- **Highly experienced management team** supported by more than 20 investment experts dedicated to Fixed Income.
- **Long track record** in Investment Grade solutions
- **SFDR<sup>1</sup> Article 8 fund**

### CHARACTERISTICS OF THE FUND

| Fund                           | SFDR classification <sup>(1)</sup> | Risk scale <sup>(2)</sup> |
|--------------------------------|------------------------------------|---------------------------|
| ODDO BHF Global Target IG 2029 | 6 8 9                              | ① ② ③ ④ ⑤ ⑥ ⑦             |

#### Main Risks:

ODDO BHF Global Target IG 2029 is principally exposed to the following risks: **risk of capital loss, credit risk, interest rate risk**. For more details about risks, please refer to page 5 of this document.

**Past performance is not a reliable indication of future returns and is not constant over time.**

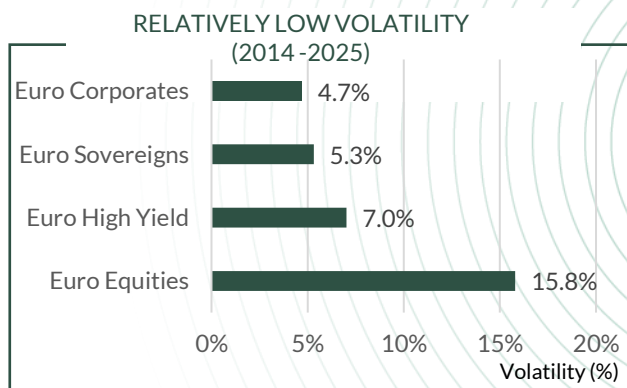

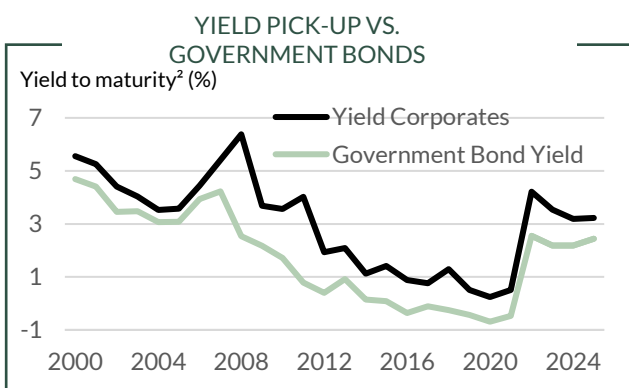

<sup>1</sup>The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider. <sup>2</sup> The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. It scales in a range from 1 (lowest risk) to 7 (highest risk). The lowest category does not mean a risk-free investment. This indicator is not constant and is updated if the risk profile of the fund changes over time. Historical data, such as is used to calculate the risk indicator, may not be a reliable indication of the future risk profile of the Fund. There is no guarantee that the management objectives in terms of risk will actually be met. The risk indicator assumes you keep the product until the end of the recommended holding period. The actual risk can vary significantly if you cash in at an early stage and you may get back less. | Source: ODDO BHF AM GmbH | Data as of 31/12/2025

# WHY INVEST IN *Corporate Bonds* ACCORDING TO OUR ANALYSIS<sup>1</sup>?

- Investment Grade corporate bonds are rated from AAA to BBB- by credit rating agencies.
- Investment Grade corporate bonds are a relatively defensive asset class due to low volatility and low default risk - compared to speculative High Yield bonds - as observed in the past.
- Historically, they offer a yield pick-up vs. Government bonds and show low or moderate correlation to other fixed income segments or equity. Hence, adding it to a portfolio may enhance portfolio diversification and potentially reduce overall portfolio risk.

## POTENTIAL BENEFITS OF CORPORATE BONDS<sup>1</sup>:

Examples of Euro Corporate Bonds (fund can invest in global Corporate Bonds)

**LOW DEFAULT RISK**

European average cumulative default rates (1985-2020)<sup>3</sup>

| Rating           | 1-Year | 3-Years | 5-Years |
|------------------|--------|---------|---------|
| Investment Grade | 0.1%   | 0.5%    | 1.0%    |
| High Yield       | 3.3%   | 9.8%    | 15.1%   |

**LOW / MODERATE CORRELATION TO OTHER FIXED INCOME SEGMENTS OR EQUITY**

Correlation (2004-2025)

|                 | Euro High Yield | Euro Government | Euro Corporate | Euro Equities |
|-----------------|-----------------|-----------------|----------------|---------------|
| Euro High Yield | 1               | 0.15            | 0.67           | 0.68          |
| Euro Government | 0.15            | 1               | 0.72           | 0.12          |
| Euro Corporate  | 0.67            | 0.72            | 1              | 0.46          |
| Euro Equities   | 0.68            | 0.12            | 0.46           | 1             |

