INVESTMENT STRATEGY

ODDO BHF Avenir Europe is a European small and mid cap equity fund, invested in companies having their registered office in the European Union or in a European OECD member state. It aims to be permanently invested in equities, targeting long-term capital growth. It primarily selects some of the best performing cyclical and non-cyclical companies in Europe, which often have an international presence, where the price is considered attractive taking long-term prospects into account.

New benchmark since 01/01/2014. Previous benchmark:100% HSBC Europe (+UK) (net dividends reinvested) until 08/12/11 and 100% HSBC European Smaller Companies (dividends reinvested) before. The fund was created on 25/05/1999. First NAV for CI-EUR Units calculated on 16/12/2005. The performance of CI-EUR Units is calculated using CR-EUR Units' NAV up to 16/12/2005, when CI-EUR Units were created.

*The glossary of indicators used is available for download on www.am.oddo-bhf.com in the Information section. | Sources : ODDO BHF AM SAS, Bloomberg, Morningstar® Sustainalytics provides company-level analysis used in the calculation of Morningstar's Sustainability Score.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It rangesfrom 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indicationof the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved..

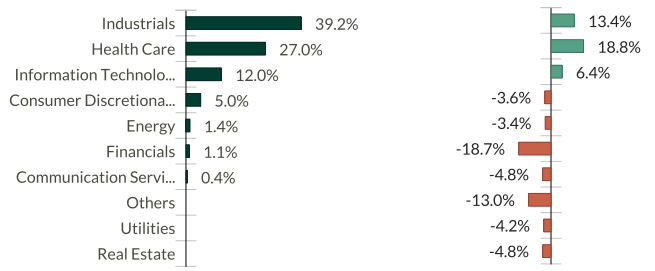

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity).
The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

ESG integration at ODDO BHF Asset Management | 3 systematic steps

Exclusions

- Norm-based: exclusion of companies that do not comply with certain international standards.(chemical weapons , anti-personnel mines, violation of the principles of the Global Compact, etc.)
- Sector-based: total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, weapon, adult entertainment / pornography and coal...)

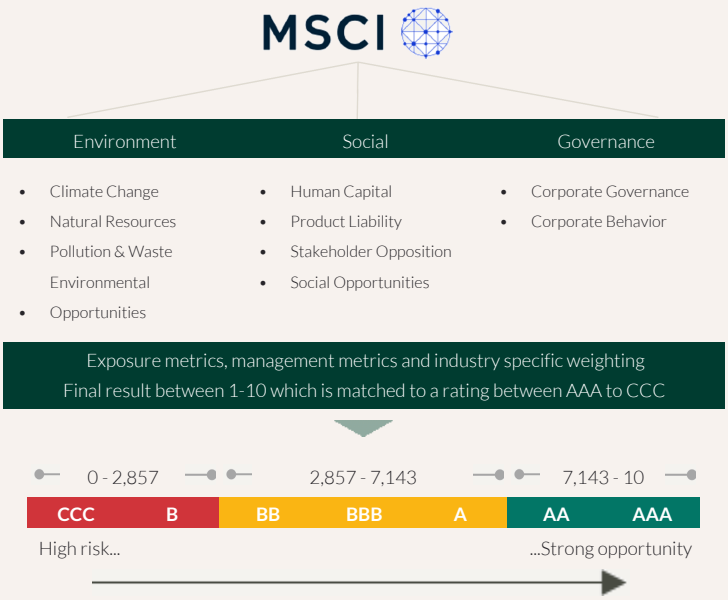

ESG ratings

- Usage of MSCI data based on a "Best-in-Class" approach
- All titles considered for investments have at least a BB rating

Dialogue and engagement

- Regular dialogue with companies on ESG issues
- Individual and joint engagement
- Inclusion of ESG research within ODDO BHF Asset Management's voting policy
- Escalation procedure if engagement is not conclusive

ESG rating methodology

Sources: ODDO BHF AM SAS, MSCI.

