designed to identify economic activities that tackle environmental or social objectives. However, only two of the six defined environmental objectives are fully scoped for the time being. For a company, we will use the taxonomy alignment as reported as the percentage of revenue that are generated by taxonomy aligned activities.

- EU Taxonomy aligned capex:

For a company, we will use the taxonomy alignment as reported as the percentage of capital expenditures that are generated by taxonomy aligned activities.

- "Green percentage" of a firm patent:

This indicator helps us to identify companies that derived revenues and held patents on emission-reduction technologies and practices to be contributing to an environmental objective.

c) Additional criteria: Sustainable bonds:

We consider that green, social and sustainability bonds can qualify as sustainable investments as long as the use of proceeds are used to finance projects that contribute positively to an environmental and/or social objective.

HOW DO THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY INTENDS TO MAKE, NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The following approach is defined to comply with Article 2 (17) of the SFDR**.

- **Sectors excluded from investment:**
The Sub-Fund applies the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com. In addition, the Sub-Fund excludes production of adult entertainment from all investments.
- **Controversies:** The most controversial companies according to our MSCI ESG data provider, and after confirmation by the ESG team for a second check, will not be considered sustainable.
- **Consideration of major negative impacts:** In order not to significantly undermine sustainability objectives, the Investment Manager defines control rules (pre-trade) for selected significantly harmful activities: exposure to controversial weapons (0% tolerance), and serious violations of the UN Global Compact principles and the Organization for Economic Co-operation and Development (OECD) guidelines for multinational enterprises (0% tolerance).
- **Dialogue, engagement, and voting:** our dialogue, engagement and voting policies support the objective of avoiding significant harm by identifying the most important risks and have our voice heard to generate change and improvement.

HOW HAVE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS BEEN TAKEN INTO ACCOUNT?

Regulation (EU) 2020/852 defines certain areas of concern that may have a negative impact ("PAI").

The Investment Manager applies pre-trade rules on two PAIs:

- Exposure to controversial weapons (PAI 14 and 0% tolerance)
- Serious violations of the UN Global Compact principles and the Organization for Economic Cooperation and Development (OECD) guidelines for multinational enterprises (PAI 10 and 0% tolerance).

Furthermore, MSCI ESG Ratings integrate environmental, social and governance themes where the collection of other core PAI data for corporates and sovereigns may support their ESG rating. The ESG analysis includes for corporates, when the data is available, the monitoring of greenhouse gas emissions (PAI 1), activities with a negative impact on biodiversity-sensitive areas (PAI 7), the lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (PAI 11), and board gender diversity (PAI 13). It may also include for sovereign issuers greenhouse gas intensity per capita (PAI 15 normally based normally on gross domestic product and not on capita) and investee countries subject to social violations (PAI 16). Nevertheless, the Management Company does not fix specific objectives or defined controlling rules on these other core PAI except the ones mentioned in the first paragraph.

More information on MSCI ESG Ratings: <https://www.msci.com/zh/esg-ratings>

HOW ARE THE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS DETAILS:

The Investment Manager ensures that the Sub-Fund's sustainable investments are aligned by applying its United Nations Global Compact (UNGC) exclusion list, as set out in the Investment Manager's

exclusion policy. Proven violations of the OECD Guidelines for Multinational Enterprises and/or the United Nations Guiding Principles on Business and Human Rights will also result in exclusion.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

DOES THIS FINANCIAL PRODUCT CONSIDER PRINCIPAL ADVERSE IMPACTS ON SUSTAINABILITY FACTORS?

Yes, in accordance with the provisions of Article 8 of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (SFDR), the Investment Manager takes sustainability risks into account by integrating ESG (Environmental, Social and Governance) criteria into its investment decision-making process, as set out in the “Investment Strategy” section. This process also makes it possible to assess the management team’s ability to manage the adverse sustainability impacts of their business activities.

No

WHAT INVESTMENT STRATEGY DOES THIS FINANCIAL PRODUCT FOLLOW?

The Sub-Fund is actively managed and references a benchmark, ICE BofA BB-B Global High Yield Non-Financial Constrained Total Return Index (hedged in EUR) (the “Benchmark”), by seeking to outperform it and for performance fee calculation purposes, if any as described in the section “Investment Strategy” of the Sub-Fund.

The approach is based on two successive stages.

ESG (Environment, Social and Governance) criteria are a complement to the credit analysis and are fully integrated into the investment process. The approach is based on two successive stages.

- First stage: Exclusion

The Sub-Fund applies the common exclusion framework as detailed in the Management Company’s exclusion policy, which is available at am.oddo-bhf.com. In addition, the Sub-Fund excludes production of adult entertainment from all investments.

- Second stage: ESG rating

This involves taking into account the ESG rating of the securities comprising the investment universe. To this end, the management team relies on ESG ratings provided by the external data provider MSCI ESG Research.

In the event that an issuer has not been rated by MSCI ESG Research, the Management Company has two options:

o Firstly, it may use the ESG rating assigned to the securities of the issuer concerned by the Management company.

o Secondly, if the management company has not assigned an ESG rating to the securities of the issuer concerned, it may generate a substitute ESG rating, which is defined, among other things, by an average based on MSCI’s ESG ratings according to the sector of activity, the size of the company and the country of domicile. The use of this substitute rating ends when MSCI ESG Research generates its

own ESG rating for the issuer concerned or when an ESG rating is assigned by the management company.

In addition, the management company may review an ESG rating provided by MSCI . This review is carried out by the ESG team and may result in the replacement of the MSCI ESG rating with a new internal ESG rating.

The management team takes into account the weighting of the securities held in the portfolio when calculating the average ESG score of the Sub-Fund. In the event of a deterioration in the ESG ratings of the securities in the Sub-Fund or a change in the ESG rating methodology affecting the average ESG rating of the Sub-Fund, the average ESG rating of the Sub-Fund will be restored to a level higher than that of the benchmark index, taking into account the interests of unitholders and market conditions.

The Management Company pledges that at least 75% of the issuers in the portfolio shall have an ESG rating (taking the weighting of each share into account).

Therefore, at least 75% of the issuers in the portfolio have an ESG rating after taking into account the weighting of each security.

This ESG scoring system impacts the portfolio structure by limiting exposure to issuers exhibiting lower ESG scores and to ensure a certain overall ESG quality level of the portfolio. In particular, the weighted average ESG rating of the portfolio shall be above of the ESG weighted average of the investment universe, defined as the following index: ICE BofA BB-B Global High Yield Non-Financial Constrained Index; pursuant to the MSCI ESG Research.

The management team may invest in debt securities from outside the investment universe. The investment universe is only a relevant comparison element for the ESG rating of the portfolio.

● **WHAT ARE THE BINDING ELEMENTS OF THE INVESTMENT STRATEGY USED TO SELECT THE INVESTMENTS TO ATTAIN EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THIS FINANCIAL PRODUCT?**

The Sub-Fund applies:

- the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com. In addition, the Sub-Fund excludes production of adult entertainment from all investments. Details of the Investment Manager's Exclusion Policy, including further information on ESG integration and exclusion thresholds, can be found on am.oddo-bhf.com.

- The weighted ESG score of the portfolio shall be above the MSCI weighted ESG score of the investment universe.
- At least 75% of the issuers in the portfolio have an ESG rating after taking into account the weighting of each security.

The Sub-fund's sustainable investment, which will be at least 10%.

● **WHAT IS THE COMMITTED MINIMUM RATE TO REDUCE THE SCOPE OF THE INVESTMENTS CONSIDERED PRIOR TO THE APPLICATION OF THAT INVESTMENT STRATEGY?**

There is no minimum rate.

● **WHAT IS THE POLICY TO ASSESS GOOD GOVERNANCE PRACTICES OF THE INVESTEE COMPANIES?**

ODDO BHF Asset Management's Responsible Investment Policy details our definition and assessment of what constitutes good governance practices.

Good Governance
practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Good governance practices can be assessed using a number of criteria, such as anti-corruption policies and practices, executive compensation policies, shareholder structure, quality of financial communication, and business ethics.

WHAT IS THE ASSET ALLOCATION PLANNED FOR THIS FINANCIAL PRODUCT?

At least 75 % of the Sub-Fund's net asset value is aligned with environmental and/or social characteristics.

The Sub-Fund may also hold up to 25 % in "Other", as defined below, which includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics.

A minimum of 10 % of the Sub-Fund's net asset value is invested in sustainable investments. The Sub-Fund may also hold assets that are aligned with environmental and/or social characteristics that do not qualify as sustainable investments.

The Fund has 0,2% of the net assets - weighted by the proportion of revenue aligned with the taxonomy for each issuer - invested in activities aligned with the taxonomy.

A minimum of 9,80% of the Sub-Fund's net assets are invested in other environmental investments and the Fund may hold social investment without minimum.

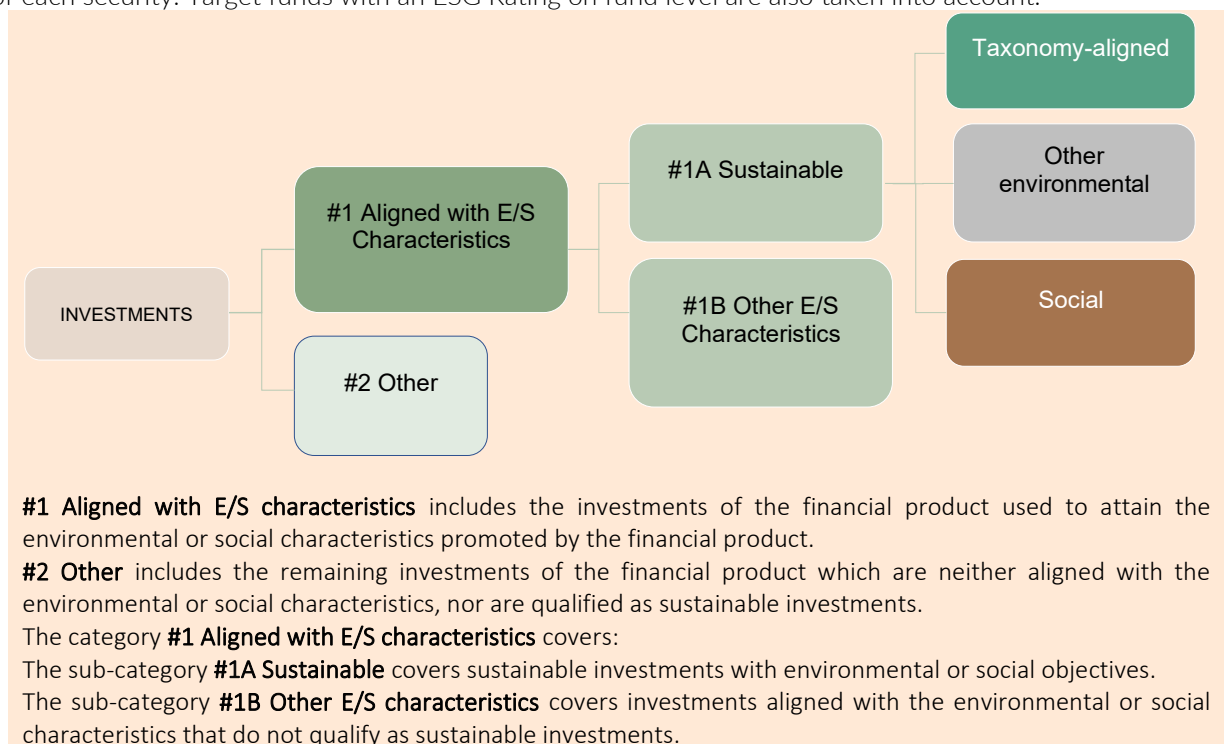

At least 75% of the issuers in the portfolio have an ESG rating after taking into account the weighting of each security. Target funds with an ESG Rating on fund level are also taken into account.

