INVESTMENT STRATEGY

ODDO BHF Artificial Intelligence is a global thematic equity fund using Artificial Intelligence on top of fundamental analysis with the objective to detect the most alpha-generating sub-themes and innovative companies linked to the theme of Artificial Intelligence. The sustainable investment objective of the fund is to contribute to carbon-reduction and to seize opportunities arising from the transition to a low-carbon economy. After the definition of the investment universe utilizing artificial intelligence, an ESG and carbon analysis reduces this universe according to the sustainable investment objective of the fund. The fund is actively managed by the management team.

**As of January 22,2021, the benchmark for the share class has shifted from MSCI World USD to MSCI World EUR. Prior to this change, the benchmark performance were calculated in USD, while share class performance were computed in EUR since inception.

*The glossary of indicators used is available for download on www.am.oddo-bhf.com in the Information section. | Sources : ODDO BHF AM SAS, Bloomberg, Morningstar® Sustainalytics provides company-level analysis used in the calculation of Morningstar's Sustainability Score.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It rangesfrom 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indicationof the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved..

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity).
The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

ESG integration at ODDO BHF Asset Management | 3 systematic steps

Exclusions

- Norm-based: exclusion of companies that do not comply with certain international standards.(chemical weapons , anti-personnel mines, violation of the principles of the Global Compact, etc.)
- Sector-based: total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, weapon, adult entertainment / pornographie and Coal...)

ESG ratings

- Usage of MSCI data based on a "Best-in-Class" approach
- All titles considered for investments have at least a BB rating

Dialogue and engagement

- Regular dialogue with companies on ESG issues
- Individual and joint engagement
- Inclusion of ESG research within ODDO BHF Asset Management's voting policy
- Escalation procedure if engagement is not conclusive

ESG rating methodology

MSCI

Environment	Social	Governance
• Climate Change • Natural Resources • Pollution & Waste • Environmental Opportunities	• Human Capital • Product Liability • Stakeholder Opposition • Social Opportunities	• Corporate Governance • Corporate Behavior

Exposure metrics, management metrics and industry specific weighting
Final result between 1-10 which is matched to a rating between AAA to CCC

CCC	B	BB	BBB	A	AA	AAA

High risk... ...Strong opportunity

Sources: ODDO BHF AM SAS, MSCI.

Carbon metrics methodology: We updated our methodology of carbon intensity calculation.
Starting January 31st, 2023, when reported carbon values are unavailable or inconsistent, estimated carbon values are used.
The estimations are based on average carbon value (scope 1+2 emissions) of sectoral peers as a function of revenues

MONTHLY MANAGEMENT COMMENT

Despite the sharp rebound seen over the last two days of the month, all the fund's units fell sharply in July 2026. This was entirely due to our fund's underperformance against its benchmark (the MSCI World Developed Countries Index). This underperformance was attributable to the unwinding of the momentum factor in the market over the month; this was particularly evident in the semiconductor sector, which is heavily represented in our fund.
It is in this sector that we find our two biggest drags on performance over the month: 1) SK Hynix; 2) AMD.

Our best contributors to performance over the month were two of the fund's top 10 holdings, both of which posted excellent results: 1) Microsoft, which pulled off a perfect performance thanks to 43% growth at its Azure cloud subsidiary, strong momentum for Copilot and a controlled increase in its CapEx; 2) Amazon, whose AWS division posted growth of 37%, coupled with very strong medium-term prospects for this global cloud leader. More generally, Amazon's overall AI strategy is being praised (leadership in cloud computing, strong credibility in hardware with the Trainium range, and model-agnostic tools such as BedRock and SageMaker).

RISKS:

The fund is exposed to the following risks :risk of capital loss, equity risk, interest rate risk, credit risk, risk associated with discretionary management, currency risk, risk associated with commitments on forward financial instruments, counterparty risk, liquidity risk of underlying assets, risk associated with holding small and medium capitalisations, emerging markets risk, volatility risk, modelling risk, Stock Connect, Bond Connect, Investing in China, Sustainability risk

SFDR CLASSIFICATION[2]

The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.
