Disclaimer

This document, for promotional purposes, has been drawn up by ODDO BHF Asset Management SAS and is exclusively dedicated to clients categorized as professional (MIFID). It may not be circulated among the public. In case of subscription, potential investors undertake to consult the Key Investor Information Document (KIID) or the fund's prospectus in order to acquaint themselves with the precise nature of any risks incurred, in particular the risk of capital loss. The value of the investment may vary both upwards and downwards and may not be returned in full. The investment must be made in accordance with investors' investment objectives, their investment horizon and their capacity to deal with the risk arising from the transaction. ODDO BHF Asset Management SAS cannot be held responsible for any direct or indirect damages resulting from the use of this document or the information contained in it. This information is provided for indicative purposes and may be modified at any moment without prior notice. Any opinions presented in this document result from our market forecasts on the publication date. They are subject to change according to market conditions and ODDO BHF Asset Management SAS shall not in any case be held contractually liable for them. The net asset values presented in this document are provided for indicative purposes only. Only the net asset value marked on the transaction statement and the securities account statement is authoritative. Subscriptions and redemptions of mutual funds are processed at an unknown asset value. The Key Investor Information Document (DEU, ESP, FR, GB, ITL, NLD, POR) and the prospectus (DEU, ESP, FR, GB) are available free of charge from ODDO BHF Asset Management SAS or on its internet site am.oddo-bhf.com. The annual and interim reports are available free of charge from ODDO BHF Asset Management SAS or on its internet site am.oddo-bhf.com. The fund is licensed for sale in Switzerland. The Key Investor Information Document, the prospectus, the annual and interim reports for Switzerland can be obtained free of charge from the Swiss Representative and paying agent, RBC INVESTOR SERVICES BANK, succursale de Zürich, Bleicherweg 7, 8027 Zürich, Switzerland.

Risks:

The fund is exposed to the following risks : risk of capital loss, interest rate risk, credit risk, risk associated with discretionary management, risk associated with commitments on forward financial instruments, counterparty risk, liquidity risk of underlying assets, risk associated with high yield bonds, risk associated with convertible bonds, risk associated with holding small and medium capitalisations, volatility risk and on an ancillary basis equity risk, currency risk, emerging markets risk

