

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

ODDO BHF Génération

(hereinafter the "Fund")

This Fund is managed by ODDO BHF Asset Management SAS

ISIN: CI-EUR units - FR0010576728 - EUR - Accumulation

OBJECTIVES AND INVESTMENT POLICY

This Fund is classified as follows: International equities

The Fund's investment objective is to outperform its benchmark index, the MSCI EMU index with net dividends reinvested (net return) denominated in euro, over an investment horizon of more than five years, while taking into account ESG (environment, social and governance) criteria.

Investors' attention is drawn to the fact that the benchmark does not limit the Fund's investment universe. It allows the investor to assess the Fund's risk profile. The Fund's performance may differ substantially from that of its benchmark index. The aim of the investment strategy is to manage a portfolio invested in European companies of all market capitalisations and sectors, benefiting from stable and long-term share ownership (often families). The Fund's investment strategy follows a purely bottom-up approach, with no style bias, and is based on the managers' most strongly held convictions: investment decisions are informed by rigorous fundamental research and a flawless grasp of companies' business models. However, there are strict sector exclusions on tobacco, gambling, activities relating to the extraction and production of energy from coal, and nuclear. The Fund cannot therefore invest in these sectors.

The investment strategy is based upon a four-stage investment process:

- Stage 1: an initial qualitative filter based upon share ownership continuity and management quality facilitates the selection of companies with a long-term vision, many of which are owned by families.

- Stage 2: a second filter based on companies' financial fundamentals to mainly pick companies with a high and/or rapidly improving ROCE and the ability to self-finance their growth and expand internationally.

- Stage 3: a fundamental analysis of companies with a view to fully understanding their economic model and operations. Once the management team is convinced of a company's quality and positioning, it will value the company by creating pessimistic, standard and optimistic scenarios, thereby defining purchase and sale levels.

ESG (Environmental, Social and Governance) criteria are taken into consideration at the valuation stage. Our approach to adopting ESG criteria combines a "best-in-universe" and a "best-effort" approach, thereby favouring the development and improvement of best practices. An internal scoring system for securities held within the portfolio, based on proprietary analyses and external databases, will be used. The Management Company uses an internal rating scale divided into five ranks: High ESG Opportunity (5), ESG Opportunity (4), ESG Neutral (3), Moderate ESG Risk (2) and High ESG Risk (1). Furthermore, the Fund undertakes not to invest more than 10% of its assets in securities rated High ESG Risk (1). A dialogue process with the issuer is systematically implemented as soon as a security in the portfolio becomes High Risk. If no progress is made within 18 to 24 months, the ESG (1) security is systematically disinvested. In any event, in the event of an asset or liability exceeding the 10% threshold, securities rated High ESG Risk (1) are also sold without delay in order to return to levels below the authorised 10% threshold. This non-financial rating system limits portfolio exposure to issuers with lower ESG ratings, and ensures a given overall

ESG rating. The average portfolio rating will therefore always be greater than or equal to 3 out of 5 on our internal ESG rating scale. This effectively eliminates at least 20% of the investment universe for the Fund.

- Stage 4: portfolio construction. Companies' "target valuation", defined in the previous stage, will be coupled with volatility and solvency criteria with a view to deciding the final weighting of each company within the portfolio.

The Fund is managed on a discretionary basis.

At least 75% of the Fund's net assets is permanently invested in equities of issuers headquartered in the European Union, Iceland and Norway. The Fund may hold a maximum of 25% of its net assets in equities of listed companies headquartered outside the European Union, Iceland or Norway. These companies may have their registered office in another OECD Member State. Otherwise, they may have their registered office in a non-OECD country (emerging markets, not to exceed 10% of the Fund's net assets).

Up to 50% of the Fund's net assets may be exposed to currency risk.

The Fund may have exposure of between 0% and 25% of its net assets to fixed, variable or revisable-rate transferable debt securities denominated in euro, issued by public or private issuers and rated higher than AA by Standard and Poor's or deemed equivalent by the Management Company or based on the Management Company's internal rating. The Management Company does not use the ratings issued by ratings agencies automatically or in isolation, as it also applies its own internal analysis. In the event of a downgrade, the Management Company will take the interests of unitholders, market conditions and its own analysis of these fixed income products into account when respecting rating limits.

