Performance fees	Maximum 20% of the Sub-Fund's outperformance of the benchmark index (see prospectus for details)
Subscription fees	5 % (maximum)
Redemption fees	Nil
Management fees and other administrative or operating costs	1.735 %

INVESTMENT STRATEGY

ODDO BHF Green Planet is a global equity fund that uses artificial intelligence to invest in listed equities with exposure to the theme of ecological transition, through a selection of associated sub-themes such as clean energy, energy efficiency, sustainable mobility and the preservation of natural resources. A big-data algorithm is first used to construct an universe of eligible investments composed of companies whose business model contributes significantly to the sub-themes identified above. A quantitative model is then applied to this limited investment universe to identify companies with the most attractive financial and risk characteristics. The management team may adjust the weightings at its own discretion and the portfolio is monitored on an ongoing basis. The fund seeks to be permanently invested in equities with the aim of generating long-term capital growth while integrating a non-financial analysis.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It rangesfrom 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indicationof the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved..

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

MONTHLY MANAGEMENT COMMENT

The fund underperformed its benchmark in October 2026. The portfolio's significant overweight to Industrials remained the largest headwind during the month, as weakness across several industrial holdings outweighed the benefits of the strategy's thematic positioning. Poor stock selection within the sector further amplified the negative impact, making Industrials the most significant detractor from relative performance. Conversely, the portfolio's underweight to Information Technology proved beneficial during the period. Following a strong rally earlier in the year, technology stocks experienced a broad correction amid profit-taking and a more challenging market environment. The portfolio's lower exposure to the sector, combined with favorable stock selection, provided a meaningful offset to performance pressures elsewhere. The overweight to Materials delivered mixed results. Strong performance from selected holdings within the sector generated positive stock selection effects, although the allocation impact remained slightly negative given the benchmark's relatively modest exposure. Main Contributors : - Tetra Tech (+17.3%): Tetra Tech was the portfolio's strongest contributor during the month. Shares advanced despite a weaker backdrop for engineering and construction companies, supported by resilient investor confidence in the company's long-term exposure to water infrastructure, environmental remediation and sustainability-related projects. Constructive analyst commentary and expectations for continued structural demand in US water infrastructure further supported sentiment. - Ecolab (+10.3%): Ecolab delivered strong performance following a solid third-quarter earnings report. Organic growth accelerated across the business, supported by pricing initiatives and robust demand in its water solutions segment. Investors responded positively to improved earnings visibility, upward revisions to analyst price targets and continued evidence of the company's ability to translate sustainability-driven demand into profitable growth. Main Detractors: - Xylem (-8.76%): Xylem was the portfolio's largest detractor during the month following disappointing third-quarter results and a significant reduction to full-year guidance. Management highlighted project delays and a more uncertain macroeconomic environment, prompting concerns about near-term demand trends. The earnings miss triggered a sharp share price decline. - Delta Electronics (-29.1%): Delta Electronics was the weakest-performing holding during the period. Despite reporting strong revenue growth driven by ongoing demand for AI-related data center infrastructure, shares declined sharply amid a broader correction across Asian technology markets. Investor concerns regarding inventory normalization within the AI supply chain and uncertainty surrounding an ongoing US intellectual property investigation further weighed on sentiment.

PORTFOLIO'S SUSTAINABLE IMPACT ANALYSIS VS. BENCHMARK

Revenues generated by a $1mm investment in the portfolio compared to the same investment in the benchmark:

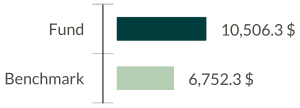

Clean Energy

Energy efficiency

Sustainable mobility

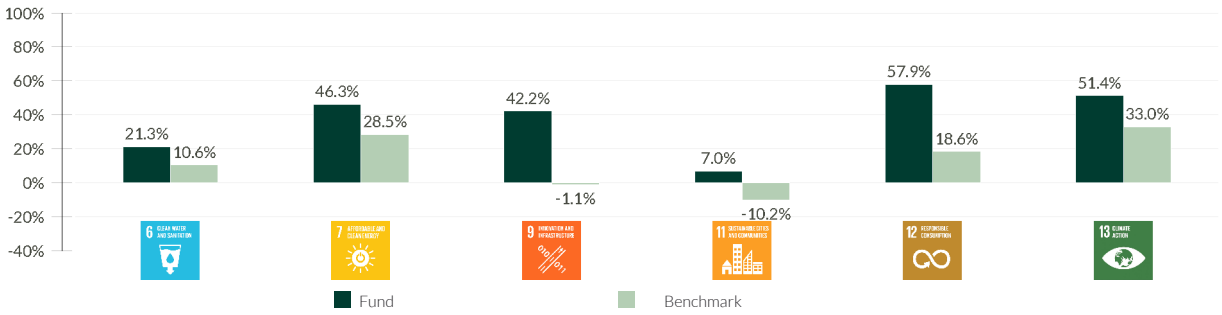

Preservation of natural resources

The figures above reflect the estimated annual revenue generated by companies from products and services providing sustainable impact solutions in relation with the 4 subthemes. A portfolio or index's estimated annual revenue derived from sustainable impact products and services is the sum of each company's sustainable impact solutions revenue represented by the investor's ownership stake.

UN SUSTAINABLE DEVELOPMENT GOAL EXPOSURE

The figures above reflect the estimated aggregated exposure to a selection of UN Sustainable Development Goal (SDG) of the portfolio compared to the benchmark.The estimated SDG exposure come from the MSCI SDG Net Alignment methodology developed by MSCI ESG Research. One company may contribute to one or several SDGs

SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity).
The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

ESG integration at ODDO BHF Asset Management | 3 systematic steps

Exclusions

- Norm-based: exclusion of companies that do not comply with certain international standards.(chemical weapons , anti-personnel mines, violation of the principles of the Global Compact, etc.)
- Sector-based: total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, weapon, adult entertainment / pornography and coal...)

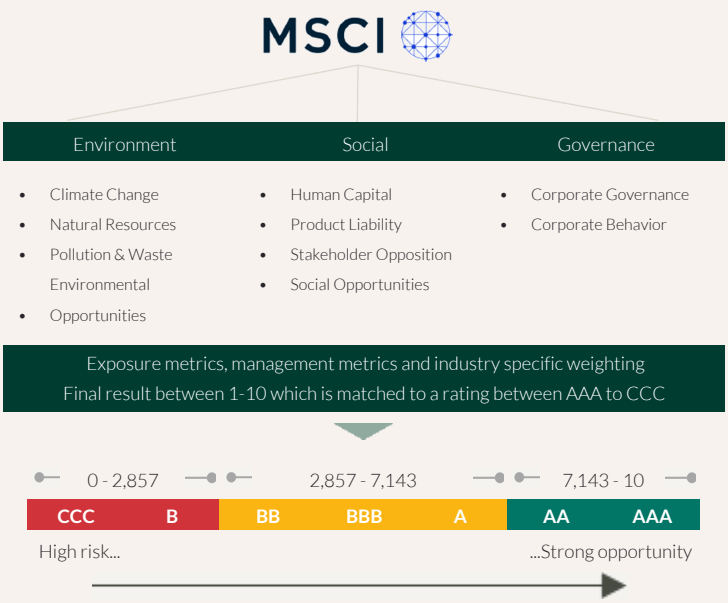

ESG ratings

- Usage of MSCI data based on a "Best-in-Class" approach
- All titles considered for investments have at least a BB rating

Dialogue and engagement

- Regular dialogue with issuer in the investment universe
- Individual or collaborative commitment
