The MSCI ACWI Climate Change (i.e. the benchmark) is aligned with the environmental characteristics promoted by the financial product. The index aims to represent the performance of an investment strategy that re-weights securities based upon the opportunities and risks associated with the transition to a lower carbon economy. The MSCI Climate Change Indexes methodology uses the MSCI Low Carbon Transition score and category to re-weight constituents of a parent index to increase exposure to companies participating in opportunities associated with transition and decrease exposure to companies exposed to risks associated with transition.