<sup>1</sup> Analysis based on following indexes: Euro Corporate Bond: ICE BofA Euro Corporate Index; Euro Government Bond: ICE BofA Euro Government Index; Euro High Yield Bond: ICE BofA Euro High Yield Index; Euro Equities: Euro Stoxx Net Return EUR Index. <sup>2</sup> The Yield to Maturity (YtM) is the estimation at a certain date of the expected rate of return of a bond portfolio if the securities are held to maturity. It does by no means constitute a promised return. It can, therefore, be affected by interest rate risks, default risks, reinvestment risks and the fact that bonds may not be held until maturity. <sup>3</sup> Moody's Default Trends – Europe; Corporate Default and Recovery Rates; 1985-2020. Data as of 31/12/2025

## POTENTIAL RISKS OF CORPORATE BONDS :

- RISK OF CAPITAL LOSS
- CREDIT RISK
- LIQUIDITY RISK OF UNDERLYING ASSETS RISK
- INTEREST RATE RISK

**The fund is exposed to a risk of capital loss. This information is provided for illustrative purposes only and should not be construed as investment advice.**

## WHY INVEST IN *fixed maturity funds* ACCORDING TO OUR ANALYSIS?

|  | Fixed Maturity fund | Traditional Bond fund | Single Bond |
|--|---------------------|-----------------------|-------------|
| 1. Visibility offered by fixed maturity, according to our analysis, in a no-default scenario | +                   | -                     | ++          |
| 2. Decreasing risk over time <sup>1</sup>  | +                   | -                     | +           |
| 3. Issuer diversification  | +                   | +                     | -           |

### 1. GREATER VISIBILITY

Fixed maturity allows you to set yourself a specific investment horizon, which is important to respect.

### 2. DECREASING RISK OVER TIME<sup>1</sup>

Default risk, interest rate risk and volatility decrease as the fund approaches maturity. Investors are reminded that yield also decreases.

### 3. ISSUER DIVERSIFICATION

Including high-quality bonds in a portfolio can improve issuer diversification and reduce risk in return for lower returns.

Fixed maturity funds combine the characteristics of a bond investment with the selection and broad diversification of an investment fund

### The fund bears a risk of capital loss.

<sup>1</sup>The risk (e.g., default risk, interest rate risk, volatility risk) associated with single bonds and fixed maturity funds decreases over time as these instruments approach maturity. This is generally not the case for traditional bond funds where the portfolio manager reinvests maturing bonds into longer maturity securities to maintain a certain level of portfolio duration.

# WHY *invest* IN ODDO BHF GLOBAL TARGET IG 2029 ACCORDING TO OUR ANALYSIS?

## ACCESS

The fund provides access to a well diversified portfolio of global corporate bonds with Investment Grade rating (min. 80%).

## DEFENSIVE PROFILE

Investment grade corporate bonds are a relatively defensive asset class due to low volatility and low default risk - compared to speculative High Yield bonds - as observed in the past.

## VISIBILITY

Fixed maturity strategies enable investors to “fix” a yield over a defined period and offer a high degree of visibility provided by the predetermined final maturity.

## DECREASING RISK<sup>1</sup>

The fund exhibits a decreasing risk over time<sup>1</sup> through the fixed maturity structure. Investors are reminded that yields are also declining.

## A PROVEN INVESTMENT PROCESS

The investment process combines fundamental credit analysis, ongoing monitoring of bonds and disciplined risk management.

## EXPERIENCED MANAGEMENT TEAM<sup>2</sup>

Long experience and track record in corporate credit as well as in fixed maturity funds.

## RISKS

ODDO BHF Global Target IG 2029 is mainly exposed to the following risks: risk of capital loss, risk associated with discretionary management, emerging markets risk, interest rate risk, credit risk, risks associated with securities financing transactions and collateral management, risk associated with commitments on forward financial instruments, counterparty risk, risk associated with high yield bonds, sustainability risk, liquidity risk of underlying assets. On an accessory basis, the Fund will be exposed to the following risks: currency risk.

**The investor is invited to read the Key Information Document and the fund prospectus for detailed information concerning the risks to which the fund is exposed.**

<sup>1</sup>The risk (e.g., default risk, interest rate risk, volatility risk) associated with single bonds and fixed maturity funds decreases over time as these instruments approach maturity. This is generally not the case for traditional bond funds where the portfolio manager reinvests maturing bonds into longer maturity securities to maintain a certain level of portfolio duration. <sup>2</sup>Current management team, subject to change | Source: ODDO BHF AM GmbH | Data as of 31/12/2025

# General characteristics

|  |  |  |
|--|--|--|
| <b>Fund name</b>                           | ODDO BHF Global Target IG 2029   |  |
| <b>Investment objective</b>                | The Sub-fund's investment strategy is to manage, on a discretionary basis, a diversified portfolio of debt securities and/or money market instruments, 80% of which shall be from private or public issuers rated at least BBB --(by Standard & Poor's or equivalent as assessed by the Management Company, or according to its own internal rating) and shall be repayable no later than six months and one day after 31 December 2029 (final maturity of the product or early redemption options at the Sub-fund's discretion). The strategy is not limited to holding bonds; the Management Company may make changes to the portfolio to take advantage of new opportunities in the market, or if it detects an increase in the risk of default of one of the issuers in the portfolio. The Sub-fund seeks to maximise the portfolio's average return at maturity (31 December 2029). |  |
| <b>Subscription period</b>                 | From 26/07/2023 to 31/12/2026  |  |