Taxonomy-aligned activities are expressed as a share of:

- **turnover**, reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● HOW DOES THE USE OF DERIVATIVES ATTAIN THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THE FINANCIAL PRODUCT?

Derivatives are not actively used to enhance ESG alignment or decrease ESG risk. As part of the investment strategy, the Sub-Fund is allowed to enter into derivatives for investment and hedging purposes.

DOES THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES THAT COMPLY WITH THE EU TAXONOMY¹⁵?

- Yes
 - In fossil gas
 - In nuclear energy
- No

The Investment Manager analyses the portfolio positions according to ESG criteria. Investments in nuclear energy and fossil gases are not excluded for the Sub-Fund. A minimum proportion of activities connected with nuclear energy and/or fossil gases that correspond to the Taxonomy is not intended for the Sub-Fund.

TO WHAT MINIMUM EXTENT ARE SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE ALIGNED WITH THE EU TAXONOMY?

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● WHAT IS THE MINIMUM SHARE OF INVESTMENTS IN TRANSITIONAL AND ENABLING ACTIVITIES?

The minimum percentage is 0%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹⁵ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory not on the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

WHAT IS THE MINIMUM SHARE OF SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE THAT ARE NOT ALIGNED WITH THE EU TAXONOMY?

There is a minimum share of 9,8 % of sustainable investments with an environmental objective, which are not aligned with EU Taxonomy.

WHAT IS THE MINIMUM SHARE OF SOCIALLY SUSTAINABLE INVESTMENTS?

The minimum percentage of sustainable investments with a social objective is 0%, but the Sub-Fund may make investments with a social objective.

WHAT INVESTMENTS ARE INCLUDED UNDER "#2 OTHER", WHAT IS THEIR PURPOSE AND ARE THERE ANY MINIMUM ENVIRONMENTAL OR SOCIAL SAFEGUARDS?

The investments included in "#2 Other" are derivatives and other ancillary assets and/or investments of the financial product which are neither aligned with the environmental or social characteristics.

IS A SPECIFIC INDEX DESIGNATED AS A REFERENCE BENCHMARK TO DETERMINE WHETHER THIS FINANCIAL PRODUCT IS ALIGNED WITH THE ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS THAT IT PROMOTES?

The benchmark of the Sub-Fund is not intended to be aligned with the environmental and/or social characteristics promoted by the Sub-Fund.

HOW IS THE REFERENCE BENCHMARK CONTINUOUSLY ALIGNED WITH EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THE FINANCIAL PRODUCT?

Non applicable.

HOW IS THE ALIGNMENT OF THE INVESTMENT STRATEGY WITH THE METHODOLOGY OF THE INDEX ENSURED ON A CONTINUOUS BASIS?

Non applicable.

HOW DOES THE DESIGNATED INDEX DIFFER FROM A RELEVANT BROAD MARKET INDEX?

Non applicable.

WHERE CAN THE METHODOLOGY USED FOR THE CALCULATION OF THE DESIGNATED INDEX BE FOUND?

Non applicable.

WHERE CAN I FIND MORE PRODUCT SPECIFIC INFORMATION ONLINE?

More product-specific information can be found on the website: <https://www.am.oddo-bhf.com>.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

Appendix XVI:

Sustainable Investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significant harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Product name: ODDO BHF GLOBAL TARGET 2031

ODDO BHF Global TARGET 2031 ("Sub-Fund" or "Fund") is a Sub-Fund of SICAV ODDO BHF ("SICAV").

Legal entity identifier: 63670051E0040GN3G375

<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: N/A <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: N/A	<input checked="" type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments. <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments.

WHAT ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS ARE PROMOTED BY THIS FINANCIAL PRODUCT?

The Sub-Fund promotes both environmental and social characteristics that are reflected in the Investment Manager's ESG internal rating system construction and weighting.

As part of the Investment Manager's rating process, the following criteria are notably analyzed:

- **Environment:** climate risk management, energy and water consumption, waste management, environmental certifications, products, and services with added environmental value, etc.
- **Social:** human capital (human resource management, diversity of management teams, employee training, health, and safety, etc.), supplier management, innovation ...

- **Governance:** corporate governance (protecting the interests of minority shareholders, composition of governance bodies, remuneration policy), tax liability, and exposure to the risk of corruption, etc.

Specific attention is paid to the analysis of human capital and corporate governance. Analysis of controversies (industrial accidents, pollution, corruption convictions, anti-competitive practices, product safety, supply chain management, etc.) based on evidence obtained from our external extra-financial data provider is integrated into the rating process and directly influences the ESG rating of each company.

This ESG analysis process results in an internal rating scale that is divided into five ranks (5 being the best and 1 the worst): Strong ESG Opportunity (5), ESG Opportunity (4), ESG Neutral (3), ESG Moderate Risk (2) and ESG High Risk (1).

Additional ESG assessments from MSCI ESG Research or from a third party may also be used, particularly in the event that an issuer has not been rated by the Management Company's research team.

The Sub-Fund does not have a benchmark index.

● WHAT SUSTAINABILITY INDICATORS ARE USED TO MEASURE THE ATTAINMENT OF EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THIS FINANCIAL PRODUCT?

The Investment Manager's ESG analysis model uses all the characteristics and indicators mentioned in the above paragraph and the monthly ESG reporting currently presents indicators demonstrating their achievement as follows:

- The weighted ESG score of the portfolio to assess the overall achievement of environmental, social and governance characteristics.
- The CO2 intensity of the Sub-Fund (sum of CO2 emissions from scopes 1 and 2 divided by the sum of the revenues of the companies in which the Sub-Fund invests).
- At least 75% of issuers in the portfolio of debt securities and money market instruments with a high yield credit rating and at least 90% of issuers in the portfolio of debt securities and money market instruments with an investment grade credit rating are subject to an ESG rating

● WHAT ARE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY INTENDS TO MAKE AND HOW DOES THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The Fund references the objectives described above in its ESG strategy but does not seek to select its investments on the basis of one or more of these objectives only. The contributions to these objectives are taken into account by the sustainability indicators used by the ESG strategy.

As such the Sub-Fund intends to capture both aspects of a company contribution: it's positive environmental and/or social output contribution coming from 1/ companies' products and/or services revenues or 2/ its contribution to environmental and/or social objective thanks to companies' wide operations when aligned with environmental and/or social targets.

To be eligible as a Sustainable Investment, a company must pass at least one of the criteria detailed below:

- Criteria "based on company operations":
 - Implied Temperature Rise « ITR »:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Company operations for which climate targets initiatives are maintaining temperature rise below or equal to 2°C, in line with Paris Agreement's pathway of 2°C or below, is considered to contribute to an environmental objective and as such qualify as a Sustainable Investment. We use MSCI ITR data to assess the temperature alignment.

- SBTi approved emission targets:

Greenhouse gas emissions are mentioned as one possibility to measure an environmental objective. Our approach to measuring sustainable investments also includes companies that have their GHG emissions reduction targets approved by the Science-Based Targets initiative (SBTi).

b) Criteria "based on company revenue activities":

- Sustainable Solutions Revenues:

We assess how an economic activity contributes to specific environmental or social objectives. In that respect we use MSCI "Sustainable Impact Revenue" data field. The "Sustainable Impact Revenue" is between 0% and 100% and represents a specific share of companies' overall revenue.

- EU Taxonomy aligned revenue:

The EU Taxonomy is designed to identify economic activities that tackle environmental or social objectives. However, only two of the six defined environmental objectives are fully scoped for the time being. For a company, we will use the taxonomy alignment as reported as the percentage of revenue that are generated by taxonomy aligned activities.

- EU Taxonomy aligned capex:

For a company, we will use the taxonomy alignment as reported as the percentage of capital expenditures that are generated by taxonomy aligned activities.

- "Green percentage" of a firm patent:

This indicator helps us to identify companies that derived revenues and held patents on emission-reduction technologies and practices to be contributing to an environmental objective.

c) Additional criteria: Sustainable bonds:

We consider that green, social and sustainability bonds can qualify as sustainable investments as long as the use of proceeds are used to finance projects that contribute positively to an environmental and/or social objective.

HOW DO THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY INTENDS TO MAKE, NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The following approach is defined to comply with Article 2 (17) of the SFDR**.

- **Sectors excluded from investment:**

The Sub-Fund applies the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com. In addition, the Sub-Fund excludes production of adult entertainment from all investments.

- **Controversies:** The most controversial companies according to our MSCI ESG data provider, and after confirmation by the ESG team for a second check, will not be considered sustainable.

- **Consideration of major negative impacts:** In order not to significantly undermine sustainability objectives, the Investment Manager defines control rules (pre-trade) for selected significantly harmful activities: exposure to controversial weapons (0% tolerance), and serious violations of

the UN Global Compact principles and the Organization for Economic Co-operation and Development (OECD) guidelines for multinational enterprises (0% tolerance).

- **Dialogue, engagement, and voting:** our dialogue, engagement and voting policies support the objective of avoiding significant harm by identifying the most important risks and have our voice heard to generate change and improvement.

— HOW HAVE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS BEEN TAKEN INTO ACCOUNT?

Regulation (EU) 2020/852 defines certain areas of concern that may have a negative impact ("PAI").

The Investment Manager applies pre-trade rules on two PAIs:

- Exposure to controversial weapons (PAI 14 and 0% tolerance)
- Serious violations of the UN Global Compact principles and the Organization for Economic Co-operation and Development (OECD) guidelines for multinational enterprises (PAI 10 and 0% tolerance).

In addition, the Investment Manager includes other PAIs in its ESG analysis for companies where the information is available, but without strict control rules. The collection of PAI data is used to define the Investment Manager's final ESG rating.

ESG analysis includes, when the data is available, monitoring of greenhouse gas emissions (PAI 1), exposure to fossil fuels (PAI 4), share of non-renewable energy consumption and production (PAI 5), energy consumption intensity by high climate impact sectors (PAI 6), activities with a negative impact on biodiversity-sensitive areas (PAI 7), the lack of processes and compliance mechanisms to monitor adherence to the UN Global Compact and OECD Guidelines for Multinational Enterprises (PAI 11), the unadjusted gender pay gap (PAI 12), and board parity (PAI 13). The Investment Manager also includes two other PAIs: the deforestation policy (PAI 15) and the lack of a human rights policy (PAI 9).

Further information on the Investment Manager's consideration of PAI is available on am.oddo-bhf.com.

— HOW ARE THE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS? DETAILS:

The Investment Manager ensures that the Sub-Fund's sustainable investments are aligned by applying its United Nations Global Compact (UNGCC) exclusion list, as set out in the Investment Manager's exclusion policy. Proven violations of the OECD Guidelines for Multinational Enterprises and/or the United Nations Guiding Principles on Business and Human Rights will also result in exclusion.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

DOES THIS FINANCIAL PRODUCT CONSIDER PRINCIPAL ADVERSE IMPACTS ON SUSTAINABILITY FACTORS?

Yes, in accordance with the provisions of Article 8 of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (SFDR), the Investment Manager takes sustainability risks into account by integrating ESG (Environmental, Social and Governance) criteria into its investment decision-making process, as set out in the “Investment Strategy” section. This process also makes it possible to assess the management team’s ability to manage the adverse sustainability impacts of their business activities.

No

WHAT INVESTMENT STRATEGY DOES THIS FINANCIAL PRODUCT FOLLOW?