Carbon metrics methodology: We updated our methodology of carbon intensity calculation.
Starting January 31st, 2023, when reported carbon values are unavailable or inconsistent, estimated carbon values are used.
The estimations are based on average carbon value (scope 1+2 emissions) of sectoral peers as a function of revenues

MONTHLY MANAGEMENT COMMENT

September was marked by central bank interest rate rises, tensions in the Middle East and a fierce debate about the risks associated with AI. Faced with accelerating inflation in August (3.2%), the ECB raised its rates by 25 bps, bringing the deposit rate to 2.5%, while the Fed followed suit with a 25 bp rise, its first since 2023. Its chair, Kevin Warsh, reiterated that inflation was "too high and has been for too long". Against this backdrop, the US 10-year yield rose above 5%, a level not seen since 2007. On the energy front, oil prices rose above the USD 100-per-barrel mark following renewed tensions in the Middle East. The situation is currently at a standstill, pending the outcome of the negotiations being conducted under Qatari mediation. The stock market was initially influenced by a call from Anthropic's CEO, Dario Amodei, to slow down the development of AI in order to allow more time for safety measures to be put in place, and towards the end of the month, the CEOs of the leading AI companies signed a voluntary self-regulatory agreement at the White House, in the presence of President Trump, aimed at ensuring the safe development of AI. This stream of news caused some volatility at the start of the month, though it did not prevent the technology equipment sector from posting a clearly positive performance over the month as a whole. Regarding IPOs, several companies, including OpenAI and Oura, have postponed their initial public offerings. However, Anthropic is expected to press ahead with its IPO, with a listing scheduled for November. Its preliminary prospectus revealed strong revenue growth, but also ambitious spending plans, in the region of USD 500 billion. Against this backdrop, some of the AI giants also made headway through M&A transactions: Nvidia announced the acquisition of the Hugging Face AI platform for USD 13 billion, while AMD acquired World Labs for USD 8 billion, with the aim of building in-house expertise in next-generation AI models, particularly in spatial/physical AI and robotics. On the bond market, according to Goldman Sachs, AI-related debt financing reached around USD 500 billion since the start of the year, contributing to the widening of spreads. Index performance was mixed in the United States, with the NASDAQ up 3.3%, buoyed by the strong performance of the US technology sector. Conversely, the industrial, financial, and cyclical and non-cyclical consumer goods sectors weighed on the S&P 500 (-0.3%) and, in particular, on the Dow Jones (-4.1%). In Europe, the MSCI Europe Index ended the month down 2.4%, weighed down by the consumer discretionary (-8%), real estate (-7%) and services (-7%) sectors. The same trend was seen among European mid-caps (MSCI Europe SMID -2.4%), which were dragged down by the industrial, financial and communication sectors.

AVENIR EUROPE (-1.6%) outperformed its benchmark index. While it certainly suffered from its structural underweighting in the energy sector, it benefited from its structural underweighting in the real estate and financial sectors. Our tactical exposure to banking and insurance ETFs was fully divested over the course of the month. Among the stocks that had the greatest impact over the month, particular mention should be made of the positive contribution from (a) MTU Aero Engines, which benefited from an upgrade in its investment rating, justified by an expected improvement in its free cash flow resulting from strong growth in maintenance, and (b) Technoprobe, buoyed by the positive momentum in the semiconductor sector. Conversely, (c) Krones was penalised during the month by expectations that revenue and order growth in 2027 would be weaker than forecast.

In an uncertain and changing world, we stand by our investment philosophy. We invest in companies that are able to adapt to the new rules of international trade, and to the ongoing technological and geopolitical shifts. We make sure that their competitive advantage remains sustainable, ensuring their ability to grow across the world and to outpace global GDP growth.

RISKS:

The fund is exposed to the following risks :risk of capital loss, equity risk, interest rate risk, credit risk, risk associated with discretionary management, currency risk, risk associated with commitments on forward financial instruments, counterparty risk, risk associated with holding small and medium capitalisations, risks associated with securities financing transactions and collateral management, Sustainability risk and on an ancillary basis risk associated with convertible bonds

SFDR CLASSIFICATION[2]

The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.
