SFDR Classification[2]

The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.

INVESTMENT STRATEGY

The management strategy implemented is a discretionary investment strategy based on a stock-picking approach and a rigorous methodology for selecting European growth stocks. It favors companies whose earnings growth exceeds the average market growth, and ensures that these high-growth stocks are not purchased at excessive prices ("Growth at Reasonable Price").

More information on the EU Sustainable Finance Disclosure Regulation (SFDR) classification can be found in the SFDR precontractual annex of the Fund available on our website.
(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

Glossary - Definition of impact measurement indicators

MSCI ESG RATING AND MSCI SCORE

The MSCI ESG RATING is the issuer's final ESG rating. To arrive at a final letter rating, the weighted average of the key issue scores are aggregated and companies are ranked from best (AAA) to worst (CCC).The MSCI score represents the weighted average of the ESG scores for each position in the portfolio. The scale is 0 to 10.

SCOPE 1, 2 & 3

Greenhouse gas emissions are classified into three scopes. Scope 1 covers to direct emissions from sources owned or controlled by the company. Scope 2 refers to indirect emissions from the generation of purchased electricity, steam, heating or cooling consumed by the issuer. Scope 3 includes all other indirect emissions generated across the upstream and downstream value chain, such as those related to suppliers, business travel, transportation, product use and end-of-life treatment.

CARBON INTENSITY

This figure represents the company's most recently reported or estimated Scope 1 + Scope 2 + Scope 3 greenhouse gas emissions normalized by sales in USD, which allows for comparison between companies of different sizes. Starting January 31st, 2023, when reported carbon values are unavailable or inconsistent, estimated carbon values are used. The estimations are based on average carbon value (scope 1+2 emissions) of sectoral peers as a function of revenues. The source of the data is MSCI Solutions (Deutschland) GmbH.

CARBON FOOTPRINT

This figure represents the company's most recently reported or estimated Scope 1, 2, 3 emissions normalized by the most recently available enterprise value including cash (EVIC) in million USD. This ratio facilitates portfolio analysis by allocating emissions across equity and debt. Contrary to the carbon intensity, we do not use estimates if the data is unavailable or inconsistent. The source of the data is MSCI Solutions (Deutschland) GmbH.

FOSSIL FUELS EXPOSURE

The company is exposed to fossil fuel-related activities, including exploration, extraction, mining, storage, distribution and trading of oil and gas, production and distribution of thermal coal, and production, distribution, storage, and reserves of metallurgical coal. The source of the data is MSCI Solutions (Deutschland) GmbH.

GREEN REVENUE

This field represents the total of all revenues derived from any of the six environmental impact themes including alternative energy, energy efficiency, green building, pollution prevention, sustainable water, or sustainable agriculture. The source ofthe data is MSCI Solutions (Deutschland) GmbH.