The investment universe of the Sub-Fund is made up of companies included in the following credit market index: the ICE BofA BB-B Global High Yield Non-Financial Constrained Total Return Index Hedged EUR.

ESG (environmental, social and governance) criteria are another factor in fundamental analysis. The management team takes ESG (environmental, social and governance) criteria into account in its investment decisions but they are not the dominant factor, so the investment decisions taken may not be consistent with ESG criteria.

This approach can be broken down into two consecutive stages.

- First stage: the Sub-fund applies the common exclusion framework as detailed in the Management Company’s exclusion policy, which is available at am.oddo-bhf.com. Adult entertainment will also be excluded from all investments.
- Second stage: It consists in assigning an ESG rating to a large majority of companies in the investment universe. As part of the internal ESG rating model, the following criteria, among others, can be analyzed:
 - Environmental: climate change, natural capital, pollution and waste, environmental opportunities
 - Social: human capital, client capital, supply chain, cybersecurity
 - Governance: corporate governance, leadership, corporate behavior

Close attention is paid to the analysis of human capital and corporate governance, which has an impact on the final ESG rating of each company. We believe that poor human capital management or corporate governance failures pose a major risk to the execution of a company’s strategy and therefore to its valuation.

Our analyses are conducted in collaboration by our ESG analyst team, which collaborates closely with the investment teams. It enables us to identify the non-financial risks to which each issuer is potentially exposed, which can impact the company financially or its operating environment. The analysis of controversies (industrial accidents, pollution, corruption, anti-competitive practices, product safety, supply chain management, etc.), based on information provided by our external non-financial data provider, is integrated into the rating process and directly influences the ESG rating of each company.

This ESG analysis results in an internal rating on a scale of 1 (worst) to 5 (best).

In the event that an issuer has not been rated by the internal ESG rating model, the Management Company may use the ESG ratings of MSCI ESG Research.

The ESG internal team will analyze the issuers selected by the Investment Manager’s management team, consequently, at least 75% of the issuers in the portfolio have an ESG rating after taking into account the weighting of each security. Target funds with an ESG rating on fund level are also taken into account.

This ESG scoring system impacts the sub-fund structure by limiting exposure to companies showing lower ESG scores, to ensure a certain overall ESG quality level of the Sub-Fund. In particular, the weighted average internal ESG rating of the Sub-Fund shall be better than the benchmark.

The management team may select stocks that are not included in the Sub-Fund's investment universe.

Given the Fund's performance target and specific maximum maturity for securities held, the selection of securities may vary over time at the Investment Manager's discretion, depending on market opportunities and the maturing of securities. In particular, the Sub-Fund may invest up to 100% of its assets in investment grade securities rated higher than BB+ (Standard & Poor's or equivalent as assessed by the Management Company or according to its own internal rating).

The Investment Manager may also invest up to 100% of net assets in French or foreign forward financial instruments traded on regulated or OTC markets, without seeking overexposure. The Investment Manager may take positions in order to hedge the portfolio against interest rate and credit risk. The Investment Manager will also use swap and/or forward exchange contracts to hedge the portfolio against currency risk, though a residual risk of a maximum of 5% remains.

The Sub-Fund's maximum market exposure (equities, debt securities, funds and derivatives) may not exceed 100% of the Sub-Fund's net assets, it being understood that the maximum exposure is the sum of the net exposures to each of the markets (equity, fixed income, money) to which the Sub-Fund is exposed (the sum of long and hedging positions).

Regulation (EU) 2020/852 (hereinafter the "Taxonomy") is aimed at identifying environmentally sustainable economic activities.

The Taxonomy identifies these activities based on their contribution to six major environmental objectives:

- climate change mitigation;
- climate change adaptation;
- the sustainable use and protection of water and marine resources;
- the transition to a circular economy (waste, prevention and recycling);
- pollution prevention and control;
- the protection and restoration of biodiversity and ecosystems.

To be considered sustainable, an economic activity must show that it contributes substantially to one or more of the six objectives, while avoiding significant harm to any of the other objectives ("Do No Significant Harm" principle).

For an activity to be deemed consistent with the Taxonomy, it must also respect the human and social rights guaranteed by international law (minimum social guarantees).

In the absence, for the time being, of data that will be provided by companies covered by the Taxonomy in future, the Management Company undertakes to invest 0% of the Sub-Fund in Taxonomy-aligned activities.

The Management Company expects that the percentage of these investments will increase as more data becomes available.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.

The underlying investments of the remaining part of the Sub-Fund do not take into account EU criteria on environmentally sustainable economic activities laid down by the Taxonomy Regulation.

● WHAT ARE THE BINDING ELEMENTS OF THE INVESTMENT STRATEGY USED TO SELECT THE INVESTMENTS TO ATTAIN EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THIS FINANCIAL PRODUCT?

The Sub-Fund applies:

- the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com. In addition, the Sub-Fund excludes production of adult entertainment from all investments.

- The weighted ESG score of the portfolio to assess the overall achievement of environmental, social and governance characteristics.
- The CO2 intensity of the Sub-Fund (sum of CO2 emissions from scopes 1 and 2 divided by the sum of the revenues of the companies in which the Sub-Fund invests).
- At least 75% of issuers in the portfolio of debt securities and money market instruments with a high yield credit rating and at least 90% of issuers in the portfolio of debt securities and money market instruments with an investment grade credit rating are subject to an ESG rating after taking into account the weighting of each security.

WHAT IS THE COMMITTED MINIMUM RATE TO REDUCE THE SCOPE OF THE INVESTMENTS CONSIDERED PRIOR TO THE APPLICATION OF THAT INVESTMENT STRATEGY?

There is no minimum rate.

WHAT IS THE POLICY TO ASSESS GOOD GOVERNANCE PRACTICES OF THE INVESTEE COMPANIES?

ODDO BHF Asset Management's Sustainable Investment Policy details our definition and assessment of what constitutes good governance practices.

The good governance practices rely on the quality of the management team, the sustainable development strategy, minority shareholders' rights, the anti-corruption processes and track record, as well as other criteria. A good indicator for the degree of alignment of companies' strategies with sustainable aspects is their positioning regarding the UN Global Compact. By committing to the ten principles on human rights, labor, environment, and anticorruption, the company sends a positive signal of strong ambitions towards a long-term oriented financial ecosystem.

WHAT IS THE ASSET ALLOCATION PLANNED FOR THIS FINANCIAL PRODUCT?

At least 75 % of the Sub-Fund's net asset value is aligned with environmental and/or social characteristics.

The Sub-Fund may also hold up to 25 % in "Other", as defined below, which includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics.

A minimum of 10% of the Sub-Fund's net asset value is invested in sustainable investments. The Sub-Fund may also hold assets that are aligned with environmental and/or social characteristics that do not qualify as sustainable investments.

The Fund has 0,2 % of the net assets - weighted by the proportion of revenue aligned with the taxonomy for each issuer - invested in activities aligned with the taxonomy.

A minimum of 9,80% of the Sub-Fund's net assets are invested in other environmental investments and the Fund may hold social investment without minimum. At least 75% of issuers in the portfolio of debt securities and money market instruments with a high yield credit rating and at least 90% of issuers in the portfolio of debt securities and money market instruments with an investment grade credit rating are subject to an ESG rating after taking into account the weighting of each security. Target funds with an ESG Rating on fund level are also taken into account.

Taxonomy-aligned activities are expressed as a share of:

- **turnover**, reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)

Good Governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● **HOW DOES THE USE OF DERIVATIVES ATTAIN THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THE FINANCIAL PRODUCT?**

Derivatives are not actively used to enhance ESG alignment or decrease ESG risk. As part of the investment strategy, the Sub-Fund is allowed to enter into derivatives for investment and hedging purposes.

DOES THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES THAT COMPLY WITH THE EU TAXONOMY¹⁶?

- Yes
 In fossil gas In nuclear energy
 No

The Investment Manager analyses the portfolio positions according to ESG criteria. Investments in nuclear energy and fossil gases are not excluded for the Sub-Fund. A minimum proportion of activities connected with nuclear energy and/or fossil gases that correspond to the Taxonomy is not intended for the Sub-Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **TO WHAT MINIMUM EXTENT ARE SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE ALIGNED WITH THE EU TAXONOMY?**

¹⁶ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory not on the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **WHAT IS THE MINIMUM SHARE OF INVESTMENTS IN TRANSITIONAL AND ENABLING ACTIVITIES?**

The minimum percentage is 0%.

● **WHAT IS THE MINIMUM SHARE OF SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE THAT ARE NOT ALIGNED WITH THE EU TAXONOMY?**

There is a minimum share of 9,8 % of sustainable investments with an environmental objective, which are not aligned with EU Taxonomy.

● **WHAT IS THE MINIMUM SHARE OF SOCIALLY SUSTAINABLE INVESTMENTS?**

The minimum percentage of sustainable investments with a social objective is 0%, but the Sub-Fund may make investments with a social objective.

● **WHAT INVESTMENTS ARE INCLUDED UNDER "#2 OTHER", WHAT IS THEIR PURPOSE AND ARE THERE ANY MINIMUM ENVIRONMENTAL OR SOCIAL SAFEGUARDS?**

The investments included in "#2 Other" are derivatives and other ancillary assets and/or investments of the financial product which are neither aligned with the environmental or social characteristics.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

IS A SPECIFIC INDEX DESIGNATED AS A REFERENCE BENCHMARK TO DETERMINE WHETHER THIS FINANCIAL PRODUCT IS ALIGNED WITH THE ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS THAT IT PROMOTES?

The Sub-Fund does not have a benchmark index.

HOW IS THE REFERENCE BENCHMARK CONTINUOUSLY ALIGNED WITH EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THE FINANCIAL PRODUCT?

Non applicable.

HOW IS THE ALIGNMENT OF THE INVESTMENT STRATEGY WITH THE METHODOLOGY OF THE INDEX ENSURED ON A CONTINUOUS BASIS?

Non applicable.

HOW DOES THE DESIGNATED INDEX DIFFER FROM A RELEVANT BROAD MARKET INDEX?

Non applicable.

WHERE CAN THE METHODOLOGY USED FOR THE CALCULATION OF THE DESIGNATED INDEX BE FOUND?

Non applicable.

WHERE CAN I FIND MORE PRODUCT SPECIFIC INFORMATION ONLINE?

More product-specific information can be found on the website: <https://www.am.oddo-bhf.com>.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

Appendix XVII:

Sustainable Investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significant harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Product name: ODDO BHF GLOBAL TARGET IG 2031

ODDO BHF GLOBAL TARGET IG 2031("Sub-Fund" or "Fund") is a Sub-Fund of SICAV ODDO BHF ("SICAV").

Legal entity identifier: 636700VS1UGOYX39X084

DOES THIS FINANCIAL PRODUCT HAVE A SUSTAINABLE INVESTMENT OBJECTIVE?	
●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: N/A <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: N/A	<input checked="" type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments. <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments.

WHAT ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS ARE PROMOTED BY THIS FINANCIAL PRODUCT?

The Sub-Fund's ESG approach aims to promote good carbon emissions management:

- By excluding issuers involved in high-carbon sectors such as coal and unconventional oil and gas, as described in the management company's Exclusion Policy;
- And, at the same time, ensuring that the Sub-fund's average carbon intensity is better than that of its investment universe (defined as 80% ICE BofA Euro Corporate Index (ER00 Index) + 20% ICE BofA BB-B Euro High Yield Non-Financial Fixed & Floating Rate Constrained Index (HEAG)).

