Risk measurement	3 Years	5 Years
Sharpe ratio	0.30	-0.34

INVESTMENT STRATEGY

The investment objective is to outperform the ESTER index +2% (capitalised), net of fees, on an annual basis. The Sub-fund does not have a benchmark. Given the Fund's discretionary management style, its management is not linked to any index.The fund may be invested up to 100% in debt securities. These securities will be issued by issuers whose registered office is located in an OECD country up to a minimum of 70%. The Sub-Fund may only invest in instruments issued by entities rated at least B.

Benchmark : Nil

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It rangesfrom 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indicationof the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved..

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity).
The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

ESG integration at ODDO BHF Asset Management | 3 systematic steps

Exclusions

- Norm-based: exclusion of companies that do not comply with certain international standards.(chemical weapons , anti-personnel mines, violation of the principles of the Global Compact, etc.)
- Sector-based: total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, weapon, adult entertainment / pornography and coal...)

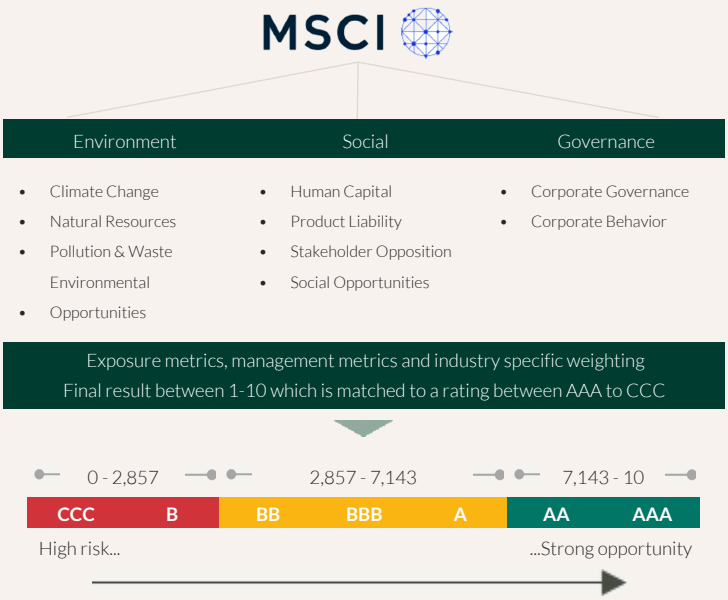

ESG ratings

- Usage of MSCI data based on a "Best-in-Class" approach
- All titles considered for investments have at least a BB rating

Dialogue and engagement

- Regular dialogue with companies on ESG issues
- Individual and joint engagement
- Inclusion of ESG research within ODDO BHF Asset Management's voting policy
- Escalation procedure if engagement is not conclusive

ESG rating methodology

Sources: ODDO BHF AM SAS, MSCI Solutions (Deutschland) GmbH.

Carbon metrics methodology: We updated our methodology of carbon intensity calculation.
Starting January 31st, 2023, when reported carbon values are unavailable or inconsistent, estimated carbon values are used.
The estimations are based on average carbon value (scope 1+2 emissions) of sectoral peers as a function of revenues

MONTHLY MANAGEMENT COMMENT

October was marked by a protracted and widespread risk-off sentiment which led to wider spreads, lower rates and a rotation in equity markets away from technology towards more defensive segments. The reasons were multifold: at the center of the turmoil were worries about the AI trade Specifically, markets scrutinized the financing capacity of the massive capex needs focusing on companies with weaker balance sheets such as the Neocloud providers. Idiosyncratic disappointments within Hyperscaler earnings and the resulting negative equity reactions added to the negative sentiment. At the same time, oil & gas prices continued their upward trend and ongoing budget negotiations in France amid large public protests weighed on Euro spreads in particular. Against this backdrop, the macroeconomic picture remained strong in the US with the initial Q3 GDP estimate coming in at 3.4% annualized driven by strong consumer spending at 3.8%. Investments into AI infrastructure continued to boost the industrial sector while labor markets remained stable and leading indicators are still pointing towards a solid pace of activity. Meanwhile in Europe, economic surprises are starting to roll over and delivered some disappointments. PMIs came in weaker than expected driven by weak French readings while hard data such as retail sales and industrial production remained lacklustre. Inflation is still a source of concern given the large increase in gas prices, even though second round effects so far remain muted. Central bank meetings ended without any changes in rates as policy makers preferred a more gradual approach toward rate hikes given the latest market movements. Nevertheless, a next round of rate hikes in December is likely at this stage. The earnings season started with an overall positive reading for most sectors and names while weak results remain prevalent in structurally challenged sectors such as Automobiles & Parts. The big focus of investors is currently on AI related demand which given high built-in expectations led to negative market reactions when results missed, despite a strong underlying trend. In this environment Corporate Investment Grade spreads finished the month 15bp wider while High Yield spreads underperformed, widening by 58bps. 10yr Bund yields reversed the September increase and ended the month at 3.32% while US 10yr Treasury yields underperformed, increasing to 4.93%.
Against this background, we increased our exposure to Government Bonds and IG Corporates, while we have reduced Financial Subs. As duration served as hedge against rising corporate spreads, we have kept our long duration stance.

RISKS:

The fund is exposed to the following risks :risk of capital loss, interest rate risk, credit risk, risk associated with discretionary management, risk associated with commitments on forward financial instruments, counterparty risk, risks associated with portfolio concentration, liquidity risk of underlying assets, risk associated with high yield bonds, emerging markets risk, risks associated with securities financing transactions and collateral management, risks linked to the use of overexposure, modelling risk, Sustainability risk and on an ancillary basis currency risk, risk associated with currency conversion

SFDR CLASSIFICATION[2]

The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.
