ISIN code	LU1785344083
Bloomberg code	ODCOPDR LX
Dividend policy	Distribution unit
Minimum (initial) investment	100 EUR
Management company (by delegation)	ODDO BHF AM GmbH
Subscriptions/redemptions	12:00pm, D
Valuation	Daily
Management fees	annual rate of a maximum of 1%, payable monthly and calculated based on the Sub-fund's average net assets for the month in question.
Performance fees	A maximum of 10% of the Sub-Fund's outperformance relative to the benchmark index, once past underperformance over the previous five years has been offset, and provided that the absolute return is positive.
Subscription fees	5 % (maximum)
Redemption fees	Nil
Management fees and other administrative or operating costs	1.119 %
Risk measurement	3 Years 5 Years
Sharpe ratio	0.35 -0.12

INVESTMENT STRATEGY

The investment objective is to outperform the ESTER index +2% (capitalised), net of fees, on an annual basis. The Sub-fund does not have a benchmark. Given the Fund's discretionary management style, its management is not linked to any index. The fund may be invested up to 100% in debt securities. These securities will be issued by issuers whose registered office is located in an OECD country up to a minimum of 70%. The Sub-Fund may only invest in instruments issued by entities rated at least B.

Benchmark : Nil

FUND	2.5%	3.4%	3.2%	3.4%

The performance shown is that of the "ODDO BHF Sustainable Credit Opportunities". "ODDO BHF Sustainable Credit Opportunities" was launched on 12/13/2013 under the name "Oddo Strategic Corporate Bond", this name and strategy have been changed on 12/30/2016 to become "Oddo Credit Opportunities". The later has been absorbed on 10/09/2018 by the Luxembourg fund "ODDO BHF Credit Opportunities", but it still pursues exactly the same investment strategy and the same investment objective as the "Oddo Credit Opportunities".

*The glossary of indicators used is available for download on www.am.oddo-bhf.com in the FUNDS section. | Sources : ODDO BHF AM SAS, Bloomberg, Morningstar® Sustainalytics provides company-level analysis used in the calculation of Morningstar's Sustainability Score.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved.

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

DR-EUR - Eur | Fixed Income - Total Return - Multi Asset Credit

Key indicators	
Yield To Maturity (YTM)**	4.62 %
Yield To Worst (YTW)**	3.56 %
Modified duration to maturity	4.30
Modified duration to worst	3.86
Average maturity (year)	5.45

The investment objective is to achieve an annualized net performance, after fees, exceeding €STER + 200 bp over an investment horizon starting from the sub-fund's inception date, i.e., 2013-12-13, up to a maximum of 2026-10-31. As a reminder, the management fees for share class DR-EUR - Eur are 1%. These fees reduce the annual performance of this share class by 1%.

*The glossary of the indicators used is available for download on www.am.oddo-bhf.com in the "FUNDS" section.

Futures and options are not included in the calculation of the yield. The Yield to Maturity is calculated before currency hedging. The Yield to Worst is calculated after currency hedging.

SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity).

The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

ESG integration at ODDO BHF Asset Management | 3 systematic steps

Exclusions

- Norm-based:** exclusion of companies that do not comply with certain international standards.(chemical weapons , anti-personnel mines, violation of the principles of the Global Compact, etc.)
- Sector-based:** total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, weapon, adult entertainment / pornographie and Coal...)

ESG ratings

- Usage of MSCI data based on a “Best-in-Class” approach
- All titles considered for investments have at least a BB rating

Dialogue and engagement

- Regular dialogue with companies on ESG issues
- Individual and joint engagement
- Inclusion of ESG research within ODDO BHF Asset Management’s voting policy
- Escalation procedure if engagement is not conclusive

ESG rating methodology

The diagram illustrates the MSCI ESG rating methodology. It starts with the MSCI logo, which branches into three pillars: Environment, Social, and Governance. Each pillar lists specific indicators: Environment (Climate Change, Natural Resources, Pollution & Waste, Environmental Opportunities), Social (Human Capital, Product Liability, Stakeholder Opposition, Social Opportunities), and Governance (Corporate Governance, Corporate Behavior). These indicators feed into a box for 'Exposure metrics, management metrics and industry specific weighting', which leads to a 'Final result between 1-10 which is matched to a rating between AAA to CCC'. Below this is a scale from 0 to 10, with corresponding ratings: CCC (0-2,857), B (2,857-7,143), BB (7,143-10), BBB, A, AA, and AAA. The scale is labeled 'High risk...' on the left and '...Strong opportunity' on the right, with an arrow pointing from left to right.

Sources: ODDO BHF AM SAS, MSCI.

Carbon metrics methodology: We updated our methodology of carbon intensity calculation. Starting January 31st, 2023, when reported carbon values are unavailable or inconsistent, estimated carbon values are used. The estimations are based on average carbon value (scope 1+2 emissions) of sectoral peers as a function of revenues

MONTHLY MANAGEMENT COMMENT

In February, markets shifted their focus on the broader implications of AI amid the earnings season. Specifically, investors scrutinized the large, expectations beating capex plans of the hyperscalers, as well as the newest AI model developments which were seen as disruptive for a range of established business models. As a result, there were stronger than usual idiosyncratic name and sector moves in both equity and credit markets while overall indices traded broadly sideways or slightly weaker. Most notably, software saw a big selloff amid fears of the viability of business models in light of new AI developments. All of this happened against a robust macroeconomic environment. In the US, the labor market report showed a second consecutive month with more positive readings across different indicators and ISM manufacturing PMIs recorded a large jump, confirming the more positive outlook for industrial sectors. The only major exception to the solid data were the softer retail sales which indicate some moderation in consumption over the last quarter. Overall, nowcasts still point to economic activity expanding at healthy levels. In the Eurozone the picture continues to look solid as well with PMIs, IFO and other leading indicators still pointing towards a moderate expansion while labor markets still continue improving in aggregate and inflation is slowly moderating. The earnings season did not bring any new impulses from a credit perspective. With the exception of still challenged cyclical sectors such as Chemicals and Automotive, results overall remained solid from a credit perspective and outlooks were good. In this environment, both Corporate Investment Grade Bond spreads and High Yield spreads widened by around 10bps. German 10yr Bund yields ended the month lower at 2.64% while US 10yr treasury yields declined to 3.95%.

We have increased our exposure towards UK government bonds and GBP duration, as pricing reached oversold levels in early February. However, at the end of the month, we have partially taken profit after the general interest rate move down and have reduced our total duration to a level of below 4. This was implemented by a reduction of EUR duration. In order to finance new issues in credit markets in February, both in High Yield and Investment Grade, we have sold some expensive short-dated bonds.

RISKS:

The fund is exposed to the following risks :risk of capital loss, interest rate risk, credit risk, risk associated with discretionary management, risk associated with commitments on forward financial instruments, counterparty risk, risks associated with portfolio concentration, liquidity risk of underlying assets, risk associated with high yield bonds, emerging markets risk, risks associated with securities financing transactions and collateral management, modelling risk, Sustainability risk and on an ancillary basis currency risk, risk associated with currency conversion

SFDR CLASSIFICATION²

The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.