I. First stage: exclusions:

The Sub-Fund applies the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddobhf.com. In addition, the Sub-Fund excludes production of adult entertainment from all investments.

II. Second stage: ESG rating and carbon intensity

This stage involves taking into account the ESG rating of the securities comprising the investment universe. To this end, the management team relies on ESG ratings provided by the external data provider MSCI ESG Research.

In the event that an issuer has not been rated by MSCI ESG Research, the Management Company has two options:

o Firstly, it may use the ESG rating assigned to the securities of the issuer concerned by the Management company.

o Secondly, if the management company has not assigned an ESG rating to the securities of the issuer concerned, it may generate a substitute ESG rating, which is defined, among other things, by an average based on MSCI's ESG ratings according to the sector of activity, the size of the company and the country of domicile. The use of this substitute rating ends when MSCI ESG Research generates its own ESG rating for the issuer concerned or when an ESG rating is assigned by the management company.

In addition, the management company may review an ESG rating provided by MSCI. This review is carried out by the ESG team and may result in the replacement of the MSCI ESG rating with a new internal ESG rating.

The management team takes into account the weighting of the securities held in the portfolio when calculating the average ESG score of the Sub-Fund.

At least 75 % of the Sub-Fund's net asset value is aligned with environmental and/or social characteristics. This minimum allows us to be aware of the main sustainability-related opportunities and risks for the majority of the Sub-Fund's assets.

Besides the integration of ESG ratings, the Sub-Fund commits to having a better carbon intensity (weighted average of Scope 1 and 2 CO₂ emissions divided by the revenue of each company in which the Sub-fund invests) than that of its investment universe (defined as 80% ICE BofA Euro Corporate Index (ER00 Index) + 20% ICE BofA BB-B Euro High Yield Non-Financial Fixed & Floating Rate Constrained Index (HEAG)).

The Sub-Fund does not have a benchmark index.

WHAT SUSTAINABILITY INDICATORS ARE USED TO MEASURE THE ATTAINMENT OF EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THIS FINANCIAL PRODUCT?

The following sustainability indicators are used to measure the achievement of ESG characteristics:

- The **ESG coverage rate**, based on the commitment that at least 90% of the Sub-fund's securities have an ESG rating after taking into account the weighting of each security and excluding cash, derivatives, sovereigns, and quasi-sovereigns;
- The weighted average **ESG rating** of the Sub-Fund to assess the fulfillment of environmental, social, and governance characteristics;
- The Sub-fund's **sustainable investment**, which will be at least 10%;
- The Sub-fund's **carbon intensity** (weighted average of Scope 1 and 2 CO₂ emissions divided by the revenue of each company in which the Sub-fund invests), particularly in relation to that of the investment universe (defined as 80% ICE BofA Euro Corporate Index (ER00 Index) + 20% ICE BofA

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

BB-B Euro High Yield Non-Financial Fixed & Floating Rate Constrained Index (HEAG)). Finally, for at least 90% of the securities comprising the net assets of the Sub-Fund data in relation to carbon intensity are available, after taking into account the weighting of each security and excluding cash, derivatives, sovereigns, and quasi-sovereigns.

WHAT ARE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY INTENDS TO MAKE AND HOW DOES THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The Sub-Fund references the objectives described above in its ESG strategy but does not seek to select its investments on the basis of one or more of these objectives only. The contributions to these objectives are taken into account by the sustainability indicators used by the ESG strategy.

As such the Sub-Fund intends to capture both aspects of a company contribution: it's positive environmental and/or social output contribution coming from 1/ companies' products and/or services revenues or 2/ its contribution to environmental and/or social objective thanks to companies' wide operations when aligned with environmental and/or social targets.

To be eligible as a Sustainable Investment, a company must pass at least one of the criteria detailed below:

a) Criteria "based on company operations":

- Implied Temperature Rise « ITR »:

Company operations for which climate targets initiatives are maintaining temperature rise below or equal to 2°C, in line with Paris Agreement's pathway of 2°C or below, is considered to contribute to an environmental objective and as such qualify as a Sustainable Investment. We use MSCI ITR data to assess the temperature alignment.

- SBTi approved emission targets:

Greenhouse gas emissions are mentioned as one possibility to measure an environmental objective. Our approach to measuring sustainable investments also includes companies that have their GHG emissions reduction targets approved by the Science-Based Targets initiative (SBTi).

b) Criteria "based on company revenue activities":

- Sustainable Solutions Revenues:

We assess how an economic activity contributes to specific environmental or social objectives. In that respect we use MSCI "Sustainable Impact Revenue" data field. The "Sustainable Impact Revenue" is between 0% and 100% and represents a specific share of companies' overall revenue.

- EU Taxonomy aligned revenue:

The EU Taxonomy is designed to identify economic activities that tackle environmental or social objectives. However, only two of the six defined environmental objectives are fully scoped for the time being. For a company, we will use the taxonomy alignment as reported as the percentage of revenue that are generated by taxonomy aligned activities.

- EU Taxonomy aligned capex:

For a company, we will use the taxonomy alignment as reported as the percentage of capital expenditures that are generated by taxonomy aligned activities.

- "Green percentage" of a firm patent:

This indicator helps us to identify companies that derived revenues and held patents on emission-reduction technologies and practices to be contributing to an environmental objective.

c) Additional criteria: Sustainable bonds:

We consider that green, social and sustainability bonds can qualify as sustainable investments as long as the use of proceeds are used to finance projects that contribute positively to an environmental and/or social objective.

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

HOW DO THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY INTENDS TO MAKE, NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The following approach is defined to comply with Article 2 (17) of the SFDR**.

- **Sectors excluded from investment:**
The Sub-fund applies the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com. In addition, the Sub-Fund excludes production of adult entertainment from all investments.
- **Controversies:** The most controversial companies according to our MSCI ESG data provider, and after confirmation by the ESG team for a second check, will not be considered sustainable.
- **Consideration of major negative impacts:** In order not to significantly undermine sustainability objectives, the Investment Manager defines control rules (pre-trade) for selected significantly harmful activities: exposure to controversial weapons (0% tolerance), and serious violations of the UN Global Compact principles and the Organization for Economic Co-operation and Development (OECD) guidelines for multinational enterprises (0% tolerance).
- **Dialogue, engagement, and voting:** our dialogue, engagement and voting policies support the objective of avoiding significant harm by identifying the most important risks and have our voice heard to generate change and improvement.

— HOW HAVE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS BEEN TAKEN INTO ACCOUNT?

Regulation (EU) 2020/852 defines certain areas of concern that may have a negative impact ("PAI").

The Investment Manager applies pre-trade rules on two PAIs:

- Exposure to controversial weapons (PAI 14 and 0% tolerance)
- Serious violations of the UN Global Compact principles and the Organization for Economic Cooperation and Development (OECD) guidelines for multinational enterprises (PAI 10 and 0% tolerance).

In addition, the Investment Manager includes other PAIs in its ESG analysis for companies where the information is available, but without strict control rules. The collection of PAI data is used to define the Investment Manager's final ESG rating.

ESG analysis includes monitoring of greenhouse gas emissions (PAI 1), exposure to fossil fuels (PAI 4), share of non-renewable energy consumption and production (PAI 5), energy consumption intensity by high climate impact sectors (PAI 6), activities with a negative impact on biodiversity-sensitive areas (PAI 7), the lack of processes and compliance mechanisms to monitor adherence to the UN Global Compact and OECD Guidelines for Multinational Enterprises (PAI 11), the unadjusted gender pay gap (PAI 12), and board parity (PAI 13). The Investment Manager also includes two other PAIs: the deforestation policy (PAI 15) and the lack of a human rights policy (PAI 9).

If the Sub-Fund has sovereign investments, the manager's ESG model incorporates the two main PAIs into the ESG analysis: greenhouse gas intensity (PAI 15) and countries with investments subject to social violations (PAI 16).

Further information on the Investment Manager's consideration of PAI is available on am.oddobhf.com.

HOW ARE THE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS? DETAILS:

The Investment Manager ensures that the Sub-Fund's sustainable investments are aligned by applying its United Nations Global Compact (UNGC) exclusion list, as set out in the Investment Manager's exclusion policy. Proven violations of the OECD Guidelines for Multinational Enterprises and/or the United Nations Guiding Principles on Business and Human Rights will also result in exclusion.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

DOES THIS FINANCIAL PRODUCT CONSIDER PRINCIPAL ADVERSE IMPACTS ON SUSTAINABILITY FACTORS?

Yes, in accordance with the provisions of Article 8 of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (SFDR), the Investment Manager takes sustainability risks into account by integrating ESG (Environmental, Social and Governance) criteria into its investment decision-making process, as set out in the "Investment Strategy" section. This process also makes it possible to assess the management team's ability to manage the adverse sustainability impacts of their business activities.

No

WHAT INVESTMENT STRATEGY DOES THIS FINANCIAL PRODUCT FOLLOW?

The investment universe of the Sub-Fund is made up of companies included in the following credit market index: 80% ICE BofA Euro Corporate Index (ER00 Index) + 20% ICE BofA BB-B Euro High Yield Non-Financial Fixed & Floating Rate Constrained Index (HEAG).

ESG (environmental, social and governance) criteria are another factor in fundamental analysis. They influence but do not dictate the management team's decision-making process.

This approach can be broken down into two consecutive stages.

- First stage: the Sub-Fund applies the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com. Adult entertainment will also be excluded from all investments.

- Second stage: ESG rating and carbon intensity:

This stage involves taking into account the ESG rating of the companies in the investment universe. To that end, the management team uses non-financial data and ratings provided by an external data provider, MSCI ESG Research. Additional ESG assessments from the Management Company's research team or from a third party may also be used, particularly in the event that an issuer has not been rated by MSCI.

The management team takes into account the weighting of securities held in the portfolio when calculating the portfolio average.

At least 90% of the issuers in the portfolio have an ESG rating after taking into account the weighting of each security. Besides the integration of ESG ratings, the Sub-Fund commits to having a better carbon intensity (weighted average of Scope 1 and 2 CO₂ emissions divided by the revenue of each

company in which the Sub-fund invests) than that of its investment universe (defined as 80% ICE BofA Euro Corporate Index (ER00 Index) + 20% ICE BofA BB-B Euro High Yield Non-Financial Fixed & Floating Rate Constrained Index (HEAG)).

The Sub-Fund may hold up to 10% of its net assets in cash.

The Sub-Fund's maximum market exposure (debt securities, funds and derivatives) may not exceed 100% of the Sub-Fund's net assets, it being understood that the maximum exposure is the sum of the net exposures to each of the markets (fixed income, money) to which the Sub-Fund is exposed (the sum of long and hedging positions).

● WHAT ARE THE BINDING ELEMENTS OF THE INVESTMENT STRATEGY USED TO SELECT THE INVESTMENTS TO ATTAIN EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THIS FINANCIAL PRODUCT?

The binding elements of the Sub-Fund are the following:

- The **ESG coverage rate**, based on the commitment that at least 90% of the Sub-fund's securities have an ESG rating after taking into account the weighting of each security and excluding cash, derivatives, sovereigns, and quasi-sovereigns;
- The Sub-Fund's **sustainable investment**, which will be at least 10%;
- The Sub-Fund's **carbon intensity** (weighted average of Scope 1 and 2 CO₂ emissions divided by the revenue of each company in which the Sub-fund invests), particularly in relation to that of its investment universe (defined as 80% ICE BofA Euro Corporate Index (ER00 Index) + 20% ICE BofA BB-B Euro High Yield Non-Financial Fixed & Floating Rate Constrained Index (HEAG)). Finally, for at least 90% of the securities comprising the net assets of the Sub-Fund data in relation to carbon intensity are available, after taking into account the weighting of each security and excluding cash, derivatives, sovereigns, and quasi-sovereigns.

