INVESTMENT STRATEGY

Since 2007, ODDO BHF Polaris Dynamic has offered a global and broadly diversified, dynamic multi-asset investment solution. It is characterized by an equity allocation between 70% and 100% and a bond portfolio that invests mainly in investment-grade bonds. The portfolio may invest in securities listed or traded on regulated markets, primarily in Europe, the US or Emerging Markets.
The investment objective is to generate attractive asset growth with reduced fluctuations in value through value-oriented investments, while taking into account environmental, social issues and corporate governance (ESG) criteria.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It rangesfrom 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indicationof the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved..

ASSET ALLOCATION

MONTHLY MANAGEMENT COMMENT

The market environment continued to benefit from a growing global economy and solid corporate profits. This helped to at least partially offset the pressures caused by higher energy costs and the associated inflation risks. High profit forecasts for US companies underlined the resilience of the economy. Over the course of the month, however, technology stocks came under increasing pressure as rising capital costs fuelled doubts about the profitability of AI investments. Defensive sectors such as healthcare and consumer staples, by contrast, performed well. Political and fiscal uncertainties continued to weigh on French government bonds. Following a price correction, we added Lumentum to our portfolio. The company is one of the leading suppliers of optical components and photonic solutions, which are essential for data transmission in data centres. We also acquired stocks in McKesson, as the company plays a central role in the US healthcare sector and benefits from long-term growth trends such as an ageing population, rising demand for medicines and the growing share of specialised therapies. In view of what we consider to be an unattractive risk-reward ratio, we sold our holding in the technology stock Halma. We took profits on Allianz, one of our long-standing top performers, for valuation reasons. We also reduced our position in Thermo Fisher, taking profits. Furthermore, we reduced our position in the electrical engineering group Schneider Electric following the announcement of its takeover of the software company PTC.

SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity).
The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

ESG integration at ODDO BHF Asset Management | 3 systematic steps

Exclusions

- Norm-based: exclusion of companies that do not comply with certain international standards.(chemical weapons , anti-personnel mines, violation of the principles of the Global Compact, etc.)
- Sector-based: total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, weapon, adult entertainment / pornography and coal...)

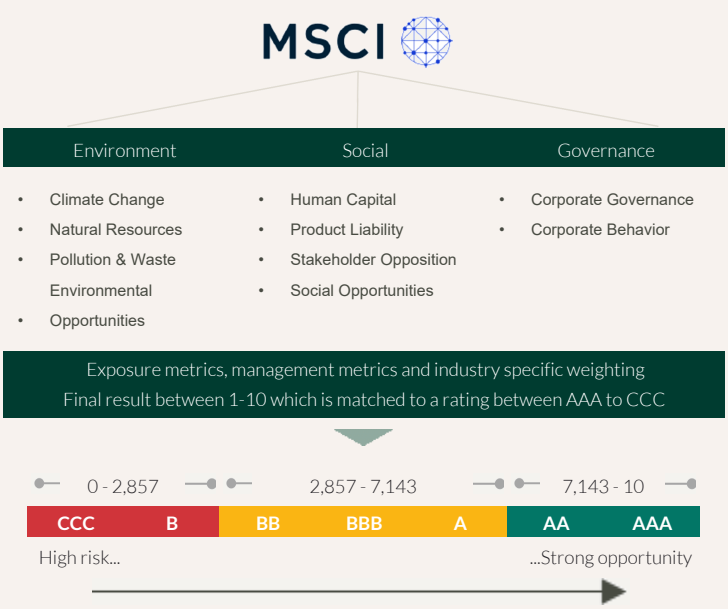

ESG ratings

- Usage of MSCI data based on a « Best-in-Class » approach

Dialogue and engagement

- Regular dialogue with companies on ESG issues
- Individual and joint engagement
- Inclusion of ESG research within ODDO BHF Asset Management's voting policy
- Escalation procedure if engagement is not conclusive