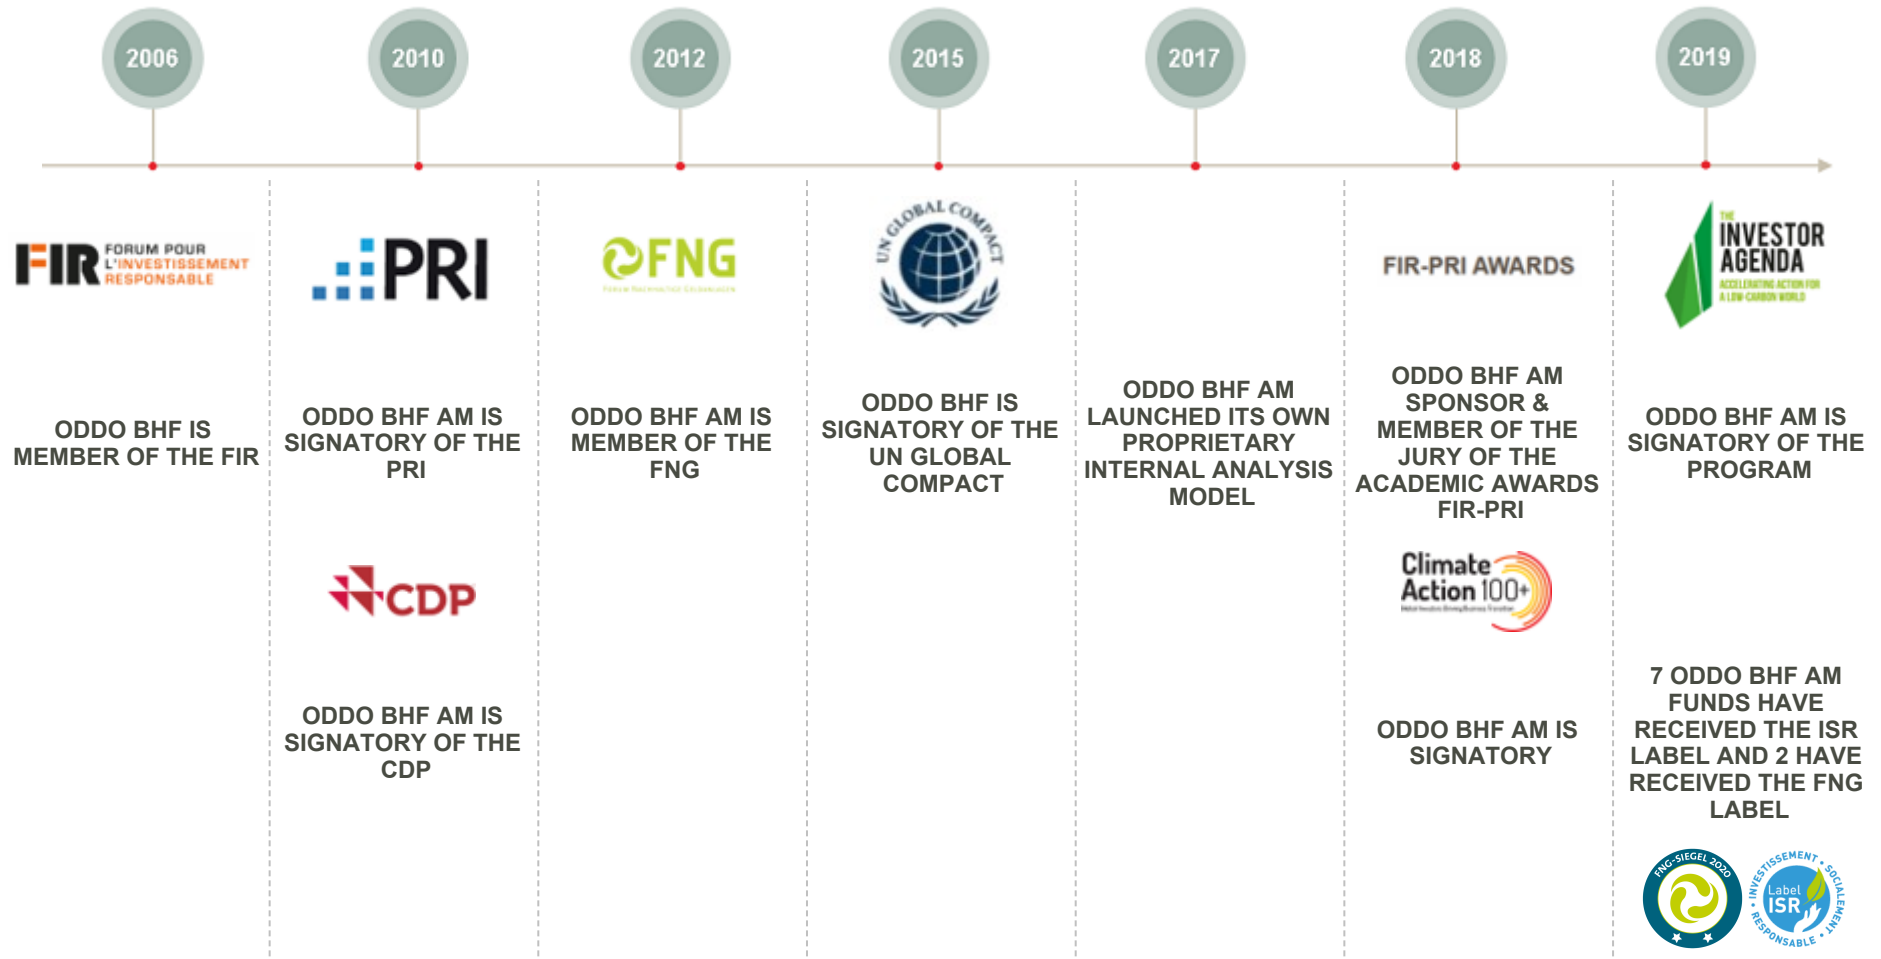

Countries in which the fund is authorised for distribution to the public:

Austria, Belgium, France, Germany, Italy, Netherlands, Portugal, Spain, Switzerland

Sustainalytics provides company-level analysis used in the calculation of Morningstar's Sustainability Score.

(1) Risk/return scale in a range from 1 (lowest risk) to 7 (highest risk). This indicator is not constant and is updated if the risk/reward profile of the fund changes over time. The lowest category does not mean a risk-free investment. Historical data, such as is used to calculate the risk/return ratio, may not be a reliable indication of the future risk profile of the Fund. There is no guarantee that the management objectives in terms of risk and return will actually be met.

1. Exclusions

- Norm-based: exclusion of companies that do not comply with certain international standards.
- Sector-based: total or partial exclusion of sectors or activities based on ethical considerations.

2. ESG ratings

- Internal model based on a « Best-in-Universe » approach: a bottom-up, stock-picking approach that favors top-rated companies in the entire investment universe.

3. Dialogue and engagement

- Systematic dialogue with low-ESG rated issuer (1/5)
- Divestment if no positive result within 18 to 24 months

*ESG: Environmental, Social, Governance

** : rebased on the rated part of the fund | In accordance with the update to our ESG integration policy published on 30 June 2017, the internal ESG rating scale now ranks the investment universe from 1 (High Risk) to 5 (Strong Opportunity) in ascending order.