● WHAT IS THE COMMITTED MINIMUM RATE TO REDUCE THE SCOPE OF THE INVESTMENTS CONSIDERED PRIOR TO THE APPLICATION OF THAT INVESTMENT STRATEGY?

There is no minimum rate.

● WHAT IS THE POLICY TO ASSESS GOOD GOVERNANCE PRACTICES OF THE INVESTEE COMPANIES?

ODDO BHF Asset Management's Responsible Investment Policy details our definition and assessment of what constitutes good governance practices. Good governance practices can be assessed using a number of criteria, such as anti-corruption policies and practices, executive compensation policies, shareholder structure, quality of financial communication, and business ethics.

WHAT IS THE ASSET ALLOCATION PLANNED FOR THIS FINANCIAL PRODUCT?

The net assets of the Sub-Fund comprise debt securities and money market instruments.

At least 75% of net assets must be aligned with environmental and social characteristics.

The Sub-Fund may hold up to 25% of its net assets in the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The Fund has a minimum 10% of sustainable investments. However, the Sub-Fund may hold investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Sub-Fund has a minimum of 0,2% of the net assets - weighted by the proportion of revenue aligned with the taxonomy for each issuer - invested in activities aligned with the taxonomy.

Good Governance
practices include sound management structures, employee relations, remuneration of staff and tax compliance.

A minimum of 9,80% of the Sub-Fund's net assets are invested in other environmental investments and the Fund may hold social investment without minimum.

At least 75% of issuers in the portfolio of debt securities and money market instruments with a high yield credit rating and at least 90% of issuers in the portfolio of debt securities and money market instruments with an investment grade credit rating are subject to an ESG rating after taking into account the weighting of each security.

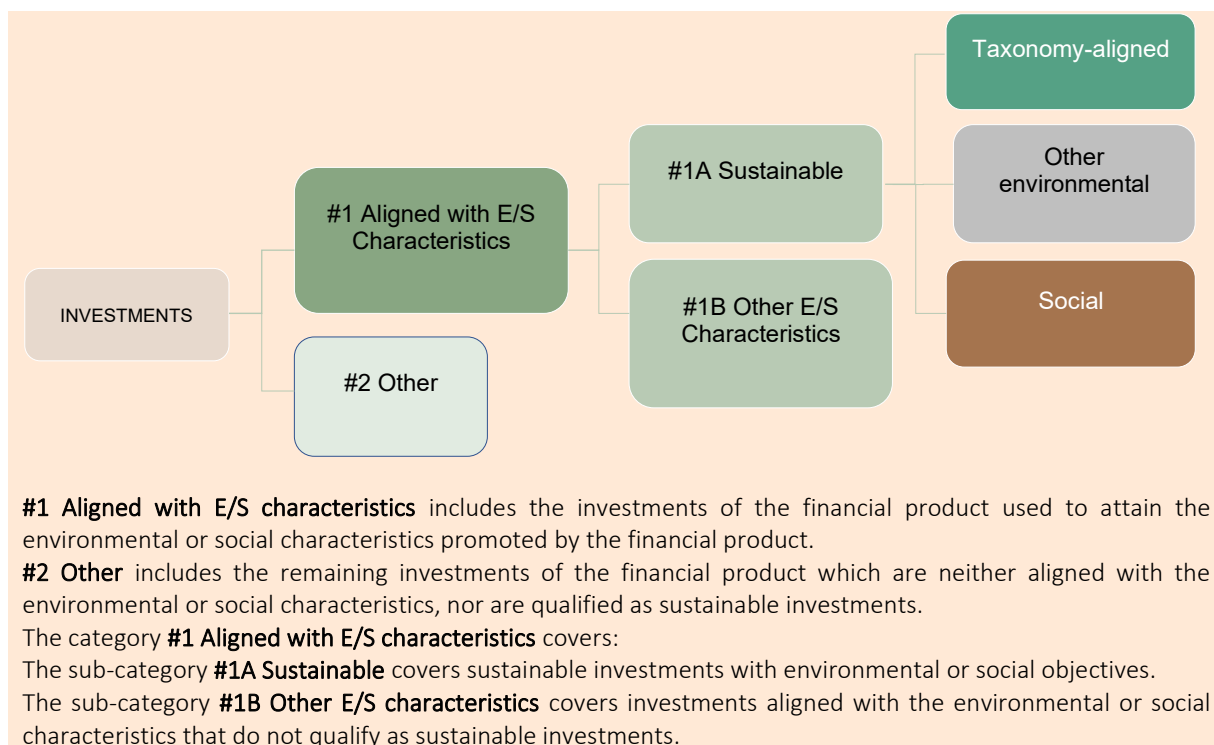

Target funds with an ESG Rating on fund level are also taken into account.

Taxonomy-aligned activities are expressed as a share of:

- **turnover**, reflecting the share of revenue from green activities of investee companies

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

● HOW DOES THE USE OF DERIVATIVES ATTAIN THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THE FINANCIAL PRODUCT?

Derivatives are not actively used to enhance ESG alignment or decrease ESG risk. As part of the investment strategy, the Sub-Fund is allowed to enter into derivatives for investment and hedging purposes.

DOES THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES THAT COMPLY WITH THE EU TAXONOMY¹⁷?

- Yes
- In fossil gas In nuclear energy
- No

The fund manager analyses the portfolio positions according to ESG criteria. Investments in nuclear energy and fossil gases are not excluded for the Sub-Fund. A minimum proportion of activities connected with nuclear energy and/or fossil gases that correspond to the Taxonomy is not intended for the Sub-Fund.

¹⁷ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory not on the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

TO WHAT MINIMUM EXTENT ARE SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE ALIGNED WITH THE EU TAXONOMY?

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● WHAT IS THE MINIMUM SHARE OF INVESTMENTS IN TRANSITIONAL AND ENABLING ACTIVITIES?

The minimum percentage is 0%.

● WHAT IS THE MINIMUM SHARE OF SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE THAT ARE NOT ALIGNED WITH THE EU TAXONOMY?

There is a minimum share of 9,8 % of sustainable investments with an environmental objective, which are not aligned with EU Taxonomy.

● WHAT IS THE MINIMUM SHARE OF SOCIALLY SUSTAINABLE INVESTMENTS?

The minimum percentage of sustainable investments with a social objective is 0%, but the Sub-Fund may make investments with a social objective.

● WHAT INVESTMENTS ARE INCLUDED UNDER "#2 OTHER", WHAT IS THEIR PURPOSE AND ARE THERE ANY MINIMUM ENVIRONMENTAL OR SOCIAL SAFEGUARDS?

The investments included in "#2 Other" are derivatives and other ancillary assets.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

IS A SPECIFIC INDEX DESIGNATED AS A REFERENCE BENCHMARK TO DETERMINE WHETHER THIS FINANCIAL PRODUCT IS ALIGNED WITH THE ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS THAT IT PROMOTES?

The Sub-Fund does not have a benchmark index.

HOW IS THE REFERENCE BENCHMARK CONTINUOUSLY ALIGNED WITH EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THE FINANCIAL PRODUCT?

Non applicable.

HOW IS THE ALIGNMENT OF THE INVESTMENT STRATEGY WITH THE METHODOLOGY OF THE INDEX ENSURED ON A CONTINUOUS BASIS?

Non applicable.

HOW DOES THE DESIGNATED INDEX DIFFER FROM A RELEVANT BROAD MARKET INDEX?

Non applicable.

WHERE CAN THE METHODOLOGY USED FOR THE CALCULATION OF THE DESIGNATED INDEX BE FOUND?

Non applicable.

WHERE CAN I FIND MORE PRODUCT SPECIFIC INFORMATION ONLINE?

More product-specific information can be found on the website: <https://www.am.oddo-bhf.com>.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

Appendix XVIII:

Sustainable Investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significant harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Product name: ODDO BHF US EQUITY TREND

ODDO BHF US EQUITY TREND ("Sub-Fund" or "Fund") is a Sub-Fund of SICAV ODDO BHF ("SICAV").

Legal entity identifier (LEI-CODE) : 54930015XWO4PJRGNW22

DOES THIS FINANCIAL PRODUCT HAVE A SUSTAINABLE INVESTMENT OBJECTIVE?	
●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: N/A <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: N/A	<input type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of __ % of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments

WHAT ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS ARE PROMOTED BY THIS FINANCIAL PRODUCT?

The Sub-Fund promotes: (1) climate transition (i.e. a reduction in carbon emissions); (2) natural capital (i.e. the protection of biodiversity and reduction of environmental damage); and (3) human rights and human capital (i.e. health and safety, human capital development, labour management, community relations, privacy and data security and product safety and quality) by

applying a combination of exclusions and an external ESG rating system from MSCI. ESG criteria are taken into consideration through an approach which can be broken down into two stages.

I- First stage: exclusions:

The Sub-Fund applies the common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com. The exclusions are the following:

Non-conventional weapons: all companies that manufacture or distribute weapons prohibited under certain international conventions¹⁸. Companies shall have no activity of manufacturing or of manufacturing tailor-made components, using, repairing, putting up for sale, selling, distributing, importing or exporting, storing or transporting controversial or indiscriminate weapons such as: anti-personnel mines, submunitions, inert ammunition and armor containing depleted uranium or any other industrial uranium, weapons containing white phosphorus, biological, chemical or nuclear weapons (in the case of companies incorporated in a country that does not form part of the Nuclear Non-Proliferation Treaty).

Coal mining: Any company with annual production in excess of 8 million tons or, alternatively, production equivalent to 5% of its revenues.

Coal power: Any company for which coal accounts for more than 15% of its production mix or, alternatively, more than 15% of its installed capacity.

Coal development projects: Any company engaged in coal mining or coal-fired power generation that is developing new projects involving thermal coal, regardless of the project's size. This includes coal infrastructure projects such as port or road developments favoring the development of coal production.

Tobacco: all companies that generate more than 0% of their revenues from the production of tobacco.

Unconventional oil and gas: all companies from the energy sector that generate more than 5% of their revenues from the extraction and production of unconventional oil and gas. This includes shale oil and gas as well as oil sands.

Arctic exploration: all companies from the energy sector that generate more than 10% of their revenues from the extraction and production of (conventional and unconventional) oil and gas in the Arctic.

Governance and international norms and conventions: all companies violating the United Nations Global Compact as well as OECD Guidelines for Multinational Enterprises.

Biodiversity: all companies that generate more than 5% of their revenues from the production of palm oil as well as any company involved (according to data provided by MSCI) in serious controversies linked to biodiversity.

II- Second stage: ESG rating

This involves assessing the ESG rating of the securities comprising the investment universe in order to select investments which will enable the Sub-Fund to meet its commitment to maintain a weighted average ESG score that is better than that of the S&P 500 NR (Net Return) (the "Benchmark."). To this end, the management team relies on ESG ratings provided by the external data provider, MSCI and at least 90% of the Sub-Fund's net assets will be invested in securities for which such data is available and has been assessed by the Investment Manager.

MSCI uses a rules-based methodology by assigning issuers an industry-relative letter rating from AAA to CCC based on how well they manage sustainability risks and opportunities (those relevant to the environmental and social characteristics set out above being: (1) Climate transition: carbon emissions, climate change vulnerability, opportunities in cleantech, opportunities in green building, and opportunities in renewable energy; (2) Natural capital:

¹⁸ Chemical Weapons Convention ratified in Paris in 1993, Convention on the Prohibition of Biological Weapons negotiated in Geneva in 1972, Ottawa Convention of 1997 and Oslo Convention of 2008

biodiversity and land use, raw material sourcing, and water stress; and (3) Human rights and human capital: Health and safety, human capital development, labor management, community relations, privacy and data security and product safety and quality; together the SRO) relative to their peers. AAA is the best rating on the rating scale and CCC is the worst.