The Fund may invest up to 10% of its assets in units or shares of UCITS under European Directive 2009/65/EC and/or in French or foreign AIFs and in foreign investment funds mentioned in R.214-25 and that meet the criteria of article R.214-13 of the French Monetary and Financial Code. These funds may be managed by ODDO BHF Asset Management SAS or ODDO BHF Asset Management GmbH, and will be compatible with the Fund's investment strategy.

The Fund may invest, without seeking overexposure, in all financial futures or options traded on regulated markets or over-the-counter in France and other countries with a view to hedging the Fund and/or exposing it to equity risk, certain economic sectors or market indices (futures and options) and in order to hedge the portfolio against currency risk associated with holding assets denominated in foreign currencies (forward exchange contracts, currency swaps).

The Fund may also hold up to 10% of its assets in convertible bonds and subscription certificates to manage exposure to equity risk without seeking overexposure.

Subscription and redemption requests are centralised by the Depositary every Paris stock exchange trading day until 11:15 (Paris time, CET/CEST) and executed on the basis of the net asset value of the same day.

CI-EUR units accumulate their income.

Recommended investment horizon: 5 years

This Fund may not be appropriate for investors who plan to withdraw their money within this period.

RISK AND REWARD PROFILE

Historical data, such as is used to calculate the synthetic indicator, may not be a reliable indication of the future risk profile of the Fund. The risk profile is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment. The capital initially invested is not guaranteed.

Why is the Fund placed in category 6?

The Fund presents a high level of risk due to its strategy of investing at least 75% of its net assets in European equities. The Fund may hold equities of listed companies headquartered in other countries (OECD members and emerging markets).

Material risks to the Fund that are not taken into account in the indicator:

Liquidity risk: the Fund invests in markets which may be affected by declines in liquidity. Low volumes of market transactions may have an impact on prices at which the manager opens or closes positions.

Counterparty risk: the risk of a counterparty's collapse, causing it to default on payment. The Fund may be exposed to this risk resulting from the use of forward financial instruments or temporary purchases and sales of securities contracts negotiated over the counter with a credit institution if the latter is unable to honour its commitments.

If one of these risks were to materialise, the Fund's net asset value may fall.

CHARGES

Charges and fees paid are used to pay the costs of marketing and distributing units; these charges reduce the potential growth of the investment.

One-off charges taken before or after you invest

Entry charges	4.00%
Exit charges	None

This is the maximum that might be deducted from your capital before it is invested and/or before the proceeds of your investment are paid out. These charges are payable to the distributor. In some cases, investors may pay less.

Charges taken by the Fund over one year

Ongoing charges	1.33%
-----------------	-------

Charges taken by the Fund under specific conditions

Performance fees	10% (inclusive of tax) of the Fund's outperformance relative to the benchmark, the MSCI EMU with net dividends reinvested (net return) denominated in euro, provided that the Fund's performance is positive. Amount of the performance fee charged during the last financial year: 0.00%
------------------	---

Ongoing charges are based on the expenses for the last financial year ended September 2019.

Actual charges may vary from year to year. The Fund's annual report for each financial year includes detail on the exact charges incurred.

These charges do not include: performance fees and intermediary fees except in the case of entry and/or exit charges paid by the Fund when it buys or sells units in another collective investment vehicle.

For more details regarding fees, please refer to the "Fees and Expenses" section of the prospectus, available at am.oddo-bhf.com.

PAST PERFORMANCE

Performance varies over time and is not an indication of future results.

The annualised performances shown in this chart are calculated after deducting all charges taken by the Fund.

This Fund was created on 19 March 2008.

The reference currency is the euro (EUR).

The performances dated prior to 2008 are those of the Oddo Génération SICAV, which was absorbed by Oddo Génération on 19 March 2008.

Until 1 October 2014, the benchmark index was the SBF 120. From 2 October 2014 to 3 May 2015, the benchmark was the MSCI France with net dividends reinvested (net return) denominated in euro. Since 4 May 2015, the benchmark index has been the MSCI EMU (net dividends reinvested).