***Controversies levels are explained in the glossary page 15

The ESG approach consists in selecting companies with the best environmental, social and governance policies by favouring the best-rated issuers within an investment universe in terms of non-financial criteria (Best in Universe) and/or issuers showing an improvement in their ESG practices over time (Best Effort).

Past performance is not an indication of future results. Performance may vary over time.

The comparison indices eventually featured in this report are provided for information purposes only.

Glossary - Definition of impact measurement indicators

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity). The choice of indicators is therefore crucial for the relevance of impact measurement.

We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

Carbon intensity	Source MSCI. We use scopes 1 (direct emissions) and 2 (indirect emissions related to electricity, heat or steam consumption) to calculate the carbon intensity, expressed in tonnes of CO2 equivalent per million euros of revenues. Cash and other derivatives are not covered.
Fossil fuel exposure	Source MSCI. Percentage of revenue exposed to fossil fuels, based on MSCI' coverage rate for the portfolio and for the comparison index.
Carbon solutions exposure "green part"	Source MSCI. Percentage of revenue exposed to carbon solutions (renewable energies, sustainable mobility, etc.), based on MSCI' coverage rate for the portfolio and for the comparison index.
5Y Employee growth (%)	5-year geometric growth rate of the number of employees calculated according to the following formula: $(\text{number of employees in the current year} / \text{number of employees same period 5 years ago})^{0.2-1} \times 100$
Female Executives	Number of female executives, as a percentage of total executives, at the end of the financial year if available, otherwise at the date of the last report. Executives are as defined by the Company or persons who are members of the Company's Executive Committee or Management Committee or its equivalent.
UN Global Compact signatory	Percentage of portfolio companies that are signatories to the United Nations Global Compact compared to the percentage of signatory companies in the benchmark.
Board members' independence	Percentage of independent directors on the Boards of Directors of portfolio companies and the comparative index.
Implementation of Human rights policy	Percentage of companies in the portfolio that have implemented one or more initiatives to protect human rights compared to the benchmark.
Controversies	A controversy defines a company involved in incidents that may negatively impact stakeholders, the environment or the company's operations. MSCI defines 5 levels of controversies: level 1 (low impact on the environment and society, negligible risk to the company); level 2 (Moderate impact on the environment and society with minimal risk to the company, Low frequency of incidents, company has strong management systems and/or actions taken to mitigate risks); level 3 (Significant impact on the environment and society with significant business risk, Evidence of structural problems at company and/or company has inadequate management systems); level 4 (High impact on the environment and society with high business risk, Structural/systemic problems, recurrence of incidents and company has inadequate management systems); level 5 (Severe impact on the environment and society with serious business risk, Exceptional egregious behavior,

Glossary - Measuring the alignment of a portfolio with long-term climate trajectories

In order to integrate the energy transition into the core of the investment process, ODDO BHF AM has developed within its internal ESG analysis platform a specific indicator at the level of each company to measure its contribution to the energy transition to a low carbon economy.

This ETA indicator ("Energy Transition Analysis") has two components:

- The positioning of the sector in which the company operates for 30%.
- The rating of the environmental component of the company assigned by our internal ESG analysis model for 70%.

Sectoral positioning is determined with regard to the environmental risks and opportunities arising from our SDG matrix (UN Sustainable Development Goals towards 2030). Within this matrix, we identify five main environmental themes: Clean energies (SDG 7, 13), Energy efficiency (SDG 7, 9, 11), Biodiversity (SDG 6, 12, 14, 15), circular economy (SDG 11, 12) and sustainable mobility (SDG 9, 11, 13).

The second part, the environmental component of our ESG analysis model, is divided into two parts:

- The environmental management system (carbon intensity, water intensity, energy mix, waste management, certification)
- Analysis of the environmental opportunities and risks to which the company is exposed (methodology aligned with TCFD recommendations)

By aggregating the ETA scores of the companies in a portfolio (weighted by the weight of each line), we obtain an indicator to measure the contribution of this investment portfolio to the energy transition to a low-carbon economy. This methodology allows us to have a qualitative approach in terms of alignment with long-term climate scenarios (IPCC scenarios up to 2100).

TCFD: the Task Force on Climate-related Financial Disclosure was launched in 2015 by the G20 to review how the financial sector can take better into account climate-related issues.

IPCC: The Intergovernmental Panel on Climate Change (IPCC) is the leading international body for the assessment of climate change. It was established by the United Nations Environment Programme (UNEP) and the World Meteorological Organization (WMO) in 1988 to provide the world with a clear scientific view on the current state of knowledge in climate change and its potential environmental and socio-economic impacts.