The Investment Manager takes into account the weighting of the securities held in the Sub-Fund when calculating the average ESG score of the Sub-Fund. In the event of a deterioration in the ESG ratings of the securities in the Sub-Fund or a change in the ESG rating methodology affecting the average ESG rating of the Sub-Fund, the average ESG rating of the Sub-Fund will be restored to a level higher than that of the benchmark index, taking into account the interests of unitholders and market conditions. The Sub-Fund does not target a specific level of outperformance in terms of this rating compared to that of the Benchmark (i.e. the margin by which the weighted average MSCI ESG score of the Fund will be better than that of the Benchmark may ultimately be minimal).

The Sub-Fund has not designated a reference benchmark for the purpose of attaining the environmental and social characteristics it promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

WHAT SUSTAINABILITY INDICATORS ARE USED TO MEASURE THE ATTAINMENT OF EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THIS FINANCIAL PRODUCT?

The following sustainability indicators are used to measure the achievement of the Sub-Fund's ESG characteristics:

- The ESG coverage of the Sub-Fund, notably given the pledge that at least 90% of the Sub-Fund's net assets will be invested in securities with an ESG rating (accounting for the weight of each security).
- The internal weighted ESG score of the Sub-Fund to assess the overall achievement of environmental, social and governance characteristics.

WHAT ARE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY INTENDS TO MAKE AND HOW DOES THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

N/A - the Sub-Fund does not make any sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

HOW DO THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY INTENDS TO MAKE, NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

N/A - the Sub-Fund does not make any sustainable investments.

HOW HAVE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS BEEN TAKEN INTO ACCOUNT?

N/A - the Sub-Fund does not make any sustainable investments

HOW ARE THE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS? DETAILS:

N/A - the Sub-Fund does not make any sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

DOES THIS FINANCIAL PRODUCT CONSIDER PRINCIPAL ADVERSE IMPACTS ON SUSTAINABILITY FACTORS?

- Yes**, in accordance with the provisions of Article 8 of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (SFDR), the Investment Manager takes sustainability risks into account by integrating ESG (Environmental, Social and Governance) criteria into its investment decision-making process, as set out in the “Investment Strategy” section. This process also makes it possible to assess the management team’s ability to manage the adverse sustainability impacts of their business activities.
- No

WHAT INVESTMENT STRATEGY DOES THIS FINANCIAL PRODUCT FOLLOW?

The Sub-Fund is actively managed and references a benchmark, the S&P 500 NR (Net Return) in EUR, dividend reinvested (the “Benchmark”), by seeking to outperform it and for performance fee calculation purposes, if any.

The Sub-Fund shall invest at least 70% of its net assets in equities that are contained in the Benchmark. Subject to market conditions, the Sub-Fund may invest up to 30% of its net assets in debt instruments denominated in euro with a rating “investment grade” (at least BBB- by Standard & Poor’s or deemed equivalent by the Investment Manager or using the Investment Manager’s internal rating) issued by corporate or sovereign issuers.

The investment process is based on ESG integration, ESG ratings, normative and sector exclusions (including UNGC and controversial weapons) and positive selection. In addition, the Investment Manager will observe the United Nations Principles for Responsible Investment with respect to ESG issues and will apply them in its commitments by actively exercising shareholder and creditor rights. The investment process consists of two stages. The first is based on sector-based exclusions and the exclusion of controversial activities. The Sub-Fund will not invest in issuers involved in the manufacture and distribution of non-conventional weapons or in coal development projects or infrastructure. In addition, issuers in other controversial business sectors are excluded if a certain turnover threshold is exceeded. These include coal mining, coal-fired power generation, coal development projects or infrastructure, tobacco and fossil fuel extraction in the Arctic or the exploration, production and use of unconventional oil and gas (shale oil/gas and oil sands). Issuers that significantly violate the UNGC principles and OECD guidelines are also excluded. The Investment Manager will rely on MSCI’s data to determine whether companies are considered to have breached any of these exclusions. ESG ratings by MSCI or another internal or external rating acceptable to the Investment Manager will be applied at the second level. In addition, this results in positive bias for issuers with lower sustainability risks (best-in-class approach).

The Sub-Fund will focus on issuers with a high sustainability performance. The Investment Manager will construct the Sub-Fund with an average ESG score better than the average ESG score of the Benchmark.

Direct investments acquired for the Sub-Fund are subject to the minimum exclusions which guarantee a minimum level of environmental or social safeguards. However, there is no look-through approach in relation to financial instruments (no look-through at the assets of a target fund or certificates).

● **WHAT ARE THE BINDING ELEMENTS OF THE INVESTMENT STRATEGY USED TO SELECT THE INVESTMENTS TO ATTAIN EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THIS FINANCIAL PRODUCT?**

The Fund will not invest in companies that violate the UN Global Compact principles or involved in serious controversies related to biodiversity, in addition to companies that are involved in the manufacture or distribution of non-conventional weapons, or that are involved in coal development projects or infrastructure. Additionally, the Sub-Fund will not invest in companies involved in the following activities, subject to the specified thresholds: coal mining (any company with an annual production in excess of 8 million tons or, alternatively, a production equivalent to 5% of its revenues), coal-fired power generation (any company for which coal accounts for more than 15% of its production mix or, alternatively, more than 15% of its installed capacity), tobacco (all companies that generate more than 0% of their revenues from the production of tobacco), fossil fuel extraction in the Arctic (all companies from the energy sector that generate more than 10% of their revenues from the extraction and production of (conventional and unconventional) oil and gas in the Arctic), unconventional oil and gas and extraction (all companies from the energy sector that generate more than 5% of their revenues from the extraction and production of unconventional oil and gas, including shale oil and gas, as well as oil sands) and palm oil production (all companies that generate more than 5% of their revenues from the production of palm oil).

The Investment Manager will construct the Sub-Fund to have a weighted average ESG score that is at all times better than the Benchmark's, resulting (as indicated above) in a positive bias towards selecting investments in issuers with relatively lower sustainability risks and higher sustainability performance (particularly in relation to the SRO listed in the What environmental and/or social characteristics are promoted by this financial product? above), in order to attain the related environmental and social characteristics that it promotes. To this end, at least 90% of the Sub-Fund's net assets will be invested in securities for which the requisite MSCI data is available and has been assessed by the Investment Manager.

● **WHAT IS THE COMMITTED MINIMUM RATE TO REDUCE THE SCOPE OF THE INVESTMENTS CONSIDERED PRIOR TO THE APPLICATION OF THAT INVESTMENT STRATEGY?**

The Sub-Fund has no commitment to reduce the scope of investments.

● **WHAT IS THE POLICY TO ASSESS GOOD GOVERNANCE PRACTICES OF THE INVESTEE COMPANIES?**

The Management Company's Responsible Investment Policy details our definition and assessment of what constitutes good governance practices.

Good governance practices rely on the quality of the management team, the sustainable development strategy, minority shareholders' rights, the anti-corruption processes and track record, as well as other criteria. A good indicator for the degree of alignment of companies' strategies with sustainable aspects is their positioning regarding the UN Global Compact. By committing to the ten principles on human

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover**, reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies,

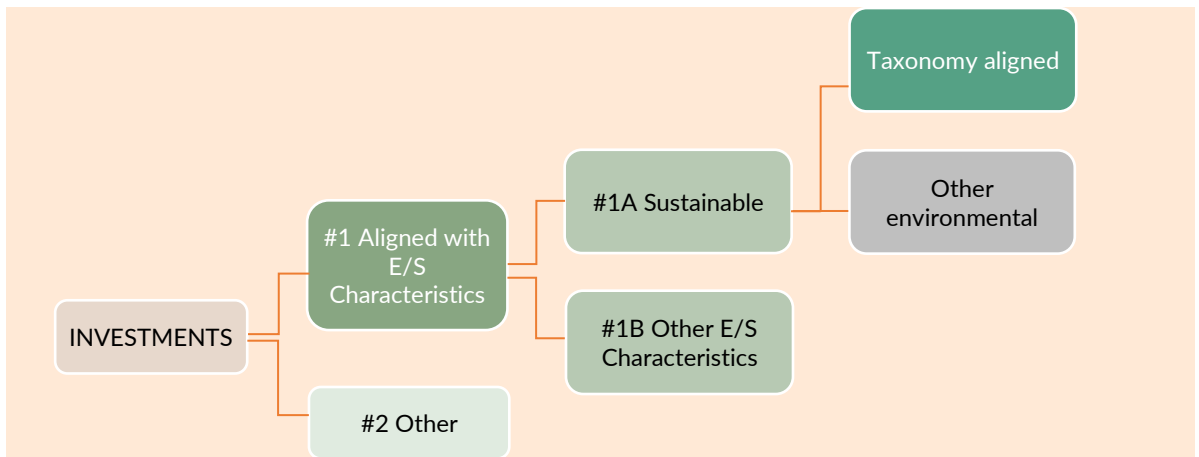

rights, labor, environment, and anticorruption, the company sends a positive signal of strong ambitions towards a long-term oriented financial ecosystem.

WHAT IS THE ASSET ALLOCATION PLANNED FOR THIS FINANCIAL PRODUCT?

The Sub-Fund is actively managed and aims to generate a sustainable return out of income from growth in investments in securities while keeping financial risk low. The Sub-Fund shall invest at least 70% of its net assets in equities that are contained in the Benchmark.

At least 90% of the Sub-Fund's net assets will be aligned with the environmental and social characteristics promoted by the Sub-Fund (#Aligned with E/S characteristics), but do not have to qualify as sustainable investments. Up to 10% of the investments of the Sub-Fund are not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● HOW DOES THE USE OF DERIVATIVES ATTAIN THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THE FINANCIAL PRODUCT?

Derivatives are not actively used to enhance ESG alignment or decrease ESG risk. As part of the investment strategy, the Sub-Fund is allowed to enter into derivatives for investment and hedging purposes.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● DOES THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES THAT COMPLY WITH THE EU TAXONOMY ?¹⁹

- Yes
 In fossil gas In nuclear energy
 No

TO WHAT MINIMUM EXTENT ARE SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE ALIGNED WITH THE EU TAXONOMY?

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● WHAT IS THE MINIMUM SHARE OF INVESTMENTS IN TRANSITIONAL AND ENABLING ACTIVITIES?

N/A – the Sub-Fund has no minimum proportion of investment in transitional or enabling activities.

WHAT IS THE MINIMUM SHARE OF SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE THAT ARE NOT ALIGNED WITH THE EU TAXONOMY?

N/A – the Sub-Fund has no minimum share of investments with an environmental objective that is not aligned with the EU Taxonomy Regulation.

WHAT IS THE MINIMUM SHARE OF SOCIALLY SUSTAINABLE INVESTMENTS?

N/A – the Sub-Fund has no minimum share of socially sustainable investments.

WHAT INVESTMENTS ARE INCLUDED UNDER “#2 OTHER”, WHAT IS THEIR PURPOSE AND ARE THERE ANY MINIMUM ENVIRONMENTAL OR SOCIAL SAFEGUARDS?

The Sub-Fund predominantly makes investments that are aligned with environmental and social characteristics (1 Aligned with E/S characteristics).

