\*The glossary of indicators used is available for download on [www.am.oddo-bhf.com](http://www.am.oddo-bhf.com) in the Information section. | Sources : ODDO BHF AM SAS, Bloomberg, Morningstar® Sustainalytics provides company-level analysis used in the calculation of Morningstar's Sustainability Score.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved.

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

## SUSTAINABLE REPORT - METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity). The choice of indicators is therefore crucial for the relevance of impact measurement.

We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

For more information on the ODDO BHF Asset Management ESG methodology, please refer to the [Sustainable investing & ESG document](#) available on [www.am.oddo-bhf.com](http://www.am.oddo-bhf.com)

\*ESG rank at the end of the period: In accordance with the update to our ESG integration policy, the internal ESG rating scale now ranks the investment universe from 1 (High Risk) to 5

30 APRIL 2026

**DI-EUR - Eur | Fixed Income - High Yield - Euro**

## MONTHLY MANAGEMENT COMMENT

In April 2026, the European High Yield market (HEAE) recorded a strong performance, rising by 1.92% as credit spreads tightened by 68 bps to close the month at 281 bps. On a year to date basis, the asset class delivered a modest positive performance of 0.24%.

Markets rebounded sharply during the month, recovering most of the drawdown recorded in March, despite the ongoing blockade of the Strait of Hormuz. Macroeconomic indicators were mixed. In the US, the Composite PMI remained in expansionary territory, improving to 52.0 from 50.3 in the previous month. In contrast, the European Composite PMI fell back into contraction at 48.6, down from 50.7.

Inflation data released in April came in higher than in the prior month, reflecting the impact of the Strait of Hormuz closure. US core CPI reached 2.6%, while European inflation rose to 2.5% (from 1.9% previously). Sovereign bond yields moved modestly higher, with the US 10 year Treasury ending April at 4.37% (+6 bps) and the German 10 year Bund closing at 3.04% (+4 bps).

Corporate earnings confirmed ongoing weaknesses, particularly in the automotive and chemical sectors. Issuer guidance across sectors remained cautious. Primary market activity rebounded, with approximately EUR 18bn of new issues in April. These transactions were well absorbed, highlighting the continued strong investor appetite for the asset class.

During the month, the ODDO BHF Euro High Yield Fund continued to invest in line with its investment philosophy and participated selectively in primary market opportunities. The fund remains cautiously positioned towards Chemicals, Real Estate and Packaging, while maintaining overweight exposures (in risk terms) to more defensive sectors such as Telecommunications and Healthcare. Overall portfolio risk remains below benchmark levels, reflecting the fund's avoidance of distressed issuers and the elevated uncertainty prevailing in current markets.

Looking ahead to 2026, credit market volatility is expected to be driven by geopolitical risks—particularly in the Middle East—as well as inflation dynamics, economic growth, corporate fundamentals and sovereign risk developments. In this environment, disciplined credit selection remains essential.

## RISKS:

The fund is exposed to the following risks :risk of capital loss, interest rate risk, credit risk, risk associated with discretionary management, risk associated with commitments on forward financial instruments, counterparty risk, liquidity risk of underlying assets, risk associated with high yield bonds, emerging markets risk, Sustainability risk and on an ancillary basis currency risk, risk associated with convertible bonds, risk associated with currency conversion

## SFDR CLASSIFICATION<sup>2</sup>

The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.

## DISCLAIMER

This document has been drawn up by ODDO BHF AM SAS. Potential investors should consult an investment advisor before subscribing to the fund. The investor is informed that the fund presents a risk of capital loss, but also many risks linked to the financial instruments/strategies in the portfolio. In case of subscription, investors must read the Key Information Document (KID) and the fund's prospectus in order to acquaint themselves with the detailed nature of any risks incurred and all costs. The value of the investment may vary both upwards and downwards and may not be returned in full. The investment must be made in accordance with investors' investment objectives, their investment horizon and their capacity to deal with the risk arising from the transaction. ODDO BHF AM SAS cannot be held responsible for any direct or indirect damages resulting from the use of this document or the information contained in it. This information is provided for indicative purposes and may be modified at any moment without prior notice.
