Performance fees	N/A
Subscription fees	2 % (maximum)
Redemption fees	Nil
Management fees and other administrative or operating costs	1.046 %

INVESTMENT STRATEGY

ODDO BHF Green Planet is a global equity fund that uses artificial intelligence to invest in listed equities with exposure to the theme of ecological transition, through a selection of associated sub-themes such as clean energy, energy efficiency, sustainable mobility and the preservation of natural resources. A big-data algorithm is first used to construct an universe of eligible investments composed of companies whose business model contributes significantly to the sub-themes identified above. A quantitative model is then applied to this limited investment universe to identify between 30 and 60 companies with the most attractive financial and risk characteristics. The management team may adjust the weightings at its own discretion and the portfolio is monitored on an ongoing basis. The fund seeks to be permanently invested in equities with the aim of generating long-term capital growth while integrating a non-financial analysis.

*The glossary of indicators used is available for download on www.am.oddo-bhf.com in the Information section. | Sources: ODDO BHF AM SAS, Bloomberg, Morningstar® Sustainalytics provides company-level analysis used in the calculation of Morningstar's Sustainability Score.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved.

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

MONTHLY MANAGEMENT COMMENT

The portfolio's outperformance in March 2026 was driven by effective stock selection across all major sectors, benefiting in particular from the strong performance of renewable energy and battery technology firms.

The top contributors were:

Nextpower (+14.7%), a US group specialising in solar trackers, which rallied on the signing of a supply agreement with Jinko Solar and on positive analyst reports, after profit-taking the previous month.

CATL (+17.35%), a battery manufacturer specialising in lithium ion batteries for electric vehicles and energy storage systems, which published its results with better-than-expected sales for 2025.

The main drags on performance were:

Schneider Electric (-17.08%), a global specialist in energy management and industrial automation solutions, hit by profit taking and negative market sentiment linked to tensions in the Middle East, despite positive comments from analysts and new strategic partnerships.

Saint-Gobain (-18.61%), a global manufacturer of building materials, which announced lower-than-expected sales for the fourth quarter of 2025.

PORTFOLIO'S SUSTAINABLE IMPACT ANALYSIS VS. BENCHMARK

Revenues generated by a \$1mm investment in the portfolio compared to the same investment in the benchmark:

The figures above reflect the estimated annual revenue generated by companies from products and services providing sustainable impact solutions in relation with the 4 subthemes. A portfolio or index's estimated annual revenue derived from sustainable impact products and services is the sum of each company's sustainable impact solutions revenue represented by the investor's ownership stake.

SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity).

The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

ESG integration at ODDO BHF Asset Management | 3 systematic steps

Exclusions

- Norm-based:** exclusion of companies that do not comply with certain international standards.(chemical weapons , anti-personnel mines, violation of the principles of the Global Compact, etc.)
- Sector-based:** total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, weapon, adult entertainment / pornographie and Coal...)

ESG ratings

- Usage of MSCI data based on a "Best-in-Class" approach
- All titles considered for investments have at least a BB rating

Dialogue and engagement

- Regular dialogue with issuer in the investment universe
- Individual or collaborative commitment

Glossary

Carbon Footprint	Portfolio carbon emissions per million dollars invested
Carbon intensity	Portfolio carbon emissions per million dollars of turnover
Weighted Average Carbon Intensity	Carbon emissions per million dollars of turnover weighted by the weight of each portfolio company Carbon metrics methodology: We updated our methodology of carbon intensity calculation. Starting January 31st, 2023, when reported carbon values are unavailable or inconsistent, estimated carbon values are used. The estimations are based on average carbon value (scope 1+2 emissions) of sectoral peers as a function of revenues
Fossil fuel reserves	% of portfolio exposed to companies that own fossil fuel reserves
Green share	% of portfolio exposed to companies that offer clean technologies solutions
SFDR Classification	The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.