¹⁹ s and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) : significantly harm any EU Taxonomy objective – see explanatory not on the left hand margin. The full criteria for fossil gas and nuclear energy activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Those investments included under “#2 Other” may include ancillary liquid assets, money market instruments, investments in ETFs authorized as UCITS, futures, currency swaps and currency forwards. It may also include securities which no longer meet the environmental and/or social criteria described above. There are no minimum environmental or social safeguards.

IS A SPECIFIC INDEX DESIGNATED AS A REFERENCE BENCHMARK TO DETERMINE WHETHER THIS FINANCIAL PRODUCT IS ALIGNED WITH THE ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS THAT IT PROMOTES?

The Sub-Fund has not designated a specific index to use as a reference benchmark to determine whether the Sub-Fund is aligned with the environmental and/or social characteristics it promotes.

- HOW IS THE REFERENCE BENCHMARK CONTINUOUSLY ALIGNED WITH EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THE FINANCIAL PRODUCT?

Non applicable.

- HOW IS THE ALIGNMENT OF THE INVESTMENT STRATEGY WITH THE METHODOLOGY OF THE INDEX ENSURED ON A CONTINUOUS BASIS?

Non applicable.

- HOW DOES THE DESIGNATED INDEX DIFFER FROM A RELEVANT BROAD MARKET INDEX?

Non applicable.

- WHERE CAN THE METHODOLOGY USED FOR THE CALCULATION OF THE DESIGNATED INDEX BE FOUND?

Non applicable.

WHERE CAN I FIND MORE PRODUCT SPECIFIC INFORMATION ONLINE?

Further information on how the Investment Manager takes ESG criteria into account will be available in the Sub-Fund's annual report and on am.oddo-bhf.com.

** Regulation (EU) 2019/2088 on sustainability-related disclosure requirements in the financial services sector

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

Appendix XIX:

Sustainable Investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significant harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Product name: ODDO BHF Laufzeitfonds 2032

ODDO BHF Laufzeitfonds 2032 ("Sub-Fund" or "Fund") is a Sub-Fund of SICAV ODDO BHF ("SICAV").

Legal entity identifier:

DOES THIS FINANCIAL PRODUCT HAVE A SUSTAINABLE INVESTMENT OBJECTIVE?	
●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: N/A <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: N/A	<input checked="" type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments. <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promotes E/S characteristics but will not make any sustainable investments.

WHAT ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS ARE PROMOTED BY THIS FINANCIAL PRODUCT?

The Sub-Fund promotes both environmental and social characteristics that are reflected in the Investment Manager's ESG internal rating system construction and weighting.

As part of the Investment Manager's rating process, the following criteria are notably analyzed:

- **Environment:** climate risk management, energy and water consumption, waste management, environmental certifications, products, and services with added environmental value, etc.
- **Social:** human capital (human resource management, diversity of management teams, employee training, health, and safety, etc.), supplier management, innovation ...
- **Governance:** corporate governance (protecting the interests of minority shareholders, composition of governance bodies, remuneration policy), tax liability, and exposure to the risk of corruption, etc.

Specific attention is paid to the analysis of human capital and corporate governance. Analysis of controversies (industrial accidents, pollution, corruption convictions, anti-competitive practices, product safety, supply chain management, etc.) based on evidence obtained from our external extra-financial data provider is integrated into the rating process and directly influences the ESG rating of each company.

This ESG analysis process results in an internal rating scale that is divided into five ranks (5 being the best and 1 the worst): Strong ESG Opportunity (5), ESG Opportunity (4), ESG Neutral (3), ESG Moderate Risk (2) and ESG High Risk (1).

Additional ESG assessments from MSCI ESG Research or from a third party may also be used, particularly in the event that an issuer has not been rated by the Management Company's research team.

The Sub-Fund does not have a benchmark index.

● **WHAT SUSTAINABILITY INDICATORS ARE USED TO MEASURE THE ATTAINMENT OF EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THIS FINANCIAL PRODUCT?**

The Investment Manager's ESG analysis model uses all the characteristics and indicators mentioned in the above paragraph and the monthly ESG reporting currently presents indicators demonstrating their achievement as follows:

- The weighted average internal ESG rating of the Sub-Fund shall be better than the investment universe.
- At least 75% of issuers in the portfolio of debt securities and money market instruments with a high yield credit rating and at least 90% of issuers in the portfolio of debt securities and money market instruments with an investment grade credit rating are subject to an ESG rating after taking into account the weighting of each security.

● **WHAT ARE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY INTENDS TO MAKE AND HOW DOES THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?**

The Fund references the objectives described above in its ESG strategy but does not seek to select its investments on the basis of one or more of these objectives only. The contributions to these objectives are taken into account by the sustainability indicators used by the ESG strategy.

As such the Sub-Fund intends to capture both aspects of a company contribution: it's positive environmental and/or social output contribution coming from 1/ companies' products and/or services revenues or 2/ its contribution to environmental and/or social objective thanks to companies' wide operations when aligned with environmental and/or social targets.

To be eligible as a Sustainable Investment, a company must pass at least one of the criteria detailed below:

- a) Criteria "based on company operations":
- Implied Temperature Rise « ITR »:

Company operations for which climate targets initiatives are maintaining temperature rise below or equal to 2°C, in line with Paris Agreement's pathway of 2°C or below, is considered to contribute to an environmental objective and as such qualify as a Sustainable Investment. We use MSCI ITR data to assess the temperature alignment.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- SBTi approved emission targets:

Greenhouse gas emissions are mentioned as one possibility to measure an environmental objective. Our approach to measuring sustainable investments also includes companies that have their GHG emissions reduction targets approved by the Science-Based Targets initiative (SBTi).

b) Criteria “based on company revenue activities”:

- Sustainable Solutions Revenues:

We assess how an economic activity contributes to specific environmental or social objectives. In that respect we use MSCI “Sustainable Impact Revenue” data field. The “Sustainable Impact Revenue” is between 0% and 100% and represents a specific share of companies’ overall revenue.

- EU Taxonomy aligned revenue:

The EU Taxonomy is designed to identify economic activities that tackle environmental or social objectives. However, only two of the six defined environmental objectives are fully scoped for the time being. For a company, we will use the taxonomy alignment as reported as the percentage of revenue that is generated by taxonomy aligned activities.

- EU Taxonomy aligned capex:

For a company, we will use the taxonomy alignment as reported as the percentage of capital expenditures that are generated by taxonomy aligned activities.

- “Green percentage” of a firm patent:

This indicator helps us to identify companies that derived revenues and held patents on emission-reduction technologies and practices to be contributing to an environmental objective.

c) Additional criteria: Sustainable bonds:

We consider that green, social and sustainability bonds can qualify as sustainable investments as long as the use of proceeds are used to finance projects that contribute positively to an environmental and/or social objective.

HOW DO THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY INTENDS TO MAKE, NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The following approach is defined to comply with Article 2 (17) of the SFDR**.

- **Sectors excluded from investment:**

The Sub-Fund applies the common exclusion framework as detailed in the Management Company’s exclusion policy, which is available at am.oddo-bhf.com. In addition, the Sub-Fund excludes production of adult entertainment from all investments.

- **Controversies:** The most controversial companies according to our MSCI ESG data provider, and after confirmation by the ESG team for a second check, will not be considered sustainable.

- **Consideration of major negative impacts:** In order not to significantly undermine sustainability objectives, the Investment Manager defines control rules (pre-trade) for selected significantly harmful activities: exposure to controversial weapons (0% tolerance), and serious violations of the UN Global Compact principles and the Organization for Economic Co-operation and Development (OECD) guidelines for multinational enterprises (0% tolerance).

- **Dialogue, engagement, and voting:** our dialogue, engagement and voting policies support the objective of avoiding significant harm by identifying the most important risks and have our voice heard to generate change and improvement.

HOW HAVE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS BEEN TAKEN INTO ACCOUNT?

Regulation (EU) 2020/852 defines certain areas of concern that may have a negative impact ("PAI").

The Investment Manager applies pre-trade rules on two PAIs:

- Exposure to controversial weapons (PAI 14 and 0% tolerance)
- Serious violations of the UN Global Compact principles and the Organization for Economic Co-operation and Development (OECD) guidelines for multinational enterprises (PAI 10 and 0% tolerance).

In addition, the Investment Manager includes other PAIs in its ESG analysis for companies where the information is available, but without strict control rules. The collection of PAI data is used to define the Investment Manager's final ESG rating.

ESG analysis includes, when the data is available, monitoring of greenhouse gas emissions (PAI 1), exposure to fossil fuels (PAI 4), share of non-renewable energy consumption and production (PAI 5), energy consumption intensity by high climate impact sectors (PAI 6), activities with a negative impact on biodiversity-sensitive areas (PAI 7), the lack of processes and compliance mechanisms to monitor adherence to the UN Global Compact and OECD Guidelines for Multinational Enterprises (PAI 11), the unadjusted gender pay gap (PAI 12), and board parity (PAI 13). The Investment Manager also includes two other PAIs: the deforestation policy (PAI 15) and the lack of a human rights policy (PAI 9).

Further information on the Investment Manager's consideration of PAI is available on am.oddo-bhf.com.

HOW ARE THE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS? DETAILS:

The Investment Manager ensures that the Sub-Fund's sustainable investments are aligned by applying its United Nations Global Compact (UNGC) exclusion list, as set out in the Investment Manager's exclusion policy. Proven violations of the OECD Guidelines for Multinational Enterprises and/or the United Nations Guiding Principles on Business and Human Rights will also result in exclusion.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

DOES THIS FINANCIAL PRODUCT CONSIDER PRINCIPAL ADVERSE IMPACTS ON SUSTAINABILITY FACTORS?

- Yes**, in accordance with the provisions of Article 8 of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (SFDR), the Investment Manager takes sustainability risks into account by integrating ESG (Environmental, Social and Governance) criteria into its investment decision-making process, as set out in the “Investment Strategy” section. This process also makes it possible to assess the management team’s ability to manage the adverse sustainability impacts of their business activities.
- No

WHAT INVESTMENT STRATEGY DOES THIS FINANCIAL PRODUCT FOLLOW?

The investment universe of the Sub-Fund is made up of companies included in the following credit market index: the ICE BofA BB-B Global High Yield Non-Financial Constrained Total Return Index Hedged EUR.

ESG (environmental, social and governance) criteria are another factor in fundamental analysis. The management team takes ESG (environmental, social and governance) criteria into account in its investment decisions but they are not the dominant factor, so the investment decisions taken may not be consistent with ESG criteria.

This approach can be broken down into two consecutive stages.

- First stage: the Sub-fund applies the common exclusion framework as detailed in the Management Company’s exclusion policy, which is available at am.oddo-bhf.com. Adult entertainment will also be excluded from all investments.
- Second stage: It consists in assigning an ESG rating to a large majority of companies in the investment universe. As part of the internal ESG rating model, the following criteria, among others, can be analyzed:
 - Environmental: climate change, natural capital, pollution and waste, environmental opportunities
 - Social: human capital, client capital, supply chain, cybersecurity
 - Governance: corporate governance, leadership, corporate behavior

Close attention is paid to the analysis of human capital and corporate governance, which has an impact on the final ESG rating of each company. We believe that poor human capital management or corporate governance failures pose a major risk to the execution of a company’s strategy and therefore to its valuation.

Our analyses are conducted in collaboration by our ESG analyst team, which collaborates closely with the investment teams. It enables us to identify the non-financial risks to which each issuer is potentially exposed, which can impact the company financially or its operating environment. The analysis of controversies (industrial accidents, pollution, corruption, anti-competitive practices, product safety, supply chain management, etc.), based on information provided by our external non-financial data provider, is integrated into the rating process and directly influences the ESG rating of each company.

This ESG analysis results in an internal rating on a scale of 1 (worst) to 5 (best).

In the event that an issuer has not been rated by the internal ESG rating model, the Management Company may use the ESG ratings of MSCI ESG Research.

The ESG internal team will analyze the issuers selected by the Investment Manager’s management team, consequently, at least 75% of the issuers in the portfolio have an ESG rating after taking into account the weighting of each security. Target funds with an ESG rating on fund level are also taken into account.

This ESG scoring system impacts the sub-fund structure by limiting exposure to companies showing lower ESG scores, to ensure a certain overall ESG quality level of the Sub-Fund. In particular, the weighted average internal ESG rating of the Sub-Fund shall be better than the investment universe.

The management team may select stocks that are not included in the Sub-Fund’s investment universe.

Given the Sub-Fund’s performance target and specific maximum maturity for securities held, the selection of securities may vary over time at the Investment Manager’s discretion, depending on market opportunities and the maturing of securities. In particular, the Sub-Fund may invest up to 100% of its assets in investment

grade securities rated higher than BB+ (Standard & Poor's or equivalent as assessed by the Management Company or according to its own internal rating).

The Investment Manager may also invest up to 100% of net assets in French or foreign forward financial instruments traded on regulated or OTC markets, without seeking overexposure. The Investment Manager may take positions in order to hedge the portfolio against interest rate and credit risk. The Investment Manager will also use swap and/or forward exchange contracts to hedge the portfolio against currency risk, though a residual risk of a maximum of 5% remains.

The Sub-Fund's maximum market exposure (equities, debt securities, funds and derivatives) may not exceed 100% of the Sub-Fund's net assets, it being understood that the maximum exposure is the sum of the net exposures to each of the markets (equity, fixed income, money) to which the Sub-Fund is exposed (the sum of long and hedging positions).

Regulation (EU) 2020/852 (hereinafter the "Taxonomy") is aimed at identifying environmentally sustainable economic activities.

The Taxonomy identifies these activities based on their contribution to six major environmental objectives:

- climate change mitigation;
- climate change adaptation;
- the sustainable use and protection of water and marine resources;
- the transition to a circular economy (waste, prevention and recycling);
- pollution prevention and control;
- the protection and restoration of biodiversity and ecosystems.

To be considered sustainable, an economic activity must show that it contributes substantially to one or more of the six objectives, while avoiding significant harm to any of the other objectives ("Do No Significant Harm" principle).

For an activity to be deemed consistent with the Taxonomy, it must also respect the human and social rights guaranteed by international law (minimum social guarantees).

In the absence, for the time being, of data that will be provided by companies covered by the Taxonomy in future, the Management Company undertakes to invest 0% of the Sub-Fund in Taxonomy-aligned activities.

The Management Company expects that the percentage of these investments will increase as more data becomes available.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities.

The underlying investments of the remaining part of the Sub-Fund do not take into account EU criteria on environmentally sustainable economic activities laid down by the Taxonomy Regulation.

● WHAT ARE THE BINDING ELEMENTS OF THE INVESTMENT STRATEGY USED TO SELECT THE INVESTMENTS TO ATTAIN EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THIS FINANCIAL PRODUCT?

The Sub-Fund applies:

- The common exclusion framework as detailed in the Management Company's exclusion policy, which is available at am.oddo-bhf.com. In addition, the Sub-Fund excludes production of adult entertainment from all investments.
- The weighted average internal ESG rating of the Sub-Fund shall be better than the investment universe.
- At least 75% of issuers in the portfolio of debt securities and money market instruments with a high yield credit rating and at least 90% of issuers in the portfolio of debt securities and money market

instruments with an investment grade credit rating are subject to an ESG rating after taking into account the weighting of each security.

- The Sub-fund's sustainable investment will be at least 10%.

● WHAT IS THE COMMITTED MINIMUM RATE TO REDUCE THE SCOPE OF THE INVESTMENTS CONSIDERED PRIOR TO THE APPLICATION OF THAT INVESTMENT STRATEGY?

There is no minimum rate.

● WHAT IS THE POLICY TO ASSESS GOOD GOVERNANCE PRACTICES OF THE INVESTEE COMPANIES?

ODDO BHF Asset Management's Responsible Investment Policy details our definition and assessment of what constitutes good governance practices.

Good governance practices can be assessed using a number of criteria, such as anti-corruption policies and practices, executive compensation policies, shareholder structure, quality of financial communication, and business ethics.

WHAT IS THE ASSET ALLOCATION PLANNED FOR THIS FINANCIAL PRODUCT?

At least 75 % of the Sub-Fund's net asset value is aligned with environmental and/or social characteristics.

The Sub-Fund may also hold up to 25 % in "Other", as defined below, which includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics,

A minimum of 10% of the Sub-Fund's net asset value is invested in sustainable investments. The Sub-Fund may also hold assets that are aligned with environmental and/or social characteristics that do not qualify as sustainable investments.

The Fund has 0,2 % of the net assets - weighted by the proportion of revenue aligned with the taxonomy for each issuer - invested in activities aligned with the taxonomy.

A minimum of 9,80% of the Sub-Fund's net assets are invested in other environmental investments and the Fund may hold social investment without minimum. At least 75% of issuers in the portfolio of debt securities and money market instruments with a high yield

credit rating and at least 90% of issuers in the portfolio of debt securities and money market instruments with an investment grade credit rating are subject to an ESG rating after taking into account the weighting of each security. Target funds with an ESG Rating on fund level are also taken into account.

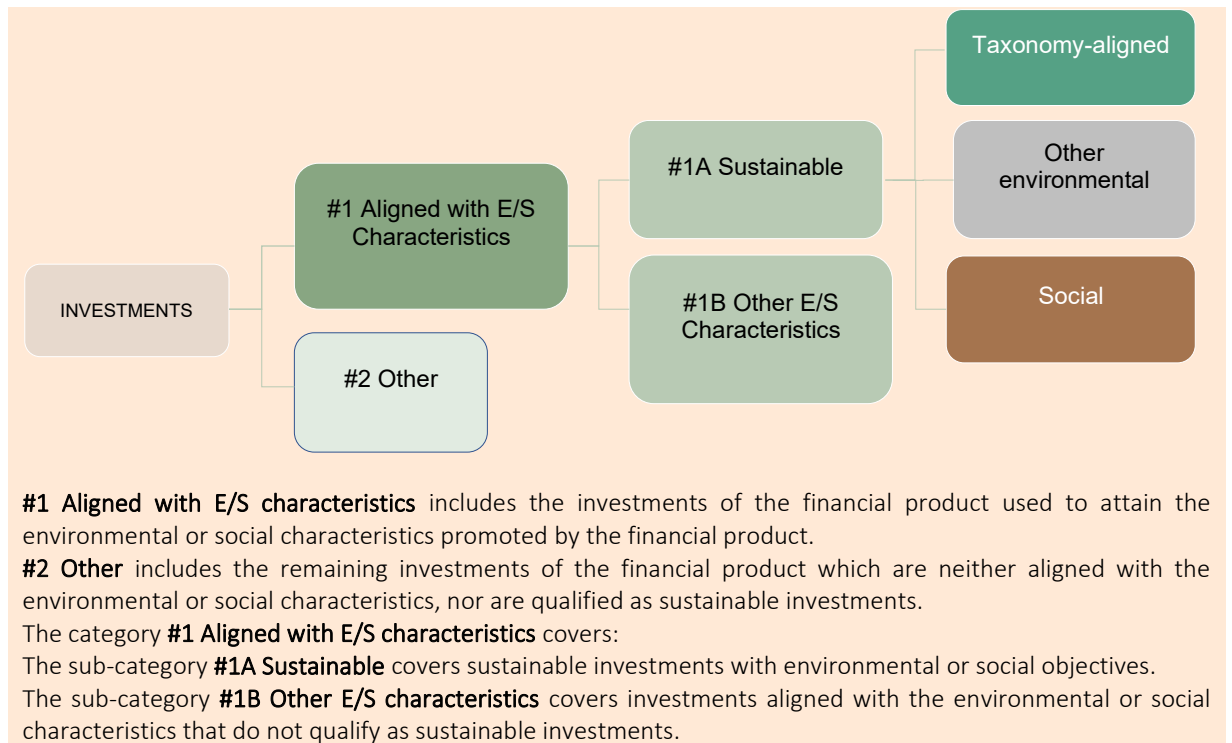

Good Governance
practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover**, reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● HOW DOES THE USE OF DERIVATIVES ATTAIN THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THE FINANCIAL PRODUCT?

Derivatives are not actively used to enhance ESG alignment or decrease ESG risk. As part of the investment strategy, the Sub-Fund is allowed to enter into derivatives for investment and hedging purposes.

DOES THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES THAT COMPLY WITH THE EU TAXONOMY²⁰?

- Yes
 In fossil gas In nuclear energy
 No

The Investment Manager analyses the portfolio positions according to ESG criteria. Investments in nuclear energy and fossil gases are not excluded for the Sub-Fund. A minimum proportion of activities connected with nuclear energy and/or fossil gases that correspond to the Taxonomy is not intended for the Sub-Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● TO WHAT MINIMUM EXTENT ARE SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE ALIGNED WITH THE EU TAXONOMY?

²⁰ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective – see explanatory not on the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **WHAT IS THE MINIMUM SHARE OF INVESTMENTS IN TRANSITIONAL AND ENABLING ACTIVITIES?**

The minimum percentage is 0%.

● **WHAT IS THE MINIMUM SHARE OF SUSTAINABLE INVESTMENTS WITH AN ENVIRONMENTAL OBJECTIVE THAT ARE NOT ALIGNED WITH THE EU TAXONOMY?**

There is a minimum share of 9,8 % of sustainable investments with an environmental objective, which are not aligned with EU Taxonomy.

● **WHAT IS THE MINIMUM SHARE OF SOCIALLY SUSTAINABLE INVESTMENTS?**

The minimum percentage of sustainable investments with a social objective is 0%, but the Sub-Fund may make investments with a social objective.

● **WHAT INVESTMENTS ARE INCLUDED UNDER "#2 OTHER", WHAT IS THEIR PURPOSE AND ARE THERE ANY MINIMUM ENVIRONMENTAL OR SOCIAL SAFEGUARDS?**

The investments included in "#2 Other" are derivatives and other ancillary assets and/or investments of the financial product which are neither aligned with the environmental or social characteristics.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

IS A SPECIFIC INDEX DESIGNATED AS A REFERENCE BENCHMARK TO DETERMINE WHETHER THIS FINANCIAL PRODUCT IS ALIGNED WITH THE ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS THAT IT PROMOTES?

The Sub-Fund does not have a benchmark index.

HOW IS THE REFERENCE BENCHMARK CONTINUOUSLY ALIGNED WITH EACH OF THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED BY THE FINANCIAL PRODUCT?

Non applicable.

HOW IS THE ALIGNMENT OF THE INVESTMENT STRATEGY WITH THE METHODOLOGY OF THE INDEX ENSURED ON A CONTINUOUS BASIS?

Non applicable.

HOW DOES THE DESIGNATED INDEX DIFFER FROM A RELEVANT BROAD MARKET INDEX?

Non applicable.

WHERE CAN THE METHODOLOGY USED FOR THE CALCULATION OF THE DESIGNATED INDEX BE FOUND?

Non applicable.

WHERE CAN I FIND MORE PRODUCT SPECIFIC INFORMATION ONLINE?

More product-specific information can be found on the website: <https://www.am.oddo-bhf.com>.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote
